J.P. Morgan Securities LLC

Yesterday, we hosted an investor group meeting with Broadcom's President and CEO, Hock Tan, CFO, Amie Thuener, and head of IR, Ji Yoo. The discussions centered around accelerating custom AI XPU demand driven by rapid growth in inference workloads, the expansion of Broadcom's decade-plus Apple relationship through 2031, continued strength in AI networking demand, and Broadcom's differentiated ASIC design, IP, and advanced packaging capabilities. Key takeaways in our view were: 1) inference demand is driving a faster custom XPU adoption curve, with management suggesting that among the largest frontier model builders, XPU/GPU unit shipments could approach a ~50/50 mix next year; 2) customers are attempting to pull in next-generation XPU tape-out schedules and broaden chip design variants as inference workloads evolve from one-shot to reasoning and agentic use cases; 3) Broadcom/OpenAI's first-gen XPU program, Jalapeño, further validates Broadcom's ASIC design and execution strength (initial design to tape-out in just 9 months), with management expecting the follow-on/next-gen chip to tape out very soon; 4) competitive concerns around hyperscaler customer-owned tooling (COT) appear overstated given the complexity of multi-die XPU design, advanced packaging, and proprietary IP; 5) Broadcom's next-gen TPU (v9) roadmap remains on track to ramp in CY28, with working 400G SerDes silicon already developed; 6) AI networking demand remains extremely strong, with Tomahawk 6 sold out and Broadcom prioritizing XPU customers for switch allocation; 7) the Apple agreement extends and expands Broadcom's design/supply relationship through 2031, and includes both RF and ASICs (which we believe will include an AI XPU ASIC accelerator; see here); 8) VMware remains a longer-dated but strategically relevant AI-on-prem opportunity; and 9) management remains committed to maintaining ASIC margins relatively stable and within target despite input cost inflation and supply constraints across wafers, substrates, and HBM. Overall, we come away with increased confidence in Broadcom's AI compute and networking growth runway, supported by accelerating inference demand, expanding strategic customer engagements, and Broadcom's strong technology leadership across ASIC design, SerDes, packaging and Ethernet switching. We see accelerating AI fundamentals combined with an improving non-AI semiconductor business and further VMware revenue unlock driving strong revenue and earnings growth. Broadcom is the #2 global AI semiconductor supplier, #1 custom chip ASIC supplier, and #1 networking semiconductor supplier, and we reiterate our Overweight (OW) rating.

- **Apple ASIC partnership expansion reinforces Broadcom's long-duration ASIC franchise — potentially expanding into AI/datacenter ASICs; RF supply agreement extended through 2031 as well…** The team emphasized that Broadcom has been engaged with Apple for multiple generations of ASIC products over 10+ years, including touch controller ASICs, wireless charging ASICs and other design sockets. The recently announced agreement extends and expands the ASIC design relationship through 2031, covers new design

See page 4 for analyst certification and important disclosures.

sockets going forward (including AI/datacenter ASICs, in our view), and includes the prior RF supply agreement as part of the broader extension/expansion through 2031. Management also pointed to the Fort Collins fab expansion as being indicative of Broadcom's confidence in the long-term opportunity and return profile.

- **Broadcom's next-gen TPU (v9) roadmap remains on track; 400G SerDes already developed and running.** On the specific question of whether the next-generation TPU program is delayed or cancelled, management indicated that the roadmap is "totally on track" - consistent with our own primary research but notable given recent concerns around competitive TPU programs and potential share shifts. The team also indicated that Broadcom has already developed working 400G-per-lane SerDes capable of driving copper over one meter (and believes Broadcom is currently the only company with this capability).

- **5-year agreement with Google includes increasing TPU revenues per year and a majority volume share.** While it was widely known that AVGO's revenues would scale each year under its 5-year contract with Google, management incrementally confirmed that it expects to retain a majority volume share through the course of the agreement and that this was a key reason AVGO entered into the partnership. In our view, this confirms that AVGO is anchored as the primary supplier across the 5-year term, which should ease widespread investor concerns around longer-term share-loss.

- **Inference demand is accelerating the custom XPU adoption curve.** Management indicated that true compute demand (ex-China) is concentrated among roughly five frontier model builders that account for the vast majority of demand. While hyperscaler infrastructure can appear GPU-skewed at the aggregate level, management suggested that, when honing in specifically on leading frontier model builders, the mix could be roughly 50/50 between XPUs and GPUs next year (in line with our view that the shift from training-dominated workloads to inference monetization is pulling forward custom accelerator/XPU adoption).

- **Customers are attempting to pull in XPU schedules and pursue more design variants.** The team confirmed that customers are attempting to accelerate next-generation ASIC XPU tape-out schedules and are pursuing a wider variety of chip designs. This reflects the rapid evolution of inference workloads from one-shot inference to reasoning and agentic workloads, as well as customer focus on lowering cost per token (which in our view increases the strategic importance of workload-optimized custom silicon).

- **OpenAI/Jalapeño highlights Broadcom's ASIC execution capabilities.** Management discussed OpenAI's first-generation XPU custom accelerator, Jalapeno, co-designed by Broadcom, and emphasized that the complexity of developing these cutting-edge XPUs is often underestimated. These products "push the envelope" across multiple design and technology dimensions, including bandwidth, SerDes, power and packaging. Broadcom expects to tape out the follow-on/next-gen OAI chip very soon.

- **COT competitive concerns appear overstated; management believes COT TPU v8t is still not optimized and ready for production deployment…** Management pushed back on concerns that hyperscaler customer-owned tooling (COT) efforts will materially displace Broadcom's XPU/TPU share. The key point was that modern XPUs are no longer simple single-die chips; they increasingly require multi-die configurations, advanced packaging, high-speed SerDes and deep productization expertise. Management referenced 6-die and 8-die configurations as examples of the complexity involved and suggested that internal hyperscaler efforts are likely to face significant technical hurdles.

- **Tomahawk 6 demand remains extremely strong; XPU customers are prioritized for AI networking allocation.** Management indicated that all of its major frontier model builder customers are adopting Tomahawk 6 (which is effectively sold out), with unconstrained demand characterized as being meaningfully higher than available supply. The team also noted that its XPU customers do receive priority when allocating Tomahawk and Jericho switching products. In our view, this reinforces the strategic value of Broadcom's full-stack AI silicon portfolio: success in custom compute can strengthen networking share, while scarcity in networking can further deepen customer relationships around XPUs.

- **No near-term oversupply concerns for AI compute.** In response to questions around hyperscalers potentially leasing or reselling excess compute, management said it does not see an oversupply of compute for 2027 or 2028. Management also noted there is no reason hyperscalers could not rent out custom XPUs to third parties, but this would not materially alter Broadcom's P&L as Broadcom sells the chips and customers determine how to deploy or monetize them.

- **Management intends to maintain stable ASIC GMs despite input cost inflation.** On rising component costs, including memory, the team is aiming to keep ASIC margins intact "one way or another," emphasizing that technology leadership is the key source of pricing power. Management also pushed back on the idea of customers consigning HBM, noting that HBM is an integral part of the XPU design and must be tightly connected to the core logic die for the product to perform properly.

- **VMware AI-on-prem opportunity remains early but relevant.** Management indicated that it is still early for enterprises to run AI workloads on-prem, but believes that as this opportunity develops, VMware is well positioned as a software stack for running AI workloads in enterprise data centers. Management has seen some early signs of this use case and is leveraging this capability in VMware customer conversations.

Important Disclosures

- **Market Maker:** J.P. Morgan Securities LLC makes a market in the securities of Broadcom Inc or related entities.
- **Market Maker/ Liquidity Provider:** J.P. Morgan is a market maker and/or liquidity provider in the financial instruments of/related to Broadcom Inc or related entities.
- **Manager or Co-manager:** J.P. Morgan acted as manager or co-manager in a public offering of securities or financial instruments (as such term is defined in Directive 2014/65/EU) of/for Broadcom Inc or related entities within the past 12 months.
- **Client:** J.P. Morgan currently has, or had within the past 12 months, the following entity(ies) as clients: Broadcom Inc or related entities.
- **Client/Investment Banking:** J.P. Morgan currently has, or had within the past 12 months, the following entity(ies) as investment banking clients: Broadcom Inc or related entities.
- **Client/Non-Investment Banking, Securities-Related:** J.P. Morgan currently has, or had within the past 12 months, the following entity(ies) as clients, and the services provided were non-investment-banking, securities-related: Broadcom Inc or related entities.
- **Client/Non-Securities-Related:** J.P. Morgan currently has, or had within the past 12 months, the following entity(ies) as clients, and the services provided were non-securities-related: Broadcom Inc or related entities.
- **Investment Banking Compensation Received:** J.P. Morgan has received in the past 12 months compensation for investment banking services from Broadcom Inc or related entities.
- **Potential Investment Banking Compensation:** J.P. Morgan expects to receive, or intends to seek, compensation for investment banking services in the next three months from Broadcom Inc or related entities.
- **Non-Investment Banking Compensation Received:** J.P. Morgan has received compensation in the past 12 months for products or services other than investment banking from Broadcom Inc or related entities.
- **Debt Position:** J.P. Morgan may hold a position in the debt securities of Broadcom Inc or related entities, if any.

Company-Specific Disclosures: J.P. Morgan does and seeks to do business with companies covered in its research reports. The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period.
J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:
J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, https:// .

Coverage Universe: Sur, Harlan : Advanced Micro Devices (AMD), Analog Devices (ADI), Applied Materials (AMAT), Arm Holdings Plc (ARM), Astera Labs Inc (ALAB), Broadcom Inc (AVGO), Cadence Design Systems (CDNS), GlobalFoundries (GFS), Intel (INTC), KLA Corporation (KLAC), Lam Research (LRCX), Marvell Technology Inc (MRVL), Microchip Technology (MCHP), Micron Technology (MU), NVIDIA Corporation (NVDA), NXP Semiconductors (NXPI), ON Semiconductor Corporation (ON), Quantinuum (QNT), Sandisk (SNDK), Synopsys Inc (SNPS), Texas Instruments (TXN)

J.P. Morgan Equity Research Ratings Distribution, as of July 04, 2026

	Overweight (buy)	Neutral (hold)	Underweight (sell)
J.P. Morgan Global Equity Research Coverage*	53%	36%	12%
IB clients**	83%	80%	73%
JPMS Equity Research Coverage*	51%	37%	12%
IB clients**	95%	92%	87%

***Please note that the percentages may not add to 100% because of rounding.**
****Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.**
For purposes of FINRA ratings distribution rules only, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

South Africa: J.P. Morgan Equities South Africa Proprietary Limited and JPMorgan Chase Bank, N.A., Johannesburg Branch are members of the Johannesburg Securities Exchange and are regulated by the Financial Services Conduct Authority (FSCA).

Taiwan: J.P. Morgan Securities (Taiwan) Limited is a participant of the Taiwan Stock Exchange (company-type) and regulated by the Taiwan Securities and Futures Bureau. Material relating to equity securities is issued and distributed in Taiwan by J.P. Morgan Securities (Taiwan) Limited, subject to the license scope and the applicable laws and the regulations in Taiwan. **To the extent that J.P. Morgan Securities (Taiwan) Limited produces research materials on securities not listed on the Taiwan Stock Exchange or Taipei Exchange (“Non-Taiwan Listed Securities”), these materials shall not constitute securities recommendations for the purpose of applicable Taiwan regulations, and, for the avoidance of doubt, J.P. Morgan Securities (Taiwan) Limited does not act as broker for Non-Taiwan Listed Securities.** According to Paragraph 2, Article 7-1 of Operational Regulations Governing Securities Firms Recommending Trades in Securities to Customers (as amended or supplemented) and/or other applicable laws or regulations, please note that the recipient of this material is not permitted to engage in any activities in connection with the material that may give rise to conflicts of interests, unless otherwise disclosed in the “Important Disclosures” in this material.

Thailand: This material is issued and distributed in Thailand by JPMorgan Securities (Thailand) Ltd., which is a member of the Stock Exchange of Thailand and is regulated by the Ministry of Finance and the Securities and Exchange Commission. The registered address is 548 One City Center Building, 50th Floor, Ploenchit Road, Lumphini, Pathum Wan, Bangkok 10330.

UK: Research is produced in the UK by J.P. Morgan Securities plc (“JPMS plc”) which is a member of the London Stock Exchange and is authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority or J.P. Morgan Markets Limited (“JPMML Ltd”) which is authorised and regulated by the Financial Conduct Authority. Unless specified to the contrary, this material is distributed in the UK by JPMS plc and is directed in the UK only to: (a) persons having professional experience in matters relating to investments falling within article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) (Order) 2005 (“the FPO”); (b) persons outlined in article 49 of the FPO (high net worth companies, unincorporated associations or partnerships, the trustees of high value trusts, etc.); or (c) any persons to whom this communication may otherwise lawfully be made; all such persons being referred to as "UK relevant persons". This material must not be acted on or relied on by persons who are not UK relevant persons. Any investment or investment activity to which this material relates is only available to UK relevant persons and will be engaged in only with UK relevant persons. A description of J.P. Morgan EMEA’s policy for prevention and avoidance of conflicts of interest related to the production of Research can be found at the following link: J.P. Morgan EMEA - Research Independence Policy.

U.S.: J.P. Morgan Securities LLC (“JPMS”) is a member of the NYSE, FINRA, SIPC, and the NFA. JPMorgan Chase Bank, N.A. is a member of the FDIC. Material published by non-U.S. affiliates is distributed in the U.S. by JPMS who accepts responsibility for its content.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst's involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts’ views and research, and it may also engage in transactions for its own account or for its clients’ accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.

Confidentiality and Security Notice: This transmission may contain information that is privileged, confidential, legally privileged, and/or exempt from disclosure under applicable law. If you are not the intended recipient, you are hereby notified that any disclosure, copying, distribution, or use of the information contained herein (including any reliance thereon) is STRICTLY PROHIBITED. Although this transmission and any attachments are believed to be free of any virus or other defect that might affect any computer system into which it is received and opened, it is the responsibility of the recipient to ensure that it is virus free and no responsibility is accepted by JPMorgan Chase & Co., its subsidiaries and affiliates, as applicable, for any loss or damage arising in any way from its use. If you received this transmission in error, please immediately contact the sender and destroy the material in its entirety, whether in electronic or hard copy format.
