In this note, we update our monthly Data Center Capacity Tracker series, a comprehensive monitor of N. American data center capacity by stage of development, operator, and geography. ***To gain recurring access to the excel-based version of this data feed, please reach out to your salesperson.*** *For our server model and performance of semi/hardware suppliers in AI supply chain, see our latest* ***AI Server Pulse*** *check.*

Project Pipeline. In the face of renewed AI market fears, 2 new statewide data center moratoria (29% of pipeline), and a PJM-housed utility cutting its data center pipeline by 40% (to 25 GW) this latest quarter, July saw a record 43 GW (up 13% M/M) of new capacity added to the pipeline now up to 381 GW. This was driven by a mix of hyperscalers and first-time entrants. The biggest contributors were Pacifico Energy (4.8 GW), DCIP Group (4 GW; new entrant), Amazon (3.5 GW), OpenAI (3.2GW; new entrant), Google (2.7 GW), Meta (2.7 GW), and Crusoe (2.6 GW). xAI also appeared for the first time with its own 1 GW. Hyperscalers collectively added ~15 GW to pipeline alone. From a geographic standpoint, Texas saw the greatest additions ot its pipeline this month (19 GW).

Under Construction. Construction saw broad-based growth across the hyperscalers. Meta led with 1.2 GW, followed by Google (655 MW), Amazon (649 MW), and Microsoft (509 MW). New entrants included Form8tion Data Centers (350 MW), CleanSpark (250 MW), Fluidstack (240 MW), and Pacifico Energy (200 MW). New construction was largest in Texas (1.1 GW) and Pennsylvania (1.1 GW). At today's build rate, it would take 12 years to clear the 381 GW pipeline, in-line with last month.

Stranded Capacity. The rise in local data center opposition/NIMBY continues driving stranded capacity higher, up 5 GW to 43 GW, representing 11% of total pipeline, which remains up vs. 7-9% last summer, but stabilizing. 8 companies entered stranded status for the first time this month - the most notable being Joule (1.6 GW), Gotspace Data Partners (960 MW), while undisclosed projects added another 1.1 GW. CAT announced its agreement to power Joule's Utah campus last August with its G3520K nat gas recip, which we originally estimated would add $5B in revenue or 10% EPS accretion. For more on this, please see: ***Separating the credible developers from dudes with PowerPoints***

Behind-the-meter back on track. Following 1.6 GW of M/M growth in June, BTM projects added 18.3 GW to the pipeline in July. 15.7 GW of BTM capacity is currently under construction, up 300 MW M/M. Of note, BTM projects accounted for 42% of the additions to July's pipeline, above the 37% YTD average. From an operator type perspective, neoclouds are most reliant on BTM (58% of pipeline), followed by developers (54%) and hyperscalers (28%). Currently, only 6% of data centers use this approach, though 23% of the capacity under construction will use it, and 39% of projects in the pipeline will use it. It's also a growing portion of stranded projects at 25%, up from 18% in January.

Electricals TAM update. Based on the current pipeline and company-disclosed $M/MW opportunity, we estimate the following data center TAMs: PWR ($5.1T), ETN ($891B), LGN ($387B), VRT ($1.4T), Schneider ($1T), ABB ($762B), as well as several other OEMs.

INVESTMENT IMPLICATIONS

US Machinery & Electrical Equipment: our latest data center capacity tracking exercise is further supportive of the short and long-term tailwinds seen in the electrification space. We see all data center exposed names in our coverage benefiting from attractive multi-year end market growth where bottlenecks persist, demand for equipment and labor is high, and backlogs remain healthy. Remain Outperform on **ETN** ($534), **HUBB** ($584), **LGN** ($103), **J** ($163), **TRMB** ($85), and **URI** ($1,317). Remain Market-Perform on **CAT** ($1,002), **CMI** ($700), **OSK** ($138) and **PWR** ($748).

European Capital Goods: We rate Schneider (PT €330), Siemens (€300), Legrand (€170), Siemens Energy (€210), and Prysmian (€110) Outperform, and rate ABB (CHF 70) Market-Perform.

US Communications Infrastructure: We rate DLR ($226) and EQIX ($1,270) Outperform. We rate CRWV ($67) Underperform.

US Multi-Industrials: We rate VRT (PT $368), NVT (PT $220), and JCI (PT $173) outperform. We are rate CARR (PT $78) Market-Perform.

Bitcoin miners/Emerging AI Infra: Crypto miners remain well positioned to solve 'time to compute' given their planned ~32GW power portfolio and operating ability to deliver 'warm powered shells' in time. Over the past two years, miners have contracted ~8 GW of power capacity to hyperscalers, neoclouds and AI-chip manufacturers across 20+ deals worth over $160Bn. The contracted ~8 GW represents ~25% of the ~32 GW pipeline of crypto miners, allowing runway for new contracts. We rate **WULF** Outperform (PT$36), **CIFR** Outperform (PT$32), **IREN** Outperform (PT$100), **CORZ** Outperform (PT$32), **RIOT** Outperform (PT$30), **CLSK** Outperform (PT$24), and **MARA** Market-perform (PT$17).

US Internet: We rate Amazon Outperform with PT of $320. We rate Meta Outperform with PT of $800. We rate Google Market-Perform with PT of $385.

Global Software: Microsoft (Outperform $647) started to shift from spending ~60% of their CAPEX on datacenters (land, building and improvements) to ~33% as this start to approach having enough global capacity to meet demand and growing datacenter capacity more in-line with Cloud / AI revenue growth. One interesting point in the note is the fact that Microsoft started to construct 203 MW of their own datacenter capacity while neither of their hyperscaler competitors added meaningful capacity. Note that some of their recent datacenter capacity was added via leased capacity and via shorter term neoCloud contracts but the direct is in-line with our thesis. Oracle (Outperform, $325) leases all their datacenter capacity and the capacity to meet their current contracts are already included in leased capacity being built by 3rd parties.

US Semiconductors & Semicap Equipment: NVDA (Outperform, $315): The datacenter opportunity is enormous, and still early, with material upside still possible. **AVGO (Outperform, $550):** A strong 2026 AI trajectory seems set to accelerate into 2027 and beyond, bolstered by software, cash deployment, and superb margins & FCF. **AMD (Outperform, $650):** Expectations remain high, but exposure to AI demand driving both a CPU and GPU story can provide substantial growth. **INTC**

(Market-Perform, $110): Server strength is helping the company get back on their feet, and narrative/headlines may fuel the vibe for now.

Asia Tech Hardware: We rate Chroma Outperform, with PT = NT$2,750.00. We rate Delta Outperform, with PT = NT $2,620.00. We rate Unimicron Outperform, with PT = NT$990.00. We rate Quanta Computer Underperform, with PT = NT $250.00.

US Business Services: We rate Ferguson Outperform with a $310 (GBp 22,963) target price, maintaining our EV/EBITDA multiple of18.0x and a P/E multiple of 24.5x.

US IT Hardware: We rate Dell Outperform with TP = $500. We rate HPE Market-Perform with TP = $62. We rate SMCI Market-Perform with TP = $37. We rate SNDK Outperform with TP = $3000. We rate STX Outperform with TP = $1350. We rate WDC Outperform with TP = $770.

RATINGS DEFINITIONS, BENCHMARKS AND DISTRIBUTION

EQUITY RATINGS DEFINITIONS

Bernstein brand

The Bernstein brand rates stocks based on forecasts of relative performance for the next 12 months versus the S&P 500 for stocks listed on the U.S. and Canadian exchanges, versus the Bloomberg Europe Developed Markets Large and Mid Cap Price Return Index EUR (EDME) for stocks listed on the European exchanges and emerging markets exchanges outside of the Asia Pacific region, versus the Bloomberg Japan Large and Mid Cap Price Return Index USD (JPL) for stocks listed on the Japanese exchanges, and versus the Bloomberg Asia ex-Japan Large and Mid Cap Price Return Index (ASIAX) for stocks listed on the Asian (ex-Japan) exchanges -unless otherwise specified.

The Bernstein brand has three categories of ratings:

- Outperform: Stock will outpace the market index by more than 15 pp
- Market-Perform: Stock will perform in line with the market index to within +/-15 pp
- Underperform: Stock will trail the performance of the market index by more than 15 pp

Coverage Suspended: Coverage of a company under the Bernstein research brand has been suspended. Ratings and price targets are suspended temporarily, are no longer current, and should therefore not be relied upon.

Not Rated: A rating assigned when the stock cannot be accurately valued, or the performance of the company accurately predicted, at the present time. The covering analyst may continue to publish research reports on the company to update investors on events and developments.

Not Covered (NC) denotes companies that are not under coverage.

Bernstein brand stock ratings are based on a 12-month time horizon.

Autonomous brand – common stocks

The Autonomous brand rates common stocks as indicated below. As our benchmarks we use the Bloomberg Europe 600 Financials Price Return Index (E600BK) and Bloomberg Europe Dev Mkt Financials Large and Mid Cap Price Ret Index EUR (EDMFI) index for developed European banks and Payments, the Bloomberg Europe 600 Insurance Price Return Index (E600IN) for European insurers, the S&P 500 and S&P Financials for US banks and Payments coverage, S5LIFE for US Insurance, the S&P Insurance Select Industry (SPSIINS) for US Non-Life Insurers coverage, the Bloomberg Emerging Markets Financials Large, Mid and Small Cap Price Return Index (EMLSF) for emerging market banks and insurers and Payments, and the Bloomberg Japan Financials Large & Mid Cap Price Return Index (JPFILM) for Japanese Financials. Ratings are stated relative to the sector (not the market).

The Autonomous brand has three categories of common stock ratings:

- Outperform (OP): Stock will outpace the relevant index by more than 10 pp
- Neutral (N): Stock will perform in line with the market index to within +/-10 pp
- Underperform (UP): Stock will trail the performance of the relevant index by more than 10 pp

Coverage Suspended: Coverage of a company under the Autonomous research brand has been suspended. Ratings and price targets are suspended temporarily, are no longer current, and should therefore not be relied upon.

Not Rated: A rating assigned when the stock cannot be accurately valued, or the performance of the company accurately predicted, at the present time. The covering analyst may continue to publish research reports on the company to update investors on events and developments.

Those denoted as 'Feature' (e.g., Feature Outperform FOP, Feature Under Outperform FUP) are our core ideas.

Not Covered (NC) denotes companies that are not under coverage.

Autonomous brand common stock ratings are based on a 12-month time horizon.

Autonomous brand – preferred stocks

The Autonomous brand has three categories of preferred stock ratings:

- Outperform (OP): The total return of the preferred instrument is expected to outperform preferred securities of other issuers operating in similar sectors or rating categories over the next six months.
- Neutral (N): The total return of the preferred instrument is expected to perform in line with preferred securities of other issuers operating in similar sectors or rating categories over the next six months.
- Underperform (UP): The total return of the preferred instrument is expected to underperform preferred securities of other issuers operating in similar sectors or rating categories over the next six months.

Autonomous preferred stock ratings are based on a 6-month time horizon.
