Sinocera is the only A-share listed domestic MLCC ceramic powder supplier. Its share price has rallied 102% since 27 May, vs SZCOMP Index up 1%, due to continued competitor price hikes across electronic materials and rising expectations for potential good news of MLCC price hike penetration through upstream players (manufacturers and distributers) to the downstream (materials suppliers). However, we note that the majority of investors remain skeptical and uninvested in Sinocera, preferring more obvious pure plays of MLCC component and PCB chain companies, which on average have seen their share prices rise +315% YTD (vs Sinocera +261% /SZCOMP Index +13%). High-end MLCC powder capacity ramp-up and potential PCB new orders in 2027 might be the multi-driver catalysts. We raise our 2027/28E EPS by 21%/29% to reflect recent MLCC price hikes and higher AI-grade product mix (JPMe high-end MLCC now >35% of segmental revenue by 2027, vs negligible in 1H26), and our price target to a Street high of Rmb136 (based on 93x P/E, Rmb1.46 2028E EPS).

- **Good progress on AI-grade MLCC powder capacity expansion.** Sinocera currently operates 10,000 tons of standard MLCC powder capacity and is actively expanding high-end capacity dedicated to AI servers and automotive-grade applications, targeting 5,000 tons – of which 2,000 tons were commissioned by YE25 and the remaining 3,000 tons are expected by YE26. The company is one of the few domestic players mastering hydrothermal barium titanate core technology and capable of mass-producing high-end powders with particle sizes of 50-100 nm, successfully breaking the long-standing dominance of global suppliers in the high-end segment. In 2025, the company produced approximately 7,000 tons of MLCC powder, in line with market expectations. Looking ahead, Sinocera is advancing stable, large-scale supply of high-end MLCC powders to major customers including Samsung, Fenghua, and Yageo.

- **Price upside may be greater than market expectations.** In Mar-May 2026, downstream MLCC manufacturers Murata and Samsung Electro-mechanics raised high-end MLCC prices by 10-35%, and upstream dielectric powder prices followed with 10-15% increases. Price tiers are clearly differentiated: standard consumer-grade powder at Rmb60k-70k/ton with a gross margin of c.33%, automotive-grade powder at Rmb80k–90k/ton, and AI server high-capacitance powder above Rmb100k/ton with a GM of 45-50%. The price hikes were driven by three factors: AI server demand (single rack MLCC usage is 15× that of traditional servers), automotive electronics growth, and potential supply constraints on global competitors due to China's tightened heavy rare earth export controls. Sinocera's 4Q25 contract liabilities surged to Rmb56mn, up 216% q/q, and 1Q26 remained at a high of Rmb40mn, partially confirming strong orders.

See page 7 for analyst certification and important disclosures, including non-US analyst disclosures.

- **Ceramic substrate broadening opportunities.** Through subsidiary Sinocera Saichuang, Sinocera has established leading technical capabilities in substrate metallization via 'powder + ceramic + metallization' integration. LED ceramic substrates have achieved stable bulk supply to global tier customers. Communication RF microsystem chip packaging enclosures have become the mainstream packaging solution for low-orbit satellite RF chips, with revenue growing rapidly in 2025 and a Rmb100mn order signed in June 2025 expected to complete by 1H26. For optical module ceramic substrates, Thermoelectric Cooler (TEC) products have achieved small-batch sales with some customers while new customer qualification is ongoing. The PCB ceramic substrate testing with a major customer is ongoing, and the company expects meaningful progress and new orders to kick-in by 2027. The company is also developing laser thermal sinks, microwave capacitors, ferrite magnetic devices, and other new products. Phase II new plant construction has been completed, with capacity gradually ramping up.
- **Raise FY27/28 EPS by 21%/30% and PT to new Street-high of Rmb136.** We raise our FY27/28E EPS to reflect improved product mix, margins and volume, as well as upward revisions to consensus expectations for AI-related products in next 2+ years. Our FY27/28 EPS is now 20%/22% above the Street. We now forecast MLCC powder business to account for 25%/28% of total gross profit by FY27/28 (previously 16%/18%). The improved product mix would result in electronic materials segmental gross margin reaching historically high levels of 50% in FY27E/28E, versus the previous peak of 49.9% in FY18. Our revised Dec-27 PT of Rmb136 is based on 93x one-year forward P/E (previously 60x) to reflect the aforementioned positives of AI-related businesses. Our revised PT of Rmb136 implies 88x/72x 2027/28E P/E, versus its industry peers at 99x/82x of 2027/28E P/E, based on market estimates.

Summary Investment Thesis and Valuation

Sinocera is China's leading integrated and platform-style ceramic (functional) manufacturer. Its business includes four key ceramic material segments: electronic (MLCC powder), catalyst (honeycomb), biomedical (dental/denture) and others (ball bearing and ink). Our OW rating is based on: 1) Sinocera being the #1 MLCC powder producer in China, with new capacity expansion completed and efforts ongoing to break into the market for higher-end products; 2) A sustainable honeycomb ceramic demand outlook, with the potential to gain market share from global major suppliers; 3) A positive outlook for dental material demand in China with integrated industrial chain development; and 4) Strong demand upside for new materials and products in the China semiconductor industries. We believe Sinocera will maintain its growth momentum in both earnings and operations over the next three years.

Our Dec-27 price target of Rmb136 is based on a 93x one-year forward P/E, an historically high level. Sinocera's current valuation is at the record high of 113x; the historical forward P/E multiple range is 17x-113x, with an average of 35x.

Valuation

Our Dec-27 price target of Rmb136 is based on a 93x one-year forward P/E, an historically high level. Sinocera's current valuation is at the record high of 113x; the historical forward P/E multiple range is 17x-113x, with an average of 35x.

Risks to Rating and Price Target

Downside risks to our rating and price target include:

- Slower-than-expected MLCC demand growth.
- Slower-than-expected dental & aerospace business new order delivery.
- Slower-than-expected solid-state electrolyte & spherical silica volume ramp-up.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period.
J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:
J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the

rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, https://www.jpmorganmarkets.com.
