

The 720: China Strategy, India AI, Keyence, Airtac, Capcom, HYBE, Aspeed, United Imaging, Rohm, Hyperscaler Credit vs. Equity

In Focus | China Strategy

China Musings – Investor FAQs on Large-Scale IPOs. CXMT completed its primary listing on Shanghai Stock Exchange's STAR market, at US\$8.6bn offer size and US\$484bn market cap, it is the largest A-share Tech IPO. Historically, market liquidity often tightens ahead of mega-IPOs but eases post-listing, with cash turnover rising post the transaction. Listed comparables of new IPOs typically traded sideways before but traded better after the event. We estimate CXMT could represent a 7% initial weight in the STAR50 Index, potentially attracting US\$12-17bn in cumulative passive inflows by 4Q27. We expect the China IPO market to remain active, with US\$30bn and US\$33bn of new IPO supply in A and H shares in 2H26 on GS forecasts. We screen for (1) GS Buy-rated names in AI Hard Tech and Semi cohort for a potential V-shaped recovery trade; and (2) existing index constituents that might experience passive index selling. *Kinger Lau*

Global Markets | Hyperscaler Credit vs. Equity

Global Markets – Hyperscaler Credit vs. Equity. We note that heavy AI-related capex is reshaping the relationship between hyperscaler credit and equity, with long-end credit spreads widening alongside deteriorating forward free cash flow yields. As these firms increasingly fund investments with debt, credit's beta to equity returns has risen, and credit has underperformed its historical equity beta during recent waves of new issuance. We think the path ahead for credit hinges on improving free cash flow generation, though the manner of improvement will dictate relative value. Specifically, free cash flow gains driven by declining capex would likely favor credit, whereas rising net income and operating cash flow alongside robust investment would favor equity. Also see Expectations for Hyperscaler Debt Issuance: A Top-Down Approach. *Shamshad Ali*

Gen-AI in India | Jobs Crosswinds & Productivity Tailwinds

Gen-AI in India: Jobs Crosswinds, Productivity Tailwinds. We view Gen-AI adoption as

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. For Reg AC certification and other important disclosures, see the Disclosure Appendix, or go to www.gs.com/research/hedge.html. Analysts employed by non-US affiliates are not registered/qualified as research analysts with FINRA in the U.S.

a medium-term positive for India's growth, acting more as a complement than a substitute for the labor market. We estimate 8-12% of non-agricultural employment is at risk of substitution, while 42-48% is likely to be complemented, potentially lifting annual labor productivity growth by a baseline of 0.4pp (ranging from 0.1pp to 0.8pp) over a 10-year period. Knowledge-intensive services like healthcare and education are best positioned to benefit, and while routine IT-BPS functions face substitution risks, aggregate tech employment and Global Capability Centre expansion remain resilient. However, scaling AI adoption will require substantial investments to overcome physical and digital infrastructure constraints, alongside navigating rising protectionism in services export markets. *Santanu Sengupta*

Results | Keyence, Airtac, Capcom, HYBE, Japan Exchange Group, Bank Central Asia, Larsen & Toubro, Hindustan Unilever, LandMark, Bellevue Gold

Keyence – First Take: Significant 1Q Beat Driven by AI and Semi Demand – Buy. Keyence delivered a major 1Q positive surprise, with operating profits of ¥187.1bn and sales of ¥346.6bn significantly beating our estimates and market expectations. Gross profit margin reached a record 85% and OPM hit 54.0%, driven by underlying business outperformance, FX tailwinds, and tariff refunds. Local-currency sales growth beat across most regions, particularly in Asia (+33.9%), as AI server supply chains, semiconductor-related demand, and robotics boosted investment appetite across a broad range of sectors. The company is successfully implementing price hikes to offset procurement costs without facing production delays, reinforcing our confidence in the sustainability of this outperformance. 12m TP of ¥110,000. *Yuichiro Isayama*

Airtac – Upward 2026 guidance revision on longer upcycle – Buy. We raise our 12m TP to NT\$1,925 from NT\$1,725 following management's upward revision to 2026 revenue and operating margin guidance, alongside expectations for a longer 2-to-3-year industry upcycle. 2Q revenue beat consensus by 11% on strong pneumatic product shipments to the electronics and battery sectors, though operating profit slightly missed our estimates due to higher operating expenses. While we lower our 2026 EPS estimate by 3% to reflect near-term raw material cost pressures, we raise our 2027 and 2028 EPS estimates by 2% and 6%, respectively, as we expect internal efficiency gains and rising utilization in the linear guide business to support long-term profitability. *Chao Wang*

Capcom – 1Q Beat Driven by Strong Catalog Sales; Estimates and TP Raised – Buy. Following a significant 1Q operating profit beat of ¥41.0 bn versus our ¥25.1 bn estimate, we raise our FY3/27–FY3/31 operating profit estimates by 6%–9% and our 12m TP to ¥4,600. The earnings beat was primarily driven by robust catalog software sales of 21.26 mn units, well ahead of our 13.8 mn assumption, fueled by successful brand awareness initiatives for the Resident Evil IP. We remain constructive on the stock given the company's meticulous pipeline management and a rich upcoming visual media rollout, which we expect will continue to drive stable catalog sales and double-digit operating profit growth. *Minami Munakata*

HYBE Co. – 2Q26 OP beat on strong concert revenue; structural leverage visible – Buy. HYBE reported strong 2Q26 results where revenue and operating profit beat our estimates by 22% and 11%, respectively, driven by the BTS world tour and broad-based artist activity. We raise our 2026-2028 revenue estimates by 13%/8%/7% and operating profit by 10%/6%/9% to reflect stronger music and performance contributions, partially offset by a lower gross margin assumption for the concert segment. While investors

expressed concern over the lower gross margin—which management attributed to a higher mix of inherently lower-margin concert revenue—we believe structural earnings expansion remains intact as the rookie monetization cycle shortens and platform-scale efficiencies improve operating leverage. 12m TP of W300,000. *Eric Cha*

Japan Exchange Group – 1Q in line, early guidance and dividend hike – Buy. We raise our 12m TP to ¥2,500 following broadly in-line 1Q3/27 results and a surprise early upward revision to FY3/27 guidance and dividends. The company raised its average daily trading value (ADTV) assumption for cash equities by 36% to ¥10.2 tn, driving a 27% increase in net profit guidance to ¥98.5 bn and a 26% hike in the DPS forecast to ¥77. We believe the revised guidance remains conservative, as it implies an ADTV of ¥9 tn from August onward and does not factor in the continuation of higher trading volumes seen recently. Reflecting the solid quarter and strong trading value trends, we raise our FY3/27-FY3/29 net profit estimates by 3%/2%/2%. *Makoto Kuroda*

Bank Central Asia – 2Q26 In-Line Results and Intact Guidance – Buy. We review BBKA's in-line 2Q26 net profit of Rp14.9tn, which was supported by resilient profitability and manageable asset quality despite a slight miss on net interest income. Management maintained its FY26 guidance, expecting NIM to improve in 2H26 from the late-quarter booking of higher-yielding loans and reaffirming 8-10% loan growth driven by a solid private-sector corporate pipeline. We trim our FY26-28E net profit forecasts by 1.1%/0.6%/0.5% to reflect the weaker NII and lower credit costs. 12m TP of Rp7,400. *Melissa Kuang*

Larsen & Toubro – 1QFY27 Results Beat on Orders; Guidance Maintained – Buy. We lower our 12m TP to Rs4,370 (from Rs4,500) following 1QFY27 results that featured a strong 17% yoy growth in core order inflows, well ahead of our -6% expectation. Core EPC revenue grew 2% yoy and EBITDA margins contracted 20bps to 6.9%, slightly below our estimates due to slower execution impacted by the West Asia conflict. However, management maintained its FY27 guidance for 10-12% growth in revenue and order inflows with stable margins. We raise our FY27E EPS by 6% on higher treasury gains but slightly lower FY28E EPS on slower revenue growth, remaining constructive on the stock's medium-term growth visibility driven by a robust Rs7.8tn order book. *Pulkit Patni*

Hindustan Unilever – Improving growth with steady margins – Buy. We lower our 12m TP to Rs2,450 following an in-line 1QFY27 that delivered 10% underlying sales growth, the highest in 13 quarters. Growth was driven by strong performance in home care and beauty & wellbeing, and we expect further sales acceleration in FY27 as the company implements calibrated price increases to offset input cost inflation. Management expects to sustain EBITDA margins in the 22.5% to 23.5% range through cost efficiencies, prompting us to raise our FY27-FY29 EPS estimates by roughly 2% on higher volume and price growth assumptions. *Arnab Mitra*

LandMark – 3Q26 Growth on SiPh Ramp and Capacity Expansion – Buy. We expect sequential revenue growth to continue through 3Q following a strong 2Q26 revenue print of NT\$1.2bn, driven by robust demand for 800G and 1.6T silicon photonics (SiPh) optical modules and improving InP substrate supply. To capture this accelerating SiPh demand, the company has approved a NT\$3bn equipment procurement plan to expand capacity across InP epiwafers and CW lasers. We revise up our 2026E earnings by 1% to reflect higher CW laser revenues. 12m TP of NT\$4,307. *Allen Chang*

Bellevue Gold – Early hedge closure accelerates FCF inflection – Buy. We raise our 12m TP to A\$1.75 following in-line 4Q26 results and FY27 guidance, which features an accelerated clearing of forward gold hedges. We adjust FY26–FY28E EBITDA by -10%/+7%/+1% to reflect minor production and cost revisions, noting that fixed rates with the new underground mining contractor should support stronger year-over-year cost performance versus peers. We expect the continued pre-delivery of the hedge book to clear remaining commitments by 2Q27, driving an operational free cash flow yield inflection from roughly 6% in FY27E to 20% in FY28E on fully unhedged sales. *Hugo Nicolaci*

Themes in Play | Aspeed, United Imaging, China Surgical Robots

Aspeed – Multiple Growth Drivers and Attractive Risk-Reward – Buy. We raise our 12m TP to NT\$22,000 from NT\$20,000 and revise up 2026–2028E EPS estimates by 10–15%. We increase our traditional BMC shipment forecasts, driven by robust agentic AI demand, accelerating AI ASIC deployments, rising AST2700 adoption, and easing substrate bottlenecks. Furthermore, we expect the newly announced AST1840 chip to unlock additional growth starting in 2H27, making the stock's recent pullback an incrementally attractive entry point. *Evelyn Yu*

United Imaging – AI Ecosystem Synergies Drive Estimate Revisions – Buy. We raise our 12m TP to Rmb182 from Rmb172 and revise our 2026–2028E revenue and EPS estimates to reflect incremental growth driven by the broader United Imaging Group AI ecosystem. We expect the AI attach rate across the company's installed base to rise from 5% in 2025 to 80% in 2035E, generating an estimated Rmb274mn in incremental revenue in 2026E and peaking at Rmb4,982mn in 2032E. While near-term RMB appreciation may pressure net profit, we believe the AI platform strengthens equipment differentiation and will increasingly flow through to earnings via a larger global installed base and improving operating leverage. *Tianyi Yan*

China Surgical Robots – Accelerating Overseas Commercialization Supports Guidance Delivery. We remain constructive on Chinese surgical robotics and reiterate our Buy ratings on Medbot and EdgeMed, as accelerating overseas commercialization offsets largely expected domestic softness. Global execution is strengthening, highlighted by Medbot achieving 1H26 profitability alongside over 450% yoy overseas revenue growth, and EdgeMed tracking toward 160 cumulative installed or shipped systems by the first half. While domestic industry bidding slowed to roughly 30 systems in 1H26 amid a weaker hospital capex environment and upcoming volume-based procurement, we view technology differentiation and product breadth in overseas markets as the primary long-term earnings drivers. *Chris Pan*

Events | Rohm

Rohm – AI/DC Market Seminar Highlights – Buy. Rohm's AI server and data center seminar highlighted the company's ¥100 bn revenue target for server applications by 2030. Management showcased a broad portfolio of power and analog semiconductors designed to address rising power consumption per rack, alongside a deepened co-development partnership with Delta Electronics. We see strong potential for standalone revenue expansion and believe that as the key growth driver shifts from EVs to AI servers, earnings leverage—particularly for SiC—could exceed market expectations. 12m TP of ¥6,500. *Daiki Takayama*

Graphic Language | China Strategy - The addition of a large-cap semiconductor company to STAR50 would further cement its status as a leading Chinese “Hard Tech” proxy

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Disclosures

Distribution of ratings/investment banking relationships

Goldman Sachs Investment Research global Equity coverage universe

	Rating Distribution				Investment Banking Relationships		
	Buy	Hold	Sell		Buy	Hold	Sell
Global	50%	34%	16%		65%	59%	43%

As of July 1, 2026, Goldman Sachs Global Investment Research had investment ratings on 3,104 equity securities. Goldman Sachs assigns stocks as Buys and Sells on various regional Investment Lists; stocks not so assigned are deemed Neutral. Such assignments equate to Buy, Hold and Sell for the purposes of the above disclosure required by the FINRA Rules. See 'Ratings, Coverage universe and related definitions' below. The Investment Banking Relationships chart reflects the percentage of subject companies within each rating category for whom Goldman Sachs has provided investment banking services within the previous twelve months.

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for “wholesale clients” within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client’s objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client’s own objectives, financial situation and needs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither “registered banks” nor “deposit takers” (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for “wholesale clients” (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom’s departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at <https://www.gs.com/disclosures/europeanpolicy.html> which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan Type II Financial Instruments Firms Association, and Investment Management Association of Japan. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock’s total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region’s Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts’ investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or

policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

Global product; distributing entities

Goldman Sachs Global Investment Research produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. This research is disseminated in Australia by Goldman Sachs Australia Pty Ltd (ABN 21 006 797 897); in Brazil by Goldman Sachs do Brasil Corretora de Títulos e Valores Mobiliários S.A.; Public Communication Channel Goldman Sachs Brazil: 0800 727 5764 and / or contatogoldmanbrasil@gs.com. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom.

Goldman Sachs International ("GSI"), authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority ("FCA") and the PRA, has approved this research in connection with its distribution in the United Kingdom.

European Economic Area: Goldman Sachs Bank Europe SE ("GSBE") is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research within the European Economic Area.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all

research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
