

Array Technologies Inc. (ARRY): Investor event highlighting APA Solar and diversification strategy

On 8/20, ARRY hosted an investor event discussing the long-term outlook for APA Solar, which it acquired in August 2025, as well as additional details on its balance-of-system strategy. Management provided incremental details on APA's business, including strong demand, new growth verticals, and financial targets, as well as strategies to expand its addressable market and customer wallet share. Additionally, the company discussed innovations within its core business, other growth opportunities, and its disciplined capital allocation framework. We highlight key takeaways here within.

Implications

Advancing APA Solar. ARRY provided incremental details on the outlook for APA Solar, which it acquired in August 2025 and provides ARRY with fixed-tilt mounting systems and engineered foundation solutions to complement its existing tracker technology. In particular, management highlighted the strategic rationale of the acquisition, including key competitive advantages, synergistic opportunities, and product innovations. We note that APA discussed how its Atlas portfolio broadens this offering across conventional, alternative, and engineered foundations, while Atlas II reduces component counts by more than half compared to the existing A-frame 2.0, providing lower costs and faster installation times. Importantly, APA's average pipeline project size increased 155% versus pre-acquisition levels as it better leverages ARRY's larger utility-scale customer base and improved access to capital. Management also targets engineered foundations increasing from ~20% to ~50% of APA's revenue mix over the near-term horizon, with international revenue reaching ~15% of sales.

Foundations experiencing strong revenue growth amid positive margin

contribution. APA revenue reached ~\$130mn in 2025 and increased by 17% yoy in 1H26. Looking ahead, management expects APA growth to accelerate in 2H26 following a weather-constrained 1Q in core Northeast markets. We highlight that ARRY anticipates APA revenue to grow at a significant double-digit CAGR over the next three years, driven by an increasing engineered-foundation mix and international sales. Management targets adj. gross margins in the high-20%/low-30% range over time, broadly in line with ARRY's 27%-28% FY26 adj. gross margin guidance.

Diversifying platform to expand market potential. ARRY discussed its balance-of-system strategy to diversify its business, expand its addressable market,

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. and increase wallet share. While ARRY estimates a core addressable domestic tracker market of ~\$4.3bn, APA adds ~\$1.7bn of U.S. TAM across foundations and fixed tilt. APA's 150,000-square-foot manufacturing facility and newly operational 130,000 sq ft Bryan, Ohio facility provide capacity to support larger project volumes. Additionally, the company believes that the pending AWM acquisition would add ~\$150mn of U.S. wire-management TAM and up to an additional ~\$250mn globally, taking the combined identified opportunity up to ~\$6.4bn. AWM would also extend the platform into battery storage and data center adjacencies. Separately, Software revenue grew more than 100% yoy, with an attach rate of ~50% year to date, and management communicated a legacy retrofit opportunity of more than 50GW, supporting further expansion of this recurring, high-margin revenue.

Capital allocation. Management reiterated a capital allocation hierarchy of reinvesting in organic growth, preserving capital flexibility, and pursuing disciplined strategic M&A. ARRY closed 2Q26 with more than \$600mn of net available liquidity, including ~\$300mn of cash. APA discussed that its preferred equity begins cash payments in August, with expected 2026 cash payments of ~\$11mn-\$12mn; and ~\$35mn in 2027, and that its 6.25% interest rate remains more attractive than its current revolver. Management anticipates that FCF generation will more than suffice to support organic investment, service its preferred equity, and pursue tuck-in M&A opportunities.

Valuation

Our 12-month price target of \$9 (vs. \$11 prior) is based on a 10x P/E (vs. 12x prior due to lower comps) applied to our Q5-Q8 EPS. Our estimates do not reflect the pending AWM acquisition.

Key Risks

Key risks include competition, customer attrition, patent protection, market demand, policy, and supplier product availability/pricing.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock’s total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region’s Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts’ investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or

policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.
