Battery Weekly 24 August

America

- [Lyten to acquire insolvent battery cell manufacturer Morrow Batteries.- electrive.com](#) US battery developer Lyten has signed a letter of intent to acquire insolvent Norwegian battery maker Morrow Batteries, following its earlier acquisition of Northvolt assets. If completed, the deal would preserve Morrow's battery technology activities in Arendal, Norway, while securing about 70 jobs in the near term and potentially hundreds more over time. Morrow's existing facility has 1 GWh of annual LFP battery capacity, with original plans to expand to 43 GWh that were halted due to funding constraints. Lyten aims to integrate Morrow into its broader European battery and energy storage strategy, supporting applications in energy storage, AI data centers, mobility, and defense.
- [Honda Eyes US to Build Newest Factory, Top Executive Says.-BNEF](#) Honda is considering building a new manufacturing facility in North America, potentially in the US, to support growing demand for hybrid vehicles and localize production of hybrid powertrains. The company plans to launch 15 new hybrid models by 2030, primarily for North America, after scaling back its US EV plans and canceling three battery-electric models earlier this year. Hybrid sales remain strong, accounting for about one-third of Honda's US sales in June, while US sales rose 2.4% in 1H26. Honda's next-generation hybrid system is expected to improve fuel efficiency by 10% and reduce costs by 30%, reinforcing the company's strategic shift toward hybrids amid softer EV demand and ongoing US trade uncertainty.
- [Trump Executive Order Restricts Foreign Grid Equipment, Pressuring Energy Storage Supply Chains.- solare.com](#) US President Donald Trump signed Executive Order 14420 on August 26, 2026, declaring a national emergency and restricting the procurement, import, and installation of certain foreign-made power grid equipment in US high-voltage transmission systems (69 kV and above). The order covers battery energy storage systems (BESS), transformers, generators, inverters, industrial control systems, and related software, citing national security concerns. The Department of Energy must issue implementation rules within 120 days and propose procurement changes within 180 days, prioritizing US-made equipment. The announcement triggered a sharp sell-off in Chinese energy storage and inverter stocks, reflecting concerns over access to the US market, which contributes roughly 15-20% of revenue for several leading Chinese solar and storage companies. The move is expected to accelerate the localization of US energy infrastructure supply chains while increasing pressure on Chinese ESS companies to expand into alternative markets such as the Middle East, Southeast Asia, and Latin America.

Asia

- [India Plans \\$1.4 Billion in Aid to Spur Battery Parts Output.-BNEF](#) India is preparing a new incentive program worth up to INR 130 billion (US\$1.37 billion) to promote domestic production of key battery materials and reduce reliance on Chinese imports. The scheme is expected to support manufacturing of cathode materials, anode materials, electrolytes, separator films, and copper foil, which are currently sourced largely from China. The initiative builds on India's existing 50 GWh battery manufacturing incentive program, under which only 40 GWh has been awarded so far. The move comes as several local battery projects have faced delays due to supply-chain constraints and shortages of upstream components. By strengthening local battery materials production, India aims to improve energy security, accelerate EV and energy storage deployment, and develop a more competitive domestic battery industry.
- [Octillion adds 3 GWh of battery capacity in India.- electrive.com](#) Octillion Power Systems has opened its third battery manufacturing facility in India in Halol, Gujarat, adding more than 3 GWh of annual capacity and over 48,000 battery systems per year. With the new plant, Octillion's total India capacity exceeds 150,000 battery systems or approximately 9 GWh annually. The facility will supply battery systems for electric passenger vehicles, commercial vehicles, and buses, supporting India's electrification targets of 30% EV penetration for passenger cars,

70% for commercial vehicles, and 40% for buses by 2030. The expansion also aligns with India's push to localize its battery supply chain and reduce dependence on imported battery materials and components.

- [Toptec Wins Back-to-Back Hyundai Mobis Battery Equipment Orders for HEVs, EREVs.- thelec.net](#) Toptec has won two battery equipment contracts from Hyundai Mobis' North American electrification unit worth a combined KRW 41.2 billion (US\$30 million), equivalent to about 24% of Toptec's 2025 revenue. The latest order includes a KRW 21.1 billion prismatic battery assembly line for EREVs, following a KRW 20.1 billion order for a cylindrical battery assembly line for HEVs signed three days earlier. The contracts reflect Hyundai Motor Group's push into hybrid and extended-range electric vehicles (EREVs) in North America, including plans to launch its first EREV in 1H27. The orders also strengthen Toptec's battery equipment backlog, which stood at KRW 158.2 billion at the end of June 2026.
- [Hyundai Mobis Unveils 40 AI, Robotics Manufacturing Technologies.- thelec.net](#) Hyundai Mobis unveiled about 40 manufacturing technologies at its M-Sphere 2026 innovation exhibition, attended by approximately 1,000 participants including suppliers. The company highlighted production-ready applications across AI, robotics, and digital twins, including a 3D vision-based autonomous transport robot capable of handling components weighing up to 20 kg, and a physical AI robot-training system that can retrain robots in a virtual environment within 2-4 hours after production line changes. Hyundai Mobis also demonstrated AI-powered battery module assembly automation, underscoring its efforts to improve manufacturing efficiency and accelerate deployment of smart factory technologies across its production network.
- [SK Innovation Targets Separator Business Turnaround Within Two Years.- thelec.net](#) SK Innovation will absorb battery separator subsidiary SK IE Technology (SKIET) as part of a restructuring aimed at improving profitability and reducing costs. The merger is expected to generate about KRW 60 billion (US\$44 million) in annual EBITDA improvement, equivalent to roughly 81% of SKIET's 1H26 EBITDA loss of KRW 74 billion. SK Innovation aims to return the separator business to profitability within two years through organizational integration, cost reductions, and streamlined R&D. While SKIET will maintain its 1.5 billion m²/year separator plant in Poland, the company plans to shut down its Jeungpyeong plant in Korea by year-end and sell its Changzhou facility in China. The merger is scheduled to take effect on January 1, 2027, as SK Innovation seeks to strengthen its battery materials business amid a prolonged EV market slowdown.
- [MOT Ships 46mm Cylindrical Battery Assembly Equipment.- thelec.net](#) MOT has shipped its first assembly equipment for 46mm cylindrical battery mass-production lines, marking its entry into the next-generation cylindrical battery manufacturing market. The company is supplying eight types of assembly equipment covering key processes such as laser welding, forming, and inspection, incorporating technology designed for tabless battery structures that improve charging performance and power output. MOT developed the equipment through participation in a major customer's pilot line and will now support the customer's first commercial-scale 46mm battery production facility. The move expands MOT's portfolio beyond prismatic batteries into 46mm cylindrical, solid-state, and LFP battery production equipment, as global battery makers continue investing in next-generation manufacturing capacity.
- [Seres-backed Aiva reportedly explores joining CATL battery swap network.- cnevpost](#) Aiva, the new EV brand owned by Saidou Technology and backed by Seres and CATL, is reportedly in discussions to adopt CATL's Choco battery swap ecosystem for its first production model, the Aiva ME7, which is scheduled to debut by the end of 2026. The move would allow Aiva to leverage CATL's existing battery-swapping infrastructure, reducing network investment costs and enabling battery leasing models that lower vehicle purchase prices. CATL currently operates 2,000 battery swap stations across 180 Chinese cities and aims to expand the network to more than 3,000 stations by the end of 2026. CATL also holds a 9.89% stake in Saidou Technology, providing a strong foundation for deeper cooperation as Aiva enters the competitive mainstream EV market.
- [KOWEPO enters Central Asian renewable energy market. - Pulse](#) Korea Western Power (KOWEPO) has signed an agreement with ACWA Power to jointly pursue solar, wind, and battery energy storage (BESS) projects in Uzbekistan, marking the first entry of a South Korean state-owned power utility into Central Asia's renewable energy market. The partnership aims to support Uzbekistan's target of increasing renewable energy's share of electricity generation to 40% by 2030. ACWA Power currently has 11.5 GW of power projects under development in the country. KOWEPO also plans to help South Korean energy equipment suppliers participate in these projects, supporting broader expansion into the Central Asian energy market.
- ['Most Companies Are Struggling': Executive Shares An Uncomfortable Truth About Solid-State EV Batteries.- insideevs.com](#) LG Energy Solution (LGES) said that while solid-state batteries offer higher energy density, faster charging, and improved safety, large-scale manufacturing remains the key challenge to commercialization. The company expects solid-state batteries to be deployed first in smaller and specialized applications such as smartphones, drones, and premium vehicles before reaching mass-market EVs or energy storage systems. Meanwhile, LGES is advancing alternative next-generation battery technologies, including LMR (lithium manganese-rich) batteries for GM vehicles from 2028, targeting 400+ miles of range at costs comparable to LFP batteries, as well as 46-series cylindrical batteries and sodium-ion batteries for energy storage applications. The comments contrast with aggressive solid-state timelines from Chinese battery makers including CATL, BYD, and Geely, which are targeting pilot production from 2027, while highlighting LGES's view that

commercialization will take longer due to manufacturing hurdles.

- [BYD Battery Signs Green City Cooperation Agreement with Mongolia's Ulaanbaatar.- solare.com](#) BYD Battery (FinDreams Battery) has signed a strategic cooperation memorandum with Ulaanbaatar, the capital of Mongolia, to support the city's green and low-carbon development initiatives. The partnership will focus on three key areas: electrification of public transportation and municipal fleets, deployment of renewable energy infrastructure including solar-plus-storage systems and integrated charging facilities, and development of grid-scale, behind-the-meter, and microgrid energy storage solutions. Leveraging BYD's capabilities across batteries, electric vehicles, energy storage, and smart transportation, the cooperation aims to accelerate Ulaanbaatar's transition toward a greener and smarter urban energy system while serving as a flagship China-Mongolia green city collaboration project.
- [Sunwoda and JD.com Partner to Develop Standardized Battery Ecosystem for Robotics and New Energy Applications.- solare.com](#) Sunwoda Electric Vehicle Battery Co., Ltd. (Sunwoda EVB) and JD.com (JD Group) have signed a strategic cooperation agreement to jointly develop standardized battery products for robotics and new energy applications. The partnership will focus on battery standardization, smart logistics, supply-chain collaboration, and green energy services. Earlier this month, the two companies, together with the China Electronics Standardization Institute (CESI), established a Robot Battery Joint Laboratory to develop battery standards, product testing, and commercialization pathways for robotics applications. Leveraging JD.com's logistics and robotics ecosystem and Sunwoda's battery manufacturing and solid-state battery expertise, the collaboration aims to accelerate the adoption of standardized batteries, battery-swapping solutions, and next-generation energy technologies across China's robotics and new energy industries.

Europe

- [Asahi Kasei opens new facility for wet-process battery separators.- electrive.com](#) Asahi Kasei has opened a new Hipore wet-process battery separator coating line in Charlotte, North Carolina, marking a key step in building a localized North American battery supply chain. Commercial production is scheduled to begin in FY2026, complementing the company's planned separator plant in Canada. The facility expands Asahi Kasei's portfolio beyond its existing dry-process separator business and is designed to support growing demand from both electric vehicles (EVs) and energy storage systems (ESS). The investment strengthens the company's North American manufacturing footprint and improves its ability to serve regional battery customers with locally produced separator materials.
- [EcoPro BM upgrades Hungarian plant for NCM production.- electrive.com](#) EcoPro BM is investing KRW 40 billion (US\$30 million) to upgrade its Debrecen, Hungary cathode materials plant, enabling production of both NCA and high-nickel NCM cathodes. Starting in Q4 2027, the facility will supply >90% nickel NCM cathode materials to a German premium automaker. The plant has an annual capacity of 54,000 tonnes, enough for around 600,000 EVs, with long-term expansion potential to 108,000 tonnes. The project strengthens EcoPro BM's position in Europe's localized battery supply chain and supports growing demand from regional EV manufacturers.
- [UK's Second-Largest Long-Duration Battery Storage Project Secures Approval.- solare.com](#) Field, a UK battery storage developer, has received irrevocable planning approval for its Rigifa Battery Energy Storage System (BESS) in Scotland, allowing the project to move into the construction phase. With a planned capacity of 200 MW / 3,600 MWh and an 18-hour duration, Rigifa is the second-largest long-duration battery storage project in the UK and one of the projects selected under Ofgem's Long Duration Electricity Storage (LDES) cap-and-floor support scheme. The project will connect to the Gills Bay substation in northern Scotland, helping absorb excess wind generation and improve grid flexibility. Field currently has four projects under construction and six operational projects across the UK and Germany, while Rigifa is one of five Field projects selected under the new UK long-duration storage support mechanism.

Others

- [Saudi Arabia Signs First BOO Battery Storage Projects Worth US\\$1.2 Billion.- solare.com](#) Saudi Arabia has signed contracts for its first large-scale Build-Own-Operate (BOO) battery energy storage projects, marking a major step in the country's grid modernization efforts. The four projects, backed by the Saudi Power Procurement Company (SPPC), have a combined capacity of 2 GW / 8 GWh and a total investment of approximately SAR 4.35 billion (US\$1.2 billion). Each project will feature 500 MW / 2,000 MWh of storage with 4-hour duration and operate under 15-year service agreements. Three projects were awarded to a consortium including ACWA Power, while the fourth went to an ENGIE-led consortium. The systems are designed to enhance grid flexibility, support renewable energy integration, and help achieve Saudi Arabia's Vision 2030 clean energy goals. A second round of storage tenders totaling 3 GW / 12 GWh is already underway.

RATINGS DEFINITIONS, BENCHMARKS AND DISTRIBUTION**EQUITY RATINGS DEFINITIONS****Bernstein brand**

The Bernstein brand rates stocks based on forecasts of relative performance for the next 12 months versus the S&P 500 for stocks listed on the U.S. and Canadian exchanges, versus the Bloomberg Europe Developed Markets Large and Mid Cap Price Return Index EUR (EDME) for stocks listed on the European exchanges and emerging markets exchanges outside of the Asia Pacific region, versus the Bloomberg Japan Large and Mid Cap Price Return Index USD (JPL) for stocks listed on the Japanese exchanges, and versus the Bloomberg Asia ex-Japan Large and Mid Cap Price Return Index (ASIA) for stocks listed on the Asian (ex-Japan) exchanges - unless otherwise specified.

The Bernstein brand has three categories of ratings:

- Outperform: Stock will outpace the market index by more than 15 pp
- Market-Perform: Stock will perform in line with the market index to within +/- 15 pp
- Underperform: Stock will trail the performance of the market index by more than 15 pp

Coverage Suspended: Coverage of a company under the Bernstein research brand has been suspended. Ratings and price targets are suspended temporarily, are no longer current, and should therefore not be relied upon.

Not Rated: A rating assigned when the stock cannot be accurately valued, or the performance of the company accurately predicted, at the present time. The covering analyst may continue to publish research reports on the company to update investors on events and developments.

Not Covered (NC) denotes companies that are not under coverage.

Bernstein brand stock ratings are based on a 12-month time horizon.

Autonomous brand – common stocks

The Autonomous brand rates common stocks as indicated below. As our benchmarks we use the Bloomberg Europe 600 Financials Price Return Index (E600BK) and Bloomberg Europe Dev Mkt Financials Large and Mid Cap Price Ret Index EUR (EDMFI) index for developed European banks and Payments, the Bloomberg Europe 600 Insurance Price Return Index (E600IN) for European insurers, the S&P 500 and S&P Financials for US banks and Payments coverage, S5LIFE for US Insurance, the S&P Insurance Select Industry (SPSIINS) for US Non-Life Insurers coverage, the Bloomberg Emerging Markets Financials Large, Mid and Small Cap Price Return Index (EMLSF) for emerging market banks and insurers and Payments, and the Bloomberg Japan Financials Large & Mid Cap Price Return Index (JPFILM) for Japanese Financials. Ratings are stated relative to the sector (not the market).

The Autonomous brand has three categories of common stock ratings:

- Outperform (OP): Stock will outpace the relevant index by more than 10 pp
- Neutral (N): Stock will perform in line with the market index to within +/- 10 pp
- Underperform (UP): Stock will trail the performance of the relevant index by more than 10 pp

Coverage Suspended: Coverage of a company under the Autonomous research brand has been suspended. Ratings and price targets are suspended temporarily, are no longer current, and should therefore not be relied upon.

Not Rated: A rating assigned when the stock cannot be accurately valued, or the performance of the company accurately predicted, at the present time. The covering analyst may continue to publish research reports on the company to update investors on events and developments.

Those denoted as 'Feature' (e.g., Feature Outperform FOP, Feature Under Outperform FUP) are our core ideas.

Not Covered (NC) denotes companies that are not under coverage.

Autonomous brand common stock ratings are based on a 12-month time horizon.

Autonomous brand – preferred stocks

The Autonomous brand has three categories of preferred stock ratings:

- Outperform (OP): The total return of the preferred instrument is expected to outperform preferred securities of other issuers operating in similar sectors or rating categories over the next six months.
- Neutral (N): The total return of the preferred instrument is expected to perform in line with preferred securities of other issuers operating in similar sectors or rating categories over the next six months.
- Underperform (UP): The total return of the preferred instrument is expected to underperform preferred securities of other issuers operating in similar sectors or rating categories over the next six months.

Autonomous preferred stock ratings are based on a 6-month time horizon.

AUTONOMOUS CREDIT RESEARCH

The analysis contained herein is based on numerous assumptions. Different assumptions could result in materially different results. The information in this report does not constitute, or form part of, any offer to sell or issue, or any offer to purchase or subscribe for shares, or to induce engagement in any other investment activity. The value of any securities or financial instruments mentioned in this report may fluctuate subject to market conditions. Information about past performance of an investment is not necessarily a guide to, indicative of, or assurance of future performance. Estimates of future performance mentioned by the research analyst in this report are based on assumptions that may not be realized due to unforeseen factors like market volatility/fluctuation. In relation to securities or financial instruments denominated in a foreign currency other than the clients' home currency, movements in exchange rates will have an effect on the value, either favorable or unfavorable. Before acting on any recommendations in this report, recipients should consider the appropriateness of investing in the subject securities or financial instruments mentioned in this report and, if necessary, seek independent professional advice.

The securities described herein may not be eligible for sale in all jurisdictions or to certain categories of investors where that permission profile is not consistent with the licenses held by the entities noted herein. This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject the entities noted herein to any regulation or licensing requirement within such jurisdiction.
