Siemens Energy AG | Europe

Addressing the more ambitious 'bull cases' we hear

ENR's recent share price performance points to the equity story having a bit of an identity crisis. Is it about order trajectory, EBITA upgrades, or EPS and FCF growth? We still see sufficient upgrades to stay OW, but outline why we think some of the more ambitious Gas bull cases look a stretch.

Key Takeaways

- We stick with our Overweight rating on Siemens Energy. We continue to see upside to consensus estimates, and a solid catalyst path into year-end.
- Unusually for an OW, we give our push-backs to some of the more ambitious bull cases we hear, and where we feel narratives may be getting over-extended.
- The 'bull cases' we address: 1) The idea that Gas OE can do 40%+ margins in 2030, 2) The Gas OE revenue debate (price per KW) and 3) Grid valuation vs ABB.
- We are not arguing that ENR cannot work as a stock, but more pointing out were the more extreme arguments on earnings power and visibility may fall down.
- Valuation. ENR still attractive on 12x 2028 EV/EBITA at a discount to both Cap Goods on 12.7x and GEV on 21.6x. We stay OW into FY26 results on 11th November.

Backdrop. Siemens Energy: The Lunar Eclipse. Siemens Energy is a very rare and curious stock and equity story in many ways. Firstly, it is unusual for an Industrial company to gain such widespread attention ownership and attention across generalist and technology investors. Secondly, we have an Overweight rating with a €195 target price (27% upside), yet we spend more time with investors debating and defending why we are not more bullish on the equity story. Perhaps this is because we removed the stock as a top pick on 27th March 2026 ([Link to report](#)), or because we have outlined the significant supply side response in power solutions and behind the meter for data centers in recent reports ([Link to report](#)). To clarify, we have expressed our view on supply demand in behind the meter power solutions through a Downgrade of Wartsila to Underweight ([LINK](#)) on 3rd March 2026, as opposed to a fundamental change in view on Siemens Energy, where we have remained Overweight relative to our broader Cap Goods coverage.

On Siemens Energy, our investment case rests on the idea that there is still upside to 2030 consensus EBIT of 6% in our base case, and 28% in our published bull case. We continue to see earnings momentum as the key driver of the Siemens Energy equity story, and is the key reason for remaining Overweight.

Where we are less convinced is the parallels with Civil Aerospace companies, when in reality Siemens Energy will only be generating ~22% of group EBIT from Gas

turbine aftermarket in 2030. There is considerably more scope for earnings volatility next decade compared to an Civil Aerospace company, in our view. There will continue to be a much greater discussion on the correct terminal margins for Siemens Energy as a whole given the mix of EBITA, as well as how quickly margins may or not get back to these levels. Bottom line, we agree, the valuation on Siemens Energy is too low, and consensus earnings need to move higher, and this keeps risk reward skewed positively into year-end. We stay Overweight into the 11th November full year results and new 2030 targets.

Addressing the three more ambitious 'bull cases' we frequently hear (and where we would disagree).

Bull case #1. The Gas new equipment margin debate, and upside to new Equipment margins of 40%+ by 2030. This is a relatively well trodden argument that we have discussed with the company both at our CEO's unplugged conference in 2025, as well as with divisional management at the 2025 CMD. The argument effectively rests on the idea that pricing has more than doubled new gas turbines, cost inflation is much less, and therefore there is no reason why Gas turbine new equipment margins cannot reach 40%+ this cycle. For reference, MS forecasts are 25% Gas OE margins in 2030.

Where we struggle with this debate is we do not think this stacks up with the disclosure around backlog margin expansion for the Gas new equipment segment (Exhibit 1). At the end of 2025, Siemens Energy's Gas services backlog was €54bn, and this was split between €13bn of backlog in Gas new equipment and €41bn of service backlog. Then, keep in mind, of the €13bn Gas new equipment backlog at year end 2025, a sizable part of this clearly comes from new Gas equipment orders taken in 2025, which were €9.7bn. In 2025, we think the revenues delivered in Gas new equipment (€4.2bn) were being delivered with a ~2% new equipment margin within Gas services.

Then, we look at Exhibit 1, which shows the increase in the Gas services new equipment backlog margin, ie the average improvement in the backlog margin through 2025. This 'only' increased by 5% in 2025 or by 13% in 2022-25. We agree pricing has doubled on Siemens Energy's orders in 2025 vs 2022, but backlog margin expansion would need to be a lot greater than what is shown in Exhibit 1, for us to credible underwrite and increase in new equipment margins of 40%+ in 2030. If the gross margin expansion on recent orders was really that significant, then the new gas equipment orders taken in 2025 would have dragged up backlog margins but a lot more than the ~500bps disclosed by Siemens Energy (or 1300bps across three years).

Where could we be wrong on this. Clearly what is being taken in 2026 in firm orders will make up a reasonable portion of Siemens Energy's 2030 revenues in Gas services new equipment. Siemens Energy reports backlog margin evolution once per year, and clearly a significant step-change in backlog margin improvement in new equipment could point towards higher new equipment margins than the one that we currently forecast.

Exhibit 1: Siemens Energy. Backlog margin improvement across the divisions, and with a split between Gas services new units. The Gas service new unit margin improvement has been significant, but we are not convinced it is enough to argue for the Gas services new equipment delivering 40%+ margins in 2030. For reference, we think 2025 new equipment EBITA margins currently sit at ~2%.

Backlog project margin¹ improvement (in pp)

Source: Siemens Energy FY25 company presentation

Bull case #2. The Gas turbine price per KW debate for Siemens Energy revenues.

Here the 'bull case' goes that revenue estimates need to be a lot higher because price per KW in the market for a new combined cycle gas turbine facility is \$3000+, and gas turbines are around one third of this at \$1000 per KW. Then, the argument is that we need to apply this to Siemens Energy's revenues for 2030. This argument then focuses on the implied Gas services new equipment number in consensus which we estimate to be ~€13.5bn for 2030 being much too low.

It is fair that the consensus estimates are likely a bit low, but we disagree with some of the more sizable buyside estimates we hear, which would argue for €15bn Gas services new equipment revenues at a minimum, or even higher. We think revenue forecasts need to be grounded in the actual disclosed average price per KW that Siemens Energy is taking on new orders. We are happy to go through all the combined cycle vs single cycle, and EUR to USD conversions, but we will keep it simple for illustrative purposes.

If we look at Siemens Energy's new equipment orders we expect these to land at ~49GW for 2026 (combined cycle) with actual Gas service new equipment order value of €21.8bn in 2026. This implies EUR per KW (combined cycle) of €445 per

KW on Gas services new equipment orders taken in 2026 (combined cycle).

If we then assume that 2026 orders are going to ultimately be the driver of 2029-30 deliveries (ie gas services new equipment revenues), and as a reminder Siemens Energy are planning to deliver ~30GW combined cycle in 2030. This gets us to €13.4bn of Siemens Energy Gas services new equipment revenues in 2030 (ie €445 per KW on deliveries, multiplied by 30GW of combined cycle capacity in 2030). We realize that some orders in the next 6-9 months may fall into 2030 deliveries, but the main point is that we would be careful in the assumptions that drive some of the considerably higher revenue forecasts (ie €15bn+). Yes, there are instances of some very high combined cycle power plant costs out there in the market, but this is not a uniform number that should be applied to Siemens Energy's 2030 deliveries, in our view.

We understand the willingness to apply the 'market trends' to Siemens Energy, we think future revenue forecasts are better informed by what we can see from the actual order intake. In addition, we have previously argued that simplistic parallels with GEV are not particularly accurate. GEV's pricing on a (\$ per KW basis) has trended above ENR, and we have attributed this to a higher share of US orders, which we most recently showed in a report ([LINK](#)).

Exhibit 2: Siemens Energy Gas turbine \$ per KW (single cycle) compared with GEV on a calendar reporting basis. We have previously argued that GEV's higher share of US orders will likely result in them receiving potentially higher pricing, as well as higher margins in this capital cycle.

Source: Company data, Morgan Stanley estimates

Bull case #3. Siemens Energy's Grid division is misunderstood and should trade on the same multiple as ABB. Firstly, we should clarify where ABB trades on 2028 estimates as this is not always reflected correctly, from our conversations. ABB trades on 16.1x 2028 EV/EBITA, and this compares to our SOTP multiple of 15x for Siemens Energy's Grid division. For context, our target price of €195 on Siemens Energy is a blend of a €216 SOTP valuation and a €175 DCF (19% Siemens Energy terminal margin from 2032 onwards).

It is fair that Siemens Energy will post higher margins than ABB in 2028. We

forecast Siemens Energy grid margins in 2028 of 24% versus ABB's group margin of 22.3%. In addition, it is fair that Siemens Energy's grid division has a clearly path for future EBITA growth in 2029-30 due to the size of their order backlog.

However, the counter balance for Siemens Energy is the following. Firstly, that historical margins for the high voltage Grid industry are much more volatile. ABB essentially disposed their Power grids business to Hitachi due to concerns around project risk and competition. With hindsight, this was not particularly well timed given the subsequent grid investment up-cycle that followed ABB's disposal, but nonetheless it does speak to aspects of these high voltage grid businesses around the competitive landscape, product differentiation and project risk, which remain true ten years later

We show a history of Siemens Power Transmission and Distribution margins, and the comparable ABB division which was disposed of to Hitachi in [Exhibit 3](#). Put simply, Siemens Energy's Grid margins could be cut in half from our current 2028 forecasted levels (24%), and they would still look relatively attractive from a historical perspective.

While we do not expect such a downturn to occur any time soon, it has to be reflected somewhat in valuation when thinking about terminal profitability for the asset. In our view, it is the risk around Siemens Energy's terminal margins that will ultimately dampen the valuation that investors are willing to place on 2028 and 2030 earnings.

One final separate point we hear from the bulls is that Siemens' Grid revenues could double again by 2030 from a 2026 base line of ~€14bn. We also disagree with this because we simply do not think that Siemens Energy have sufficient production capacity to deliver another doubling of revenues for the division.

Exhibit 3: Power Transmission and Distribution historical margin. We show the Siemens Power Transmission and distribution EBITA and ABB's Power Transmission division which subsequently was disposed of to Hitachi. We forecast much higher margins this cycle for Siemens Energy's Grid division at 25% in 2030. While we do not think any material normalization in margins happens any time soon for Siemens Energy, we do think the history of EBITA margins in previous cycles will continue to influence terminal margins. In a DCF, we think Siemens Energy group is currently priced for a 16% terminal margin (~20% in Gas, and 16% in Grid).

Source: Company Data, Morgan Stanley Research

Valuation. Siemens Energy is trading on 12x 2028e EV/EBITA, which is still a discount to our broad European Cap Goods coverage which trades on 12.7x. We think this is relatively undemanding, given our forecast for ongoing >20% EBITA growth for Siemens Energy per year in 2029 and 2030. We also see Wartsila (UW) trading at a small premium to Siemens Energy on 12.3x 2028e EV/EBITA, and we continue to view their product offering, margin potential, Marine business, as less attractive compared to what we see at Siemens Energy. For context, Siemens Energy's valuation also looks attractive relative to GE Vernova (covered by David Arcaro), which is still trading on 21.7x 2028e EV/EBITA. This still implies that Siemens Energy is trading at a 45% discount to GE Vernova on 2028e multiples, versus this discount being in a 25-50% range in the last 12 months.

When we look at GE Vernova, we do see reasons for the premium. In our view, GEV has greater visibility from customer commitments in Gas, we think they have likely pushed service pricing more aggressively, and they have higher share of US Gas orders. We also think their wind strategy has been preferable for shareholders, with GEV placing less emphasis on offshore going forward. Finally, GEV's hyperscaler exposure in Grid is arguably growing also at a faster rate due to their Prolec acquisition.

That said, we still think something more in the 25% discount range is appropriate when we think about where Siemens Energy should trade relative to GE Vernova. For context, similar EU vs US businesses like Schneider's discount to Eaton, currently sits at a 25% discount on 2027 EV/EBITA.

Exhibit 4: Total customer commitments continue increasing sequentially (calendar dates). Siemens Energy's step up of 8 GW also included 6 GW of deliveries this quarter. Siemens Energy expects to end the fiscal year at the upper end of its 90-100GW of 'customer commitments'. We think this implies ~9GW of firm order intake into 4Q26.

Source: Company Data, Morgan Stanley Research

Exhibit 5: ENR vs GEV EBITDA Margins in Gas Turbine Division. We find that the investor expectations tend to be more optimistic for GE Vernova's mid-term gas margins compared to Siemens Energy. In reality, so far, the two margins have broadly tracked each other as they have moved higher.

Source: Company Data, Morgan Stanley Research

Morgan Stanley & Co. International plc ("Morgan Stanley") has acted as advisor to WARTSILA OYJ ABP ("WARTSILA") in relation to the assessment of strategic options for its global Energy Storage business. WARTSILA has announced on 15th June 2026 that it will establish a joint venture for its global Energy Storage business with RCT Solutions GmbH. WARTSILA has agreed to pay fees to Morgan Stanley for its financial services. Please refer to the notes at the end of the report

Valuation Methodology and Risks

ABB (ABB.N.S)

Our price target is the average of two methods: (1) a FY27 SotP in which multiples are applied to each division based on key peer averages, resulting in the group being valued at ~20.5x 2027 EV/EBITA and 4.4x EV/sales; (2) a DCF, reflecting a WACC of 6.4% and a terminal growth rate of 2.5%.

Risks to Upside

Value accretive M&A to accelerate earnings growth, turn-around of the Robotics and Discrete Automation business. Re-rating towards a Schneider multiple

Risks to Downside

Margin normalization in Electrification, slowdown in later-cycle process capex for ABB's Process Automation and Motion division. Increased competition in Robotics

Siemens Energy AG (ENR1n.DE)

Our price target is the average of two valuation methods: 1) a 2028 SOTP approach in which we benchmark Gas Services, Grid Technologies and Transformation of Industries against key peers such as GE Vernova, Mitsubishi and Hitachi. Our derived EV value is an average of applying 2028 EV/EBIT multiples (averaging out at 18x); and 2) a DCF valuation, assuming an 7.8% WACC and 2% terminal growth rate.

Risks to Upside

- Accelerated coal-to-gas transition, particularly in large markets such as China
- Higher than anticipated cost savings
- Favourable regulatory changes, e.g. on hydrogen and wind

Risks to Downside

- Timing delays in contract awards due to permitting processes, policy and other geopolitical factors
- Project risks, particularly on large generation projects and at SGRE
- Accelerated shift from coal to renewables vs coal to gas

Wartsila Oyj Abp (WRT1V.HE)

Our PT is an average of: 1) a SOTP valuation where we apply peer multiples to our 2027e forecasts. Our aggregate target multiple on Wartsila is 15x, and 2) a DCF using a 8.4% WACC and a terminal growth rate of 2%.

Risks to Upside

Energy margins increasing faster than we expect, and a re-acceleration in the Marine equipment cycle. Also, increased adoption of Wartsila solutions in Energy to data center applications, thereby increasing Wartsila's market share in Energy.

Risks to Downside

The greatest downside risk is pricing pressure due to over-capacity in Energy markets. Also, execution of the relatively large backlog.

Important Regulatory Disclosures on Subject Companies

As of July 31, 2026, Morgan Stanley beneficially owned 1% or more of a class of common equity securities of the following companies covered in Morgan Stanley Research: Alstom, AutoStore Holdings Ltd-W/I, GEA Group AG, Halma PLC, KION Group AG, Legrand, Prysmian SpA, Rexel S.A., Rotork PLC, Schindler Holding AG, Schneider Electric, **Siemens Energy AG**, Signify NV, SKF, Spirax Group PLC, Weir Group PLC.

Within the last 12 months, Morgan Stanley managed or co-managed a public offering (or 144A offering) of securities of Schneider Electric.

Within the last 12 months, Morgan Stanley has received compensation for investment banking services from AutoStore Holdings Ltd-W/I, Schneider Electric, Siemens.

In the next 3 months, Morgan Stanley expects to receive or intends to seek compensation for investment banking services from ABB, Alfa Laval AB, Alstom, Assa Abloy AB, Atlas Copco, AutoStore Holdings Ltd-W/I, Epiroc AB, GEA Group AG, Halma PLC, KION Group AG, Knorr Bremse AG, Kone Oyj, Legrand, Metso Corporation, Prysmian SpA, Rotork PLC, Sandvik, Schindler Holding AG, Schneider Electric, Siemens, **Siemens Energy AG**, SKF, Spirax Group PLC, Wartsila Oyj Abp, Weir Group PLC.

Within the last 12 months, Morgan Stanley has received compensation for products and services other than investment banking services from ABB, Alstom, AutoStore Holdings Ltd-W/I, KION Group AG, Legrand, Prysmian SpA, Schneider Electric, Siemens, **Siemens Energy AG**, Signify NV, Vestas Wind Systems A/S.

Within the last 12 months, Morgan Stanley has provided or is providing investment banking services to, or has an investment banking client relationship with, the following company: ABB, Alfa Laval AB, Alstom, Assa Abloy AB, Atlas Copco, AutoStore Holdings Ltd-W/I, Epiroc AB, GEA Group AG, Halma PLC, KION Group AG, Knorr Bremse AG, Kone Oyj, Legrand, Metso Corporation, Prysmian SpA, Rotork PLC, Sandvik, Schindler Holding AG, Schneider Electric, Siemens, **Siemens Energy AG**, SKF, Spirax Group PLC, Wartsila Oyj Abp, Weir Group PLC.

Within the last 12 months, Morgan Stanley has either provided or is providing non-investment banking, securities-related services to and/or in the past has entered into an agreement to provide services or has a client relationship with the following company: ABB, Alstom, AutoStore Holdings Ltd-W/I, KION Group AG, Legrand, Prysmian SpA, Schneider Electric, Siemens, **Siemens Energy AG**, Signify NV, Vestas Wind Systems A/S.

Morgan Stanley & Co. International plc is a corporate broker to Halma PLC, Spirax Group PLC.

The equity research analysts or strategists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality of research, investor client feedback, stock picking, competitive factors, firm revenues and overall investment banking revenues. Equity Research analysts' or strategists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

Morgan Stanley and its affiliates do business that relates to companies/instruments covered in Morgan Stanley Research, including market making, providing liquidity, fund management, commercial banking, extension of credit, investment services and investment banking. Morgan Stanley sells to and buys from customers the securities/instruments of companies covered in Morgan Stanley Research on a principal basis. Morgan Stanley may have a position in the debt of the Company or instruments discussed in this report. Morgan Stanley trades or may trade as principal in the debt securities (or in related derivatives) that are the subject of the debt research report.

Certain disclosures listed above are also for compliance with applicable regulations in non-US jurisdictions.

STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Global Stock Ratings Distribution

(as of July 31, 2026)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm.

For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated

and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.

Stock Rating Category	Coverage Universe		Investment Banking Clients (IBC)			Other Material Investment Services Clients (MISC)	
	Count	% of Total	Count	% of Total IBC	% of Rating Category	Count	% of Total Other MISC
Overweight/Buy	1529	42%	442	47%	29%	750	43%
Equal-weight/Hold	1582	43%	396	42%	25%	773	44%
Not-Rated/Hold	3	0%	1	0%	33%	1	0%
Underweight/Sell	560	15%	97	10%	17%	217	12%
Total	3,674		936			1741	

Data include common stock and ADRs currently assigned ratings. Investment Banking Clients are companies from whom Morgan Stanley received investment banking compensation in the last 12 months. Due to rounding off of decimals, the percentages provided in the "% of total" column may not add up to exactly 100 percent.

Analyst Stock Ratings

Overweight (O). The stock's total return is expected to exceed the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Equal-weight (E). The stock's total return is expected to be in line with the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Not-Rated (NR). Currently the analyst does not have adequate conviction about the stock's total return relative to the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Underweight (U). The stock's total return is expected to be below the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Unless otherwise specified, the time frame for price targets included in Morgan Stanley Research is 12 to 18 months.

Analyst Industry Views

Attractive (A): The analyst expects the performance of his or her industry coverage universe over the next 12-18 months to be attractive vs. the relevant broad market benchmark, as indicated below.

In-Line (I): The analyst expects the performance of his or her industry coverage universe over the next 12-18 months to be in line with the relevant broad market benchmark, as indicated below.

Cautious (C): The analyst views the performance of his or her industry coverage universe over the next 12-18 months with caution vs. the relevant broad market benchmark, as indicated below.

Benchmarks for each region are as follows: North America - S&P 500; Latin America - relevant MSCI country index or MSCI Latin America Index; Europe - MSCI Europe; Japan - TOPIX; Asia - relevant MSCI country index or MSCI sub-regional index or MSCI AC Asia Pacific ex Japan Index.

Important Disclosures for Morgan Stanley Smith Barney LLC Customers

Important disclosures regarding any material conflict of interest that can reasonably be expected to have influenced Morgan Stanley Smith Barney LLC's choice of a third-party research provider or the subject company of a third-party research report, are available on the Morgan Stanley Wealth Management disclosure website at www.morganstanley.com/online/researchdisclosures. For Morgan Stanley specific disclosures, you may refer to <https://www.morganstanley.com/eqr/disclosures/webapp/generalresearch>.

Each Morgan Stanley research report is reviewed and approved on behalf of Morgan Stanley Smith Barney LLC. This review and approval is conducted by the same person who reviews the research report on behalf of Morgan Stanley. This could create a conflict of interest.

Other Important Disclosures

Morgan Stanley Research policy is to update research reports as and when the Research Analyst and Research Management deem appropriate, based on developments with the issuer, the sector, or the market that may have a material impact on the research views or opinions stated therein. In addition, certain Research publications are intended to be updated on a regular periodic basis (weekly/monthly/quarterly/annual) and will ordinarily be updated with that frequency, unless the Research Analyst and Research Management determine that a different publication schedule is appropriate based on current conditions.

Morgan Stanley is not acting as a municipal advisor and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act.

Morgan Stanley produces an equity research product called a "Tactical Idea." Views contained in a "Tactical Idea" on a particular stock may be contrary to the recommendations or views expressed in research on the same stock. This may be the result of differing time horizons, methodologies, market events, or other factors. For all research available on a particular stock, please contact your sales representative or go to Matrix at <http://www.morganstanley.com/matrix>.

Morgan Stanley Research is provided to our clients through our proprietary research portal on Matrix and also distributed electronically by Morgan Stanley to clients. Certain, but not all, Morgan Stanley Research products are also made available to clients through third-party vendors or redistributed to clients through alternate electronic means as a convenience. For access to all available Morgan Stanley Research, please contact your sales representative or go to Matrix at <http://www.morganstanley.com/matrix>.

Any access and/or use of Morgan Stanley Research is subject to Morgan Stanley's Terms of Use (<http://www.morganstanley.com/terms.html>). By accessing and/or using Morgan Stanley Research, you are indicating that you have read and agree to be bound by our Terms of Use (<http://www.morganstanley.com/terms.html>). In addition you consent to Morgan Stanley processing your personal data and using cookies in accordance with our Privacy Policy and our Global Cookies Policy (http://www.morganstanley.com/privacy_pledge.html), including for the purposes of setting your preferences and to collect readership data so that we can deliver better and more personalized service and products to you. To find out more information about how Morgan Stanley processes personal data, how we use cookies and how to reject cookies see our Privacy Policy and our Global Cookies Policy (http://www.morganstanley.com/privacy_pledge.html). Please use the provided link to review the Terms and Conditions and Most Important Terms and Conditions for Morgan Stanley India Company Private Limited (https://www.morganstanley.com/assets/pdfs/about-us-global-offices/india/Terms_and_conditions.pdf) and the following link to review the audit report (https://ny.matrix.ms.com/eqr/research/webapp/researchdocs/MSICPL_Morgan_Stanley_Research_Audit_Report.pdf).

If you do not agree to our Terms of Use and/or if you do not wish to provide your consent to Morgan Stanley processing your personal data or using cookies please do not access our research.

Morgan Stanley Research does not provide individually tailored investment advice. Morgan Stanley Research has been prepared without regard to the circumstances and objectives of those who receive it. Morgan Stanley recommends that investors independently evaluate particular investments and strategies, and encourages investors to seek the advice of a financial adviser. The appropriateness of an investment or strategy will depend on an investor's circumstances and objectives. The securities, instruments, or strategies discussed in Morgan Stanley Research may not be suitable for all investors, and certain investors may not be eligible to purchase or participate in some or all of them. Morgan Stanley Research is not an offer to buy or sell or the solicitation of an offer to buy or sell any security/instrument or to participate in any particular trading strategy. The value of and income from your investments may vary because of changes in interest rates, foreign exchange rates, default rates, prepayment rates, securities/instruments prices, market indexes, operational or financial conditions of companies or other factors. There may be time limitations on the exercise of options or other rights in securities/instruments transactions. Past performance is not necessarily a guide to future performance. Estimates of future performance are based on assumptions that may not be realized. If provided, and unless otherwise stated, the closing price on the cover page is that of the primary exchange for the subject company's securities/instruments.

The fixed income research analysts, strategists or economists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality, accuracy and value of research, firm profitability or revenues (which include fixed income trading and capital markets profitability or revenues), client feedback and competitive factors. Fixed Income Research analysts', strategists' or economists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

The "Important Regulatory Disclosures on Subject Companies" section in Morgan Stanley Research lists all companies mentioned where Morgan Stanley owns 1% or more of a class of common equity securities of the companies. For all other companies mentioned in Morgan Stanley Research, Morgan Stanley may have an investment of less than 1% in securities/instruments or derivatives of securities/instruments of companies and may trade them in ways different from those discussed in Morgan Stanley Research. Employees of Morgan Stanley not involved in the preparation of Morgan Stanley Research may have investments in securities/instruments or derivatives of securities/instruments of companies mentioned and may trade them in ways different from those discussed in Morgan Stanley Research. Derivatives may be issued by Morgan Stanley or associated persons.

With the exception of information regarding Morgan Stanley, Morgan Stanley Research is based on public information. Morgan Stanley makes every effort to use reliable, comprehensive information, but we make no representation that it is accurate or complete. We have no obligation to tell you when opinions or information in Morgan Stanley Research change apart from when we intend to discontinue equity research coverage of a subject company. Facts and views presented in Morgan Stanley Research have not been reviewed by, and may not reflect information known to, professionals in other Morgan Stanley business areas, including investment banking personnel.

Morgan Stanley Research personnel may participate in company events such as site visits and are generally prohibited from accepting payment by the company of associated expenses unless pre-approved by authorized members of Research management.

Morgan Stanley may make investment decisions that are inconsistent with the recommendations or views in this report.

To our readers based in Taiwan or trading in Taiwan securities/instruments: Information on securities/instruments that trade in Taiwan is distributed by Morgan Stanley Taiwan Limited ("MSTL"). Such information is for your reference only. The reader should independently evaluate the investment risks and is solely responsible for their investment decisions. Morgan Stanley Research may not be distributed to the public media or quoted or used by the public media without the express written consent of Morgan Stanley. Any non-customer reader within the scope of Article 7-1 of the Taiwan Stock Exchange Recommendation Regulations accessing and/or receiving Morgan Stanley Research is not permitted to provide Morgan Stanley Research to any third party (including but not limited to related parties, affiliated companies and any other third parties) or engage in any activities regarding Morgan Stanley Research which may create or give the appearance of creating a conflict of interest. Information on securities/instruments that do not trade in Taiwan is for informational purposes only and is not to be construed as a recommendation or a solicitation to trade in such securities/instruments. MSTL may not execute transactions for clients in these securities/instruments.

Morgan Stanley is not incorporated under PRC law and the research in relation to this report is conducted outside the PRC. Morgan Stanley Research does not constitute an offer to sell or the solicitation of an offer to buy any securities in the PRC. PRC investors shall have the relevant qualifications to invest in such securities and shall be responsible for obtaining all relevant approvals, licenses, verifications and/or registrations from the relevant governmental authorities themselves. Neither this report nor any part of it is intended as, or shall constitute, provision of any consultancy or advisory service of securities investment as defined under PRC law. Such information is provided for your reference only.
