

## Korea Utilities and Nuclear EPC

Korea nuclear update: 8+ nuclear reactors reportedly in discussion as part of Korea's US investment framework

Korean nuclear stocks have largely underperformed the KOSPI over the past month (Hyundai E&C -3%, KEPCO -6%, Doosan Enerbility -7% vs KOSPI +1% m/m), with KEPCO E&C (+5%) being the exception, despite Korea confirming the \$22.3bn Texas Encinal LNG CCPP (combined-cycle power plant) as its first US investment and negotiating to build 8+ large reactors in the US. The ~\$10bn early disbursement will be channeled into long-lead nuclear equipment pre-orders, though the official announcement is delayed due to remaining US-side procedures. Globally, Poland's first nuclear project has moved closer to contract finalization, with the full EPC contract expected to be concluded by year-end. We remain constructive on Korean nuclear EPC names, with Doosan Enerbility (Doosan) as our top pick.

- **\$22.3bn Texas LNG CCPP was selected as Korea's first US investment project**, though the official announcement is being delayed likely due to remaining internal procedures on the US side, according to [media reports](#). Korea and the US are reportedly negotiating a framework to build at least eight large reactors in the US. This would be supportive for all three Korean nuclear EPC names we cover, though the magnitude of benefit would vary depending on the mix between AP1000 and APR1400 (see our [report](#) on the scenario analysis). The two governments also agreed to channel the ~\$10bn early disbursement into pre-ordering long-lead nuclear equipment, a near-term new order catalyst for Doosan.
- **Other developments globally.** In Europe, Poland's first nuclear project has moved closer to contract finalization, with the full EPC contract expected to be concluded by year-end. It is also noteworthy that EDF's SMR subsidiary announced plans to deploy 10 SMR units across five EU countries from 2030. In the US, GE Vernova Hitachi's BWRX-300 is nearing construction permit approval at Clinch River, which should be supportive for broader SMR sentiment. In contrast, Holtec is delaying the restart of Michigan's Palisades nuclear plant following an issue during refueling, which could weigh on sentiment for the Palisades SMR project planned adjacent to the site.
- **Maintain constructive view on Korea nuclear EPC sector. Our top pick is Doosan**, led by its expanding order book and well-balanced portfolio across large-scale nuclear plants, SMRs, and gas turbine projects. **We prefer nuclear EPC companies Doosan, KEPCO E&C and Hyundai E&C (all OW) over KEPCO (UW)**, given: 1) crystallizing catalysts from overseas nuclear EPC opportunities; and 2) relatively small policy risks vs KEPCO.
- **Potential catalysts for the sector include:** 1) Further progress on Korea-led nuclear projects, including in Vietnam and the US; 2) new nuclear projects from big tech companies and governments; and 3) a revision of the Korea-US Nuclear Cooperation Agreement granting Korea greater opportunities.

| Bulgaria       | AP1000 has been selected. HDEC signed an engineering contract for the new capacity, with ministers saying that signing the contract meant that schedule and finance details would be firmed up by the end of 2026. The Ministry of Energy and the US's Citi agreed on a partnership in July to secure funding for the construction of the new units, and site location applications have been submitted in 2025. | 2x1200  | 2026 (JPMe)                                        |
| Slovakia       | Slovakia and the US signed an agreement to advance Slovakia's nuclear program—including a planned 1,200 MWe unit at Bohunice targeted for 2040/41.                                                                                                                                                                                                                                                               | 1x1200  | n/a                                                |
| Slovenia       | Technical feasibility study completed - both AP1000 and EDF design suitable.                                                                                                                                                                                                                                                                                                                                     | 2x1200  | 2027 (Company estimates)                           |
| Finland        | Early Works Agreement was signed for the possible deployment of an AP1000.                                                                                                                                                                                                                                                                                                                                       |         | 2028 (Company estimates)                           |
| Poland         | Poland's nuclear agency PEJ submitted a construction permit application for its first nuclear project in Pomerania (three AP1000 units, ~€42bn), while agreeing on main commercial and legal terms of the EPC contract with the US consortium, with full contract negotiations expected to conclude by year-end. First concrete is targeted for 4Q28, with commercial operation planned for 2036-2038.           | 3x1200  | 2027 (JPMe)                                        |
| Sweden         | In November 2023, Sweden unveiled a roadmap which envisages the construction of new nuclear generating capacity equivalent to at least two large-scale reactors by 2035. A new act on state aid entered into force on 1 August 2025, since when interested companies have been able to apply for the aid.                                                                                                        | 2 units | 2029 (Company estimates)                           |
| Czech          | In addition to Dukovany project, two more units at the Temelin Nuclear Power Plant are also being considered.                                                                                                                                                                                                                                                                                                    | 2 units | 2028 (Company estimates)                           |

| NuScale     | US        | ENTRA1-TVA initiative targeting 6GW of new nuclear capacity using NuScale Power Modules has moved into detailed site evaluation, with four candidate sites identified and a term sheet signed with a major financial institution.                                                                                                                                                                                                                                                                     | Operation targeted in 2030                    |
|             | Romania   | has approved the final investment decision for a 462 MW SMR plant in Doicești, Romania, using NuScale's American SMR technology.                                                                                                                                                                                                                                                                                                                                                                      | Operation targeted in 2034                    |
|             | Indonesia | Indonesia has officially approved a US SMR partnership, selecting NuScale Power as the developer and confirming a NuScale SMR project.                                                                                                                                                                                                                                                                                                                                                                | Operation targeted in 2034                    |
| X-energy    | US        | Amazon has released a series of images of how its planned X-energy small modular reactor plant - to be named the Cascade Advanced Energy Facility - will look as it gave an update on progress a year after announcing its investment plans.                                                                                                                                                                                                                                                          | Completion by 2039                            |
|             | US        | Dow and X-energy submitted construction permit application to the US Nuclear Regulatory Commission for proposed advanced nuclear project in Texas.                                                                                                                                                                                                                                                                                                                                                    | Potential to commercialize in the mid-2030s   |
|             | US        | Talen Energy and X-energy signed LOI (Letter of Intent) to assess deploying XE-100 SMR in Pennsylvania and across the PJM market.                                                                                                                                                                                                                                                                                                                                                                     | n/a                                           |
|             | UK        | Centrica and X-energy signed a JDA (Joint Development Agreement) to deploy Xe-100 SMRs in the UK.                                                                                                                                                                                                                                                                                                                                                                                                     | Operation expected in mid-2030s               |
| TerraPower  | US        | TerraPower officially broke ground on its 345MWe Sodium plant (Kemmerer Unit 1) in Wyoming, with completion expected by 2030 under the DOE's Advanced Reactor Demonstration Program. The company expects to announce its second project within 2026, with groundbreaking planned for 2027. Separately, Meta announced in January plans to fund up to eight Sodium units totaling 2.8GW by 2035. HDEC has been selected as TerraPower's preferred EPC partner and Doosan for core components supplier. | Completion targeted for 2030                  |
| GE Hitachi  | US        | The US and Japan have announced a second tranche of Japanese investments that includes ~\$40bn for GVH to build SMR power plants in Tennessee and Alabama. The US NRC aims to complete the construction permit for GE Vernova Hitachi's BWRX-300 SMR at the Clinch River site in Tennessee by Sept 30th.                                                                                                                                                                                              | Operation targeted for early 2030s            |
|             | Canada    | The first BWRX-300 is currently under construction at Ontario Power Generation's Darlington site in Canada.                                                                                                                                                                                                                                                                                                                                                                                           | Operation targeted for 2030                   |
|             | Lithuania | Lithuania signed an MOU with Poland's SGE, Altra, and GE Hitachi to assess the 300 MWe BWRX-300's technical, licensing, and economic feasibility.                                                                                                                                                                                                                                                                                                                                                     | Operations targeted in 2038                   |
| Rolls-Royce | UK        | UK decided to provide regulatory justification for the Rolls-Royce SMR design - the first small modular reactor to receive this approval.                                                                                                                                                                                                                                                                                                                                                             | Final investment decision is expected in 2029 |
|             | Czech     | Czech Republic will sign an agreement with Rolls-Royce SMR to begin preparations for SMRs at Dětmarovice and Tušimice, both former coal plant sites, extending beyond the first planned SMR at Temelín. ČEZ, which owns ~20% of Rolls-Royce SMR, plans to develop up to 3 GW of SMR capacity in the country.                                                                                                                                                                                          | Completion target in mid-2030s                |
|             | Sweden    | Rolls-Royce SMR was selected to supply three SMRs for Sweden's first new nuclear power plant in over 40 years, adding 1.5 GW of capacity to the grid.                                                                                                                                                                                                                                                                                                                                                 | Operation targeted in mid-2030s               |

| Company                 | Ticker    | Description                                                                                                                                                                                                                                                                                                                  | Mkt cap (\$mn) | Daily liquidity (\$mn) | FCF yield (%) | ROE (%) | Net D/E (2025) | P/E (2025) | P/B (2025) | Foreign ownership % |
|-------------------------|-----------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|------------------------|---------------|---------|----------------|------------|------------|---------------------|
| Doosan Enerbility       | 034020 KS | Doosan Enerbility produces gas turbines, engines, turbine generators, boilers, power plant equipment, and other related products. Doosan Enerbility also offers energy solutions for thermal power, nuclear power, and renewable energy.                                                                                     | 38,612         | 480.7                  | 0.1           | 2.3     | 24.9           | 621.2      | 6.8        | 22.7                |
| Samsung C&T             | 028260 KS | Samsung C&T offers a range of services in areas including clothing retail, construction (including nuclear powerplants), energy, real estate, food service, and resort accommodations. Samsung C&T also operates a resort with amusement rides, a zoo, water park, golf clubs, and restaurants.                              | 41,187         | 133.6                  | 6.8           | 4.0     | -2.7           | 23.2       | 1.1        | 30.7                |
| KEPCO                   | 015760 KS | KEPCO generates, transmits, and distributes electricity to South Korea for a variety of uses. The Company also builds and operates hydro-power, thermal-power, and nuclear power units in South Korea.                                                                                                                       | 14,488         | 55.6                   | 8.1           | 16.8    | 258.0          | 2.3        | 0.4        | 20.6                |
| HD Hyundai Electric     | 267260 KS | HD Hyundai Electric manufactures and distributes electrical machinery. The Company produces power transformer, gas insulated switchgear, high and low voltage motor, generator, distribution transformer, circuit breaker, and other related products.                                                                       | 18,363         | 82.0                   | 2.7           | 43.7    | -34.9          | 34.0       | 12.3       | 34.2                |
| Hyundai E&C             | 000720 KS | Hyundai E&C, a general construction company, provides civil engineering, architectural, industrial, and electrical engineering services. The Company constructs roadways, dams, bridges, ports, industrial plants, apartment complexes, and cultural facilities.                                                             | 10,200         | 161.2                  | -5.7          | 5.1     | -11.7          | 37.5       | 1.6        | 24.9                |
| KEPCO E&C               | 052690 KS | KEPCO E&C designs nuclear and conventionally-fueled electricity generating plants. The Company also provides power plant engineering services and consulting services to power industry.                                                                                                                                     | 3,546          | 235.1                  | -0.5          | 6.0     | -26.8          | 56.2       | 7.7        | 11.4                |
| KEPCO KPS               | 051600 KS | KEPCO KPS provides maintenance services for power plants and industrial plants. The Company's main service areas are turbine maintenance, generator and motor maintenance, pump maintenance, and boiler maintenance.                                                                                                         | 1,535          | 10.0                   | 1.4           | 10.0    | -28.4          | 16.8       | 1.6        | 8.3                 |
| BHI                     | 083650 KS | BHI manufactures power plant equipment. The Company's product includes boiler, condenser, and heat exchangers for nuclear power plants.                                                                                                                                                                                      | 1,376          | 53.9                   | 6.9           | 29.4    | 19.6           | 28.7       | 10.5       | 7.5                 |
| Daewoo E&C              | 047040 KS | Daewoo E&C is a general engineering constructor. The Company's projects include architectural works, such as commercial buildings, public facilities, schools, hospitals, and civil works, such as highways, ports, tunnels, railways, and dams. Daewoo E&C also constructs power plants including nuclear power plants.     | 5,642          | 133.9                  | n/a           | -14.3   | 51.8           | -8.4       | 2.3        | 9.5                 |
| Woori Technology        | 032820 KS | Woori Technology manufactures and sells communications devices, such as audio video receivers (AVR) and digital convergence platform (DCP). The company develops and supplies monitoring, alarm, and control systems for nuclear power plants.                                                                               | 1,614          | 70.6                   | n/a           | 13.7    | 122.6          | 2,647.9    | 16.8       | 4.8                 |
| KISCO Corp              | 104700 KS | KISCO Corp provides a wide range of steel products. The company produces deformed bars including high tensile steel bars for nuclear power plants and low-alloy steel bars for liquefied natural gas underground storage facilities.                                                                                         | 257            | 0.2                    | -1.4          | -2.1    | -55.4          | -35.4      | 0.4        | 5.3                 |
| Soosan Industries       | 126720 KS | Soosan Industries operates as plant facilities and maintenance company. The company provides nuclear power, thermal power, new generation, electric work, plant construction, and other related power generation facility maintenance services. Soosan Industries also offers nuclear fuel transportation services.          | 226            | 0.5                    | 7.8           | 13.7    | -28.3          | 6.2        | 0.6        | 2.8                 |
| Dawonsys                | 068240 KS | Dawonsys operates special power generating business such as Nuclear Fusion, Industrial Electric and Plasma Power business. The Company also operates Inductive Heating and ESD Polyimide Film Business.                                                                                                                      | 71             | n/a                    | n/a           | n/a     | n/a            | -0.5       | -0.2       | 5.2                 |
| Woojin                  | 105840 KS | Woojin produces industrial measuring instruments. The company manufactures nuclear instruments, temperature sensors, and other products.                                                                                                                                                                                     | 201            | 6.2                    | -3.2          | 6.1     | -21.8          | 30.8       | 1.4        | 5.5                 |
| Woojin Ntec             | 457550 KS | Woojin Ntec operates as a power generation facility maintenance company. The company provides maintenance services for measurement and control equipment of nuclear power plants and thermal power plants.                                                                                                                   | 95             | 0.9                    | 4.1           | 12.4    | -57.6          | 24.4       | 2.5        | 2.8                 |
| Bosung Power Technology | 006910 KS | Bosung Power Technology manufactures and markets a diverse line of power supply materials and equipment. The company's products include high voltage breakers, transmission towers, steel poles, power safety devices, and underground cable fittings.                                                                       | 262            | 8.0                    | 4.1           | 15.6    | -45.2          | 17.5       | 3.2        | 3.5                 |
| Iljin Power             | 094820 KS | Iljin Power designs and manufactures a variety of industrial machineries. The company's products include heat exchangers, pressure vessels, distillation systems, reaction vessels, and storage tanks. It also provides construction, maintenance, and repair services for industrial plants including nuclear power plants. | 132            | 1.5                    | 3.0           | 15.8    | 8.0            | 9.5        | 1.2        | 3.5                 |
| Mobiis                  | 250060 KS | Mobiis markets and supplies control function systems and equipments. The Company produces accelerators, nuclear fusion, machine learnings, and other products.                                                                                                                                                               | 73             | 0.4                    | -0.5          | -4.9    | -98.2          | -93.3      | 2.9        | 3.5                 |
| Enertork                | 019990 KS | Enertork develops, manufactures, sells electric actuator for plants including nuclear power plants. The actuator is an automatic control machine attached in valve or floorgate.                                                                                                                                             | 37             | 0.4                    | -2.4          | -8.0    | -21.1          | -12.0      | 1.3        | 11.6                |

## Industry news

### Korea

#### Delay in US investment announcement

The official announcement of the first US investment project is delayed likely due to remaining internal procedures on the US side. The process requires the US President to finalize investment selections based on recommendations from the Commerce Secretary's investment committee. A Korean government official clarified that no new issues have emerged, and working-level procedures are known to be completed (*Yonhap*).

#### Korea to build 8+ reactors in US under nuclear framework

Korea and the US are negotiating a framework to build at least eight large reactors in the US, including two APR1400 units, funded through a Korean-US investment fund. For APR1400 units, Korea would pay ~\$2bn per unit in technology and fuel fees under a prior agreement made in January 2025 (*Maeil Economics*).

#### Texas CCPP confirmed as first US investment project

Korea confirmed a \$22.3bn Texas Encinal CCPP as its first US investment project, with a total capacity of 6.3GW, expecting to recover \$43.3-45.4bn over 20 years. Two additional projects, eight large reactors in the US and an Alaska LNG development, remain under further discussion, while capping total US investment at \$200bn (*Yonhap*).

#### ~\$10bn early disbursement via nuclear equipment pre-orders

Korea and the US agreed to channel the ~\$10bn early disbursement of the US strategic investment into pre-ordering long-lead nuclear equipment, which typically takes four to five years from order to delivery. This approach allows the US to accelerate its nuclear project timelines while Korea reduces the burden of early cash outlays (*Sedaily*).

#### Government proposes nuclear firms join equity investment in US nuclear firm

The Korean government has asked major nuclear EPC firms including Doosan Enerbility, Samsung C&T, Hyundai E&C, DL and SK Ecoplant to jointly acquire a stake in the major US nuclear company, up to \$30bn (₩4tn), aiming to secure a nuclear alliance and minimize individual financial burdens (*Hankyung*).

#### SMR construction at retired coal plant sites under review

12th Basic Plan could propose building SMRs at retired coal plant sites, while retaining around 10 of the 21 units with remaining lifespans beyond 2040 as emergency security power reserves, and converting others to LNG or pumped-storage facilities (*Yonhap*).

#### SMR and data center proposed for Kori Unit 1 site

Korea Atomic Energy Research Institute proposed at a government forum that the Kori #1 site could be repurposed for SMR or data center construction after decommissioning is completed around 2037, marking the first official post-decommissioning land use plan since the unit received dismantlement approval last year (*Kookje*).

#### Korea and France deepen nuclear and tech cooperation

President Lee and President Macron agreed to strengthen cooperation on next-generation reactor development, SMR joint research and uranium enrichment across the full nuclear cycle, while signing 16 documents including 9 MOUs covering AI,

quantum, space, bio and nuclear sectors during Lee's state visit to Paris (*Hankyung*).

## **Global**

### **Polish plant contract negotiations move to next stage**

US consortium and PEJ have agreed on the main commercial and legal terms of the EPC contract for Poland's first nuclear project at Lubiatowo-Kopalino, with full contract negotiations expected to be concluded by year-end. Bechtel assumed management of the project site in August as earthworks began, while the second phase of preparatory work and geological surveys is underway. PEJ submitted a construction license application in March (*World Nuclear News*).

### **US-Türkiye agreement to accelerate SMR deployment**

The US Trade and Development Agency signed an agreement with Türkiye's state-owned TÜNAŞ to fund technical assistance to create a regulatory, institutional, and financial roadmap for SMR deployment by the private sector. The year-long study, budgeted at ~\$2mn, will evaluate SMR designs from four US companies and five 4th-generation US reactor designs. Türkiye targets 5,000MWe of SMR capacity in addition to 12 large reactors by 2050 (*World Nuclear News*).

### **US funding for Thai SMR feasibility study**

The US Trade and Development Agency signed an agreement with Thailand's EGAT to fund a feasibility study assessing potential sites, costs and regulatory steps for deploying ~600MWe of US SMR technologies, evaluating designs from seven US vendors including GE-Hitachi, Holtec, NuScale, TerraPower and Westinghouse (*World Nuclear News*).

### **Holtec pauses refueling at Palisades Nuclear Power Plant, delays restart**

Holtec has paused refueling at Michigan's Palisades Nuclear Power Plant, delaying the restart of the roughly 50 year old facility after an Aug. 30 incident in which a radioactive fuel assembly tilted during loading. The assembly remains in the reactor vessel as Holtec develops retrieval and storage equipment and prepares a License Amendment Request. The U.S. Nuclear Regulatory Commission is reviewing the incident and said preliminary results show no radiation release or worker impact (*WWMT*).

### **UK regulators to begin Xe-100 design assessment**

UK regulators will commence the Generic Design Assessment of X-energy's Xe-100 high-temperature gas-cooled reactor, with Centrica and X-energy planning a fleet of up to 6GWe starting at the Hartlepool site in north-east England, where the approximately three-year assessment process will evaluate safety, security and environmental implications (*World Nuclear News*).

### **Nuward targets 10 SMRs in five EU countries**

Nuward, EDF Group's wholly-owned subsidiary, announced plans to deploy an initial fleet of 10 SMR units across five European countries, targeting construction start in 2030 and first production by 2035, with a 48-month construction timeline per unit. The redesigned Nuward SMR delivers 400MW with cogeneration capability of approximately 100MWt, intended for industrial clusters and district heating. The EU's European Industrial Alliance on SMRs is targeting 17-53GW of SMR capacity by 2050 (*World Nuclear News*).

### **Italy's Senate approves a return to nuclear power**

Italy's Senate passed Prime Minister Giorgia Meloni's bill to reintroduce nuclear power by 81 votes to 51, ending a four-decade absence from nuclear energy. The bill, originally approved by Italy's Council of Ministers in October last year, empowers the government to regulate sustainable nuclear power aligned with European decarbonisation and energy security goals. Key mandates include developing a National Programme for Sustainable Nuclear Power and establishing an independent Nuclear Safety Authority (*World Nuclear News*).

### **Google signs up for electricity from Finnish nuclear power plant**

Google signed a long-term PPA with Fortum covering up to 50% of Finland's Loviisa nuclear plant capacity from 2030 to 2049, providing revenue certainty for Fortum's EUR1 billion life extension investment program, alongside Google's EUR13 billion Finnish data center expansion and an MOU to explore new nuclear development at Loviisa (*World Nuclear News*).

## **Company news**

### **KHNP and Orano deepen uranium enrichment cooperation**

KHNP and Orano signed a letter of intent during President Lee's state visit to France to expand long-term cooperation in uranium enrichment, building on KHNP's existing 2.5% stake in Orano's Georges Besse 2 plant and aiming to diversify Western enrichment sources (*World Nuclear News*).

### **Bechtel splits with Bill Gates-backed nuclear project, files layoff notice**

Bechtel has parted ways with TerraPower's Sodium Demonstration Project in Kemmerer, Wyoming, after failing to agree on terms for the next phase, filing a layoff notice for approximately 200 employees at its Virginia headquarters, though the firm expects to redeploy many to other nuclear projects including the Clinch River site and Poland's AP1000 plant (*Construction Dive*).

### **Blue Energy submits first construction application to NRC**

Blue Energy submitted its first construction permit application to the NRC for a ~1.5GW gas-to-nuclear project at the Port of Victoria, Texas, which will initially deliver 1GW via GE Vernova gas turbines from 2028 before transitioning to up to five GVH BWRX-300 SMRs by 2031 (*World Nuclear News*).

### **GE Vernova Hitachi's BWRX-300 nears US construction permit approval**

The US NRC aims to complete the construction permit for GE Vernova Hitachi's BWRX-300 SMR at the Clinch River site in Tennessee by Sept 30, ahead of the original December deadline, which would make it the first Generation III SMR to receive a US construction permit (*The Guru*).

### **SGE, GE Vernova, Hitachi and Samsung C&T sign MOU for SMR in Europe**

SGE, GE Vernova, Hitachi, and Samsung C&T signed an MOU to cooperate on deploying the BWRX-300 SMR across Central and Eastern Europe and the UK, linked to a broader US-Japan-Korea government cooperation framework on SMR deployment (*GE Vernova*).

Source: Bloomberg Finance L.P. and J.P. Morgan; price data adjusted for stock splits and dividends.  
Initiated coverage Sep 05, 2025. All share prices are as of market close on the previous business day.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period.  
J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

## Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, <https://www.jpmorganmarkets.com>.

**Coverage Universe:** Lee, Sonny : Doosan Enerbility (034020.KS), Ecopro BM (247540.KQ), HL Mando (204320.KS), Hyundai Autoever (307950.KS), Hyundai E&C (000720.KS), Hyundai Mobis (012330.KS), Hyundai Motor Company (005380.KS), KEPCO (015760.KS), KEPCO E&C (052690.KS), Kia Corp (000270.KS), L&F (066970.KQ), POSCO (005490.KS), POSCO Future M (003670.KS), Samsung SDI (006400.KS)

## J.P. Morgan Equity Research Ratings Distribution, as of July 04, 2026

|                                              | Overweight<br>(buy) | Neutral<br>(hold) | Underweight<br>(sell) |
|----------------------------------------------|---------------------|-------------------|-----------------------|
| J.P. Morgan Global Equity Research Coverage* | 53%                 | 36%               | 12%                   |

\*Please note that the percentages may not add to 100% because of rounding.

\*\*Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.

For purposes of FINRA ratings distribution rules only, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

**Equity Valuation and Risks:** For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at <http://www.jpmorganmarkets.com>, contact the primary analyst or your J.P. Morgan representative, or email [research.disclosure.inquiries@jpmorgan.com](mailto:research.disclosure.inquiries@jpmorgan.com). Morgan Securities LLC, and may not be subject to FINRA Rule 2241 or 2242 restrictions on communications with covered companies, public appearances, and trading securities held by a research analyst account.

#### Other Disclosures

---

J.P. Morgan is a marketing name for investment banking businesses of JPMorgan Chase & Co. and its subsidiaries and affiliates worldwide.

**UK MIFID FICC research unbundling exemption:** UK clients should refer to [UK MIFID Research Unbundling exemption](#) for details of J.P. Morgan's implementation of the FICC research exemption and guidance on relevant FICC research categorisation.

All research material made available to clients are simultaneously available on our client website, J.P. Morgan Markets, unless specifically permitted by relevant laws. Not all research content is redistributed, e-mailed or made available to third-party aggregators. For all research material available on a particular stock, please contact your sales representative.

Any long form nomenclature for references to China; Hong Kong; Taiwan; and Macau within this research material are Mainland China; Hong Kong SAR (China); Taiwan (China); and Macau SAR (China).

J.P. Morgan Research may, from time to time, write on issuers or securities targeted by economic or financial sanctions imposed or administered by the governmental authorities of the U.S., EU, UK or other relevant jurisdictions (Sanctioned Securities). Nothing in this report is intended to be read or construed as encouraging, facilitating, promoting or otherwise approving investment or dealing in such Sanctioned Securities. Clients should be aware of their own legal and compliance obligations when making investment decisions.

Digital assets, which may also be referred to as virtual or crypto assets or crypto currencies (e.g. bitcoin), discussed in this research report are subject to a rapidly changing regulatory landscape. The application of relevant laws in respect of such assets may be unsettled, and the legality of any digital asset investment may be unclear. Prior to making any investment decision regarding any digital asset, investors should seek their own legal advice and be aware of any legal considerations regarding the purchase, holding or selling of such an investment. For relevant regulatory advisories on digital assets, including bitcoin and ethereum, please see <https://www.jpmorgan.com/disclosures/cryptoasset-disclosure>.

The author(s) of this research report may not be licensed to carry on regulated activities in your jurisdiction and, if not licensed, do not hold themselves out as being able to do so.

**Exchange-Traded Funds (ETFs):** J.P. Morgan Securities LLC ("JPMS") acts as authorized participant for substantially all U.S.-listed ETFs. To the extent that any ETFs are mentioned in this report, JPMS may earn commissions and transaction-based compensation in connection with the distribution of those ETF shares and may earn fees for performing other trade-related services, such as securities lending to short sellers of the ETF shares. JPMS may also perform services for the ETFs themselves, including acting as a broker or dealer to the ETFs. In addition, affiliates of JPMS may perform services for the ETFs, including trust, custodial, administration, lending, index calculation and/or maintenance and other services.

**Options and Futures related research:** If the information contained herein regards options- or futures-related research, such information is available only to persons who have received the proper options or futures risk disclosure documents. Please contact your J.P. Morgan Representative or visit <https://www.theocc.com/components/docs/riskstoc.pdf> for a copy of the Option Clearing Corporation's Characteristics and Risks of Standardized Options or [https://www.finra.org/sites/default/files/2020-08/Security\\_Futures\\_Risk\\_Disclosure\\_Statement\\_2020.pdf](https://www.finra.org/sites/default/files/2020-08/Security_Futures_Risk_Disclosure_Statement_2020.pdf) for a copy of the Security Futures Risk Disclosure Statement.

**Changes to Interbank Offered Rates (IBORs) and other benchmark rates:** Certain interest rate benchmarks are, or may in the future become, subject to ongoing international, national and other regulatory guidance, reform and proposals for reform. For more information, please consult: [https://www.jpmorgan.com/global/disclosures/interbank\\_offered\\_rates](https://www.jpmorgan.com/global/disclosures/interbank_offered_rates)

**Private Bank Clients:** Where you are receiving research as a client of the private banking businesses offered by JPMorgan Chase & Co. and its subsidiaries ("J.P. Morgan Private Bank"), research is provided to you by J.P. Morgan Private Bank and not by any other division of J.P. Morgan, including, but not limited to, the J.P. Morgan Corporate and Investment Bank and its Global Research division.

**Legal entity responsible for the production and distribution of research:** The legal entity identified below the name of the Reg AC Research Analyst who authored this material is the legal entity responsible for the production of this research. Where multiple Reg AC Research Analysts authored this material with different legal entities identified below their names, these legal entities are jointly responsible for the production of this research. Where more than one legal entity is listed under an analyst's name, the first legal entity is responsible for the production unless stated otherwise. Research Analysts from various J.P. Morgan affiliates may have contributed to the production of this material but may not be licensed to carry out regulated activities in your jurisdiction (and do not hold themselves out as being able to do so). Unless otherwise stated below in the legal entity disclosures, this material has been distributed by the legal entity responsible for production, or where more than one legal entity is listed under the analyst's name, the first legal entity will be responsible for distribution. If you have any queries, please contact the relevant Research Analyst in your jurisdiction or the entity in your jurisdiction that has distributed this research material.

**Legal Entities Disclosures and Country-/Region-Specific Disclosures:**

Morgan Securities plc (“JPMS plc”) which is a member of the London Stock Exchange and is authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority or J.P. Morgan Markets Limited (“JPML Ltd”) which is authorised and regulated by the Financial Conduct Authority. Unless specified to the contrary, this material is distributed in the UK by JPMS plc and is directed in the UK only to: (a) persons having professional experience in

matters relating to investments falling within article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) (Order) 2005 ("the FPO"); (b) persons outlined in article 49 of the FPO (high net worth companies, unincorporated associations or partnerships, the trustees of high value trusts, etc.); or (c) any persons to whom this communication may otherwise lawfully be made; all such persons being referred to as "UK relevant persons". This material must not be acted on or relied on by persons who are not UK relevant persons. Any investment or investment activity to which this material relates is only available to UK relevant persons and will be engaged in only with UK relevant persons. A description of J.P. Morgan EMEA's policy for prevention and avoidance of conflicts of interest related to the production of Research can be found at the following link: [J.P. Morgan EMEA - Research Independence Policy](#).

**U.S.:** J.P. Morgan Securities LLC ("JPMS") is a member of the NYSE, FINRA, SIPC, and the NFA. JPMorgan Chase Bank, N.A. is a member of the FDIC. Material published by non-U.S. affiliates is distributed in the U.S. by JPMS who accepts responsibility for its content.

**General:** Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst's involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.
