Welcome to the 2026 edition of Bernstein's Electric Revolution series - our annual cross sector look at the transformation of the EV landscape. This year, we focus on supply chain resilience, a theme rising in importance as EV adoption diverges by region and geopolitical risks intensify. OEMs and suppliers face growing pressure to anticipate, navigate, and recover quickly from disruptions across sourcing, production, and logistics, etc. In this note, we review which battery makers are winning the battle for market share.

As the China EV market matures, Europe and RoW are becoming more important drivers for power battery growth. Global battery sales grew at a 25% two-year CAGR, led by Europe at 34% and RoW at 77%, while the U.S. declined 5%. CATL grew 30% and gained 3.0% global share to 38.4%, supported by a 7.9% gain in Europe. BYD remained second at 16.2% but lost 7.8% in China, while LGES fell to 9.5% after losing 13.2% in Europe. Samsung SDI and SK On also lost share, while Panasonic gained in the U.S.

Among global battery makers, CATL has the strongest overall competitive position, combining customer diversification and broad regional market strength. Success in the battery business depends not only on cost and technology, but also on supplying successful OEMs and popular EV models. CATL's Top 3 customers accounted for only 24% of 2025 sales, versus 53% for LGES, 83% for BYD and 100% for Panasonic. Tesla was CATL's largest named customer at only 10% of sales, while BYD remained dependent on its own vehicles, Panasonic on Tesla, Samsung SDI on BMW, and SK On on Hyundai and Ford.

CATL had the broadest exposure to high-volume and fast-growing third-party EV models in both China and ex-China markets. Exposure to successful vehicle platforms will drive differentiated battery-sales growth. In China, CATL led the two highest-volume model deciles, while BYD dominated several middle-ranked groups through its vertically integrated vehicle portfolio. Outside China, CATL supplied 31% of battery demand across the model universe, followed by LGES at 21%, as incremental growth shifted toward new European EV platforms.

We expect global passenger-vehicle battery demand to increase from 1,029 GWh in 2025 to 2,365 GWh in 2030, representing an 18% CAGR. CATL sales increase from 370 GWh to 943 GWh, representing a 21% CAGR, while market share rises from 36% to 40%. BYD remains second at around 17%, while LGES gradually recovers from 10% to 11% and delivers a 20% sales CAGR. CATL's sales and capacity growth remain broadly aligned, while LGES has utilisation upside. Samsung SDI, SK On and lower-tier suppliers face utilisation pressure if capacity grows faster than sales.

We prefer CATL within our coverage. We rate CATL Outperform, supported by its market leadership, diversified customer base, exposure to winning EV platforms and strong growth visibility. CATL A-shares trade at 13.9x 2027E P/E, versus 36.1x for LGES and 27.7x for Samsung SDI. We rate LGES and Samsung SDI Market-Perform, as their earnings depend more on utilisation recovery, customer demand and execution.

DETAILS

Success in the battery business is not only about manufacturing the best batteries at the lowest possible cost. It is also about supplying successful OEMs and gaining exposure to popular and fast-growing EV models. In this note, we examine which battery makers are gaining share, where they are strongest and whether their customer and model exposure can support future growth.

Last year, the global passenger-vehicle battery market reached approximately 1,029 GWh, up from 666 GWh in 2023. We expect demand to increase to approximately 2,365 GWh by 2030, representing an 18% CAGR and an annual addressable market of more than US\$220bn at an assumed battery-pack value of US\$100/kWh. Battery-maker valuations will depend on market-share performance, customer and regional exposure, capacity utilization and profitability.

CATL has the strongest overall competitive position, combining low customer concentration, broad regional market strength and positive share momentum. BYD delivered the fastest battery-sales growth between 2023 and 2025, but remains concentrated in its own vehicles and China. LGES has a more balanced regional sales mix but has lost global share, while Panasonic, Samsung SDI and SK On remain more concentrated by customer or region.

At the model level, CATL had the broadest exposure to high-volume and fast-growing third-party EV platforms in both China and ex-China markets. BYD's growth remained more closely linked to its vertically integrated vehicle portfolio. Incremental demand in China was led by new models from Geely, Xiaomi, XPeng and AITO, while ex-China growth shifted from mature Tesla platforms toward new European models. CATL remained the global leader with 36% share in 2025 and is forecast to reach approximately 40% by 2030, while BYD remains second at approximately 17% and LGES gradually recovers to 11%

EXHIBIT 2: **Battery sales market share based on market historical growth and momentum**

Source: Company data, SNE Research, IHS, Bernstein estimates and analysis

Over the two years from 2Q24 to 2Q26, CATL gained 3.0% global market share to reach 38.4%, driven by a 7.9% gain in Europe, despite losing 5.3% in the U.S. BYD remained the second-largest global supplier with 16.2% share, gaining 5.6% in Europe and 7.2% in RoW but losing 7.8% in China. LGES recorded the largest global decline of 3.2%, mainly reflecting a 13.2% loss in Europe and a 4.8% loss in the U.S. Panasonic gained 19.7% in the U.S. and reached 45.6% market share, while Samsung SDI and SK On lost share across their major ex-China markets. Other suppliers gained 5.5% globally and increased share in every region, indicating greater fragmentation below the leading battery makers.

EXHIBIT 3: Market share change since 2Q24 to 2Q26

	Global	China	Europe	U.S.	RoW
M/S change(2Q24-2Q26)					
CATL	3.0%	1.0%	7.9%	-5.3%	-0.1%
BYD	-1.3%	-7.8%	5.6%	0.0%	7.2%

Others	5.5%	5.5%	6.8%	1.1%	3.8%

Source: SNE research, Bernstein analysis

Global battery sales reached 295.5 GWh in 2Q26, including 150.4 GWh in China, 74.4 GWh in Europe, 30.0 GWh in the U.S. and 40.6 GWh in RoW. CATL remained the largest supplier with 113.5 GWh of sales and delivered a 30% CAGR from 2Q24 to 2Q26, supported by 48% growth in Europe and 77% in RoW. BYD ranked second with 48.0 GWh and grew at 20%, driven by rapid expansion outside China. LGES generated 28.1 GWh and grew at 8%, while Panasonic's 26% growth was supported primarily by the U.S. Overall industry sales grew at a 25% CAGR, led by 34% growth in Europe and 77% in RoW, while the U.S. declined by 5%.

EXHIBIT 5: Regional battery-sales growth, 2Q24-2Q26

Source: SNE research, Bernstein analysis

CATL has the most diversified customer base and the broadest regional market strength, together with positive share momentum and 25% sales growth. BYD grew faster but remains concentrated in its own vehicles and China. LGES has the most balanced regional sales mix, while Panasonic, Samsung SDI and SK On remain more concentrated by customer, region or both.

EXHIBIT 7: Competitive positioning of leading battery makers: customer concentration, regional strength, sales exposure and growth

Source: SNE research, Bernstein analysis

Battery-maker growth depends not only on battery technology and cost, but also on the quality and diversification of the underlying customer portfolio. A supplier with exposure to fast-growing OEMs can deliver strong sales growth, but high customer concentration creates greater downside risk if individual vehicle platforms underperform or sourcing allocations change.

CATL has the most diversified customer base among the six leading battery manufacturers. CATL's largest customer accounted for approximately 10% of 2025 sales, while its top three and top five customers represented only 24% and 36%, respectively. Approximately 64% of CATL sales came from customers outside its five largest customers.

BYD and Panasonic were the most concentrated suppliers. BYD's largest customer relationship, primarily its own vehicle operations, accounted for approximately 67% of battery sales, while the top three represented 83%. Tesla accounted for approximately 91% of Panasonic's battery sales, leaving Panasonic almost entirely dependent on one customer.

LGES's top three customers represented 53% of sales, compared with 73% for Samsung SDI and 63% for SK On. Customer concentration creates both upside and downside operating leverage, but CATL's broader portfolio makes its growth less dependent on the performance of individual OEMs or vehicle programmes.

EXHIBIT 8: **Top customers as a percentage of battery sales: CATL has the most diversified customer base**

Source: SNE research, Bernstein analysis

Combining current market share with the latest 12-month change distinguishes suppliers that are both large and strengthening from those whose historical market positions are eroding.

CATL had the strongest combination of scale and momentum. Its global market share reached 38.4% in 2Q26, an increase of 2.9% from 2Q25. CATL was the only supplier among the six largest battery makers to combine a global share above 30% with clearly positive 12-month momentum.

BYD remained the second-largest supplier but lost approximately 3.2 % of global share over the same period. LGES lost approximately 0.9 % while Samsung SDI and SK On lost approximately 1.2 % and 0.8%, respectively. Panasonic’s share was broadly stable.

CATL’s leadership is therefore not simply the result of historical scale. The company continues to gain share, while most major competitors are either stable at substantially lower levels or losing share.

EXHIBIT 9: **Market-share level and momentum: CATL is the only large supplier still gaining global share**

Source: SNE research, Bernstein analysis

The global market-share ranking masks substantial regional differences. CATL led globally, in China and in Europe, and also held the largest share in RoW. Panasonic and LGES remained strongest in the US, while BYD's battery position was concentrated in China and RoW.

CATL's balanced regional exposure contrasts with Panasonic's dependence on North America, BYD's limited US participation and the Korean suppliers' low market shares in China. Regional diversification is increasingly important as battery demand, policy support, localization requirements and vehicle-platform performance diverge across markets.

EXHIBIT 10: **Regional market-share positions: one global ranking conceals very different competitive structures**

M/S	Global	China	Europe	U.S.	RoW
CATL	36%	40%	44%	10%	27%
BYD	18%	26%	7%	0%	26%

Source: SNE research, Bernstein analysis

Unique relationships between OEMs and battery makers continue to drive differentiated growth, but customer concentration varies materially across suppliers. CATL has the most diversified portfolio: Tesla was its largest named customer in 2025 but accounted for only 10% of sales, followed by Xiaomi at 8%, Changan at 7%, Geely at 6%, Volkswagen at 5% and BMW at 4%. Other customers represented 57% of CATL's sales. BYD remained primarily dependent on its own vehicle operations, which accounted for 67% of battery sales, while Panasonic generated 91% of sales from Tesla. Tesla accounted for 37% of LGES sales, BMW represented 41% of Samsung SDI sales, and SK On's largest customers were Hyundai, Ford, Mercedes-Benz and Volkswagen.

EXHIBIT 11: Customer breakdown of top battery makers, 2025. CATL has the most diversified customer base and Tesla's battery supply accounted only for 10%. LGES relies on Tesla and VW, while Samsung SDI relies on BMW and Ford.

	CATL	BYD	LGES	SDI	SK On	Panasonic	Other
Tesla	10%		37%			91%	2%
BYD		67%					
VW	5%		7%	0%	10%	0%

Source: SNE Research, Bernstein analysis

Looking at the relationships from the OEM perspective, CATL is the leading battery supplier to most major Chinese and European manufacturers. CATL supplies approximately 60% of Volkswagen's battery demand, 57% of Geely's, 54% of BMW's, 84% of Changan's and 70% of Xiaomi's. Tesla maintains a diversified supply base, sourcing approximately 35% from Panasonic, 32% from LGES and 30% from CATL. Panasonic is the most exposed to any change in Tesla's sourcing strategy, as Tesla represented approximately 91% of Panasonic's total battery sales in 2025. SK On is Hyundai's largest supplier with a 61% share and Ford's largest supplier with 42%, while Samsung SDI retains a strong 41% position at BMW. Overall, CATL's broad set of leading OEM relationships provides the strongest customer diversification and the lowest dependence on individual vehicle manufacturers.

EXHIBIT 12: Supplier breakdown of top OEMs, 2025. CATL is the key supplier of most Chinese and European OEMs. SKI is the leading supplier of Hyundai and Panasonic is the leading supplier of Tesla.

	CATL	BYD	LGES	SDI	SK On	Panasonic	Other	Total
Tesla	30%		32%			35%	3%	100%
BYD		100%						100%

BATTERY MAKERS' MARKET SHARE AND TOP EV MODELS

Exhibit 9 ranks China's best-selling EV models by sales-volume decile. CATL had the strongest exposure to the highest-volume models, accounting for 72% of battery supply in the first decile and 59% in the second. BYD was strongest in several middle-ranked groups, with 69% share in the 20%-30% decile, 49% in the 30%-40% decile and 50% in the 40%-50% decile, largely supported by its vertically integrated vehicle portfolio. Tier 2 suppliers, including CALB, Gotion, EVE, Sunwoda and SVOLT, had more fragmented exposure and generally became more relevant outside the highest-volume groups. CATL therefore has the broadest third-party model exposure, while BYD's scale remains primarily linked to its own successful EV portfolio.

EXHIBIT 13: Best-selling EV models and the battery suppliers (China, 2025). BYD sold the most best-selling EV models in China. Lower-tier battery makers can only sell their batteries to less popular EV models.

CATL, LGES and SDI are covered by Neil Beveridge. VW, Mercedes and BMW are covered by Stephen Reitman. BYD, Xiaomi and Geely are covered by Eunice Lee. All other companies not covered by Bernstein.

Source: SNE Research, Bernstein analysis

Size is not the only measure of model quality; exposure to fast-growing vehicle platforms provides a more forward-looking indication of battery-demand growth. BYD led the highest-growth 0%-10% decile, accounting for 59% of battery supply, compared with CATL's 32%. CATL, however, had the broadest exposure across the full growth distribution, including 60% of the 20%-30% decile, 50% of the 40%-50% decile and between 38% and 46% across several other groups. Tier 2 suppliers, including CALB, EVE, Gotion, Sunwoda and SVOLT, held meaningful positions in selected deciles but had less consistent exposure. BYD's position primarily reflects growth within its own vehicle portfolio, while CATL benefits from a broader set of fast-growing third-party OEM platforms.

EXHIBIT 14: CATL is broadly represented across China's fast-growing EV models, while BYD leads selected growth deciles

Source: SNE Research, Bernstein analysis

Exhibit 11 ranks the Chinese EV models generating the largest absolute increases in battery demand between 2024 and 2025. Geely Xingyuan was the largest contributor at approximately 15 GWh, followed by Xiaomi's YU7 and SU7 at roughly 12 GWh each. XPeng's MONA M03, AITO's M8 EREV and BYD's Sea Lion models were also important sources of incremental demand. CATL had the broadest exposure across these growth platforms, supplying Changan, Geely, Xiaomi, AITO, Leapmotor and Huawei models. BYD captured growth through its own models and selected third-party platforms, while EVE, Gotion and CALB gained narrower positions in individual new vehicles.

EXHIBIT 15: **Top EV models (ranked by battery demand growth in MWh) in China and their battery suppliers**

CATL, LGES and SDI are covered by Neil Beveridge. VW, Mercedes and BMW are covered by Stephen Reitman. BYD, Xiaomi and Geely are covered by Eunice Lee. All other companies not covered by Bernstein.

Source: SNE Research, Bernstein analysis

Outside China, Panasonic led the highest-volume, Tesla-dominated model decile with 50% of battery supply, followed by LGES at 35% and CATL at 14%. CATL nevertheless had the broadest exposure across the overall model distribution and supplied approximately 35% of battery demand in the selected model universe, almost twice LGES's 18%. Samsung SDI, SK On and BYD each accounted for approximately 8%-9%, but remained more concentrated in individual OEMs or vehicle programmes.

EXHIBIT 18: Best-selling EV models and the battery suppliers (ex-China, 2025). Tesla's Model Y spans the first two deciles of the best-selling EV models outside of China.

Source: SNE Research, Bernstein analysis

For fast-growing EV models outside China, CATL had the broadest exposure across the model-growth distribution. CATL accounted for 29% of battery supply in the top 10% fastest-growing models, rising to 38% in the 10%-20% decile and 40% in the 20%-30% decile. CATL's share reached 53% in the 40%-50% decile, supporting continued ex-China growth momentum. LGES also had meaningful exposure, including a 40% share in the 30%-40% decile and 33% in the 80%-90% decile. Samsung SDI held selected positions but no longer showed the disproportionate exposure seen in 2023.

EXHIBIT 19: Fast-growing EV models and the battery suppliers (ex-China, 2025). More than one third of fast-growing EV models sourced CATL's batteries.

Source: SNE Research, Bernstein analysis

Outside China, the largest sources of incremental battery demand shifted toward newly launched European EV models in 2025. The Skoda Elroq recorded the largest increase at nearly 7 GWh, followed by the Hyundai EV3 at approximately 6.5 GWh, BYD Sea Lion 07 at approximately 6.0 GWh and Renault R5 at approximately 5.6 GWh. CATL and LGES were exposed to the Elroq, while LGES supplied the EV3, BYD internally supplied the Sea Lion 07 and Envision AESC supplied the R5. CATL also

participated in several other leading growth models, including the Audi Q6 e-tron, Volkswagen ID.7 and Audi A6 e-tron.

EXHIBIT 20: Top EV models (ranked by battery demand growth in MWh) in ex-China regions and their battery suppliers

ESTIMATING BATTERY MAKERS' MARKET SHARE

The relationship between OEMs and battery makers continues to evolve. Exhibit 19 shows approximately 1,029 GWh of passenger-vehicle battery demand in 2025. CATL remained the largest supplier with 370 GWh of sales and the most diversified customer base across Chinese and global OEMs. Tesla, Volkswagen, Changan, BMW and Geely were important customers, but CATL also generated substantial demand from a long tail of other OEMs. BYD supplied approximately 199 GWh, primarily to BYD Group vehicles, while Panasonic's 48 GWh remained highly concentrated in Tesla. LGES supplied approximately 106 GWh across Tesla, Volkswagen, GM, Hyundai, Ford and other international OEMs. Samsung SDI remained most closely linked to BMW, while SK On's key relationships included Hyundai, Ford, Mercedes-Benz and Volkswagen.

To forecast battery makers' future sales and market shares, we estimate EV battery demand based on each market's historical growth, and recent momentum. On our base-case assumptions, supplier market shares remain in a relatively stable at the end of the decade.

Below is an overview of passenger-vehicle battery sales between battery makers and OEMs in 2025. CATL was the largest battery supplier, with approximately 370 GWh of sales and 36% market share. From the OEM perspective, BYD was the largest battery consumer at approximately 132 GWh, 13% of total demand, followed by Tesla at approximately 123 GWh, 12% of total demand.

EXHIBIT 23: **2025 battery sales (GWh) for passenger vehicles**

2025 Sales (GWh)	Tesla	VW	Toyota	CHANGAN	RENAULT	Ford	GM	Hyundai	MERCEDES	BMW	BYD	Geely	Honda	Other	Total

Exhibit 24 shows the battery-supplier shares within major OEMs in 2025. CATL was the leading supplier to Volkswagen, Changan, BMW and Geely, and also supplied approximately 30% of Tesla's battery demand. Tesla maintained a diversified supply base across Panasonic, LGES and CATL, with Panasonic holding the largest allocation. LGES remained the dominant supplier to GM and held meaningful positions at Tesla, Volkswagen, Ford and Hyundai. SK On was the leading supplier to Hyundai and Ford, while Samsung SDI retained a strong position at BMW.

EXHIBIT 24: **2025 battery sales market share for passenger vehicles**

Exhibit 25 summarises historical and forecast passenger-vehicle battery sales and market shares. Based on our estimations, global demand would increase from 1,029 GWh in 2025 to approximately 2,365 GWh in 2030. CATL remains the clear leader, with sales reaching approximately 943 GWh and market share increasing from 36% to 40%. BYD remains second, with sales reaching approximately 413 GWh, at relatively stable share around 17%. LGES stays third and recovers from 10% to approximately 11% share, while Panasonic, Samsung SDI and SK On remain smaller and grow below or broadly in line with the overall market.

EXHIBIT 25: **Battery sales and market share**

Sales (GWh)	2023	2024	2025	2026E	2027E	2028E	2029E	2030E	CAGR 2025-30

Exhibit 26 shows the historical and forecast global passenger-vehicle battery market shares. We expect CATL to consolidate its leadership, with market share increasing from 36% in 2025 to approximately 40% in 2030. BYD remains second with approximately 17% share, while LGES recovers gradually from 10% to 11%. Panasonic, Samsung SDI and SK On remain smaller suppliers, while other battery makers collectively maintain around 23% of the market.

EXHIBIT 26: **Battery sales market share based on market historical growth and momentum**

Source: Company data, SNE Research, IHS, Bernstein estimates and analysis

We expect LGES and CATL to deliver the strongest battery-sales growth from 2025 to 2030, with forecast CAGRs of 20% and 21%, respectively. CATL's growth is supported by diversified customers and continued share gains, while LGES's requires improved utilisation and new-platform wins. We expect BYD to grow at 16%, followed by Panasonic at 12%, SK On at 10%, and Samsung SDI at 8%,

LGES has the strongest potential for utilization improvement, as forecast sales growth of c.20% materially exceeds capacity growth of c.7%. BYD's sales growth also outpaces capacity expansion. CATL's sales and capacity growth are broadly aligned, although sales may grow slightly faster. With utilization already above 95% since 2025, however, capacity constraints may limit further market-share gains under current capacity expansion plan. By contrast, Samsung SDI, SK On and lower-tier suppliers have forecast sales growth below announced capacity growth, implying potential pressure on utilization and profitability if all planned capacity comes online.

EXHIBIT 33: We expect CATL's capacity and sales growth to remain aligned, while LGES has potential utilisation upside

REGIONAL TRENDS IN BATTERY MARKET SHARE

For Li-ion batteries supplied to global passenger xEVs (BEV+PHEV), Exhibit 34 shows the market shares of EV battery makers across different regions in 2025. CATL remained the world's largest battery maker, with 36% market share in a global market of approximately 1,030 GWh. BYD ranked second with 18% market share, supported by the continued growth of its vertically integrated EV and battery operations. LGES ranked third with 11% market share. These companies were followed by CALB with 5%, while Panasonic, SK On and Gotion each held approximately 4%. Samsung SDI accounted for 3%, EVE for 2% and Farasis for 1%. The Top 3 battery makers accounted for approximately 65% of the global market, while the Top 5 accounted for approximately 74%. However, competitive positions varied significantly by geographic region.

China remained the world's largest passenger-xEV battery market, with approximately 583 GWh of demand, equivalent to 57% of the global total. CATL remained the leading supplier with 40% market share, followed by BYD with 26%. Together, CATL and BYD accounted for 66% of the Chinese market. CALB ranked third with 8%, followed by Gotion with 5%, LGES with 3% and EVE with 2%. Other suppliers accounted for approximately 16%, reflecting increasing competition and fragmentation below the two market leaders.

Europe was the second-largest regional market, with approximately 230 GWh of battery demand. CATL was the clear market leader with 44% market share, followed by LGES with 20%. SK On ranked third with 9%, while BYD reached 7% and Samsung SDI held 5%. Farasis accounted for 4%, CALB for 2% and EVE for 1%. CATL's leading position reflects its broad relationships with European OEMs and participation across a wide range of vehicle platforms. BYD's European share was supported primarily by the expansion of its own vehicle sales, while LGES, SK On and Samsung SDI maintained important relationships with European and Korean OEMs.

North America accounted for approximately 132 GWh of passenger-xEV battery demand. Panasonic remained the largest supplier with 33% market share, reflecting its close relationship with Tesla. LGES ranked second with 27% share, followed by SK On with 12%. CATL and Samsung SDI each held approximately 10%, while Gotion and CALB accounted for approximately

2% and 1%, respectively. North America remained the most customer-concentrated regional market, with supplier shares strongly influenced by individual OEM production volumes, sourcing allocations and local manufacturing relationships.

RoW remained the smallest regional market, with approximately 85 GWh of demand, or 8% of the global total, but had a more diversified supplier structure. CATL narrowly led with 27% market share, followed by BYD with 26%, LGES with 14% and Gotion with 12%. SK On held 5%, EVE 3%, and Samsung SDI, CALB and Farasis approximately 2% each. BYD's position was primarily supported by the international expansion of its own EV portfolio, while Gotion emerged as a meaningful supplier to third-party customers.

EXHIBIT 34: Market share by region, 2025. CATL is the world largest battery maker with 36% market share in 2025, followed by BYD (18%), LGES (11%) and CALB (5%).

Over the past three years, CATL has further consolidated its global leadership, while LGES, Samsung SDI and SK On have continued to lose market share. CATL's global market share reached a record 39.9% in 1Q26 before moderating slightly to 38.4% in 2Q26, compared with 35.5% in 2Q25 and 37.3% in 4Q23. BYD remained the second-largest supplier, although its share fell from 19.4% in 2Q25 to 16.2% in 2Q26. LGES remained third, but its share declined from 14.3% in 3Q23 to 9.5% in 2Q26. Panasonic recovered to 4.8% in 2Q26, supported by recovered North American demand, while Samsung SDI and SK On fell to 1.8% and 3.2%, respectively. Chinese Tier 2 suppliers continued to gain scale, with Gotion increasing from 2.0% in 3Q23 to 4.5% in 2Q26. The "Other" category also increased from 6.5% to 14.1%, indicating greater fragmentation below the leading suppliers.

EXHIBIT 40: The evolution of battery makers' market share, Global. CATL keeps the dominant position with around 40%, BYD relatively stable at 15%, with LGES at 10%.

In China, CATL has maintained its leading position, while BYD has continued to lose market share and Tier 2 suppliers have gradually gained ground. CATL's market share increased from 39.4% in 2Q25 to 42.6% in 2Q26. BYD remained the second-largest supplier, but its share fell from 27.9% in 2Q25 to 21.5% in 2Q26. CALB remained the third-largest supplier with 6.4% share, followed by Gotion at 5.2% and Sunwoda at 4.1%. EVE and SVOLT held 2.2% and 2.8%, respectively. The market below the leading suppliers has become increasingly fragmented, with the "Others" rising from 10.8% in 2Q25 to 15.1% in 2Q26.

In Europe, CATL has consolidated its position as the largest battery supplier, while LGES and the other Korean battery makers have continued to lose market share. CATL's market share increased from 36.9% in 3Q23 to 44.5% in 2Q26 and has remained

above 43% since 1Q25. LGES remained the second-largest supplier, but its share declined from 36.6% in 3Q23 to 17.4% in 2Q26. Samsung SDI's share fell from 8.6% to 4.4% over the same period, while SK On declined from 8.8% to 6.6%. BYD has gradually established a larger European position, with its share increasing from 1.1% in 3Q23 to 7.9% in 2Q26, supported by the expansion of BYD vehicle sales in the region. AESC also increased its share from 0.8% to 2.8%, while Farasis declined from 3.1% to 2.5%. The "Others" category expanded from 1.0% to 11.6%, indicating increasing fragmentation below the leading suppliers.

EXHIBIT 44: The evolution of battery makers' market share, Europe. CATL consolidates its leadership at 45%, while LGES falls below 20% and BYD gains share.

In North America, Panasonic has strengthened its leading position, while LGES, Samsung SDI and SK On have lost market share. Panasonic's market share increased from 35.1% in 3Q23 to 45.6% in 2Q26, after falling to 24.6% in 4Q24. The recovery reflects stronger battery demand from Tesla and the continued importance of Panasonic's relationship with the OEM. LGES remained the second-largest supplier, but its market share declined from 26.7% in 2Q25 to 19.7% in 2Q26. CATL's share also fell from 15.0% in 3Q23 to 10.2% in 2Q26, although the company remained the third-largest supplier in the latest quarter. Samsung SDI's market share declined from 13.8% to 5.5%, while SK On fell from 10.6% to 9.3%. PPES increased its share to 3.9%, and Gotion reached 2.8% after briefly rising to 3.7% in 4Q25.

Source: SNE Research, Bernstein analysis

CATL remained the largest battery supplier in RoW with 32.7% market share in 2Q26, recovering from 25.1% in 2Q25. BYD has gained significant share over the past three years, increasing from 10.9% in 3Q23 to 23.9% in 2Q26, supported by the overseas expansion of BYD vehicles. Gotion also emerged as a significant supplier, with its share increasing from 4.1% to 10.7% over the same period and briefly reaching 16.6% in 4Q25. LGES remained an important supplier with 12.8% market share, but its share declined from 16.2% in 3Q23. Korean suppliers lost substantial ground, with SK On falling from 13.6% to 4.2% and Samsung SDI from 7.8% to 1.3%. The "Other" category increased from 2.1% to 11.8%, indicating greater fragmentation and the emergence of additional suppliers. Overall, CATL maintained its leadership at around one-third of the market, while BYD and Gotion became its principal challengers and Korean suppliers continued to lose share.

EXHIBIT 48: The evolution of battery makers' market share, RoW. CATL maintains its leadership, while BYD and Gotion gain share and Korean suppliers retreat.

DISCLOSURE APPENDIX

I. REQUIRED DISCLOSURES

References to "Bernstein" or the "Firm" in these disclosures relate to the following entities: Bernstein Institutional Services LLC (April 1, 2024 onwards), Sanford C. Bernstein & Co., LLC (pre April 1, 2024), Bernstein Autonomous LLP, BSG France S.A. (April 1, 2024 onwards), Sanford C. Bernstein (Hong Kong) Limited 盛博香港有限公司, Sanford C. Bernstein (Canada) Limited, Sanford C. Bernstein (India) Private Limited (SEBI registration no. INH000006378), Sanford C. Bernstein (Singapore) Private Limited, Sanford C. Bernstein Japan KK (サンフォード・C・バーンスタイン株式会社) and analysts employed by Société Générale Africa Technologies & Services to produce Bernstein research under a Global Services Agreement in place between Bernstein and Société Générale.

Bernstein is part of a joint venture between Société Générale (SG) and AllianceBernstein, L.P. (AB). Unless specifically noted otherwise, for purposes of these disclosures, references to Bernstein's "affiliates" relate to both SG and AB and their respective affiliates.

VALUATION METHODOLOGY**Contemporary Amperex Technology Co Ltd**

We value CATL (A) using the DCF approach using a WACC of 9.6% and a terminal growth rate of 3%. Our DCF model is based on annual free cash flow forecasts until 2050, plus a terminal value estimate to capture the continuing value of the company. Our price target is RMB800.

We value CATL (H) using the DCF approach using a WACC of 10.4% and a terminal growth rate of 3%. Our DCF model is based on annual free cash flow forecasts until 2050, plus a terminal value estimate to capture the continuing value of the company. Our price target is HKD770.

LG Energy Solution

We value LGES using the DCF approach with a WACC of 9.6% and a terminal growth rate of 3%. Our DCF model is based on annual free cash flow forecasts until 2050, plus a terminal value estimate to capture the continuing value of the company. Our price target is KRW351,000.

LG Chem Ltd

We value LG Chem using a SOTP methodology to arrive at our KRW312,000 target price. We use the DCF approach with a WACC of 9.6% and a terminal growth rate of 2% to value the Energy Solutions business, which comprises ~70% of our SOTP-based target price. We value Petrochemicals business using 2025-27 P/E multiple of 10x, Advanced Materials business using a 2025 EV/Sales of 2.0x and Life Sciences business using a 2025-27 P/E of 50x.

Samsung SDI Co Ltd

We value Samsung SDI using the DCF approach with a WACC of 9.3% and a terminal growth rate of 3%. Our DCF model is based on annual free cash flow forecasts until 2050, plus a terminal value estimate to capture the continuing value of the company. Our price target is KRW520,000

RISKS**Contemporary Amperex Technology Co Ltd**

For CATL (A), key risks include: 1) overcapacity of battery manufacturing in China 2) geopolitical factors which restrict CATL market share and 3) increased competition from vertically integrated OEM's.

For CATL (H), key downside risks include: 1) overcapacity of battery manufacturing in China 2) geopolitical factors which restrict CATL market share and 3) increased competition from vertically integrated OEM's.

LG Energy Solution

Key upside risks include 1) increasing market share with customer diversification which could increase sales, 2) rising margins with better costs control and raw material pass through and 3) improved battery quality which could lower the risks of recalls.

Key downside risks include 1) lower tax benefits from US IRA policy which LGES currently benefits from, 2) redistribution of tax credits with customers or partners, and 3) cost inflation in battery manufacturing.

LG Chem Ltd

Downside risks include: 1) increasing competition within the EV battery industry, 2) rising raw material costs which could put additional pressure on the EV value chain, 3) battery quality issues which could lead to battery recalls, and 4) a larger than expected conglomerate discount. In addition, oversupply of chemicals and weak demand could create sustained lower margins.

Key upside risks include: 1) divestment of the LGES stake; 2) faster growth in demand for EV batteries and related materials; and 3) margin expansion driven by improved cost management and effective raw material cost pass-through.

Samsung SDI Co Ltd

Samsung SDI's earnings growth depends on the adoption of electric vehicles and energy storage systems to boost battery revenues and profits. Any change in strategy by automakers, or lack of cost declines would reduce this upside. Other downside risks include loss of sales to OEM switching battery suppliers. A reduction of US IRA subsidies would reduce benefits to Samsung SDI's profitability which is also a downside risk.

Key upside risks comprise: 1) higher-than-anticipated demand for ESS batteries, particularly driven by robust data center requirements; 2) increased EV battery demand from clients such as BMW following the launch of new models; and 3) accelerated commercialization advancements in solid-state battery technology

RATINGS DEFINITIONS, BENCHMARKS AND DISTRIBUTION

EQUITY RATINGS DEFINITIONS

Bernstein brand

The Bernstein brand rates stocks based on forecasts of relative performance for the next 12 months versus the S&P 500 for stocks listed on the U.S. and Canadian exchanges, versus the Bloomberg Europe Developed Markets Large and Mid Cap Price Return Index EUR (EDME) for stocks listed on the European exchanges and emerging markets exchanges outside of the Asia Pacific region, versus the Bloomberg Japan Large and Mid Cap Price Return Index USD (JPL) for stocks listed on the Japanese exchanges, and versus the Bloomberg Asia ex-Japan Large and Mid Cap Price Return Index (ASIA) for stocks listed on the Asian (ex-Japan) exchanges -unless otherwise specified.

The Bernstein brand has three categories of ratings:

- Outperform: Stock will outpace the market index by more than 15 pp
- Market-Perform: Stock will perform in line with the market index to within +/- 15 pp
- Underperform: Stock will trail the performance of the market index by more than 15 pp

Coverage Suspended: Coverage of a company under the Bernstein research brand has been suspended. Ratings and price targets are suspended temporarily, are no longer current, and should therefore not be relied upon.

Not Rated: A rating assigned when the stock cannot be accurately valued, or the performance of the company accurately predicted, at the present time. The covering analyst may continue to publish research reports on the company to update investors on events and developments.

Not Covered (NC) denotes companies that are not under coverage.

Bernstein brand stock ratings are based on a 12-month time horizon.

Autonomous brand – common stocks

The Autonomous brand rates common stocks as indicated below. As our benchmarks we use the Bloomberg Europe 600 Financials Price Return Index (E600BK) and Bloomberg Europe Dev Mkt Financials Large and Mid Cap Price Ret Index EUR (EDMFI) index for developed European banks and Payments, the Bloomberg Europe 600 Insurance Price Return Index (E600IN) for European insurers, the S&P 500 and S&P Financials for US banks and Payments coverage, S5LIFE for US Insurance, the S&P Insurance Select Industry (SPSIINS) for US Non-Life Insurers coverage, the Bloomberg Emerging Markets Financials Large, Mid and Small Cap Price Return Index (EMLSF) for emerging market banks and insurers and Payments, and the Bloomberg Japan Financials Large & Mid Cap Price Return Index (JPFILM) for Japanese Financials. Ratings are stated relative to the sector (not the market).

The Autonomous brand has three categories of common stock ratings:

- Outperform (OP): Stock will outpace the relevant index by more than 10 pp
- Neutral (N): Stock will perform in line with the market index to within +/-10 pp
- Underperform (UP): Stock will trail the performance of the relevant index by more than 10 pp

Coverage Suspended: Coverage of a company under the Autonomous research brand has been suspended. Ratings and price targets are suspended temporarily, are no longer current, and should therefore not be relied upon.

Not Rated: A rating assigned when the stock cannot be accurately valued, or the performance of the company accurately predicted, at the present time. The covering analyst may continue to publish research reports on the company to update investors on events and developments.

Those denoted as 'Feature' (e.g., Feature Outperform FOP, Feature Under Outperform FUP) are our core ideas.

Not Covered (NC) denotes companies that are not under coverage.

Autonomous brand common stock ratings are based on a 12-month time horizon.

Autonomous brand – preferred stocks

The Autonomous brand has three categories of preferred stock ratings:

- Outperform (OP): The total return of the preferred instrument is expected to outperform preferred securities of other issuers operating in similar sectors or rating categories over the next six months.
- Neutral (N): The total return of the preferred instrument is expected to perform in line with preferred securities of other issuers operating in similar sectors or rating categories over the next six months.
- Underperform (UP): The total return of the preferred instrument is expected to underperform preferred securities of other issuers operating in similar sectors or rating categories over the next six months.

Autonomous preferred stock ratings are based on a 6-month time horizon.

AUTONOMOUS CREDIT RESEARCH

Where this report contains investment recommendations for credit instruments, as defined in article 3(1)(35) of the Market Abuse Regulation, the information below is presented to comply with its disclosure requirements.

The report may also include reference(s) to published opinions by other Autonomous or Bernstein analysts covering the equity securities of the issuer(s) referenced herein. Please note an investment recommendation for credit instruments published by the author(s) of this report may differ from the published view of the analyst covering equity securities for the issuer(s) contained in this report and vice versa.

CREDIT RATINGS DEFINITIONS

The Autonomous brand has three categories of credit ratings:

- Credit Outperform (C-OP): The total return of the Reference Credit Instrument is expected to outperform the credit spread of bonds of other issuers operating in similar sectors or rating categories over the next six months.

- **Credit Neutral (C-N):** The total return of the Reference Credit Instrument is expected to perform in line with the credit spread of bonds of other issuers operating in similar sectors or rating categories over the next six months.
- **Credit Underperform (C-UP):** The total return of the Reference Credit Instrument is expected to underperform the credit spread of bonds of other issuers operating in similar sectors or rating categories over the next six months.

Autonomous credit ratings are based on a 6-month time horizon.

A list of all investment recommendations produced by the author(s) of this report alongside credit ratings history are available upon request.

It is at the sole discretion of the Firm as to when to initiate, update and cease research coverage. The Firm has established, maintains and relies on information barriers to control the flow of information contained in one or more areas (i.e. the private side) within the Firm, and into other areas, units, groups or affiliates (i.e. public side) of the Firm

DISTRIBUTION OF EQUITY RATINGS/INVESTMENT BANKING SERVICES

Equity Rating	Market Abuse Regulation (MAR) and FINRA Rating Category	Global Rating Distribution	Investment Banking Relationships*
Outperform	BUY	51.2%	15.3%
Market-Perform (Bernstein Brand) Neutral (Autonomous Brand)	HOLD	35.8%	16.2%
Underperform	SELL	13.1%	13.6%

* These figures represent the percentage of companies within each equity rating category for which affiliates of Bernstein have provided investment banking services within the previous 12 months.

As of June 30, 2026. All figures are updated quarterly.

+65 Sanford C. Bernstein (Singapore) Private Limited; Singapore

+81 Sanford C. Bernstein Japan KK; Tokyo, Japan

Where this report has been prepared by research analyst(s) employed by a non-US affiliate, such analyst(s), is/are (unless otherwise expressly noted below) not registered as associated persons of Bernstein Institutional Services LLC or any other SEC-registered broker-dealer and are not licensed or qualified as research analysts with FINRA. Accordingly, such analyst(s) may not be subject to FINRA's restrictions regarding (among other things) communications by research analysts with a subject company, interactions between research analysts and investment banking personnel, participation by research analysts in solicitation and marketing activities relating to investment banking transactions, public appearances by research analysts, and trading securities held by a research analyst account.

Where this report has been prepared by research analyst(s) employed by Société Générale Africa Technologies & Services (part of the Société Générale group of companies), it has been prepared on behalf of a Bernstein company under a Global Services Agreement in place between Bernstein and Société Générale.

CERTIFICATION

Each research analyst listed in this report, who is primarily responsible for the preparation of the content of this report, certifies that all of the views expressed in this publication accurately reflect that analyst's personal views about any and all of the subject securities or issuers and that no part of that analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views in this publication.

II. ADDITIONAL GLOBAL CONFLICT DISCLOSURES

It is at the sole discretion of the Firm as to when to initiate, update and cease research coverage. The Firm has established, maintains and relies on information barriers to control the flow of information contained in one or more areas (i.e., the private side) within the Firm, and into other areas, units, groups or affiliates (i.e., public side) of the Firm.

III. OTHER IMPORTANT INFORMATION AND DISCLOSURES

Separate branding is maintained for "Bernstein" and "Autonomous" research products.

- Bernstein produces a number of different types of research products including, among others, fundamental analysis and quantitative analysis under both the "Autonomous" and "Bernstein" brands. Recommendations contained within one type of research product may differ from recommendations contained within other types of research products, whether as a result of differing time horizons, methodologies or otherwise. Furthermore, views or recommendations within a research product issued under one brand may differ from views or recommendations under the same type of research product issued under the other brand. The Research Ratings System for the two brands and other information related to those Rating Systems are included in the previous section.
- Autonomous operates as a separate business unit within the following entities: Bernstein Institutional Services LLC, Bernstein Autonomous LLP, Sanford C. Bernstein (Hong Kong) Limited 盛博香港有限公司 and Sanford C. Bernstein (India) Private Limited. For information relating to "Autonomous" branded products (including certain Sales materials) please visit: www.autonomous.com. For information relating to Bernstein branded products please visit: www.bernsteinresearch.com.

Analysts are compensated based on aggregate contributions to the research franchise as measured by account penetration, productivity and proactivity of investment ideas. No analysts are compensated based on performance in, or contributions to, generating investment banking revenues.

This report has been produced by an independent analyst as defined in Article 3 (1)(34)(i) of EU 596/2014 Market Abuse Regulation ("MAR") and the same article of MAR as it forms part of United Kingdom domestic law by virtue of the European Union (Withdrawal) Act 2018.

To our readers in the United States: Bernstein Institutional Services LLC, a broker-dealer registered with the U.S. Securities and Exchange Commission ("SEC") and a member of the U.S. Financial Industry Regulatory Authority, Inc. ("FINRA") is distributing this publication in the United States and accepts responsibility for its contents. Where this material contains an analysis of debt product(s), such material is intended only for institutional investors and is not subject to the US independence and disclosure standards applicable to debt research prepared for retail investors.

Bernstein Institutional Services LLC may act as principal for its own account or as agent for another person (including an affiliate) in sales or purchases of any security which is a subject of this report. This report does not purport to meet the objectives or needs

of any specific individuals, entities or accounts.

To our readers in Canada: If this publication pertains to a Canadian domiciled company, it is being distributed in Canada by Sanford C. Bernstein (Canada) Limited, which is licensed and regulated by the Canadian Investment Regulatory Organization. If the publication pertains to a non-Canadian domiciled company, it is being distributed by Bernstein Institutional Services LLC, which is licensed and regulated by both the SEC and FINRA, into Canada under the International Dealers Exemption.

This document may not be passed onto any person in Canada unless that person qualifies as "permitted client" as defined in Section 1.1 of NI 31-103.

To our readers in Brazil: This report has been prepared by Bernstein Institutional Services LLC, and Banco BTG Pactual S.A. ("BTG") is responsible for the distribution of this report in Brazil.

To readers in the United Kingdom: This publication has been issued or approved for issue in the United Kingdom by Bernstein Autonomous LLP, authorised and regulated by the Financial Conduct Authority and located at 60 London Wall, London EC2M 5SH, +44 (0)20-7170-5000. Registered in England & Wales No OC343985.

This document is for distribution only to persons who (i) have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (as amended, the "Financial Promotion Order"), (ii) are persons falling within Article 49(2)(a) to (d) ("high net worth companies, unincorporated associations, etc.") of the Financial Promotion Order, (iii) are outside the United Kingdom, or (iv) are persons to whom an invitation or inducement to engage in investment activity (within the meaning of section 21 of the FSMA) in connection with the issue or sale of any securities may otherwise lawfully be communicated or caused to be communicated (all such persons together being referred to as "relevant persons"). This document is directed only at relevant persons and must not be acted on or relied on by persons who are not relevant persons. Any investment or investment activity to which this document relates is available only to relevant persons and will be engaged in only with relevant persons.

To our readers in the member states of the EEA: This publication is being distributed by BSG France SA, which is authorised and regulated by the Autorité de Contrôle Prudentiel et de Résolution (ACPR) and Autorité des Marchés Financiers (AMF).

To our readers in Hong Kong: This publication is being distributed in Hong Kong by Sanford C. Bernstein (Hong Kong) Limited 盛博香港有限公司, which is licensed and regulated by the Hong Kong Securities and Futures Commission (Central Entity No. AXC846) to carry out Type 4 (Advising on Securities) regulated activities and subject to the licensing conditions mentioned in the SFC Public Register (<https://www.sfc.hk/publicregWeb/corp/AXC846/details>). This publication is solely for professional investors, as defined in the Securities and Futures Ordinance (Cap. 571). The purpose of this report is solely to provide an analysis of the issuers referred to in this report and is not intended for any purpose contrary to the laws of Hong Kong.

To our readers in Singapore: This publication is being distributed in Singapore by Sanford C. Bernstein (Singapore) Private Limited, only to accredited investors or institutional investors, as defined in the Securities and Futures Act 2001 of Singapore ("SFA"). Recipients in Singapore should contact Sanford C. Bernstein (Singapore) Private Limited in respect of matters arising from, or in connection with, this publication. Sanford C. Bernstein (Singapore) Private Limited is regulated by the Monetary Authority of Singapore and licensed under the SFA as a capital markets services licence holder for dealing in capital markets products that are securities and collective investment schemes and an exempt financial adviser for advising on, issuing and promulgating analyses and reports on securities. Sanford C. Bernstein (Singapore) Private Limited is registered in Singapore with Company Registration No. 20213710W and located at 8 Marina Boulevard, #12-01, Marina Bay Financial Centre, Singapore 018981, +65-6326-7000.

To our readers in the People's Republic of China: The securities referred to in this document are not being offered or sold and may not be offered or sold, directly or indirectly, in the People's Republic of China (for such purposes, not including the Hong Kong and Macau Special Administrative Regions or Taiwan, the "PRC") in contravention of any applicable laws of the PRC.

This document does not constitute an offer to sell or the solicitation of an offer to buy any securities in the PRC to any person to whom it is unlawful to make the offer or solicitation in the PRC.

We do not represent that this document may be lawfully distributed, or that any securities may be lawfully offered, in compliance with any applicable registration or other requirements in the PRC, or pursuant to an exemption available thereunder, or assume any responsibility for facilitating any such distribution or offering. In particular, no action has been taken by us which would permit a public offering of any securities or distribution of this document in the PRC. Accordingly, the securities are not being offered or sold within the PRC by means of this document or any other document. Neither this document nor any advertisement or other offering material may be distributed or published in the PRC, except under circumstances that will result in compliance with any applicable laws and regulations.

To our readers in Japan: This publication is being distributed in Japan by Sanford C. Bernstein Japan KK (サンフォード・C・バーンスタイン株式会社), which is registered in Japan as a Financial Instruments Business Operator with the Kanto Local

Finance Bureau (registration number: The Director-General of Kanto Local Finance Bureau (FIBO) No.3387) and regulated by the Financial Services Agency. It is also a member of Investment Management Association of Japan. This publication is solely for qualified institutional investors in Japan only, as defined in Article 2, paragraph (3), items (i) of the Financial Instruments and Exchange Act.

For the institutional client readers in Japan who have been granted access to the Bernstein website by Daiwa Securities Group Inc. ("Daiwa"), your access to this document should not be construed as meaning that Bernstein is providing you with investment advice for any purposes. Whilst Bernstein has prepared this document, your relationship is, and will remain with, Daiwa, and Bernstein has neither any contractual relationship with you nor any obligations towards you.

To our readers in Australia: Sanford C. Bernstein (Hong Kong) Limited 盛博香港有限公司 is responsible for distributing research in Australia. It is regulated by the Securities and Exchange Commission under U.S. laws, by the Financial Conduct Authority under U.K. laws, which differs from Australian laws. Sanford C. Bernstein (Hong Kong) Limited 盛博香港有限公司 is exempt from the requirement to hold an Australian financial services license under the Corporations Act 2001 in respect of the provision of the following financial services to wholesale clients:

- providing financial product advice;
- dealing in a financial product;
- making a market for a financial product; and
- providing a custodial or depository service.

To our readers in India: This publication is being distributed in India by Sanford C. Bernstein (India) Private Limited (SCB India) which is licensed and regulated by Securities and Exchange Board of India ("SEBI") as a research analyst entity under the SEBI (Research Analyst) Regulations, 2014, having registration no. INH000006378 and as a stock broker having registration no. INZ000213537. SCB India is currently engaged in the business of providing research and stock broking services. Please refer to www.bernsteinresearch.in for more information.

- SCB India is a Private limited company incorporated under the Companies Act, 2013, on April 12, 2017 bearing corporate identification number U65999MH2017FTC293762, and registered office at Level 3A, 4th Floor, First International Financial Centre, Plot Nos C-54 and C-55, G Block, Near CBI Office, Bandra Kurla Complex, Bandra (East), Mumbai 400098, Maharashtra, India (Phone No: +91-22-68421401).

LEGAL

All research publications are disseminated to our clients through posting on the firm's password protected websites, bernsteinresearch.com and autonomous.com. Certain, but not all, research publications are also made available to clients through third-party vendors or redistributed to clients through alternate electronic means as a convenience.

This publication has been published and distributed in accordance with the Firm's policy for management of conflicts of interest in investment research, a copy of which is available from Bernstein Institutional Services LLC, Director of Compliance, 245 Park Avenue, New York, NY 10167. Additional disclosures and information regarding Bernstein's business are available on our website www.bernsteinresearch.com.

The securities described herein may not be eligible for sale in all jurisdictions or to certain categories of investors where that permission profile is not consistent with the licenses held by the entities noted herein. This document is for distribution only as may be permitted by law. This publication is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of, or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject any of the entities referenced herein or any of their subsidiaries or affiliates to any registration or licensing requirement within such jurisdiction. This publication is based upon public sources we believe to be reliable, but no representation is made by us that the publication is accurate or complete. We do not undertake to advise you of any change in the reported information or in the opinions herein. This publication was prepared and issued by entity referred to herein for distribution to eligible counterparties or professional clients. This publication is not an offer to buy or sell any security, and it does not constitute investment, legal or tax advice. The investments referred to herein may not be suitable for you. Investors must make their own investment decisions in consultation with their professional advisors in light of their specific circumstances. The value of investments may fluctuate, and investments that are denominated in foreign currencies may fluctuate in value as a result of exposure to exchange rate movements. Information about past performance of an investment is not necessarily a guide to, indicator of, or assurance of, future performance.

This report is directed to and intended only for our clients who are "eligible counterparties", "professional clients", "institutional investors" and/or "professional investors" as defined by the aforementioned regulators, and must not be redistributed to retail

clients as defined by the aforementioned regulators. Retail clients who receive this report should note that the services of the entities noted herein are not available to them and should not rely on the material herein to make an investment decision. The result of such act will not hold the entities noted herein liable for any loss thus incurred as the entities noted herein are not registered/ authorised/ licensed to deal with retail clients and will not enter into any contractual agreement/arrangement with retail clients. This report is provided subject to the terms and conditions of any agreement that the clients may have entered into with the entities noted herein. All research reports are disseminated on a simultaneous basis to eligible clients through electronic publication to our client portal.

The information in this report was prepared by Bernstein solely for the internal business use of our clients. Clients may store, display, analyze, reformat and print the information in this report for this limited use only. Clients may not copy, alter, create derivative works, resell, reverse engineer, commercially exploit, share or distribute any part of the information contained herein for any purpose without Bernstein's express written consent. These restrictions include extracting data or using the content to develop indices or other products. Further, you may not use this report, or any portion of this report, to train or finetune any third-party machine learning or artificial intelligence system, or as a prompt or input into any such system. You also may not, without Bernstein's express written consent, do any of the foregoing in connection with your own internal machine learning or artificial intelligence system.

Bernstein may use artificial intelligence tools in the preparation of its materials. Any such materials are reviewed by Bernstein's research analysts prior to publication.

This report has been prepared for information purposes only and is based on current public information that we consider reliable, but the entities noted herein do not warrant or represent (express or implied) as to the sources of information or data contained herein are accurate, complete, not misleading or as to its fitness for the purpose intended even though the entities noted herein rely on reputable or trustworthy data providers, it should not be relied upon as such. Opinions expressed are the author(s)' current opinions as of the date appearing on the material only and we do not undertake to advise you of any change in the reported information or in the opinions herein.

Any references to Societe Generale herein are purely factual, based upon publicly available information, and included for comparative purposes only. They do not constitute an opinion or recommendation with respect to the securities of Societe Generale.

This publication was prepared and issued by the entity referred to herein for distribution to eligible counterparties or professional clients. The information in this report is intended for general circulation and does not constitute an offer to buy or sell any security, investment, legal or tax advice nor a personal recommendation, as defined by any of the aforementioned regulators. It does not take into account the particular investment objectives, financial situations, or needs of individual investors. The report has not been reviewed by any of the aforementioned regulators and does not represent any official recommendation from the aforementioned regulators. The investments referred to herein may not be suitable for you. Investors must make their own investment decisions in consultation with advice sought from a financial adviser regarding the suitability of the investment product, taking into account the specific investment objectives, financial situation or particular needs of any recipient of the recommendation, before the recipient makes a commitment to purchase the investment product.

The analysis contained herein is based on numerous assumptions. Different assumptions could result in materially different results. The information in this report does not constitute, or form part of, any offer to sell or issue, or any offer to purchase or subscribe for shares, or to induce engagement in any other investment activity. The value of any securities or financial instruments mentioned in this report may fluctuate subject to market conditions. Information about past performance of an investment is not necessarily a guide to, indicative of, or assurance of future performance. Estimates of future performance mentioned by the research analyst in this report are based on assumptions that may not be realized due to unforeseen factors like market volatility/fluctuation. In relation to securities or financial instruments denominated in a foreign currency other than the clients' home currency, movements in exchange rates will have an effect on the value, either favorable or unfavorable. Before acting on any recommendations in this report, recipients should consider the appropriateness of investing in the subject securities or financial instruments mentioned in this report and, if necessary, seek independent professional advice.

The securities described herein may not be eligible for sale in all jurisdictions or to certain categories of investors where that permission profile is not consistent with the licenses held by the entities noted herein. This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject the entities noted herein to any regulation or licensing requirement within such jurisdiction.
