2Q26 Review: Smartphone GPM Beats, EV Beta Weighs, New Catalyst Window Opens; Buy

1810.HK

12m Price Target: **HK\$39.00**Price: **HK\$26.18**Upside: **49.0%**

Ahead of Xiaomi's SkyNomad model launch in early Sep, **Xiaomi delivered 2Q26 results that are largely inline with expectations.** Revenue declined -6% yoy (largely inline with GSe/Visible Alpha Consensus Data), while adj. net profit fell -43% yoy to Rmb6.2bn (4% above GSe/2% below consensus) as higher-than-expected fair value gains and other income offset lower operating income from higher-than-expected OPEX.

By segment, we view **smartphone GPM at 8.5% as the biggest positive surprise** which demonstrates Xiaomi's solid execution in balancing shipments (-26% yoy), ASP (+26% yoy) and GPM against rising BOM costs; we **raise 2026-28E smartphone GPM to 8.9%/8.9%/9.5%** (vs. 8.1%/8.5%/9.3% prior) and expect 2026E GPM may bottom out in 3Q26E. That said, **the negative beta in the auto industry weighed on smart EV revenue and profitability;** revenue from EV, AI and other initiatives grew +17% yoy (5%/8% below GSe/consensus) on lower ASP, and segment GPM fell below 20% for the first time since 4Q24 (including some margin drag from AI revenue); accordingly, **we cut our 2026-28E EV, AI, and other initiatives revenue by 6-12%** as we expect lower shipment volume (450k/740k/960k, respectively), and lower GPM by 1.1-1.4pp to 19.4%/20.0%/20.1% despite our confidence in SkyNomad's demand and profitability.

By and large, we lower 2026-28E revenue by 3% on average primarily on lower EV revenue, and cut adj. net profit by 5% on average due to slower EV profitability ramp-up and continued AI investments. We estimate **Rmb35.4bn "backbone profit" in 2026E** (-5% yoy) which is higher than prior GSe thanks to larger investments gains and other income; this backbone profit is equivalent to c.150% of **Rmb24.0bn group adj. net profit in 2026E** due to Rmb3-4bn loss from smartphones and c.Rmb8bn loss from EV, AI and other new initiatives.

Following the +39% share price performance (vs. HSTECH's +10%) from Jun 24 (GS note Setting the scene for a catalyst-rich 3Q and potential turnaround) to July 29 ahead of Xiaomi's second EV Technology Conference, Xiaomi's share price has since fallen -18% vs. HSTECH -3%. We believe **a new round of catalysts are around corner** including **i) EV** – the SkyNomad official launch in early Sep and confirmed order volume by early Oct (the end of the National Day Golden Week); **ii) AIoT** – Mijia brand launch at scale in Europe at IFA 2026 which should pave way to further overseas expansion; **iii) chipset/OS** – the new-gen XRING chipset and HyperOS release; **iv) smartphone** – the flagship Xiaomi 18 model release in end-Sep; and **v) AI** – the MiMo-V3 model and other AI application releases. **Stay Buy** with our updated **12m SOTP-based TP of HK\$39** (vs. HK\$40 prior, +49% implied upside).

Investment Thesis - Xiaomi Corp.

We view Xiaomi, which is the world's #3 smartphone brand and a leading consumer AIoT/NEV platform, as still being in the early stages of a multi-year ecosystem expansion underpinned by its "Human x Car x Home" strategy. Over the longer term, we believe

Xiaomi's robust balance sheet, strong capabilities in ecosystem integration, and cost advantages arising from scale and deep involvement in the EV supply chain will enhance its competitiveness and appeal in the EV market. We also believe Xiaomi is well-positioned to build one of the largest consumer physical intelligence ecosystems globally, leveraging its interconnected consumer terminals. We are Buy-rated.

Price Target Risks and Methodology - Xiaomi Corp.

We are Buy-rated on Xiaomi with a 12-month target price of HK\$39, based on a SOTP valuation methodology: 1) 16x target 12m-fwd EV/NOPAT on Xiaomi core; 2) a DCF-based valuation for Xiaomi EV of US\$35bn (12% WACC and 3% TGR); 3) a 10% holdco discount. Key downside risks: 1) More intense competition and weaker market share gains within the global smartphone industry. 2) Higher GPM pressure on the smartphone/EV business. 3) Below-expected execution on Xiaomi brand premiumization and the EV business. 4) Intensifying geopolitical risks and regulatory uncertainties. 5) Softer macro environment and weaker smartphone/IoT demand. 6) FX fluctuation.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists

and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, make a market or act as liquidity provider in, and buy or sell, any securities, derivatives, or other financial instruments referred to in this research (including any financial instruments issued by the companies referred to herein), unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction

costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators.
