

Autodesk Inc. (ADSK)

Solid Core Execution; Upside Case Still Developing

ADSK 12m Price Target: **\$265.00** Price: **\$270.58** Downside: **2.1%**

We reiterate our Neutral rating and raise our Price Target to \$265 on Autodesk following F2Q results that saw Revenue +2% above Consensus, Billings +2%, Non-GAAP Op. Income +5%, GAAP EPS +18% and FCF +8%. Management increased underlying Revenue guidance beyond the MaintainX contribution and raised the underlying FY27 billings outlook +100 bps from +8-9% to +9-10%, reflecting stronger F1H execution, healthy renewals and improving sales productivity, with Western Europe taking longer to recover from the sales reorganization. Construction continues to grow north of 20%, while Fusion delivered healthy growth across users, ACV and multi-seat purchases. These remain important contributors to the current growth algorithm, although the quarter did not provide clear evidence of a materially faster company-wide growth profile. AI is helping Fusion adoption, but monetization remains largely embedded in subscriptions, with workflow automation and consumption still developing. MaintainX guidance was consistent with the initial framework, and Autodesk's immediate focus remains preserving the business's existing growth as it begins pursuing enterprise, geographic and AEC synergies. Underlying margin execution was solid, and management maintained FY27 guidance despite MaintainX dilution while still expecting modest expansion in FY28. This lends greater credibility to the 41% FY29 target, although the remaining bridge must absorb a full year of MaintainX costs and growing AI workloads. Overall, F2Q was consistent with our initiation framework: a durable franchise executing relatively well, with the next leg of upside still requiring more evidence.

Our Thesis

Autodesk remains one of the strongest franchises in software, with deep roots in design and an expanding presence across the broader asset lifecycle. Despite an uneven construction and manufacturing backdrop, Autodesk has continued to execute through pricing, cross-sell, product expansion, and growing contributions from

Construction Cloud and Fusion, leading us to view the current growth algorithm as broadly defensible. MaintainX and AI further expand the company's long-term opportunity set. At the same time, the path to a meaningfully faster growth profile is still being defined. We believe AI has the potential to strengthen Autodesk's platform and deepen its role within customer workflows over time, though the magnitude of the opportunity, path to monetization, and broader implications for design software remain uncertain today. Newer growth vectors continue to gain traction but remain modest relative to the scale of the core business, while margin expansion must be balanced against continued investment in cloud infrastructure, AI, and platform expansion. We remain constructive on Autodesk's strategic position and expect the company to execute reasonably well but view the setup as appropriately balanced until there is clearer evidence that these next-generation growth drivers can materially expand the company's long-term trajectory.

Valuation and Key Risks

We reiterate our Neutral rating and raise our 12-month Price Target to \$265 (from \$260 prior) as we adjust our estimates following updated FY27 guidance. Our valuation methodology is based on GAAP P/E (NTM). We apply a target multiple of 25x on SNTM GAAP EPS (unchanged) to arrive at our \$265 Price Target. Our target multiple is broadly consistent with the median of large-cap software and vertical peers.

Key Upside Risks:

- Autodesk could sustain stronger growth than we anticipate if Construction Cloud, Fusion, and MaintainX accelerate adoption faster than expected, allowing newer workflow categories to become a more meaningful contributor to growth and reducing the company's reliance on pricing and product mix.
- A recovery in AEC and Manufacturing activity could drive a reacceleration in customer formation and seat growth, providing an incremental tailwind to revenue growth beyond our current assumptions.
- AI could ultimately reinforce Autodesk's competitive position more than we expect, creating new monetization opportunities, improving customer productivity, and strengthening the value of the platform without disrupting the economics of the business.

Key Downside Risks:

- Growth could trend below our expectations if customer formation remains subdued and seat growth fails to recover, increasing Autodesk's dependence on pricing, cross-sell, and mix-driven expansion to sustain the current growth algorithm.
- Construction Cloud, Fusion, and MaintainX may take longer to scale than anticipated, limiting Autodesk's ability to generate meaningful share gains in newer workflow categories and reducing the contribution from its most important emerging growth vectors.
- AI-driven workflow changes could reshape software purchasing and usage patterns in ways that pressure pricing power, seat growth, or the long-term economics of incumbent design platforms more than we currently anticipate.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock’s total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region’s Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts’ investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs’ involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, make a market or act as liquidity provider in, and buy or sell, any securities, derivatives, or other financial instruments referred to in this research (including any financial instruments issued by the companies referred to herein), unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.
