12m Price Target: **\$120.00**Price: **\$107.02**Upside: **12.1%**

We reiterate our Buy rating on Rubrik and raise our Price Target to \$120 following strong F2Q results that saw ARR come in +1.2% above Consensus (in-line with F4Q beat), Revenue +8%, Contribution Margin +230 bps and FCF +70%. Management also raised FY27 Subscription ARR +1.3% above prior guidance and Revenue +2.8%, while Contribution Margin and FCFM increased +150 bps and +125 bps. Subscription NNARR was the standout, accelerating to +35% (vs. +16% in F4Q), its highest level since F4Q25 (organic, no Strata contribution). Yet the stock is indicated -6% AH, likely reflecting two dynamics: 1) Adjusted Cloud NNARR grew +20%, well below Subs NNARR, raising questions as Cloud was historically the sole growth driver. As legacy migrations wind down and sovereign/regulated demand revives self-hosted growth, however, Cloud alone no longer captures the full growth picture; and 2) The 2H raise to Subs NNARR (+\$4M) was modest relative to F2Q momentum (implying +6% F2H NNARR growth vs. +24% F1H). With expectations elevated (stock +45% since last print), investors likely wanted both stronger Cloud NNARR and greater F2H flow-through. All else equal, we view this as a high-quality print and believe demand momentum remains intact, with an upside path to sustained low-30's Subs ARR growth through F2H. Guidance embeds a sharp slowdown from F2Q, which we view as conservative given healthy demand signals observed ahead of earnings, while annual NNARR-based sales incentives support pipeline conversion through year-end. **Bottom line:** we continue to view Rubrik as one of the highest-quality growth stories in software, as the company pairs a durable Cyber Resilience growth engine with expanding relevance across Identity and AI.

Our Thesis

Rubrik is a Cyber Resilience company primed to disrupt the decades-old, legacy-dominated \$11B+ Backup and Recovery market. While legacy vendors provide critical tooling for disaster

recovery, Rubrik's cloud-native RSC platform was purpose-built for data security. Providing an end-to-end data security suite, Rubrik enables organizations to holistically secure their most critical asset, data, against ransomware attacks. Rubrik complements traditional infrastructure security solutions focused predominantly on securing the perimeter, acting as the last line of defense against breaches. We view Rubrik as a high-quality platform play in a historically low-innovation market segment with a multi-billion-dollar displacement opportunity. With the ever-growing frequency and sophistication of cyberattacks, Rubrik's distinct value proposition can encourage CIOs to repurpose existing backup budgets for a more comprehensive data security offering. As Rubrik layers on additional security features, we envisage a scenario in which it could compete directly for security budgets (expanding TAM 2-3x). While Rubrik continues to invest heavily in its GTM function and R&D, the company has made demonstrable progress on profitability, expanding FCFMs +1600 bps from FY25 to FY26. We anticipate long-term margin expansion as Rubrik leans into its multi-threaded expansion motion and generates a higher proportion of new business from renewals. With visibility into durable mid-20's-plus ARR/Revenue growth and FCF compounding higher, we believe Rubrik's risk-reward screens favorably at high-40's EV/FCF and 11x EV/S (FY28).

Rubrik Through the Lens of the GS Framework for Investing in Software

Rubrik screens well across the GS Framework for Investing in Software. Addressing a core TAM of \$15B+ by CY27 (Backup and Recovery), we believe Rubrik can continue to successfully capture incremental share of a significant brownfield market opportunity in Backup and Recovery and Data Management. Our view is predicated, in part, on Rubrik's proven track record of delivering high innovation velocity and differentiated products against a low innovation technology category, including through its core platform (CDM to RSC) and data security tooling via organic and inorganic investments (e.g., Laminar acquisition in Data Security Posture Management). With cyber-attacks increasing in both frequency and sophistication (+77% growth in CY23, per ITRC), Rubrik should be well positioned to benefit from this trend as Cyber Resilience becomes increasingly topical for CIOs and CISOs seeking to complement existing investments in traditional infrastructure security solutions historically focused on securing an organization's perimeter (vs. Rubrik at the data layer). With deep technology integrations and a differentiated end-to-end data security platform coupled with secular tailwinds from ongoing DX initiatives and enterprises hardening their security posture to help mitigate ever-growing Cyber threats, we believe Rubrik is uniquely positioned to sustainably grow revenue >20% over the next few years.

Exhibit 1: Mapping Rubrik to the GS Framework for Investing in Software

OUR VIEW ON RUBRIK		
8 KEY FACTORS	TANGIBLE	INTANGIBLE
TAM	TAM (2029): \$125B+ Across Data (\$30B+), Security/Resilience (\$45B+), Identity (\$10B+), and AI (\$40B+)	Replacing legacy backup solutions with comprehensive data security platforms (incl. backup and recovery capabilities)
SECULAR THEMES	Ongoing DX initiatives, unstructured data creation (Gen-AI), proliferation of ransomware attacks driving data security investments	Regulatory requirements (CCPA, GDPR, HIPAA, PIC) can act as a catalyst for broader enterprise adoption of data security solutions
ENTRY/EXIT POINTS	Stock trades at 11x (FY28) EV/Sales and 49x (FY28) EV/FCF	We view the risk/reward as compelling at current levels
LT FRAMEWORK RETURN	Compounded Returns: Bear: -12%, Base: 10%, Bull: 24%	Potential for durable 20%+ revenue growth with significant margin expansion as co. progresses towards material FCF generation
ECONOMICS	CAC of 1.8x, compares favorably to our broader coverage of 2-3x	High-quality expansion motion via growth in already-secured applications, new workload acquisition and cross-sell of data security products
PLATFORM/ BEST OF BREED	RSC's unique Zero Trust Design ensures resilience against ransomware attacks; Broad workload protection drives higher retention over time	Deep technology integrations, self-describing data architecture augmenting platform functionality and informing product roadmap
MOAT	High retention rates upmarket underscores stickiness of backup and recovery and data security to protect against ransomware attacks	Clear differentiation relative to legacy backup and recovery providers; Competition prevalent against Cohesity, Veeam, Commvault
ESG	Cloud-based RSC platform reduces physical infrastructure requirements, reducing emissions from power consumption	Securing mission-critical consumer and business data; provides Ransomware Recovery Warranty (\$10MM) for Enterprise customers

Valuation and Key Risks

We reiterate our Buy rating and raise our 12-month Price Target to \$120 (vs. \$106 prior) as we raise our estimates following F2Q results and revised FY27 guidance and mark-to-market with peers. Our valuation methodology is based on a two-pronged valuation framework with 50% weight to a target EV/S multiple and 50% weight to a target EV/FCF multiple. We apply a 52x EV/FCF multiple (vs. 48x prior) to our Q5-Q8 FCF estimate and 13x EV/S multiple (vs. 12x prior) to our Q5-Q8 Revenue estimate. Our EV/FCF and EV/S multiples are informed by a blend of high-growth platform and security peers.

Key downside risks include: 1) Heightened competition from Cohesity, Commvault and Veeam, among others, limits Rubrik's ability to capture a sizable portion of the legacy Backup and Recovery market, 2) Industry consolidation, akin to Cohesity combining with Veritas' data protection business, leading to better-resourced peers with improved distribution footprints and more competitive product offerings, impacting Rubrik's win rates, 3) Elevated product development and sales and marketing expenditures hinder further operating leverage, and 4) Slower-than-expected adoption of next-generation backup and recovery solutions limits Rubrik's addressable market opportunity.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, make a market or act as liquidity provider in, and buy or sell, any securities, derivatives, or other financial instruments referred to in this research (including any financial instruments issued by the companies referred to herein), unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators.
