Focus: MF Allocation; MSCI Review; India MF flows

- **Prelim MF Allocation:** Based on prelim. July EPFR data,

EM funds are most OW Brazil/Mexico, and most UW Taiwan. Over the past month, EM funds have raised exposure the most in Korea, and trimmed exposure in China and India. Sectorally, funds are most OW China Industrials, while most UW Taiwan Hardware/Semis and China Banks. In July, fund managers rotated back into Korea Tech H/W & Semis, while further cutting Taiwan Tech H/W & Semis exposure.

- **MSCI Index Review and Flow Implications:** We expect the upcoming MSCI index rebalancing (effective 8/31 close) could trigger over US\$35bn/US\$24bn in gross two-way flows across APAC/GEM markets for the core indices. Within EM, India, Taiwan, China and UAE could see the largest passive inflows, while Korea, Malaysia, Indonesia, Saudi Arabia and Mexico are expected to see the largest outflows. Sectorally, Tech Hardware & Semis and Software could see the largest passive inflows, offset by outflows in Internet/Media and Health Care.
- **India DII Flows:** Inflows in domestic MFs dropped 15% in July to US\$2.6bn on outflows from Large-cap funds. SIP inflows remained sticky, up +1% mom to US\$3.3bn. Fund cash levels improved in July to \$14bn (up from lows of \$12bn in June), per our estimate.
