

Oracle

Build Today, Tighten Tomorrow

- **Oracle's F1Q results provided further evidence that its massive backlog is beginning to convert**, with OCI growth accelerating as new capacity comes online and management maintaining an aggressive buildout through FY27 and FY28. RPO continues to grow, while increased use of customer prepayments and bring-your-own-hardware ("BYOH") structures should reduce Oracle's direct funding burden despite elevated capex and negative FCF. That being said, **execution remains critical** given the scale of the buildout, significant OpenAI concentration and rapidly growing off-balance sheet commitments.
- **We remain Overweight on Oracle**, with spreads still cheap despite some recovery from the midsummer wiles. The front end has retraced much of its widening as liquidity and near-term funding risk improve, while intermediate and long-dated bonds remain wider than early-summer levels. **We continue to view the premium for leverage, negative FCF and execution risk as attractive** given expected RPO conversion, the recently completed \$20bn equity raise and increased customer prepayments and BYOH. Downside risks to our rating include slower backlog conversion, data center delays, higher Oracle-funded capex, weaker FCF, additional debt-funded investments and customer concentration.
- **The AI supply technical remains a powerful constraint on Oracle's performance**, as heavy hyperscaler and data center supply, combined with Oracle's large capital structure, continues to limit sustained spread compression even without new Oracle issuance. Rallies on positive developments and strong results have repeatedly faded as hyperscaler supply pressure pulls spreads toward prior levels. **However, we expect capacity delivery and monetization to support eventual outperformance, making our Overweight a longer-term trade that will likely require more than a few months to fully play out.**
- **Oracle reported a strong F1Q as new cloud capacity began contributing more meaningfully to results.** Revenue increased 30% y/y to \$19.3bn, while OCI revenue rose 120% y/y to \$7.4bn, accelerating from 93% growth in F4Q. Operating income increased 31% to \$8.2bn and operating margin remained roughly flat at 42% **despite infrastructure-related gross margin pressure.** Management adjusted FY27 revenue guidance to "at least" \$90bn, up from a firm \$90bn prior, implying 34% growth, with F2Q revenue and cloud revenue expected to grow 30-34% and 65-71%, respectively. **They also affirmed prior FY27 capex guidance of \$90-95bn, though customer prepayments and BYOH agreements will reduce the net cash outflow to ~\$70bn.**
- **RPO reached \$664bn, up \$26bn q/q**, providing significant visibility into the next leg of OCI growth potential. **~50% is expected to convert over the next three years, including 13% over the next 12 months.** Most of the new RPOs signed during F1Q are not expected to contribute to revenue or capex until FY28 or later.
- **OpenAI remains the largest customer and biggest risk underlying Oracle's AI backlog**, with Stargate covering more than \$300bn of contracted capacity over five years with over 5GW under development. Oracle does not disclose OpenAI's share of the RPO, but the concentration is significant and

Overweight

makes Stargate execution a key driver of backlog conversion. Oracle also expanded the relationship beyond infrastructure by adding OpenAI API access, ChatGPT for Work and Codex to Oracle Marketplace.

- **Oracle delivered 850MW of AI capacity and more than 300k GPUs in F1Q, nearly 3x the prior quarter's capacity additions.** At the Abilene site, Oracle delivered 131k GPUs across six of eight buildings, representing 618MW and 75% of campus capacity, with customer acceptance compressed to 24 hours. **Shackelford remains on track for initial delivery in 1H27, although other projects have faced power, permitting and local opposition delays.** Broader site diversification and higher FY27 guidance suggest these delays have not materially constrained near-term capacity additions.
- **The firm also provided updates on two data center projects last week amid continued permitting and local scrutiny.** At [Project Jupiter](#) in New Mexico, a state Supreme Court stay applies only to the adjacent microgrid's air permit proceeding, allowing campus construction to continue, though this issue remains unresolved for now. In **Wisconsin**, Oracle reaffirmed its commitment to [Project Lighthouse](#) following a revised transmission application incorporating stakeholder feedback. Oracle will fund all project energy costs without increasing local customer rates and expects more than half of campus power to come from carbon-free sources, with regulatory review ongoing.
- **Oracle's legacy businesses remain an important source of recurring revenue and cash flow, though software revenue declined 3% y/y to \$5.5bn as customers continued migrating from on-premise products to the cloud.** Cloud applications revenue increased 10% y/y, with Fusion and industry applications growing faster than the broader portfolio, while multicloud database revenue rose 353% and customers increased 180% as Oracle expanded across Azure and AWS. **Despite the ongoing shift away from legacy software, these higher-margin, less capital-intensive businesses continue to provide cash flow support for the broader AI capex investment cycle.**
- **Capex remains the central pressure point in the Oracle credit story, with F1Q spending reaching \$28.5bn versus \$8.5bn a year ago.** Oracle maintained its prior FY27 capex guidance of \$90-95bn but expects net cash capex of no more than \$70bn as customers increasingly fund capacity through prepayments and BYOH. **Oracle received \$11.4bn of customer prepayments with a significant financing component during F1Q, while management said the vast majority of incremental RPO will not require additional Oracle capital.** Prepayments provide cash ahead of revenue recognition, while BYOH reduces Oracle's required investment without generating a cash inflow. These structures lower external funding needs, although prepayments represent a form of customer financing and boost reported OCF relative to internally generated cash flow.
- **Another potential funding source could eventually be GPU-backed financing,** whereby Oracle could use an off-balance sheet structure to shift hardware investment to third-party capital. An SPV could raise debt and equity to purchase NVIDIA GPUs and lease the hardware or compute capacity to Oracle, with Oracle's payments supporting the financing and NVIDIA potentially providing residual value support. This could reduce upfront cash capex and unsecured funding needs, although the payment obligations would remain economically debt-like. **No Oracle transaction has been announced, and we do not currently view it as essential given the success of customer prepayments and BYOH,** but the growing use of GPU financing and Oracle's significant hardware needs make this a plausible source of capital, in our view, as the buildout progresses.
- **FCF remained under pressure, with \$28.5bn of capex driving a \$5.4bn outflow despite a record OCF of \$23.1bn, which included the \$11.4bn of customer prepayments**

discussed above. Excluding prepayments, the firm reported OCF of \$11.7bn and an FCF outflow of \$16.8bn. **Management did not provide a specific timeframe for a return to positive FCF, though they said individual data center projects should become highly cash generative shortly after ramp**, with management expecting FCF conversion approaching 100% of post-tax EBITDA. However, with at least FY27 and FY28 expected to remain peak investment years, consolidated FCF will depend on the pace of capacity deployment and the share funded by customers and other third parties.

- **Liquidity improved following the completion of Oracle's \$20bn ATM and receipt of customer funding.** Cash and marketable securities increased to \$37.1bn from \$31.9bn at FYE26 despite elevated capex, supported by \$19.9bn of equity proceeds, while Oracle repaid \$4.2bn of debt. Gross borrowings remain elevated at ~\$125bn, but the funding mix is diversifying across debt, equity, customer prepayments, BYOH and other capex financing. **Additional funding needs remain significant, although potential future equity issuances and customer-funded structures should reduce reliance on unsecured debt relative to the gross investment requirement.**
- **Off-balance sheet commitments increased alongside the buildout, with \$288bn of uncommenced lease commitments in F1Q, up \$28bn q/q** and substantially all related to data centers. **These leases are expected to begin between F2Q27 and FY29**, and generally carry terms of 15-19 years. **Oracle also had \$34.2bn of purchase obligations** primarily related to cloud infrastructure and power, bringing disclosed unrecognized commitments above \$320bn. **These obligations should support future revenue but remain an important consideration when assessing longer-term leverage and fixed costs.**
- **On the rating agencies, we are still not particularly concerned about near-term pressure, especially around a downgrade to HY.** Maintaining IG remains imperative given the scale of Oracle's funding needs, and we expect the company to supplement debt funding with equity issuance and customer-funded structures as needed to protect ratings. **We also think the agencies will need greater visibility into backlog conversion, capacity monetization and the ultimate funding mix before making a more structural call.** This is particularly relevant for S&P at BBB- (Stable), where a downgrade would move Oracle below IG and raise the bar for acting before the trajectory of the buildout becomes clearer. For now, we think that the significant uncertainty around both the funding burden and eventual earnings contribution supports a wait-and-see approach.
- **We remain focused on Oracle's ability to convert its backlog while managing the associated capital requirements.** Key areas to watch include data center delivery, OCI growth, RPO conversion, project delays, customer concentration and the mix of Oracle-funded capacity, prepayments and BYOH. We are also monitoring capex and FCF through the expected FY27 and FY28 investment peak, growth in off-balance sheet commitments and the need for additional equity, debt or third-party financing.

***Indicates representative/primary bond/instrument.**

The table(s) above show the recommendation changes made by J.P. Morgan Credit Research Analysts in the subject company and/or instruments over the past three years (or, if no recommendation changes were made during that period, the most recent change). Notes: Effective April 11, 2016, J.P. Morgan changed its Credit Research Ratings System. Please see the Explanation of Credit Research Ratings below for the new definitions. The previous rating system no longer should be relied upon. For the history prior to April 11, 2016, please call 1-800-447-0406 or e-mail research.disclosure.inquiries@jpmorgan.com.

Explanation of Credit Research Valuation Methodology, Ratings and Risk to Ratings:

J.P. Morgan uses a bond-level rating system that incorporates valuations (relative value) and our fundamental view on the security. Our fundamental credit view of an issuer is based on the company's underlying credit trends, overall and our opinion on whether the issuer will be able to service its debt obligations when they become due and payable. We analyze, among other things, the company's cash flow capacity and trends and standard credit ratios, such as gross and net leverage, interest coverage and liquidity ratios. We also analyze profitability, capitalization and asset quality, among other variables, when assessing financials. Analysts also rate the issuer, based on the rating of the benchmark or representative security. Unless we specify a different recommendation for the company's individual securities, an issuer recommendation applies to all of the bonds at the same level of the issuer's capital structure. We may also rate certain loans and preferred securities, as applicable. This report also sets out within it the material underlying assumptions used. We use the following ratings for bonds (issues), issuers, loans, and preferred securities: Overweight (over the next three months, the recommended risk position is expected to outperform the relevant index, sector, or benchmark); Neutral (over the next three months, the recommended risk position is expected to perform in line with the relevant index, sector, or benchmark); and Underweight (over the next three months, the recommended risk position is expected to underperform the relevant index, sector, or benchmark). For CDS, we use the following rating system: Long Risk (over the next three months, the credit return on the recommended position is expected to exceed the relevant index, sector or benchmark); Neutral (over the next three months, the credit return on the recommended position is expected to match the relevant index, sector or benchmark); and Short Risk (over the next three months, the credit return on the recommended position is expected to underperform the relevant index, sector or benchmark).

J.P. Morgan Credit Research Ratings Distribution, as of July 04, 2026

	Overweight (buy)	Neutral (hold)	Underweight (sell)
Global Credit Research Universe*	26%	58%	16%
IB clients**	84%	84%	89%

*Please note that the percentages may not add to 100% because of rounding.

**Percentage of subject companies within each of the "Overweight," "Neutral" and "Underweight" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.

For purposes of FINRA ratings distribution rules only, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. The Credit Research Rating Distribution is at the issuer level. Issuers with an NR or an NC designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

Analysts' Compensation: The research analysts responsible for the preparation of this report receive compensation based upon various factors, including the quality and accuracy of research, client feedback, competitive factors, and overall firm revenues.

Other Disclosures

J.P. Morgan is a marketing name for investment banking businesses of JPMorgan Chase & Co. and its subsidiaries and affiliates worldwide.

UK MIFID FICC research unbundling exemption: UK clients should refer to [UK MIFID Research Unbundling exemption](#) for details of J.P. Morgan's implementation of the FICC research exemption and guidance on relevant FICC research categorisation.

Any long form nomenclature for references to China; Hong Kong; Taiwan; and Macau within this research material are Mainland China; Hong Kong SAR (China); Taiwan (China); and Macau SAR (China).

J.P. Morgan Research may, from time to time, write on issuers or securities targeted by economic or financial sanctions imposed or administered by the governmental authorities of the U.S., EU, UK or other relevant jurisdictions (Sanctioned Securities). Nothing in this report is intended to be read or construed as encouraging, facilitating, promoting or otherwise approving investment or dealing in such Sanctioned Securities. Clients

should be aware of their own legal and compliance obligations when making investment decisions.

Digital assets, which may also be referred to as virtual or crypto assets or crypto currencies (e.g. bitcoin), discussed in this research report are subject to a rapidly changing regulatory landscape. The application of relevant laws in respect of such assets may be unsettled, and the legality of any digital asset investment may be unclear. Prior to making any investment decision regarding any digital asset, investors should seek their own legal advice and be aware of any legal considerations regarding the purchase, holding or selling of such an investment. For relevant regulatory advisories on digital assets, including bitcoin and ethereum, please see <https://www.jpmorgan.com/disclosures/cryptoasset-disclosure>.

The author(s) of this research report may not be licensed to carry on regulated activities in your jurisdiction and, if not licensed, do not hold themselves out as being able to do so.

Exchange-Traded Funds (ETFs): J.P. Morgan Securities LLC ("JPMS") acts as authorized participant for substantially all U.S.-listed ETFs. To the extent that any ETFs are mentioned in this report, JPMS may earn commissions and transaction-based compensation in connection with the distribution of those ETF shares and may earn fees for performing other trade-related services, such as securities lending to short sellers of the ETF shares. JPMS may also perform services for the ETFs themselves, including acting as a broker or dealer to the ETFs. In addition, affiliates of JPMS may perform services for the ETFs, including trust, custodial, administration, lending, index calculation and/or maintenance and other services.

Options and Futures related research: If the information contained herein regards options- or futures-related research, such information is available only to persons who have received the proper options or futures risk disclosure documents. Please contact your J.P. Morgan Representative or visit <https://www.theocc.com/components/docs/riskstoc.pdf> for a copy of the Option Clearing Corporation's Characteristics and Risks of Standardized Options or https://www.finra.org/sites/default/files/2020-08/Security_Futures_Risk_Disclosure_Statement_2020.pdf for a copy of the Security Futures Risk Disclosure Statement.

Changes to Interbank Offered Rates (IBORs) and other benchmark rates: Certain interest rate benchmarks are, or may in the future become, subject to ongoing international, national and other regulatory guidance, reform and proposals for reform. For more information, please consult: https://www.jpmorgan.com/global/disclosures/interbank_offered_rates

Private Bank Clients: Where you are receiving research as a client of the private banking businesses offered by JPMorgan Chase & Co. and its subsidiaries ("J.P. Morgan Private Bank"), research is provided to you by J.P. Morgan Private Bank and not by any other division of J.P. Morgan, including, but not limited to, the J.P. Morgan Corporate and Investment Bank and its Global Research division.

Legal entity responsible for the production and distribution of research: The legal entity identified below the name of the Reg AC Research Analyst who authored this material is the legal entity responsible for the production of this research. Where multiple Reg AC Research Analysts authored this material with different legal entities identified below their names, these legal entities are jointly responsible for the production of this research. Where more than one legal entity is listed under an analyst's name, the first legal entity is responsible for the production unless stated otherwise. Research Analysts from various J.P. Morgan affiliates may have contributed to the production of this material but may not be licensed to carry out regulated activities in your jurisdiction (and do not hold themselves out as being able to do so). Unless otherwise stated below in the legal entity disclosures, this material has been distributed by the legal entity responsible for production, or where more than one legal entity is listed under the analyst's name, the first legal entity will be responsible for distribution. If you have any queries, please contact the relevant Research Analyst in your jurisdiction or the entity in your jurisdiction that has distributed this research material.

This material must not be acted on or relied on by persons who are not UK relevant persons. Any investment or investment activity to which this material relates is only available to UK relevant persons and will be engaged in only with UK relevant persons. A description of J.P. Morgan EMEA’s policy for prevention and avoidance of conflicts of interest related to the production of Research can be found at the following link: [J.P. Morgan EMEA - Research Independence Policy](#).

U.S.: J.P. Morgan Securities LLC (“JPMS”) is a member of the NYSE, FINRA, SIPC, and the NFA. JPMorgan Chase Bank, N.A. is a member of the FDIC. Material published by non-U.S. affiliates is distributed in the U.S. by JPMS who accepts responsibility for its content.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst's involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives,

or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.
