To the surprise of many (including us), US eCommerce demand has been accelerating over the past four quarters. 2Q26 felt like a significant earnings cycle, not only because the momentum in US eCommerce continued, but also because 3Q26 guidance was constructive on GMV trends even against tougher compares considering the timing of the uptick last year. In other words, eCommerce stocks are now starting to 'comp the comp'. The group is at an interesting juncture. It's hard to argue with improving data, but it's less clear why this has happened, which makes 2027 growth trajectories a fun debate. The sell-side is anchoring on deceleration, with the buy-side more of a spectrum of opinions. We lean positive (see [SHOP initiation at Outperform](#) and [Wayfair Upgrade](#)), but admittedly we too are speculating about 'what changed'. We don't have the perfect explanation, but we do have theories...

US eCommerce accelerates. For the past 2 years, US eCommerce growth has been stuck in the MSD to HSD range. This year, GMV trends have improved, with the industry growing ~10% and the largest platforms growing mid-teens — levels that feel like sticker shock but are close to what 'normal' would've been a few years ago. Penetration rates sit 17% with several core categories at ~30% — there is headroom for further online migration. Higher rates and rising oil prices raise questions on the durability of the consumer. So far, management teams have continued to sound constructive. Looking back on the past year, we break down drivers of acceleration into: **(1) top-of-funnel** and **(2) onsite** tailwinds.

Top-of-funnel: We believe there have been a few contributing factors, some more long-lasting than others. Firstly, apart from well documented pressure at the low-end, the US consumer appears to have held up well. Tax refunds probably helped in Q2, but the ongoing momentum into Q3 suggests the trend is bigger than this. Secondly, the digital ad auction got more favorable — notably, Amazon exited Google PLAs last August and Temu/Shein spending has been far more rational than in years past. But Q3 guides were good even as we comp this dynamic with Amazon. Furthermore, Amazon's own GMV trajectory has also been strong this year. On a related note, we believe US eCommerce is benefitting AI-driven improvements around content recommendation and targeting from the leading digital advertising platforms ([see META and GOOGL strength](#)), a symbiotic relationship.

Onsite drivers: We believe the story here is more idiosyncratic with the leading players improving platform quality and building adjacent growth drivers. For example, AMZN is quickly scaling into Everyday Essentials and Same-Day delivery, reinforcing its logistics lead and position in grocery/consumables. SHOP GMV momentum reflects a combination of Enterprise wins and International expansion. EBAY is benefitting from years of investment in trust, authentication, search, and listing tools coinciding with strength in key end-markets (e.g., Collectibles, reCommerce, P&A). Wayfair's rewards program has contributed to almost [half the company's growth this year by our math](#) with the store roll-out an incremental tailwind to come. And ETSY is doing the basics better around targeting and re-engagement, while also leaning into incremental advertising channels like social.

Where are the dollars flowing? To the largest platforms, as it has for years. Does Agentic change this? In 2Q26, the top 14 platforms made up ~82% of US GMV, gaining ~3ppts Y/Y. Walmart and Shopify (the one exception to the aggregation rule) led the way this quarter in terms of gains at scale, with Carvana and eBay punching above their weight too.

TOP-OF-FUNNEL DRIVERS: A STRONGER E-COMMERCE BACKDROP THAN EXPECTED

US eCommerce growth has accelerated this year, growing ~10% Y/Y through the first three quarters of 2026 (with Q3 based on our estimate) vs. our expectation of 8% at the start of the year. Tax refunds and Amazon PLA dynamics helped in 1H26, but guidance from our covered companies points to momentum continuing in Q3, which suggests additional factors at play. With no clear-cut explanation for the improvement, 2027 outcomes are a fun debate right now amongst investors. If US eCommerce can continue to grow at ~10% into next year, then we will likely see further positive revenue revisions across the space. If industry growth reverts to MSD, then expect multiple compression. We don't have a succinct explanation for 'what changed' this year, but we think a combination of factors have probably played a role:

- **Consumer remains more resilient than expected.** The "K-shaped" economy has been well documented, and incremental concerns around inflation and oil prices have further weighed on consumer related stocks. However, so far, the YTD data on retail and eCommerce spending and overall credit card trends have been solid — particularly on a nominal basis which flows through to GMV.
- **Digital advertising auction dynamics have been favorable.** Most notably Amazon exited Google PLAs last August and Temu/Shein spending has been far more rational than in years past. That said, Q3 guides are good even as we lap the Amazon dynamic and Amazon's own GMV trajectory has also been strong throughout this year.
- **AI-driven improvements in advertising efficiency.** Advances in Google's and Meta's advertising platforms have improved recommendations and targeting, driving higher conversion rates and better returns on ad spend (ROAS). This appears to be a more structural and durable tailwind for the sector.

EXHIBIT 4: US credit card spending growth has also accelerated in recent quarters.

For Card Volume growth, we use V, MA, AXP, Discover. July Y/Y growth rate is estimated based on V/MA MTD company disclosed data. Excludes COF migration to DFS starting 4Q25; reported overall volumes would have grown 7%/9% in 1Q26, 2Q26.

EXHIBIT 5: Our estimate coming into the year was for ~8% growth (pictured below). Longer-term, given where penetration rates sit, we would expect to see eCommerce growth persist in the 9-10% range, led by newer discretionary categories and verticals like grocery. 2027 will test of the durability of recent trends.

ONSITE DRIVERS: SELF-HELP INITIATIVES ARE BOOSTING GMV GROWTH

Beyond the top of funnel tailwinds, we believe the story here is more idiosyncratic with the leading eCommerce platforms investing behind improving platform quality and building out adjacent growth drivers.

- **Amazon** is quickly scaling into Everyday Essentials and Same-Day delivery, reinforcing its logistics lead and position in grocery and consumables. In 1H26, Amazon delivered 40% more items via Same Day and overnight delivery vs. 1H25 continuing to drive value and convenience for consumers.
- **Shopify** GMV momentum reflects a combination of Enterprise wins and International expansion.
- **eBay** is benefitting from years of investment in trust, authentication, search, and listing tools. This has coincided with strength in key end-markets (e.g., Collectibles, re-Commerce, P&A) helping eBay to maintain a strong growth momentum even as it laps tougher comps. AI-powered seller tools are also contributing to better tagging, metadata and categorization of listings, which yields a better offering for buyers.
- **Wayfair** has had success with its rewards program, which is driving almost [half the company's growth this year by our math](#). The physical retail rollout should provide an additional tailwind in 2027, with six new stores expected to open between by end of next year alongside the company's existing three locations.
- **Etsy** is doing the basics better on search, discovery, and re-targeting. Surfacing higher quality items to customers is also helping AOVs. Leaning into the social channel for marketing (TikTok, Instagram, YouTube) is helping with acquiring younger customers.

Broadly across the sector, advancements in AI/ML should contribute to better onsite search, discovery, and personalized recommendations. Marketplaces with limited frequency of use and a long tail of non-standardized merchandise should be better able to understand their own catalog and serve more relevant content, which can help close the gap in terms of quality of search & discovery to the bigger platforms. Conversational commerce searches should also offer up more context for what consumers are looking for (whether that takes place on the company's owned & operated vertical-specific agent or on a horizontal agent which then shares the query with the underlying marketplace/merchant). Agentic Commerce is raising plenty of questions in the market about underlying take rate dynamics for the incumbents — but if it lives up to its promise, then it should be a [tailwind to longer-term eCommerce adoption](#) at the aggregate industry level even if it shakes up the status quo.

EXHIBIT 11: Amazon is leaning harder into grocery, perishables and Everyday Essentials.**Amazon CEO Andy Jassy on the 2Q26 Earnings Call:**

"We're the second largest grocer in the US, and our grocery business continues growing quickly across perishables and non-perishables. The number of monthly active perishables customers grew over 50% since the start of the year. Same-day orders with perishables average over 3x more units per order, and fresh groceries now make up 6 of the top 20 best sellers on Amazon.com."

"We continue speeding up overall delivery and once again achieved record delivery speeds for customers in the first half of the year. We offer millions of items for same-day delivery with Prime, up to 40 times more selection than a typical big-box retail store, and our same-day network continues to expand. Globally, we delivered over 40% more items same-day or overnight in the first six months of the year than the same period last year."

"We also continued to expand our ultra-fast service, Amazon Now, which offers delivery in 30 minutes or less on thousands of everyday essentials. We added 80 new cities and towns across the US and several major cities in Egypt in Q2, and Amazon Now is available in nine countries in over 250 cities and towns globally. We continue to see strong customer response with over 80% growth in gross sales and units sold quarter over quarter, and we served over 60% more customers quarter over quarter."

EXHIBIT 15: Improvements in AI/ML capabilities are helping Etsy drive better onsite search, discovery, and recommendations. Others should benefit from this too.

Etsy (then in-coming) CEO at a Conference in December 2025

"What we're seeing with the advancements in AI and particularly capabilities of LLMs as they're evolving is the opportunities that that opens up for Etsy, particularly a marketplace like ours that has such unique inventory, they make things possible that were really difficult, if not impossible in the past. So, our ability to much more deeply understand buyers' tastes and interests as well as more deeply understand our inventory by leveraging not just the information that sellers give us, but things like photo – the data from photographs allows us to better make much more non-linear, less obvious connections. And so, that's where we've been really investing a lot of time."

WHERE ARE THE DOLLARS FLOWING? SHARE SHIFT IN 2Q26

In short, GMV dollars continue to flow to the largest platforms and marketplaces. Below, we highlight a combination of company reported financials and our own estimates for the largest eCommerce players in the US (excluding Apple) to get a better sense of market share trends for calendar 2Q26.

- **Amazon, Shopify and Walmart (once again) pulled in the majority of the incremental eCommerce dollars in Q2.** That said, Amazon was outpaced by the likes of Walmart, Shopify, Carvana, eBay and Costco. Given the prominence of Prime Day in 2Q26, it's encouraging to see the strength in eCommerce broaden out to other categories/platforms that should not have much overlap with general merchandise/the event.
- **SMID-Cap eCommerce marketplaces (Etsy, eBay, and Wayfair) get back to growth.** Riding the strength of its underlying end-markets, eBay gained share in Q2. Etsy and Wayfair trailed but HSD US GMV growth is a stark improvement from prior periods, considering the state of underlying categories like furniture/home goods.
- **Traditional retailers mixed.** Walmart, Costco, and Lowe's outpaced the broader eCommerce market, while others lagged a touch. However, even amongst the latter bucket, online growth rates were positive last quarter.

EXHIBIT 16: We estimate 2Q26 was a strong quarter of mid-to-high teens growth across the largest US eCommerce platforms and marketplaces, compared to low-double-digit for the broader market. Prime Day timing certainly helped in Q2 and should normalize in Q3.

RATINGS DEFINITIONS, BENCHMARKS AND DISTRIBUTION**EQUITY RATINGS DEFINITIONS****Bernstein brand**

The Bernstein brand rates stocks based on forecasts of relative performance for the next 12 months versus the S&P 500 for stocks listed on the U.S. and Canadian exchanges, versus the Bloomberg Europe Developed Markets Large and Mid Cap Price Return Index EUR (EDME) for stocks listed on the European exchanges and emerging markets exchanges outside of the Asia Pacific region, versus the Bloomberg Japan Large and Mid Cap Price Return Index USD (JPL) for stocks listed on the Japanese exchanges, and versus the Bloomberg Asia ex-Japan Large and Mid Cap Price Return Index (ASIA) for stocks listed on the Asian (ex-Japan) exchanges -unless otherwise specified.

The Bernstein brand has three categories of ratings:

- Outperform: Stock will outpace the market index by more than 15 pp
- Market-Perform: Stock will perform in line with the market index to within +/- 15 pp
- Underperform: Stock will trail the performance of the market index by more than 15 pp

Coverage Suspended: Coverage of a company under the Bernstein research brand has been suspended. Ratings and price targets are suspended temporarily, are no longer current, and should therefore not be relied upon.

Not Rated: A rating assigned when the stock cannot be accurately valued, or the performance of the company accurately predicted, at the present time. The covering analyst may continue to publish research reports on the company to update investors on events and developments.

Not Covered (NC) denotes companies that are not under coverage.

Bernstein brand stock ratings are based on a 12-month time horizon.

Autonomous brand – common stocks

The Autonomous brand rates common stocks as indicated below. As our benchmarks we use the Bloomberg Europe 600 Financials Price Return Index (E600BK) and Bloomberg Europe Dev Mkt Financials Large and Mid Cap Price Ret Index EUR (EDMFI) index for developed European banks and Payments, the Bloomberg Europe 600 Insurance Price Return Index (E600IN) for European insurers, the S&P 500 and S&P Financials for US banks and Payments coverage, S5LIFE for US Insurance, the S&P Insurance Select Industry (SPSIINS) for US Non-Life Insurers coverage, the Bloomberg Emerging Markets Financials Large, Mid and Small Cap Price Return Index (EMLSF) for emerging market banks and insurers and Payments, and the Bloomberg Japan Financials Large & Mid Cap Price Return Index (JPFILM) for Japanese Financials. Ratings are stated relative to the sector (not the market).

The Autonomous brand has three categories of common stock ratings:

- Outperform (OP): Stock will outpace the relevant index by more than 10 pp
- Neutral (N): Stock will perform in line with the market index to within +/-10 pp
- Underperform (UP): Stock will trail the performance of the relevant index by more than 10 pp

Coverage Suspended: Coverage of a company under the Autonomous research brand has been suspended. Ratings and price targets are suspended temporarily, are no longer current, and should therefore not be relied upon.

Not Rated: A rating assigned when the stock cannot be accurately valued, or the performance of the company accurately predicted, at the present time. The covering analyst may continue to publish research reports on the company to update investors on events and developments.

Those denoted as 'Feature' (e.g., Feature Outperform FOP, Feature Under Outperform FUP) are our core ideas.

Not Covered (NC) denotes companies that are not under coverage.

Autonomous brand common stock ratings are based on a 12-month time horizon.

Autonomous brand – preferred stocks

The Autonomous brand has three categories of preferred stock ratings:

- Outperform (OP): The total return of the preferred instrument is expected to outperform preferred securities of other issuers operating in similar sectors or rating categories over the next six months.
- Neutral (N): The total return of the preferred instrument is expected to perform in line with preferred securities of other issuers operating in similar sectors or rating categories over the next six months.
- Underperform (UP): The total return of the preferred instrument is expected to underperform preferred securities of other issuers operating in similar sectors or rating categories over the next six months.

Autonomous preferred stock ratings are based on a 6-month time horizon.

AUTONOMOUS CREDIT RESEARCH
