Raise 2026-28F earnings estimates

Interplex acquisition completed on 23 Sep

We raise our estimates for Bizlink's 2026-28F earnings, following the company's announcement that the acquisition of Interplex (unlisted) was completed on 23 Sep. The acquisition was previously announced on **10 Jun**. Interplex's major product offerings include racks, servers, switches, and enclosure levels (such as busbars, custom/standard racks, chassis, cold plates, heat sinks, CPU sockets, and rail kits), and we believe **busbars and chassis** are the majority of the business unit's revenue.

The deal should enable Bizlink to grow market share of power cabling and enhance its product offerings in AI datacenter

Bizlink has a dominant position in power cabling/interconnect parts of the AI datacenter field, such as power whip, busbar, and various connector products. We believe the deal would drive the company's market share higher, especially for busbar-related products. In addition, we believe Interplex's other non-power cabling products could enrich Bizlink's AI product portfolio, such as chassis and other precision metal components. As Interplex has different end customers (system integrator and hyperscaler customers), there will be cross-selling opportunities for Bizlink after the acquisition, in our view. We estimate Interplex to contribute TWD21bn/29bn revenue to Bizlink, and account for 13%/13% of 2027F/28F consolidated sales. Given **the acquisition that would push power cabling's dollar content growth** along with higher power consumption and **power rack design** in next-generation AI servers, we expect the company's high performance computing (HPC) business unit to reach 66%/70% of total sales in 2026F/27F. In terms of margin profile, Interplex's current GM is lower than that of Bizlink, but OPM and net margin are likely to be accretive to the company, on our estimates.

Raise 2026/27F EPS estimates by 7%/15% to TWD69.77/134.64, with TP TWD3,770

We raise 2026F/27F sales and EPS estimates, on the completion of the acquisition. Our new TP of TWD3,770 is based on 28x 2027F EPS of TWD134.64 (previous: TWD3,270 based on 28x 2027F EPS of TWD116.73; historical average PE of 17x since 2014). Our current earnings estimate revision has not factored in the potential revenue and earnings contribution from Bizlink and ams OSRAM's (AMS SW, not rated) cooperation in developing scale-up interconnect solutions using micro VSCSEL and fiber-to-fiber solutions, which was announced on 22 September.

Company profile

BizLink specializes in cable assembly and wiring harness design and production. End applications include IT & DataComm, Automotive, Industrial, and Electrical Appliance.

Valuation Methodology

Our target price of TWD3,770 is based on 28x 2027F EPS of TWD134.64. Our multiple is higher than the mid point of its historical P/E of 9.9-29.7x in the past five years. The benchmark for this stock is TAIEX.

Risks that may impede the achievement of the target price

Downside risks: 1) slower-than-expected demand recovery of the company's major EV clients, other automotive OEM clients and automation customers; 2) slower-than-expected AI server and SPE demand growth and pricing pressure for supply chains; 3) Rising material and energy costs, and global tariffs that could possibly lead to supply chain disruption and weak consumer demand.

ESG

Bizlink is aware of its duty on environmental protection and has developed comprehensive green policy and strategy, monitor emissions, raw material usage, and water efficiency. The company has long-term strategies: reduce supply shocks from climate change and natural disasters, and reduce carbon footprint. The company targets green revenues (EV, Charging, Energy) to continue to grow as percentage of total annual sales.
