Advanced Micro Devices (AMD): Q226 recap - Surface tension?

AMD's Q2 results were very good (\$11.5B/\$1.66 vs Street \$11.3B/\$1.62), with Datacenter, Client and Embedded above expectations, and Gaming below. Within Datacenter server CPUs continue to show strength with revenues up >70% YoY with growth also from Data Center GPUs; within Client AMD continues to see share gains and good commercial adoption. Gross margins at 56.2% were a touch above consensus at ~56.1%. However, like prior quarters, opex spending was higher than expected. We suspect GPU sales were probably ~\$2.8B or so, above consensus at ~\$2.65B.

Q3 revenue outlook was good (\$13.0B/~\$1.93 vs Street \$12.5B/\$1.87), with gross margin of 56% inline to a touch below consensus (56.2%) though with opex once again meaningfully above (\$3,650M vs Street at \$3,535M). The beat appears driven by Data Center and Embedded revenues, which are both seen up strong double-digits sequentially. Data Center revenues are likely ~\$8.1B vs. Street at ~\$7.7B, with double-digit sequential growth across server CPUs (guided up >80% YoY in 2H26) and AI GPUs we believe are implicitly guided to ~\$3.4B or so, mostly inline with Street at ~\$3.36B.

And yet the stock sold off in the aftermarket; we suspect expectations had moved higher following Intel's results a couple of weeks ago, and the buy-side already has a fairly bullish outlook. Nevertheless, the fundamentals and story here are getting better. Server outlook continues to surprise to the upside, and the company is still taking share and benefitting from pricing; in fact they now feel comfortable signing up for 70%+ server growth next year and total datacenter growth of "well over" 100% (a wide range for now admittedly but one that admits the possibility of some large numbers as the Helios ramp begins). Embedded is finally entering recovery. And even client is holding up better than expected.

Despite some apparent surface tension, a sell-off into transition quarter right before both server and AI take off seems buyable to us. Raising estimates, PT to \$650 vs \$600 prior (35x, unchanged, on new avg FY27/28 EPS of \$18.74)

Investment Implications

AMD (OP, \$650): Expectations remain high, but exposure to AI demand driving both a CPU and GPU story can provide substantial growth.

AMD's Q2 results were very good, above on revenues and EPS (\$11.5B/\$1.66 vs Street \$11.3B/\$1.62), with Datacenter, Client and Embedded above expectations, and Gaming below. Within Datacenter, server CPUs continue to show strength with revenues up >70% YoY with growth also from Data Center GPUs; within Client, AMD continues to see share gains and good commercial adoption of their latest Ryzen processors (with commercial sell-through increasing >50% YoY). Gross margins at 56.2% were a touch above consensus at ~56.1%. However, like prior quarters, opex spending was higher than expected. We suspect GPU sales were probably ~\$2.8B or so, above consensus at ~\$2.65B.

- *AMD's Q2 revenues* came in at \$11,536M, above expectations (Street at \$11.3B) (**Exhibit 1**), with the beat driven primarily by Data Center. Sales were up 13% sequentially and up ~50% YoY (**Exhibit 2**).
- *Non-GAAP gross margins* were 56.2%, a touch above the Street (56.1%) and guidance (~56%), and up ~80 bps sequentially (**Exhibit 4**).
- *Non-GAAP operating expenses* were \$3,394M, above expectations (consensus at \$3,334M).
- *Pro-forma EPS* was \$1.66, above the Street at \$1.62 (**Exhibit 1**).
- *Datacenter* (server CPUs, datacenter GPUs and Xilinx datacenter products) revenues were above expectations, at \$6,718M vs consensus at \$6,554M, given server CPU strength (up >70% YoY) and datacenter GPU growth. Revenue was up 16% QoQ and up 107% YoY (**Exhibit 5, Exhibit 6**). Within Datacenter, we suspect GPU sales were probably a ~\$2.8B or so, above consensus at ~\$2.65B.
- *Client* (desktop and notebook processors and chipsets) revenues were slightly above expectations at \$3,062M vs consensus at \$3,009M, up ~6% QoQ and up ~23 % YoY on continued share gains and commercial adoption of the latest Ryzen processors (commercial sell through increasing >50 % YoY). *AMD's Client revenues were above the overall PC market sequentially*, as estimated using 3rd-party PC market data, though below their larger competitor (**Exhibit 7**).
- *Gaming* (discrete graphic processors and semi-custom game console products) revenues were \$779M in Q2, slightly below consensus at \$790M, up ~8% QoQ and down ~31% YoY.
- *Embedded* (AMD and Xilinx embedded products) revenues were \$977M in the quarter, above consensus at \$960M, up ~12% QoQ and up ~19% YoY.
- *The All Other category* had an operating loss of \$1,081M vs \$1,036M loss last quarter (**Exhibit 5**).

Q3 revenue outlook was good, with revenues seen up ~13% QoQ and above the street (\$13.0B/~\$1.93 vs Street \$12.5B/\$1.87), with gross margin of 56% inline(ish) with consensus (56.2%) though with opex once again meaningfully above expectations on continued investment (\$3,650M vs Street at \$3,535M). The beat appears driven by Datacenter and Embedded revenues, which are both seen up strong double-digits sequentially. Datacenter revenues are likely ~\$8.1B vs. Street at ~\$7.7B, with double-digit sequential growth across server CPUs (guided up >80% YoY in 2H26) and AI GPUs we believe are implicitly guided to ~\$3.4B or so, mostly inline with Street at ~\$3.36B. Client is seen slightly above expectations, implicitly guided up slightly QoQ (~\$3.1B or so, vs Street at ~\$3.0B), Gaming outlook appears below expectations (seen ~\$630M vs Street at \$711M) and Embedded is seen up strong DD% QoQ, landing above consensus expectations (~\$1.0B).

- Q3 revenues were guided above the street at \$13.0B (+/- \$300M), versus consensus at \$12.5B (**Exhibit 8, Exhibit 3**), with the beat driven primarily by Data Center and Embedded, with Client & Gaming implicitly guided inline to slightly above (**Exhibit 9**).
- Datacenter revenues are seen up double-digits QoQ (we believe ~\$8.1B or so, and above consensus (\$7,733M), with both server CPUs and GPUs growing sequentially. Server CPU demand remains strong and is expected to grow >80% YoY in 2H26. AI GPUs are also implicitly seen up double-digits QoQ, we believe in the ~\$3.4B range, mostly inline with sell-side expectations of ~\$3.36B.

- The Client and Gaming segment (now a combination of the prior two standalone segments) is expected to decline sequentially, with slight growth in Client more than offset by a strong double-digit decline in Gaming. Gaming is seen down ~20% QoQ to ~\$630M, below the Street at \$711M. Client is also seen up slightly QoQ, likely to ~\$3.1B or so, slightly above the Street at ~\$3.0B). We believe altogether the segment is guided to ~\$3.74B or so, inline to slightly above consensus at \$3,701M.
- Embedded is seen growing strong DD% sequentially, likely landing roughly at ~\$1,175M, above consensus (~\$1.0B).
- Q3 pro-forma gross margins are seen at ~56% (**Exhibit 8**) inline to just a hair below consensus at 56.2%.
- Opex was guided to ~\$3,650M in Q3, again above consensus (\$3,535M) (**Exhibit 8**), and up ~\$256 sequentially.
- Non-GAAP effective tax rate is seen at ~13%.
- Implied EPS seems to land at around \$1.93 vs Street at \$1.87.

And yet the stock sold off in the aftermarket (giving back the gains it enjoyed during the day); we suspect expectations had moved higher following Intel's results a couple of weeks ago, and the buy-side already has fairly bullish outlook for the company. Nevertheless, the fundamentals and story here are getting better. Server outlook continues to surprise to the upside, and the company is clearly still taking share (units had to have been up 40%+ YoY vs 9% for their competitor) as well as experiencing pricing tailwinds as high core-count products get ready to ramp in a bigger way; in fact they now feel comfortable (in August) signing up for 70%+ server growth next year and total datacenter growth of "well over" 100% (a wide range for now admittedly but one that admits the possibility of some large numbers). Helios is set to begin ramp at the end of the quarter but mainly into Q4 and 2027 with multiple anchor customers. Embedded is finally entering recovery. And even client is holding up better than expected. But despite some apparent surface tension, a sell-off into a transition quarter right before both server and AI take off seems buyable to us.

- We actually thought this was a fine quarter. But for now the market apparently disagrees, with the shares down in the aftermarket and giving back the gains they enjoyed during the day.
- We suspect expectations had moved higher following Intel's results a couple of weeks ago (we note Intel beat their quarter by double digits and raised by a decent amount, whereas AMD beat and raised in the low single digits). And buy-side outlook for the company is already fairly bullish (so perhaps those expectations will not go up on this print, strong as it was).
- Nevertheless, we think the fundamentals and story here are getting better.
- Server outlook continues to surprise to the upside. The company grew their CPU sales over 70% in the quarter, and their units must have been up at least 40% YoY suggesting continued material share gains (we note that Intel's server units grew 9% YoY). And while they did not quite enjoy Intel's 48% YoY ASP increases, we think AMD's pricing rose at least 20% (Intel moved from selling older out-of-date parts to selling more granite rapids, whereas AMD's pricing trajectory was already more stable). Importantly, we believe AMD's pricing trends should continue going forward as Venice moves to volume.
- At this point (after increasing their server TAM outlook once again at their AI day 2 weeks ago), AMD feels comfortable enough to sign up for 80%+ 2H server growth and 70%+ next year (we believe suggesting a server business in 2027 exceeding \$30B). We also note capex (~\$800M in the quarter) was to build out more backend capacity specifically for server CPU, suggesting further confidence and visibility.
- They also suggested 2027 total datacenter growth of "well over" 100%, admittedly a wide range for now but one that admits the possibility of some potentially large AI GPU numbers as their three anchor tenants ramp (**Exhibit 10**).
- Even some of the other businesses are contributing. Embedded is finally turning around (adding growth as well as potentially bolstering margins), and client is holding up better than expected (even as they do unsurprisingly expect a softer 2H).
- Our one nitpick continues to be opex (which once again came in high in the quarter and guide). We don't object to the spending per se, but would like to see the company guide to a number and hit it. For what it is worth, on our callback they

suggested opex would likely rise ~35% this year and would rise by a similar level next year, quite a bit higher than our old model (though so is our revenue).

- But despite some apparent surface tension, overall a sell-off into a transition quarter right before both server and AI take off seems buyable to us.

Other tidbits:

- Inventories came in at \$8,468M, up from \$8,045M last quarter, with days down to 151 vs 159 last quarter (**Exhibit 11**).
- Total debt in the quarter came in at \$3,226M, up a hair sequentially from \$3,224M.
- AMD did not repurchase shares in the quarter (**Exhibit 12**).
- AMD ended the quarter with \$13.1B in cash and marketable securities vs \$12.3B last quarter.

We update our model and raise estimates. We raise our price target to \$650, and maintain our Outperform rating.

- We update our model, and raise estimates, primarily on higher server CPU offset somewhat by higher opex.
- We raise our FY2026 revenue estimate from \$47.9B to \$50.7B, FY2027 from \$82.2B to \$92.6B, and FY2028 from \$107.2B to \$124.8B. We model \$14.5B AI GPUs in 2026, \$43B in 2027, and \$60B in 2028, mostly unchanged from our prior estimates.
- We increase our FY2026 non-GAAP EPS estimate from \$6.98 to \$7.55, FY2027 from \$14.61 to \$15.56, and FY2028 from \$19.53 to \$21.92.
- We raise our price target from \$600 to \$650, a ~35x multiple (unchanged) on the average of our new FY27/FY28 pro-forma EPS estimate of \$18.74.
- We maintain our Outperform rating.
