Astera guides 3q revenues to \$550M vs. consensus \$417M as the switch cycle takes off in earnest and other parts of the business remain robust. Customer concentration and repeatability continue to be debated but the company continues to execute.

Key Takeaways

- Q3 guide implies ~40% q/q growth, with Scorpio becoming the largest product family as the lead X-Series program enters volume production.
- CY27 revenue rises to nearly \$3B as UALink, CXL, optical and custom solutions broaden the growth runway beyond the initial Scorpio ramp.
- Amazon concentration remains the key risk, though exposure spans multiple platforms; we still view Trainium4 as a key socket to watch.
- Stay OW, raise PT to \$382

The quarter materially improves our confidence in both the magnitude and duration of Astera's growth. Revenue reached \$392M in Q2, up 27% sequentially, while the September quarter guide of \$540-560M implies another roughly 40% increase at the midpoint. Q2 upside was broad-based, supported by the initial Scorpio X ramp, continued Scorpio P strength, record Aries revenue, and solid Taurus growth. The September quarter is more concentrated around the lead Scorpio X program entering volume production, with the broader Scorpio family expected to become Astera's largest product category one quarter ahead of prior expectations. Aries also remains healthy, with Gen6 still early in its volume ramp and new Gen5 inference platforms extending the prior-generation cycle. Importantly, they are not seeing evidence of meaningful PCIe share loss despite the entry of additional competitors, and indicated that their position in key sockets remains intact.

The shift into scale-up switching materially expands Astera's role and content within AI systems. Management expects Scorpio X content to move beyond \$1,000

per XPU, driven by higher attach rates, greater switch complexity, and differentiated capabilities. These features improve accelerator utilization and support higher pricing, while rising copper and optical complexity should drive additional content growth over time. Astera is moving beyond its legacy role in signal conditioning to become a more central provider of the scale-up fabric itself, with greater dollar content, stronger customer stickiness, and a longer multi-generation growth runway.

Our CY27 revenue estimate is now approaching \$3B, versus below \$2B previously. The revision reflects both a larger Scorpio ramp and a broader set of product launches. UALink-enabled switches are expected next year; Leo CXL should start to meaningfully ramp; optical revenue should begin through fiber-attached and NPO solutions; and custom products should start contributing. Optical and CXL are likely to make 2027 more back-half weighted, but the overall pipeline now looks substantially deeper than it did previously.

Customer concentration remains the clearest risk, with Amazon (covered by Brian Nowak) still expected to represent the majority of revenue next year. Amazon exposure spans multiple products and configurations rather than a single Trainium socket, which reduces program specific risk but does not eliminate the underlying concentration. Within that relationship, Trainium4 remains a key point of debate between Astera and Marvell. We currently view it as Astera's socket to lose given its hardware incumbency, Cosmos integration, and engagement across future platforms. The switching costs are high, as Astera enabled a fully switched architecture for Trainium 3 which we think gives them a strong position heading into the next generation. We will continue to monitor both Trainium4 and AMD's future scale-up roadmap.

Details on the quarter: Revenue of \$392mn (+27% q/q and 105% y/y) was above the Street at \$361mn and our estimate of \$362mn. Gross margin of 73.7% was slightly above the Street and our estimate of 72.8% and 73.1%, respectively. Non-GAAP EPS was \$0.80, ahead of the Street at \$0.69 and our estimate of \$0.70.

Details on guidance: ALAB guided JuneQ revenue of \$550mn (up 40% q/q and 139% y/y), significantly ahead of both the Street estimate of \$417mn and our estimate of \$406mn. Gross margin was guided to 72.0%, roughly in-line with the Street at 71.7% and our estimate of 72.0%. EPS of \$1.19 at the midpoint was guided meaningfully ahead of the Street and our estimate of \$0.81 and \$0.73, respectively.

Changes to estimates: We had previously modeled 80% and 28% top-line growth in 2026 and 2027. We now model 123% and 55%. We are modeling gross margins of 73.0% in 2026, slightly lower than our prior estimate of 73.1%. and modeling a 70.8% 2027 GM. Our non-GAAP EPS increases from \$2.88 to \$3.99 in CY2026 and we are modeling EPS of \$5.83 vs. our prior \$3.70 in 2027.

Thoughts on the stock: Upside is not surprising, as we are entering into the meat of the Trainium 3 ramp, but the magnitude of the upside IS surprising. The stock sold off after hours, as it did a quarter ago, reflecting anxiety about the repeatability of these numbers. Success is not a given, but we see a strong opportunity to migrate early success with PCI express into UALink/NVLink and ultimately to early optical scale up. Skeptics remain vocal, as they have since the company came public during

a \$65 mm qtr, and has grown mostly organically to \$550 per quarter in less than two years, transitioning a signal integrity business to a switch business. While the stock remains expensive, particularly in light of the customer concentration, with AI driven growth rates, high 30s operating margins, and continued polarized positioning, we expect the stock to continue to work.

We are raising our price target to \$382, based on 0.37x EV/Sales/Growth applied to CY27 revenue of \$2.953B and a 62% 2025-28 revenue CAGR, equivalent to roughly 23x EV/Sales. This compares with our prior framework of 0.75x EV/Sales/Growth on CY27 revenue of \$1.957B. While ALAB remains expensive on an absolute basis, the significant increase in our revenue estimates makes the valuation more reasonable on a growth-adjusted basis. ALAB remains one of our favorite ways to play the AI connectivity theme.

Risk Reward – Astera Labs Inc (ALAB.O)

AI connectivity leader poised for outsized growth

PRICE TARGET \$382.00

We apply a 0.37x CY27 EV/sales/growth multiple, assuming a 62% revenue CAGR. While this represents a premium to AI peers, we believe it is warranted by ALAB's superior growth profile and nearly 100% exposure to AI connectivity.

BULL CASE

\$490.00

0.5x EV/S/G on CY27 rev of \$3.3bn

We reflect a better than expected ramp from new products as well as Astera retaining their monopolistic market share.

-Revenue growth accelerates from successful launch of new products and maintained leadership in Aries and Scorpio

- Assume 75% 26-28 revenue CAGR

BASE CASE

\$382.00

0.37x EV/Sales/G on CY27 revenue of \$2.953bn

We expect Astera to trade at a premium to the other major networking players due to their unique AI exposure. In addition, their revenue ramp is just beginning and we forecast higher growth than peers.

- 0.37x is a premium to peer group

- Assume 62% 26-28 revenue CAGR

BEAR CASE

\$208.00

0.7x EV/S/G on CY27 sales of \$2.2bn

We reflect weaker than expected contribution from new products and significant Aries retimer share loss. Investors question future prospects for growth as key debates go in the wrong direction.

-Topline growth significantly slows as Astera loses dominant position and Scorpio fails to gain traction

- Assume 40% 26-28 revenue CAGR

RISKS TO UPSIDE

- Increase AI spend to propel data center revenue
- Quicker upgrade of underlying technology driving content growth
- New product launches increasing TAM

RISKS TO DOWNSIDE

- Increased competition reduces Astera's market share meaningfully
- Pause in AI spend and data center investment halts future revenue growth
- CXL servers and 1.6T port speeds are significantly delayed, preventing new products from gaining traction

Morgan Stanley trades or may trade as principal in the debt securities (or in related derivatives) that are the subject of the debt research report.

Certain disclosures listed above are also for compliance with applicable regulations in non-US jurisdictions.

STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan

Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Global Stock Ratings Distribution

(as of July 31, 2026)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm.

For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.

Stock Rating Category	Coverage Universe		Investment Banking Clients (IBC)			Other Material Investment Services Clients (MISC)	
	Count	% of Total	Count	% of Total IBC	% of Rating Category	Count	% of Total Other MISC

The securities, instruments, or strategies discussed in Morgan Stanley Research may not be suitable for all investors, and certain investors may not be eligible to purchase or participate in some or all of them. Morgan Stanley Research is not an offer to buy or sell or the solicitation of an offer to buy or sell any security/instrument or to participate in any particular trading strategy. The value of and income from your investments may vary because of changes in interest rates, foreign exchange rates, default rates, prepayment rates, securities/instruments prices, market indexes, operational or financial conditions of companies or other factors. There may be time limitations on the exercise of options or other rights in securities/instruments transactions. Past performance is not necessarily a guide to future performance. Estimates of future performance are based on assumptions that may not be realized. If provided, and unless otherwise stated, the closing price on the cover page is that of the primary exchange for the subject company's securities/instruments.

The fixed income research analysts, strategists or economists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality, accuracy and value of research, firm profitability or revenues (which include fixed income trading and capital markets profitability or revenues), client feedback and competitive factors. Fixed Income Research analysts', strategists' or economists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

The "Important Regulatory Disclosures on Subject Companies" section in Morgan Stanley Research lists all companies mentioned where Morgan Stanley owns 1% or more of a class of common equity securities of the companies. For all other companies mentioned in Morgan Stanley Research, Morgan Stanley may have an investment of less than 1% in securities/instruments or derivatives of securities/instruments of companies and may trade them in ways different from those discussed in Morgan Stanley Research. Employees of Morgan Stanley not involved in the preparation of Morgan Stanley Research may have investments in securities/instruments or derivatives of securities/instruments of companies mentioned and may trade them in ways different from those discussed in Morgan Stanley Research. Derivatives may be issued by Morgan Stanley or associated persons.

With the exception of information regarding Morgan Stanley, Morgan Stanley Research is based on public information. Morgan Stanley makes every effort to use reliable, comprehensive information, but we make no representation that it is accurate or complete. We have no obligation to tell you when opinions or information in Morgan Stanley Research change apart from when we intend to discontinue equity research coverage of a subject company. Facts and views presented in Morgan Stanley Research have not been reviewed by, and may not reflect information known to, professionals in other Morgan Stanley business areas, including investment banking personnel.

Morgan Stanley Research personnel may participate in company events such as site visits and are generally prohibited from accepting payment by the company of associated expenses unless pre-approved by authorized members of Research management.
