

Fositek

2Q GM a nice beat; Revenue momentum to resume in Aug with both VR200 and ASIC QD shipments; OW

Fositek reported 2Q26 earnings and held an investor meeting. Reported 2Q GM was another quarter of beat with stronger expansion, despite a deeper QoQ revenue decline. The company's share price has underperformed the Taiex by 35% in the past 3 months, owing to the VR200 QD order push-out along with smartphone business weakness. With no further delay of VR200 mass production, in our view, and Huawei's upcoming new foldable phone launch, we believe Fositek's revenue should resume momentum from 3Q26 and grow further in 4Q26 with the ramp of ASIC QD projects. The company's margins should continue to grow as well with a higher server mix (JPMe to reach 60% by end of 2026). In our view, the reaccelerating revenue growth and GM upward revision trend should gradually revive sentiment on Fositek. Stay OW.

- 2Q26 review.** Reported EPS of NT\$12.4 was below both JPMe and consensus estimates given the revenue miss, despite a strong GM beat. 2Q26 revenue declined 11% QoQ, as both its AI server QD and smartphone hinge businesses were in a product transition period. However, GM of 34% was a beat vs BBGe of 33% and implied solid growth vs 32% in 1Q26 and 29.0% in 4Q25, which was mainly driven by technology and yield enhancement of Fositek's server QD business.
- 3Q26 revenue to resume momentum driven by V200 QD shipments, while 4Q26 to further grow with ASIC QD and smartphone hinge ramp.** Post the 11% QoQ revenue decline in 2Q26, we model Fositek's revenue to resume momentum in 3Q26 with 23% QoQ growth to NT\$4.6bn, driven by the shipment of Nvidia's VR200 QD (both compute tray and switch tray), along with the initial order pull-in from Huawei's upcoming new models (both inward and tri-fold models are expected to launch in 2H26). In addition, we believe the liquid-cooled version of AWS Trainium 3 and Google TPU v8 QDs will also start ramping up in 4Q26, which should drive further QoQ revenue growth for Fositek. In terms of GM, we think the increasing server revenue mix along with continued technology and yield enhancement will contribute to further GM expansion to 35% and 36% in 3Q and 4Q26 (vs consensus at 33+% and 34+%).
- Implications.** We revise down our 2026E/27E EPS by 9%/12% to NT\$61/NT\$104 mainly to reflect the smartphone hinge business decline, despite stronger GM expansion. We introduce our 2028E EPS at NT\$140 to factor in further server business growth. Our new Jun-27 PT is set at NT\$2,600, based on a 22x 2H27-1H28E P/E (rolled over from 22x 2027E P/E), largely in line with the historical average since its OTC listing in 2020, which we believe is warranted by its strong earnings potential.

Our Jun-27 PT of NT\$2,600 is based on a 22x 2H27-1H28E P/E, largely in line with Fositek's historical average since its OTC listing in 2020, which we believe is warranted by its strong earnings potential.

Risks to Rating and Price Target

Key downside risks include slower foldable phone penetration, market share loss in server components, and margin pressure amid increasing competition.

The chart(s) show J.P. Morgan’s continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period. J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s

team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, <https://www.jpmorganmarkets.com>.
