More than one way to win in DC

Chart of the week: Legrand's projections for DC & cooling technology adoption

Legrand's CMD showed how its data center product approach differs from ABB's, and why both could benefit. ABB is putting power conversion and protection at the center of its strategy, with solid-state transformers, solid-state circuit breakers and medium-voltage UPS. Legrand is taking a more indirect and gradual route, with power sidecars, AI load stabilizers, transformer rectifier units (TRUs) and LVDC racks, alongside liquid cooling and liquid-cooled load banks. As shown in our Chart of the Week, Legrand expects full low-voltage DC (LVDC) to account for less than 5% of new IT-load capacity in 2030, with hybrid AC/DC below 35%, leaving plenty of room for different architectures to coexist. It also expects rear-door heat exchangers and direct-to-chip cooling to serve c.85% of AI cooling demand, up from c.50% in 2025. Legrand's sidecar is planned for commercialization in 2027, while launching its own solid-state transformer remains an option. Its route into DC is therefore somewhat indirect, but we think the roadmap shows more agility and potential than its majority white space exposure might suggest. Management sees its addressable market rising from \$2.5m/MW today to more than \$3m/MW in both hybrid and LVDC architectures, even without an SST. ABB can benefit as power infrastructure shifts towards the grey space; Legrand can benefit by adapting the racks, cooling and testing around it.

Figure 1: Legrand's projections for DC power and cooling technology adoption

Source: Legrand CMD 2026

Last week

At its CMD in Singapore on Tuesday, **Legrand** announced higher-than-expected new targets for 2027–2030. The company expects to deliver an organic revenue CAGR of 6%–8% (up from 3%–5% over 2024–30), with acquisitions adding 5% to growth on average each year (up from 3%–5%), while divestments would amount to €0.5–1bn of sales over the period. The target for its adj. operating margin is set at 21–22% on average including dilution from acquisitions, up from >20% in 2030.

Several companies under our coverage had their CY Q3 group pre-close calls this week. **Schneider Electric** looks set for another strong quarter, with momentum across Energy Management and Industrial Automation supporting a likely increase in FY26 organic growth guidance to 12–15% from 10–13% in our view. **Siemens Energy** enters its upcoming results event with growing confidence around its long-term earnings trajectory. The group confirmed that customer demand continues to exceed the pace at which new generation and transmission supply can be brought to the market. Its planning continues to assume gas turbine market demand of 110–120GW per annum over the coming years although the company now sees a further 10–20GW of potential upside from data centers. **Prysmian** appears primed for a strong Q3, underpinned by accelerating data-center demand and further margin expansion in Digital Solutions, potentially leading to an increase in FY26 EBITDA guidance. While **Siemens AG** is on track to finish FY26 strongly, FY27 EPS guidance may struggle to match elevated market expectations, particularly given the earnings dilution associated with the SHL deconsolidation. **KION's** preclose update was clearly disappointing as the company sees continued subdued order trends and guided for Q3 EBIT 3% below consensus estimates.

Over the week, **Alstom** secured over €1.6bn in new rail contracts across South Africa, Saudi Arabia, and Sweden. Key wins include an €800m modernization project in South Africa, a €460m contract to supply additional driverless trains for the expanding Riyadh Metro network, and a €350m order for 35 additional Avelia Stream Nordic trains.

On the macro side, September manufacturing PMI improved MoM in the Eurozone (52.9 vs. 52.7 in Aug), Germany (53.9 vs. 53.8 in Aug), France (50.6 vs. 50.3 in Aug), and Italy (50.4 vs. 49.6 in Aug). The US ISM manufacturing PMI was broadly flat MoM at 54.5 (vs. Cons: 55.0, Aug: 54.6) and the Dallas Fed manufacturing index declined MoM to +9.8 (vs. cons: +7.8) from +11.6 in Aug. China's manufacturing PMI for September improved to 50.1 (vs. cons: 50.1) from 49.8 in August. China's industrial profits till Aug (YTD) came in at +15.7% YoY (vs. +0.6% YoY for FY25). Italy's manufacturing confidence index for September improved to 91.9 (vs. cons: 90.5) from 89.9 in August.

This week

On the macro front, key releases this week include Germany's factory orders (Aug), France's August Industrial and manufacturing production data on Tuesday, Germany's industrial production (Aug) on Wednesday, the US wholesale inventories (Aug F) on Thursday, followed by Italy's Industrial Production (Aug) data on Friday. A full schedule is shown below.

Figure 2: Calendar of upcoming events this week

	Event
6-Oct	Germany - Factory orders (Aug), France - Industrial production (Aug), France - Manufacturing Production (Aug)
7-Oct	Germany - Industrial production (Aug)
8-Oct	US - Wholesale Inventories (Aug F)
9-Oct	Italy - Industrial production (Aug)

Reports you might have missed

Europe Capital Goods

Schneider Electric: FY26 growth guidance: 2ppts upgrade ahead Schneider's pre-close update was encouraging. The company expects another strong quarter for Energy Management in Q3, sustaining its prior positive momentum across both orders and revenues. For Industrial Automation, Schneider anticipates robust growth in Q3 as well, despite facing a more challenging base of comparison than in Q2, with dynamics well captured in current consensus estimates. Management also confirmed that its net price/cost will turn positive in H2. We expect management to upgrade its FY26 organic growth guidance to a new range of 12-15% (up from 10-13%). We are raising our EPS estimates by 2%, and our TP to €325 from €320. See full report [here](#).

Kion: Disappointing preclose update KION's pre-close update was disappointing. Order momentum remains subdued, with a book-to-bill ratio likely falling below 1x for both ITS and IAS. The company also indicated that Q3 EBIT should increase by around 10% YoY, which lands 3% below consensus. We are cutting our EPS estimates by 3-4% and lowering our TP to €60 from €63. Nevertheless, we continue to see asymmetric upside for the stock. With a 1-year forward P/E of only 9x (a 30% discount to historical multiples), investors have already priced in a sharp downward revision to the FY26 EBIT guidance. See full report [here](#).

Legrand: Q3'26 results due November 5 - strong growth, positive margin momentum Legrand is scheduled to report its Q3 results on November 5. We expect continued strong growth in the datacenter segment (+30%). In addition, last year's recovery in housing starts and transaction volumes points to stronger demand for Legrand's products, potentially manifesting as early as Q3'26 given the typical 12- to 18-month lag. If the company fires on both cylinders (data centers and buildings), it is poised to become one of the fastest-growing companies in our coverage. We also anticipate a return to positive margin momentum, supported by normalized SG&A spending in Europe. We are raising our EPS estimates by 1-2% to reflect more favorable currency movements. BUY. See full report [here](#).

Legrand: Feedback from CMD - TP raised to €170 We attended Legrand's CMD in Singapore and found the group's strategic and technological roadmaps very compelling. Management revised its targets higher for both growth and margins, demonstrating strong confidence in its positioning within the data center market. We reiterate our BUY rating with a new TP of €170, up from €160 previously. See full report [here](#).

Siemens Energy: Setting the stage for FY30 Siemens Energy (ENR) is scheduled to report its fiscal Q4 results, provide guidance for FY2027, and outline new strategic objectives for 2030 on November 11. The company appears well-positioned to achieve a 20% margin, with potential upside to 22% when factoring in the planned exit from TI, the acquisition of SEI, and the elimination of royalty payments to Siemens AG. We view the recently launched €2bn share buyback program, which runs until March 31, 2027, as a highly positive signal ahead of the event, and we reiterate our BUY rating. See full report [here](#).

Knorr-Bremse: Strong innovation power Knorr-Bremse's continuous innovation strengthens its long-term growth outlook, particularly within the rail segment. Near-term dynamics also remain highly supportive, driven by sustained cyclical tail winds in the US truck market. Consequently, we expect the company to upgrade its 2026 guidance toward the upper half of its targeted revenue and margin ranges, and to achieve its 16% EBIT margin target for 2030 at least one to two years ahead of schedule. BUY. See full report [here](#).

Siemens AG: What's in store for FY27? We expect Siemens to finish FY26 on a strong note, both commercially and operationally. However, management's guidance for FY27 could prove somewhat underwhelming as market expectations are already running fairly high, particularly for DI margins. We also believe that investors are underestimating the EPS dilution from the planned deconsolidation of SHL in FY27, with the stock trading at a demanding 24x 2027e P/E on a proforma basis. See full report [here](#).

Prysmian: Q3'26 results due October 29: Prysmian is due to report its Q3-26 results on 29th October. We expect a strong performance from the group, driven by a further improvement in demand for data center power cables in the quarter. Digital Solutions should also see a further step up in margins QoQ as the company continues to reallocate optical fiber capacity to higher-margin data center customers. We forecast group EBITDA of €800m for Q3, supported by organic revenue growth of 10.3% (vs. 9.4% in Q2). Our FY26-28 EBITDA estimates rise by 2-3%, largely reflecting an improved outlook for I&C. We expect the FY26 EBITDA guidance range to be upgraded to a new mid-point of around €2.93bn (+€80m). See full report [here](#).

SKF: Q3 preview: DB estimates a bit under cons on adj EBIT but Vertevo looms SKF reports Q3 2026 results on Oct 21st with DBE slightly ahead of consensus on revenues and slightly below on margins for the quarter. Q3 features a slightly tougher comp for organic revenue growth vs Q2 but we continue to see modest organic revenue growth for SKF Industrial. The Q2 exit rate was mixed with Specialized Industrial Solutions growing +8% org yr/yr, supported by Aerospace, Magnetic Solutions and aftermarket with Bearing Solutions broadly flat while Automotive shrunk -1.4%. We expect positive price/mix and targeted growth areas to do most of the work with limited volume recovery overall for SKF group in the quarter with tailwinds from efficiency efforts and fx to support profitability. These should be balanced by cost inflation, separation dis-synergies, a tougher comp for SIS and less benefit from safety-stock production vs earlier in the year. We update our forecasts, fx and valuation with a new target price of 300 SEK. See full report [here](#).

KONE Corporation: Q3 preview: looks in-line with +MSD order and revenue growth expected KONE reports Q3 results on Oct 28th. Against tougher growth comps, we expect Q3 orders to largely maintain trend growth in lc yr/yr (DBE +5.5%/cons +4.5%) vs +7.8% a yr ago (Q2 26 +10.9% yr/yr vs +3.0% Q2 25). China continues to contract with negative impact for NBS with key western markets in Europe and the US still expected to recover gradually with Q3 NBS revenue expected to deliver flat yr/yr in lc similar to Q2 vs a soft comp. We expect slight acceleration in service revenues in H2 from the timing from portfolio management efforts last year. We expect continued strong growth in modernisation with Q3 revenue comps sequentially easier with Chinese subsidies positive for volumes but slowing the mix migration within mod revenues. While

China remains material to group results, the country's contribution continues to decline in relative contribution to group results as its NBS continues to decline in country-specific revenue mix. In our bridge components, we see continued headwinds in wage inflation and raw materials/components which look manageable vs price/mix with price adjustments in Q2. In Q3, we continue to expect deal-related charges at €20m in the quarter. We maintain our Buy recommendation with no change to our target price of €66. See full report [here](#).

Epiroc: Q3 preview: mining strength continues, a focus on E&S margins Epiroc releases its Q3 FY26 results on October 28th. We expect no change to management's guide for near-term mining demand to remain high with infrastructure demand to increase somewhat. We expect Q3 to feature continued strong order growth in equipment and slightly better order growth in service vs Q2. In Q3 Epiroc also laps the margin impact from tariffs which should be positive incrementally for yr/yr margin progression with Q3 25 a soft comp in E&S. That said, we still see some scope to miss here with revised DB estimates slightly below consensus on Q3 group orders and adjusted EBIT margin (19.7% DBE/20.3% cons) with 20%+ an important marker for the company, which has struggled with margin delivery in recent years. We update forecasts, fx and valuation while maintaining our HOLD rating with a new target price of 270 SEK. See full report [here](#).

Nordex: Q3 preview: slower project delivery limits ability to raise guidance Nordex reports Q3 results on November 5th. We expect Q3 2026 to reflect normal seasonality with the quarter important in deliveries, project execution and the company's ability to raise its guidance this year. In our view, NDX's ability to raise guidance hinges on visibility on installations for Q3 and Q4 with headwinds/delays to projects in Germany and Turkey which was previously communicated to the market. As such, we temper our installation expectations with a bit more weight to Q4 and some installation delays but we don't see meaningful exposures for NDX as project delays are generally due to external factors. As a result, we expect less revenue in the quarter but strong margins with the delivery schedule more of a phasing issue right now. Thus, we expect continued year-on-year earnings progression, supported by good execution with continued improvement in Service margins. DB estimates are now -1% vs cons on Project orders (DB €2.5bn), +5% on group revenues (DB €2.3bn), and in-line on EBITDA (DB 247m at a 10.6% margin). Also in this note, we provide our take on NDX's recent presentation on its service business given at the Hamburg wind fair (details inside). We adjust our forecasts and maintain our BUY rating with an updated target price of €59 (was €58). See full report [here](#).

Vestas: Q3 preview: orders look light; offshore could limit margins, new TP 205 DKK Vestas reports Q3 results on November 11th. Disclosed order intake is light at this point with revised Q3 26 DBE PS order intake down c28% yr/yr and c3% seq. While the quarter is not over, we think it's very difficult for VWS to reach consensus expectations here. We expect Q3 to reflect a more normalised level of project execution in onshore vs Q2, which combines with some issues in offshore to constrain Power Solutions profitability in the quarter. We expect Service margins to deliver at 16% in Q3, in line with mgmt's guide for 15.5-17.5%. As such, Q3 margins look to decline sequentially vs a tough Q2 comp at -120bps for group margin and -160bps in the Power Solutions division. Revised DB Q3 estimates are -30% below consensus on orders, +5% above on group revenue and -5% below on

group adj EBIT. We retain our HOLD rating, with a revised target price of 205 DKK.

We read in the news

Extraordinary General Meeting of AB SKF resolved on distribution of the shares in SKF Vertevo AB

In accordance with the Board of Directors' proposal, the Extraordinary General Meeting resolved to distribute all shares in the wholly owned subsidiary SKF Vertevo AB to SKF's shareholders, whereby five (5) SKF class A shares entitle the holder to one (1) SKF Vertevo class A share and five (5) SKF class B shares entitle the holder to one (1) SKF Vertevo class B share. The General Meeting also authorized SKF's Board of Directors to determine the record date for the distribution of the shares in SKF Vertevo. The record date is expected to be 27 November 2026, and the first day of trading in the SKF Vertevo shares is expected to be 1 December 2026. A prospectus for the admission to trading of the SKF Vertevo shares on Nasdaq Stockholm is planned to be published in November 2026. A Capital Markets Day for SKF Vertevo is scheduled to be held in Stockholm on 17 November 2026. (Source: SKF, 1 October 2026)

Wartsila closes the transaction of the joint venture for its global Energy Storage business with RCT Solutions GmbH

Technology group Wartsila has closed the transaction of the joint venture for its Energy Storage business, following the agreement with German engineering company RCT Solutions GmbH announced on 15 June 2026. Under the arrangement, Wartsila and RCT Solutions each hold a 50% ownership stake in the joint venture, called Valo. The joint venture combines Wartsila's global energy storage capabilities with RCT Solutions' engineering expertise and is designed to provide a strong platform for long-term growth in the rapidly evolving energy storage market. Wartsila's Energy Storage business employs approximately 450 people globally, and in 2025, it generated net sales of EUR 694m. The transaction represents less than 5% of Wartsila's total net assets. (Source: Wartsila, 1 October 2026)

KONE supports the next generation of supertall structures with Burj Azizi, one of the world's tallest buildings

KONE has been selected as a partner to deliver advanced People Flow solutions for Burj Azizi in Dubai, United Arab Emirates. Planned to reach 725 meters, the tower will rank among the world's tallest buildings once completed. The order highlights KONE's latest high-rise innovations in action, helping customers push the boundaries of vertical reach while supporting safe and efficient travel on an exceptional scale. For Burj Azizi, KONE will deliver technologies from its high-rise solutions offering, launched to support world-record elevator travel heights and serve buildings reaching well past the 1-kilometer mark. In Burj Azizi, a KONE MiniSpace elevator is set to make one of the world's longest single elevator journeys, traveling 631.5 meters. (Source: KONE, 1 October 2026)

As skyscrapers stretch higher, KONE launches technology for cities reaching beyond 1km

KONE launches new solutions for use in high-rises and tall buildings. Combining wireless power and data transfer, self-learning AI-enabled control systems, ultralight composite ropes, and an electromechanical safety gear system, the offering addresses some of the most fundamental constraints in elevator technology and next generation urban development. The announcement coincides with the news that technologies from KONE's high-rise solutions offering will be used in Burj Azizi, the 725-meter building in Dubai, United Arab Emirates, and one of the tallest in the world upon completion. (Source: KONE, 1 October 2026)

Milestone in Austria: Nordex Group receives 56 MW order from WEB Windenergie for first N175/6.X project in the country The Nordex Group has received an order for 56 MW in Austria from WEB Windenergie AG. For the Auersthal RI repowering project in the district of Gänserndorf in Lower Austria, the Nordex Group will supply and install eight N175/6.X turbines. The order also includes a 25-year Premium Service agreement. The turbines in Auersthal will be the first N175/6.X turbines to be installed in the country. Commissioning of the turbines is scheduled for 2028. (Source: Nordex, 1 October 2026)

Vestas secures orders across Germany, Austria, Romania, Australia, and Vietnam Vestas announced a strong pipeline of new wind orders totaling approximately 1.38 GW across key markets in Europe and Asia-Pacific. The company secured multiple projects in Germany, Austria, Romania, Australia, and Vietnam, with major awards including a 614 MW order in Western Australia covering the Parron Maam Marang and Kondinin wind farms, a 346 MW Australian project for an undisclosed customer, and a 156 MW Romanian project for Electrocentrale Borzești. Across Europe, Vestas also won several orders in Germany and Austria, while in Vietnam it secured two undisclosed projects involving 16 V163 turbines. Most contracts include long-term 20- to 30-year Active Output Management (AOM) service agreements, strengthening recurring service revenue visibility. Deliveries are primarily scheduled for 2027-2028, with commissioning expected through 2028, underscoring continued global demand for Vestas' wind technology and expanding renewable energy capacity across its key markets. (Source: Vestas, 30 September 2026)

Alstom to support the modernization of Gautrain, Gauteng Province's higher-speed express commuter system in South Africa Alstom welcomes the announcement by the Gauteng Provincial Government and the Gautrain Management Agency naming Sihamba Sonke Mobility (SSM) Consortium as the successful bidder for the next Gautrain concession. Alstom, as a shareholder and strategic industrial partner of SSM Concession, will play a major role in the modernization and long-term performance of one of Africa's flagship mobility systems. Within the SSM concession, Alstom's scope represents a cumulative contract value of €800m over the 15-year concession period, including the Engineering, Procurement and Construction (EPC) activities for the rail system modernization and refurbishment programme. This includes the delivery of eight new trains manufactured locally in Gauteng, a new signaling system, communications upgrades, the refurbishment and modernization of the existing fleet, together with long-term rail maintenance services. (Source: Alstom, 30 September 2026)

Wartsila, Schneider Electric and Stanley Consultants launch coordinated approach for faster U.S. data center power delivery Technology group Wartsila, Schneider Electric and Stanley Consultants have developed an innovative "Generator-to-Chip" approach to help U.S. data center developers and operators bring scalable power capacity online faster. Designed around the AI load, the approach aligns onsite power generation, electrical infrastructure, automation, engineering and project execution from the outset. By connecting the power pathway from generation and electrical distribution to digital monitoring and the IT load, the approach reduces handoffs, improves coordination across critical interfaces and provides greater execution certainty. The combined approach can

accelerate project schedules compared to traditional, sequential delivery models. (Source: Wartsila, 30 September 2026)

Epiroc wins large equipment order for platinum mine in South Africa Epiroc AB, a leading productivity and sustainability partner for the mining and infrastructure industries, has won a large order for underground mining equipment from Sibanye-Stillwater for a platinum mine in South Africa. Sibanye-Stillwater, one of the world's leading precious metals mining companies, will use the equipment for platinum mining at the Siphumelele shaft at its Rustenburg operations. The order includes low-profile loaders and utility vehicles, designed for use in mining applications with narrow veins. Sibanye-Stillwater will use the equipment as part of its ongoing project to mechanize the operation at the Siphumelele shaft, boosting safety and productivity. Delivery of the equipment will begin in the fourth quarter 2026. (Source: Epiroc, 30 September 2026)

Nordex Group secures 175 MW of new orders in France, Portugal and Spain The Nordex Group has secured new orders totalling 175 MW across three European wind energy markets: France, Portugal and Spain. The contracts comprise the supply and installation of 34 wind turbines and include comprehensive multi-year service agreements designed to ensure high technical availability and long-term energy production. The names of the customers and wind farms are not disclosed. The orders include eight N175/6.X turbines, four N163/6.X turbines, four N149/4.X turbines, nine N133/4.8 turbines, and nine N131/3.6 turbines. All projects are scheduled for installation and commissioning between 2027 and 2028. (Source: Nordex, 30 September 2026)

Wartsila to deliver engines for Australia's largest-ever engine power plant to support the country's energy transition Technology group Wartsila has been selected to supply its flexible and highly efficient Wartsila 46TS engines for Australia's largest-ever reciprocating engine power plant. The 300 MW plant will provide critical grid balancing and system security in Australia. The fast-starting flexible capacity provided by the Wartsila 46TS engines will enable greater integration of renewable energy into the power system. The order was booked by Wartsila in Q3 2026. (Source: Wartsila, 30 September 2026)

Västtrafik reaffirms confidence in Alstom with 35 additional Avelia Stream Nordic trains, bringing fleet to 80 Alstom, global leader in smart and sustainable mobility, has received an order from Västtrafik to deliver 35 additional Avelia Stream Nordic X80 trains through an option worth approximately €350m exercised under the existing frame contract. With this new order, Alstom will deliver a total of 80 trains to Västtrafik. New trains will increase capacity on some of western Sweden's busiest railway lines. Option exercise follows the entry into service of the first Avelia Stream Nordic trains and reinforces Västtrafik's long-term partnership with Alstom. Avelia Stream Nordic is a climate-resilient high-speed train able to withstand heavy snow and extreme cold. The train's award-winning design has been tailored to passengers' needs with enhanced accessibility and comfort. (Source: Alstom, 29 September 2026)

Nordex Group receives 42 MW order from Navaris in Germany The Nordex Group has received an order from Navaris in Germany. The 42 MW Lambacher Höh wind farm project is being built in Rhineland-Palatinate. The order comprises the supply and installation of four N163/6.X turbines and two N175/6.X turbines. It also includes a 20-year Premium Service contract. The wind farm is being built

southwest of Bitburg, close to the Luxembourg border. Installation of the first wind turbine is scheduled for January 2028. Full commissioning of the wind farm is planned for July 2028. (Source: Nordex, 29 September 2026)

Vestas announces new orders for a total of 120 MW Vestas secured three wind turbine orders within the EMEA region totaling 66 MW across Denmark and Italy. In Denmark, the 23 MW Øster Starup project for customer Eurowind features five V136-4.5 MW turbines and is backed by a 10-year AOM 4000 Service Agreement, with delivery and commissioning planned to start in Q4 27. Also in Denmark, the Broholm project for customer NRGi has a 14 MW capacity utilizing three V136-4.5 MW turbines under a 15-year AOM 5000 Service Agreement, with delivery beginning in Q1 28 and commissioning in Q2 28. Finally, in Italy, an undisclosed customer for an undisclosed project has ordered 29 MW consisting of seven V136-4.2 MW turbines with a 10-year AOM 5000 Service Agreement, where delivery is scheduled for Q1 2028 followed by commissioning in Q3 28. Lastly, in Japan, Vestas has signed an agreement with an undisclosed partner for a 55 MW project comprising thirteen V136-4.2 MW turbines supported by a 20-year AOM5000 service agreement, with delivery planned for Q1 2029 and commissioning scheduled for Q3 2029. Alstom to support Riyadh's next chapter of mobility with additional driverless metro trains Alstom, a global leader in smart and sustainable mobility, has signed a contract worth approximately €460m with the Royal Commission for Riyadh City (RCRC) to supply additional driverless metro trains for Lines 3, 4 and 6 and integrate them into the existing infrastructure, thereby supporting the ongoing expansion of Riyadh's metro network. The new vehicles expand the existing fleet, increasing capacity and enabling more frequent services as passengers demand continues to grow. They will be maintained by Alstom as part of the existing operation and maintenance (O&M) contract for Lines 3, 4 and 6. This order marks a new milestone in Alstom's long-standing partnership with RCRC and builds on the 116 driverless trains already delivered for Riyadh Metro network. Since entering passenger service in late 2024, the network has carried more than 100m passengers and become a key part of daily mobility across the capital. (Source: Alstom, 28 September 2026)

Schneider Electric unveils the world's first fully Software-Defined Medium Voltage switchgear to accelerate the speed and scalability of AI factories Schneider Electric, a global energy technology leader, unveiled the world's first fully Software-Defined Medium Voltage (MV) switchgear, redefining how electrical distribution systems are designed, deployed, and operated. Announced at YOTTA 2026 (September 28–30, Las Vegas), the innovation is part of Schneider Electric's broader vision for Software Defined Energy, which decouples system intelligence from hardware to create more flexible, resilient, and sustainable energy infrastructure. As electrification accelerates and AI factories drive data center demand, this approach allows power infrastructure to evolve at the same pace as the digital services it supports. (Source: Schneider Electric, 28 September 2026)

Schneider Electric appoints Damien Dhellemmes as Senior Vice President, Secure Power and Data Centres, Europe Schneider Electric, a global energy technology leader, appointed Damien Dhellemmes as the new Senior Vice President of its Secure Power and Data Centre business in Europe. With more

than 30 years of international leadership experience at Schneider Electric, including senior operational and supply chain roles in Europe, Asia and the Middle East, Damien brings extensive commercial leadership to the business - accelerating its regional growth ambitions and underpinning its mission to become the global energy technology partner for data centers and artificial intelligence (AI). Inauguration of two Exclusive Lean Manufacturing Facilities for GE Vernova's Gas Power Business AZAD Engineering Limited inaugurated two Exclusive Lean Manufacturing Facilities for GE Vernova's Gas Power business at its Centre of Excellence & Innovation Centre in Tunikibollaram, Hyderabad, on September 28, 2026, expanding its footprint to three dedicated facilities for the global energy giant. The two state-of-the-art lean manufacturing facilities, each spanning 7,600 sq. m are dedicated to manufacturing highly engineered rotating and stationary airfoils and specialized machined parts, meeting GE Vernova's global demand in power generation and essential industries. (Source: Bloomberg, 28 September 2026)

Jungheinrich and Kuehne+Nagel have signed an international framework agreement for around 5,000 industrial trucks Jungheinrich AG signed an international framework agreement with the Kuehne+Nagel Group, covering a volume of around 5,000 industrial trucks across several European countries. The agreement covers the long-term provision and management of industrial trucks as part of a rental and service concept. Jungheinrich has designed a bespoke solution for Kuehne+Nagel called KN-RFM+, which prioritizes flexibility and a high utilization rate for the fleet. Among other things, energy-efficient industrial trucks featuring lithium-ion technology from the Jungheinrich portfolio are being deployed. These vehicles are characterized by high availability, short charging times and maintenance-free battery systems. (Source: Jungheinrich, 28 September 2026)

Appendix 1

Important Disclosures

Prices are current as of the end of the previous trading session unless otherwise indicated and are sourced from local exchanges via Reuters, Bloomberg and other vendors. Other information is sourced from Deutsche Bank, subject companies, and other sources. For disclosures pertaining to recommendations or estimates made on securities other than the primary subject of this research, please see the most recently published company report or visit our global disclosure look-up page on our website at <https://research.db.com/Research/Disclosures/EquityResearchDisclosures>. Aside from within this report, important risk and conflict disclosures can also be found at <https://research.db.com/Research/Disclosures/Disclaimer>. Investors are strongly encouraged to review this information before investing.

Analyst Certification

The views expressed in this report accurately reflect the personal views of the undersigned lead analyst(s). In addition, the undersigned lead analyst(s) has not and will not receive any compensation for providing a specific recommendation or view in this report. Lars Vom-Cleff, Gael de-Bray, CFA, John Kim, Nabil Najeeb.

Company rating dispersion and banking relationships

DBSI Companies under Coverage	Buy	Hold	Sell
Covered	57%	42%	0%
w/ Banking relationship	43%	34%	0%
w/ MiFID services	63%	52%	67%

Global Companies under Coverage	Buy	Hold	Sell
Covered	58%	40%	2%
w/ Banking relationship	46%	32%	26%
w/ MiFID services	75%	67%	90%

Company Rating and Dispersion Key

The above table provides a snapshot of Deutsche Bank's company research rating distribution across our covered companies. We also present the percentage of companies where Deutsche Bank has provided Investment Banking Services in the past 12 months and/or MIFID Investment and Ancillary services, in the past 12 months. Please see the key and definition of our rating below.

Note - percentages are rounded so may not total 100%.

Covered: The overall rating distribution across all companies under coverage with a rating.

w/Banking relation: Percentage of companies under coverage with a rating within each of the "buy", "hold" and "sell" categories for which Deutsche Bank has provided Investment Banking Services within the previous 12 months.

w/MiFID services: Percentage of companies under coverage with a rating within each of the "buy", "hold" and "sell" categories for which Deutsche Bank has provided MIFID Investment and Ancillary services within the previous 12 months.

Buy/Hold/Sell Percentages: These percentages reflect the proportion of companies within each category that have been assigned the corresponding rating, based on our 12-month view of Total Shareholder Return (TSR).

Rating definitions:

Buy: Based on a current 12-month view of TSR, we recommend that investors buy the stock.

Sell: Based on a current 12-month view of TSR, we recommend that investors sell the stock.

Hold: We take a neutral view on the stock 12-months out and, based on this time horizon, do not recommend either a Buy or Sell.

TSR: Total Shareholder Return. Percentage change in share price from current price to projected target price plus projected dividend yield.

Newly issued research recommendations and target prices supersede previously published research.

Additional Information

The information and opinions in this report were prepared by Deutsche Bank AG or one of its affiliates (collectively 'Deutsche Bank'). Though the information herein is believed to be reliable and has been obtained from public sources believed to be reliable, Deutsche Bank makes no representation as to its accuracy or completeness. Hyperlinks to third-party websites in this report are provided for reader convenience only. Deutsche Bank neither endorses the content nor is responsible for the accuracy or security controls of those websites.

If you use the services of Deutsche Bank in connection with a purchase or sale of a security that is discussed in this report, or is included or discussed in another communication (oral or written) from a Deutsche Bank analyst, Deutsche Bank may act as principal for its own account or as agent for another person.

Deutsche Bank may consider this report in deciding to trade as principal. It may also engage in transactions, for its own account or with customers, in a manner inconsistent with the views taken in this research report. Others within Deutsche Bank, including strategists, sales staff and other analysts, may take views that are inconsistent with those taken in this research report. Deutsche Bank issues a variety of research products, including fundamental analysis, equity-linked analysis, quantitative analysis and trade ideas. Recommendations contained in one type of communication may differ from recommendations contained in others, whether as a result of differing time horizons, methodologies, perspectives or otherwise. Deutsche Bank and/or its affiliates may also be holding debt or equity securities of the issuers it writes on. Analysts are paid in part based on the profitability of Deutsche Bank AG and its affiliates, which includes investment banking, trading and principal trading revenues.

Opinions, estimates and projections constitute the current judgment of the author as of the date of this report. They do not necessarily reflect the opinions of Deutsche Bank and are subject to change without notice. Deutsche Bank provides liquidity for buyers and sellers of securities issued by the companies it covers. Deutsche Bank research analysts sometimes have shorter-term trade ideas that may be inconsistent with Deutsche Bank's existing longer-term ratings. Some trade ideas for equities are listed as Catalyst Calls on the Research Website (<https://research.db.com/Research/>), and can be found on the general coverage list and also on the covered company's page. A Catalyst Call represents a high-conviction belief by an analyst that a stock will outperform or underperform the market and/or a specified sector over a time frame of no less than two weeks and no more than three months. In addition to Catalyst Calls, analysts may occasionally discuss with our clients, and with Deutsche Bank salespersons and traders, trading strategies or ideas that reference catalysts or events that may have a near-term or medium-term impact on the market price of the securities discussed in this report, which impact may be directionally counter to the analysts' current 12-month view of total return or investment return as described herein. Deutsche Bank has no obligation to update, modify or amend this report or to otherwise notify a recipient thereof if an opinion, forecast or estimate changes or becomes inaccurate. Coverage and the frequency of changes in market conditions and in both general and company-specific economic prospects make it difficult to update research at defined intervals. Updates are at the sole discretion of the coverage analyst or of the Research Department Management, and the majority of reports are published at irregular intervals. This report is provided for informational purposes only and does not take into account the particular investment objectives, financial situations, or needs of individual clients. It is not an offer or a solicitation of an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Target prices are inherently imprecise and a product of the analyst's judgment. The financial instruments discussed in this report may not be suitable for all investors, and investors must make their own informed investment decisions. Prices and availability of financial instruments are subject to change without notice, and investment transactions can lead to losses as a result of price fluctuations and other factors. If a financial instrument is denominated in a currency other than an investor's currency, a change in exchange rates may adversely affect the investment. Past performance is not necessarily indicative of future results. Performance calculations exclude transaction costs, unless otherwise indicated. Unless otherwise indicated, prices are current as of the end of the previous trading session and are sourced from local exchanges via Reuters, Bloomberg and other vendors. Data is also sourced from Deutsche Bank, subject companies, and other parties. Artificial intelligence tools may be used in the preparation of this material, including but not limited to assist in fact-finding, data analysis, pattern recognition, content drafting and editorial corrections pertaining to research material.

The Deutsche Bank Research Department is independent of other business divisions of the Bank. Details regarding our organizational arrangements and information barriers we have to prevent and avoid conflicts of interest with respect to our research are available on our website (<https://research.db.com/Research/>) under Disclaimer.

Macroeconomic fluctuations often account for most of the risks associated with exposures to instruments that promise to pay fixed or variable interest rates. For an investor who is long fixed-rate instruments (thus receiving these cash flows), increases in interest rates naturally lift the discount factors applied to the expected cash flows and thus cause a loss. The longer the maturity of a certain cash flow and the higher the move in the discount factor, the higher will be the loss. Upside surprises in inflation, fiscal funding needs, and FX depreciation rates are among the most common adverse macroeconomic shocks to receivers. But counterparty exposure, issuer creditworthiness, client segmentation, regulation (including changes in assets holding limits for different types of investors), changes in tax policies, currency convertibility (which may constrain currency conversion, repatriation of profits and/or liquidation of positions), and settlement issues related to local clearing houses are also important risk factors. The sensitivity of fixed-income instruments to macroeconomic shocks may be mitigated by indexing the contracted cash flows to inflation, to FX depreciation, or to specified interest rates - these are common in emerging markets. The index fixings may - by construction - lag or mis-measure the actual move in the underlying variables they are intended to track. The choice of the proper fixing (or metric) is particularly important in swaps markets, where floating coupon rates (i.e., coupons indexed to a typically short-dated interest rate reference index) are exchanged for fixed coupons. Funding in a currency that differs from the currency in which coupons are denominated carries FX risk. Options on swaps (swaptions) the risks typical to options in addition to the risks related to rates movements.

Derivative transactions involve numerous risks including market, counterparty default and illiquidity risk. The appropriateness of these products for use by investors depends on the investors' own circumstances, including their tax position, their regulatory environment and the nature of their other assets and liabilities; as such, investors should take expert legal and financial advice before entering into any transaction similar to or inspired by the contents of this publication. The risk of loss in futures trading and options, foreign or domestic, can be substantial. As a result of the high degree of leverage obtainable in futures and options trading, losses may be incurred that are greater than the amount of funds initially deposited - up to theoretically unlimited losses. Trading in options involves risk and is not suitable for all investors. Prior to buying or selling an option, investors must review the 'Characteristics and Risks of Standardized Options', at <https://www.theocc.com/company-information/documents-and-archives/options-disclosure-document>. If you are unable to access the website, please contact your Deutsche Bank representative for a copy of this important document.

Participants in foreign exchange transactions may incur risks arising from several factors, including the following: (i) exchange rates can be volatile and are subject to large fluctuations; (ii) the value of currencies may be affected by numerous market factors, including world and national economic, political and regulatory events, events in equity and debt markets and changes in interest rates; and (iii) currencies may be subject to devaluation or government-imposed exchange controls, which could affect the value of the currency. Investors in securities such as ADRs, whose values are affected by the currency of an underlying security, effectively assume currency risk.

Unless governing law provides otherwise, all transactions should be executed through the Deutsche Bank entity in the investor's home jurisdiction. Aside from within this report, important conflict disclosures can also be found at <https://research.db.com/Research/> on each company's research page or under the 'Disclosures' tab. Investors are strongly encouraged to review this information before investing.

Deutsche Bank (which includes Deutsche Bank AG, its branches and affiliated companies) is not acting as a financial adviser, consultant or fiduciary to you or any of your agents (collectively, "You" or "Your") with respect to any information provided in this report. Deutsche Bank does not provide investment, legal, tax or accounting advice, Deutsche Bank is not acting as your impartial adviser, and does not express any opinion or recommendation whatsoever as to any strategies, products or any other information presented in the materials. Information contained herein is being provided solely on the basis that the recipient will make an independent assessment of the merits of any investment decision, and it does not constitute a recommendation of, or express an opinion on, any product or service or any trading strategy.

The information presented is general in nature and is not directed to retirement accounts or any specific person or account type, and is therefore provided to You on the express basis that it is not advice, and You may not rely upon it in making Your decision. The information we provide is being directed only to persons we believe to be financially sophisticated, who are capable of evaluating investment risks independently, both in general and with regard to particular transactions and investment strategies, and who understand that Deutsche Bank has financial interests in the offering of its products and services. If this is not the case, or if You are an IRA or other retail investor receiving this directly from us, we ask that you inform us immediately.

In July 2018, Deutsche Bank revised its rating system for short term ideas whereby the branding has been changed to Catalyst Calls ("CC") from SOLAR ideas; the rating categories for Catalyst Calls originated in the Americas region have been made consistent with the categories used by Analysts globally; and the effective time period for CCs has been reduced from a maximum of 180 days to 90 days.

United States: Approved and/or distributed by Deutsche Bank Securities Incorporated, a member of FINRA and SIPC. Analysts located outside of the United States are employed by non-US affiliates and are not registered/qualified as research analysts with FINRA.

European Economic Area (exc. United Kingdom): Approved and/or distributed by Deutsche Bank AG, a joint stock corporation with limited liability incorporated in the Federal Republic of Germany with its principal office in Frankfurt am Main. Deutsche Bank AG is authorized under German Banking Law and is subject to supervision by the European Central Bank and by BaFin, Germany's Federal Financial Supervisory Authority.

United Kingdom: Approved and/or distributed by Deutsche Bank AG acting through its London Branch at 21 Moorfields, London EC2Y 9DB. Deutsche Bank AG in the United Kingdom is authorised by the Prudential Regulation Authority and is subject to limited regulation by the Prudential Regulation Authority and Financial Conduct Authority. Details about the extent of our authorisation and regulation are available on request.

Hong Kong SAR: Distributed by Deutsche Bank AG, Hong Kong Branch, except for any research content relating to futures contracts within the meaning of the Hong Kong Securities and Futures Ordinance Cap. 571. Research reports on such futures contracts are not intended for access by persons who are located, incorporated, constituted or resident in Hong Kong. The author(s) of a research report, and the entities for which they act and/or are affiliated with, may not be licensed to carry on regulated activities in Hong Kong, and if not licensed, do not hold themselves out as being able to do so. The provisions set out above in the 'Additional Information' section shall apply to the fullest extent permissible by local laws and regulations, including without limitation the Code of Conduct for Persons Licensed or Registered with the Securities and Futures Commission. This report is intended for distribution only to 'professional investors' as defined in Part 1 of Schedule of the SFO. This document must not be acted or relied on by persons who are not professional investors. Any investment or investment activity to which this document relates is only available to professional investors and will be engaged only with professional investors.

India: Prepared by Deutsche Equities India Private Limited (DEIPL) having CIN: U65990MH2002PTC137431 and registered office at 14th Floor, The Capital, C-70, G Block, Bandra Kurla Complex, Mumbai (India) 400051. Tel: + 91 22 7180 4444. It is registered by the Securities and Exchange Board of India (SEBI) as a Stock broker bearing registration no.: INZ000252437; Merchant Banker bearing SEBI Registration no.: INM000010833 and Research Analyst bearing SEBI Registration no.: INH000001741. DEIPL's Compliance / Grievance officer is Ms. Rashmi Poddar (Tel: +91 22 7180 4929 email ID: complaints.deipl@db.com). Registration granted by SEBI and certification from NISM in no way guarantee performance of DEIPL or provide any assurance of returns to investors. Investment in securities market are subject to market risks. Read all the related documents carefully before investing. DEIPL may have received administrative warnings from the SEBI for breaches of Indian regulations. Deutsche Bank and/or its affiliate(s) may have debt holdings or positions in the subject company. With regard to information on associates, please refer to the "Shareholdings" section in the Annual Report at: <https://www.db.com/ir/en/annual-reports.htm>. For latest India research audit report, refer https://country.db.com/india/deutsche-equities-india/index?language_id=1.

Japan: Approved and/or distributed by Deutsche Securities Inc.(DSI). Registration number - Registered as a financial instruments dealer by the Head of the Kanto Local Finance Bureau (Kinsho) No. 117. Member of associations: JSDA,

Type II Financial Instruments Firms Association and The Financial Futures Association of Japan. Commissions and risks involved in stock transactions - for stock transactions, we charge stock commissions and consumption tax by multiplying the transaction amount by the commission rate agreed with each customer. Stock transactions can lead to losses as a result of share price fluctuations and other factors. Transactions in foreign stocks can lead to additional losses stemming from foreign exchange fluctuations. We may also charge commissions and fees for certain categories of investment advice, products and services. Recommended investment strategies, products and services carry the risk of losses to principal and other losses as a result of changes in market and/or economic trends, and/or fluctuations in market value. Before deciding on the purchase of financial products and/or services, customers should carefully read the relevant disclosures, prospectuses and other documentation. 'Moody's', 'Standard Poor's', and 'Fitch' mentioned in this report are not registered credit rating agencies in Japan unless Japan or 'Nippon' is specifically designated in the name of the entity. Reports on Japanese listed companies not written by analysts of DSI are written by Deutsche Bank Group's analysts with the coverage companies specified by DSI. Some of the foreign securities stated on this report are not disclosed according to the Financial Instruments and Exchange Law of Japan. Target prices set by Deutsche Bank's equity analysts are based on a 12-month forecast period.

Korea: Distributed by Deutsche Securities Korea Co.

South Africa: Deutsche Bank AG Johannesburg is incorporated in the Federal Republic of Germany (Branch Register Number in South Africa: 1998/003298/10).

Singapore: This report is issued by Deutsche Bank AG, Singapore Branch (One Raffles Quay #18-00 South Tower Singapore 048583, 65 6423 8001), which may be contacted in respect of any matters arising from, or in connection with, this report. Where this report is issued or promulgated by Deutsche Bank in Singapore to a person who is not an accredited investor, expert investor or institutional investor (as defined in the applicable Singapore laws and regulations), they accept legal responsibility to such person for its contents.

Taiwan: Information on securities/investments that trade in Taiwan is for your reference only. Readers should independently evaluate investment risks and are solely responsible for their investment decisions. Deutsche Bank research may not be distributed to the Taiwan public media or quoted or used by the Taiwan public media without written consent. Information on securities/instruments that do not trade in Taiwan is for informational purposes only and is not to be construed as a recommendation to trade in such securities/instruments.

Qatar: Deutsche Bank AG in the Qatar Financial Centre (registered no. 00032) is regulated by the Qatar Financial Centre Regulatory Authority. Deutsche Bank AG - QFC Branch may undertake only the financial services activities that fall within the scope of its existing QFCRA license. Its principal place of business in the QFC: Qatar Financial Centre, Tower, West Bay, Level 5, PO Box 14928, Doha, Qatar. This information has been distributed by Deutsche Bank AG. Related financial products or services are only available only to Business Customers, as defined by the Qatar Financial Centre Regulatory Authority.

Russia: The information, interpretation and opinions submitted herein are not in the context of, and do not constitute, any appraisal or evaluation activity requiring a license in the Russian Federation.

Kingdom of Saudi Arabia: Deutsche Securities Saudi Arabia (DSSA) is a closed joint stock company authorized by the Capital Market Authority of the Kingdom of Saudi Arabia with a license number (No. 37-07073) to conduct the following business activities: Dealing, Arranging, Advising, and Custody activities. DSSA registered office is Faisaliah Tower, 17th Floor, King Fahad Road - Al Olaya District Riyadh, Kingdom of Saudi Arabia P.O. Box 301806.

United Arab Emirates: Deutsche Bank AG in the Dubai International Financial Centre (registered no. 00045) is regulated by the Dubai Financial Services Authority. Deutsche Bank AG - DIFC Branch may only undertake the financial services activities that fall within the scope of its existing DFSA license. Principal place of business in the DIFC: Dubai International Financial Centre, The Gate Village, Building 5, PO Box 504902, Dubai, U.A.E. This information has been distributed by Deutsche Bank AG. Related financial products or services are available only to Professional Clients, as defined by the Dubai Financial Services Authority.

Australia and New Zealand: This research is intended only for 'wholesale clients' within the meaning of the Australian Corporations Act and New Zealand Financial Advisors Act, respectively. Please refer to Australia-specific research disclosures and related information at https://www.dbresearch.com/PROD/RPS_EN-PROD/PROD000000000521304.xhtml. Where research refers to any particular financial product recipients of the research should consider any product disclosure statement, prospectus or other applicable disclosure document before making any decision about whether to acquire the product. In preparing this report, the primary analyst or an individual who assisted in the preparation of this report has likely been in contact with the company that is the subject of this research for confirmation/clarification of data, facts, statements, permission to use company-sourced material in the report, and/or site-visit attendance. Without prior approval from Research Management, analysts may not accept from current or potential Banking clients the costs of travel, accommodations, or other expenses incurred by analysts attending site visits, conferences, social events, and the like. Similarly, without prior approval from Research Management and Anti-Bribery and Corruption ("ABC") team, analysts may not accept perks or other items of value for their personal use from issuers they cover.

Additional information relative to securities, other financial products or issuers discussed in this report is available upon request. This report may not be reproduced, distributed or published without Deutsche Bank's prior written consent.

Backtested, hypothetical or simulated performance results have inherent limitations. Unlike an actual performance record based on trading actual client portfolios, simulated results are achieved by means of the retroactive application of a backtested model itself designed with the benefit of hindsight. Taking into account historical events the backtesting of performance also differs from actual account performance because an actual investment strategy may be adjusted any time, for any reason, including a response to material, economic or market factors. The backtested performance includes hypothetical results that do not reflect the reinvestment of dividends and other earnings or the deduction of advisory fees, brokerage or other commissions, and any other expenses that a client would have paid or actually paid. No representation is made that any trading strategy or account will or is likely to achieve profits or losses similar to those shown. Alternative modeling techniques or assumptions might produce significantly different results and prove to be more appropriate. Past hypothetical backtest results are neither an indicator nor guarantee of future returns. Actual results will vary, perhaps materially, from the analysis.

The method for computing individual E,S,G and composite ESG scores set forth herein is a novel method developed by the Research department within Deutsche Bank AG, computed using a systematic approach without human intervention. Different data providers, market sectors and geographies approach ESG analysis and incorporate the findings in a variety of ways. As such, the ESG scores referred to herein may differ from equivalent ratings developed and implemented by other ESG data providers in the market and may also differ from equivalent ratings developed and implemented by other divisions within the Deutsche Bank Group. Such ESG scores also differ from other ratings and rankings that have historically been applied in research reports published by Deutsche Bank AG. Further, such ESG scores do not represent a formal or official view of Deutsche Bank AG.

It should be noted that the decision to incorporate ESG factors into any investment strategy may inhibit the ability to participate in certain investment opportunities that otherwise would be consistent with your investment objective and other principal investment strategies. The returns on a portfolio consisting primarily of sustainable investments may be lower or higher than portfolios where ESG factors, exclusions, or other sustainability issues are not considered, and the investment opportunities available to such portfolios may differ. Companies may not necessarily meet high performance standards on all aspects of ESG or sustainable investing issues; there is also no guarantee that any company will meet expectations in connection with corporate responsibility, sustainability, and/or impact performance.
