

Price and Prejudice

Reiterate Rating: BUY | PO: 2,557 EUR | Price: 1,652 EUR

Raising '28E EPS on higher pricing/units; PO to €2,515

We raise our CY28E revenue/EPS estimates by 8.7%/13.0% respectively to €76.5bn/€85.2 from €70.4bn/€75.4. Our higher estimates reflect higher like-for-like pricing (c5% higher ASPs for DUV, EUV and IBM), higher EUV units (120 vs 110 prior) and higher dry units (210 vs 190 prior) less than offset by 2.5% higher input costs. On our revised estimates, we expect ASML system revenues to grow 40%/31.9%/36.2% yoy in CY26/27/28E, in-line to slightly above WFE revenue growth over the same period (33%/34%/30%) and deliver 50% EPS CAGR 2025-28E, the best of its global peers owing to higher gross margins (6.5ppts higher GM vs 1.3ppts on average for peers). Accordingly, we reiterate our Buy rating/Top Pick and raise our PO from €2,452 to €2,557 (US\$2915 for the ADR) on 25x CY28E EV/EBITDA, down from 27x prior reflecting recent sector de-rating but still within its historical range of (18x to 34x).

Rule of thumbs: 5% ASP increase = 8% EPS accretion

ASML have guided for “higher value-based pricing” during Q2 earnings call, likely impacting the P&L towards the end of '27E. Conceptually (details inside the note) we estimate that for every 5% ASP increase (tools and services), ASML's EPS could increase by 8%, assuming roughly 2.5% higher input costs. If ASML can increase ASPs by 5% without increasing input costs, we estimate that EPS accretion would increase to c10%. Our revised estimates assume c5% ASP increase in CY28E and c2.5% increase in input costs, which we consider conservative at this stage. While we have kept our CY27E EUV forecast at 86 units, we have raised our CY28E EUV forecast to 120 units, up from 110. We think ASML will gradually increase production reallocating factory floor to low-NA and benefitting from shorter lead times at key suppliers such as Zeiss.

MATCH Act uncertainty likely to be lifted by year-end

Uncertainties around ASML's ability to ship DUV tools to China remains a hot topic with investors. However, we think this is likely largely baked in the stock and would expect some clarity around its modalities and implementation post US mid-terms and US Defence budget negotiations.

Company Sector

Semiconductor Capital Equipment

Company Description

ASML is the market leader in lithography tools, a critical part of the semiconductor manufacturing process enabling 'Moore's law'. The company benefits from technology transitions as well as new additions in leading edge logic and memory chip capacity. ASML currently has a market share of more than 90% in litho tools and a monopoly in EUV lithography, the most advanced lithography tools

Investment Rationale

ASML has industrialised next gen EUV (Extreme Ultraviolet) lithography technology, which we believe will underpin many of the disruptive trends of this decade. Our Buy rating is predicated on 1) our long-term forecasts calling for high-teens revenue CAGR and high-twenty percent EPS CAGR over the next 5 years, 2) higher litho intensity in DRAM, and 3) potential upside to ASML's 2030 targets from AI and stronger industry demand.

ASML Holding N.V. (ASMLF / ASML)

We have set a PO of €2,557 (\$2,915 for the ADR). We use a 25.0x CY28E EV/EBITDA to derive our PO, within its historical range of 18x to 34x and broadly in-line with its 5-year historical median of 25.5x due to similar growth.

Upside risks to our PO are:

- 1) Higher-than-expected demand for EUV and DUV machines
- 2) Higher-than-expected gross margins on EUV machines and services
- 3) Stronger-than-expected Semi Capex environment driven by macroeconomic trends and higher capital intensity per wafer.

Downside risks to our PO are:

- 1) Delays in ramping volume shipments of EUV machines
- 2) Lower-than-expected gross margins on EUV machines
- 3) Weaker-than-expected Semi Capex driven by macro slowdown/oversupply
- 4) China export restrictions
- 5) Emerging litho startups could disrupt ASML's monopoly in the longer term

Buy	2057	57.03%	Buy	1386	67.38%
Hold	806	22.35%	Hold	563	69.85%
Sell	744	20.63%	Sell	446	59.95%

^{R1} Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. **VOLATILITY RISK RATINGS**, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. **INVESTMENT RATINGS** reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster ^{R2}
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

^{R2} Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. **Coverage Cluster** is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.
