US Semiconductors

Meta Muse Personal Agent Implications – AMD to \$800

CITI'S TAKE

Following the launch of several personal AI agents recently, including Muse, Dots, Instinct, GrokBot, and GeminiSpark, we raise our 2030 CPU TAM to \$300B. Unlike chatbots, which remain largely idle between user interactions, always-on agents like Muse can operate continuously, drive a significant increase in inference related compute, memory, and networking consumption across both enterprise and consumer workloads. We raise AMD TP to \$800 as the primary CPU beneficiary given, Meta, is one of the largest customers of AMD's server business. We reiterate Buy on NVDA w/\$315 TP on GPU demand uplift.

Raising CPU TAM to \$300B by 2030 — We update our CPU model post the launch of Muse, Meta's personal AI agent. Fundamentally, we view agentic AI as a potential orders-of-magnitude driver of compute demand relative to traditional chatbots. **We believe the CPU TAM expands from \$29B in 2025 to \$300B in 2030, or a 60% CAGR.** We still expect AMD to be the key beneficiary of the CPU renaissance and Intel as a secondary beneficiary.

Sizing the GPU Revenue for a Consumer Agent Per User. Meta's Muse is the first consumer AI agent launched at true social-network scale, and its compute footprint is now one of the more consequential unknowns in AI infrastructure. Our base case is that each user requires about 0.0020 GB200-class GPUs. At 100M daily users, our framework implies roughly 200,000–390,000 Blackwell-class GPUs, about 2,800–5,500 NVL72 racks, and approximately \$7–19B of one-time Nvidia revenue, including scale-out networking. **On a per-user basis, each incremental million agentic daily users is worth roughly \$70–190M to Nvidia if new servers are used.**

Memory: CPUs have a large attach rate of LP, DDR, and SSDs. Micron expects server units to grow in the high teens in CY26/27 and another vector of logic silicon to grow and take advantage of AI trends. Micron recently said that CPUs are creating more of a constraint on DRAM with Meta Muse as an example of how consumers are drawing value from agentic workflows.

Networking: Agentic AI materially increases networking traffic because agents are increasingly accessing infrastructure, creating a new acceleration opportunity using DPUs and Spectrum-X Ethernet.

Meta Muse Implications

CPU TAM to \$300B by 2030: We update our CPU model following the launch of several personal AI agents, including Muse, Dots, Instinct, GrokBot and GeminiSpark. Fundamentally, we view agentic AI as a potential orders-of-magnitude driver of compute demand relative to traditional chatbots. Unlike chatbots, which remain largely idle between user interactions, AI agents like Muse can operate continuously for hours or even run persistently in the background, autonomously executing multi-step tasks. Moreover, using cybersecurity as a prime example, where always-on agents could generate substantially higher token volumes, driving a significant increase in inference and compute consumption across both enterprise and consumer workloads.

Positive Impact on CPUs & Memory Demand: Unlike standard chatbots, Muse operates continuously as an autonomous agent and draws from virtual machines rather than GPUs. Muse is built upon Meta's Spark model and is designed to be the center of user's daily life. Prior to the explosion of agentic AI, a CPU was primarily limited to two main applications: 1.) traditional workflows and 2.) acting as the head node for AI applications.

In a head node, the CPU merely does the "management" by sending the user request to the GPU and sending the output back to the user. In this context, the GPU is doing heavy lifting such as running matrix multiplications to train LLMs or doing the inferencing when you query a chatbot.

The third new application for CPUs is agentic AI, and this new application has seen explosive growth within the past year as AI has moved from chatbot inferencing to agentic autonomous workflows like Claude Code and Meta Muse. At Citi, we define agentic CPUs as those that are handling the orchestration, reasoning loops, data processing, and security components of autonomous AI agents.

In Agentic AI, CPUs have become the new bottleneck as CPU-to-GPU ratios move from 1:8 in model training, to 1:4 in inferencing, to 1:1 or greater in agentic AI. We believe the ratio will increasingly skew towards CPUs over time as agentic AI scales. We believe the CPU TAM expands from \$29B in 2025 to \$300B in 2030, or a 60% CAGR.

We expect general purpose CPUs to grow at a 26% CAGR to \$64B in 2030, AI head nodes to grow at a 57% CAGR to \$78B in 2030, and agentic CPUs to grow at a 247% CAGR to \$157B in 2030. We model general purpose CPUs to represent 21% of the TAM in 2030, AI head nodes to represent 26% of the TAM in 2030, and agentic CPUs to represent 52% of the TAM by 2030. For reference, AMD forecasted a TAM of \$220B by 2030, and Nvidia forecasted a TAM of \$200B. For memory, CPUs have a large attach rate of LP, DDR, and SSDs. Micron expects server units to grow in the high teens in CY26/27 and another vector of logic silicon to grow and take advantage of AI trends. Micron recently said that CPUs are creating more of a constraint on DRAM with Meta Muse as an example of how consumers are drawing value from agentic workflows.

Figure 1. Citi Updated CPU TAM Model

TAM Estimates (\$M)	C25	C26E	C27E	C28E	C29E	C30E

We recap pre-quiet period highlights with the AMD IR team:

- **Helios launch execution.** Management is confident where they are with the ramp. Customers have racks and are running code on their racks. There are a few blocking and tackling with ODMs, very well-known are with Sanmina, ZT Systems, Wiwynn, and several other ODMs that are early in ramp. Other ODMs will be participating in a couple of quarters (Q1-Q2 timeframe). There are lot of things they are working through, but they are where they need to be.
- **Supply.** AMD already secured supply to do better than the plan. Includes packaging and CoWoS from TSMC. In an advanced position with substrates. AMD has HBM supply and they have DRAM. They are in a good position in supply. Guided to greater than 100% growth, could more than double from 2026 to 2027. AMD previously guided servers to up 70% YoY, they will ramp Venice very quickly for both 256 agentic parts and 96 core for head nodes. Turin should do well over next few quarters as AMD has strong 3nm and 4nm supply. AI business will more than double YoY.
- **Memory De-specing.** AMD is having some conversations with customers but wouldn't be hard to change from a roadmap perspective.
- **View on fast inference.** In house view, 75% of AI will be served by GPUs is consistent, but TAM has grown. There is a niche of fast inference accelerators that is relatively small today and could be an exciting part of the market. Doing a partnership with Cerebras with their WSE in their cloud. AMD does their head nodes, they do FPGAs in WSE, and AMD are investors in Cerebras. They do plan to do internal chiplets and have plans in ultra-fast inference, Talos provides IP and talent for that goal. AMD will have multiple ways to attack this market.
- **Potential TPU/ASIC capabilities.** AMD has semi-custom GPU configurations like with Meta, they have done separate shipments. They have 40 ASIC programs in company today, these are mostly smaller projects - but do include game consoles with Sony, Microsoft.
- **Future MI500/MI600 designs.** MI455 will be doing scale up networking with UAL, and MI500 will do native silicon ethernet partners. AMD will have option to use optics for scale up at end of MI500 products. Will likely be NPO. Copper and Optics will coexist for several generations.
- **Rev per GW.** AMD hasn't given specifics on these numbers, but have acknowledged the range of \$15-\$20B. Longer term, they expect revenue per GW

will go higher for AMD and the industry. Revenue per GPU will go up significantly, but the number of racks per GW will come down.

- **Venice Servers.** Venice will be most important server program in history of AMD; it will be a successful and fast launch. Not every partner gets allocation at the beginning of their launch given increased demand. Spikes in demand for 256 core agentic part and 96 core AI head node part.
- **\$220B TAM for servers.** Ambition to be over 50% dollar share in TAM, which implies AMD will build a \$100B server business.
- **Enterprise mix.** Enterprise is a part of the traditional workflows. Feel good there with AMD investments and go-to-market. There is a little bit of share shift happening there with DMR and their 8-channel competitor. As they move through decade it will be smaller portion of TAM, but it is a good business because it is sticky and high OM.
- **Gross margins.** AMD guided to 56% in 2Q and did better than that and guided to 56% in Q3 which includes 1 month of MI shipments and impacts to DT business. MI455 will become a meaningful part of revenue mix in 4Q, will be majority of AI business in Q4, so margin % likely will come down in Q4 (we estimate ~100 bps or so). In 2027, 55% range will move around depending on quarter. GM \$ growth will be significantly faster than opex growth. Positive drivers include servers and embedded, and gaming being weaker will be a tailwind to gross margins. AMD hasn't been margin stacking their HBM. HBM capacity and bandwidth are very important for inference workflows.
- **Client and gaming.** Client will be up 3Q, modeling a sub seasonal in 4Q for the industry. Client held better in 1H for the industry, and AMD likely gained share. Embedded has cleared inventory at distributor and OEM level, Embedded will be up 30% YoY in Q3. Embedded is important for GM and OM. Because DC will more than double, Embedded mix will go down.

Meta Muse: Sizing the GPU Revenue for a Consumer Agent Per User

Meta's Muse is the first consumer AI agent launched at true social-network scale, and its compute footprint is now one of the more consequential unknowns in AI infrastructure. Meta discloses neither usage nor serving architecture. We therefore build a bottom-up estimate of GPU demand for a single Muse daily active user, then scale it. Our base case is that each user requires about **0.0020 GB200-class GPUs (in theory)**, so simplistically speaking one GPU serves roughly 500 users and every million users requires about 2,000 GPUs. Our bull case, which assumes two hours of daily agent activity, raises that to about **0.0039 GPUs per user**, or roughly 250 users per GPU. For context, a chat-style user in our framework needs only 12.5-25% as much GPU capacity. This is the core of our view that agents are a structurally heavier inference workload than chatbots.

Figure 2. MUSE User GPU Estimate

MUSE User GPU Estimate				
Users served by one GPU	users	498	377	254
Users served by one NVL72 rack (72 GPUs)	users	35,867	27,176	18,305
GPUs per 1,000 users	GPUs	2.0	2.6	3.9
GPUs per 1 million users	GPUs	2,007	2,649	3,933
Share of GPUs spent writing (decode)	%	70%	70%	70%

How one user consumes compute. We model a typical user as running four simple requests a day, such as a quick factual question, plus twelve agentic tasks in our base case, such as finding a restaurant, checking availability against a calendar and drafting an invitation. We estimate an agentic task at about eight model calls. In each call the model reasons briefly, invokes a tool, reads the result and repeats. The model has no memory between calls, so it re-reads the growing conversation each time. A task therefore reads about 104,000 input tokens in total we estimate, even though its final context is only around 21,000. We assume the serving stack caches previously processed text. On that basis, only about 19,000 of those tokens are genuinely new work: the 5,000-token starting context (system instructions, tool definitions, user memory and the request) plus seven tool results of roughly 2,000 tokens each. Output per agentic task is about 4,000 tokens: seven decision steps of about 300 tokens, a 1,000-token final answer and a 900-token allowance for hidden reasoning. Across the day, our base-case user generates about 238,000 new input tokens and 50,000 output tokens.

From tokens to GPUs. We anchor GPU throughput to public benchmarks of DeepSeek R1, the closest disclosed analogue to a frontier mixture-of-experts model, on GB200 NVL72. We assume Muse Spark has around 800B total parameters, of which about 40B are active per token. Reading input (prefill) is compute-bound, and we estimate about 22,500 tokens per second per GPU, consistent with the roughly 26,000 LMSYS has demonstrated. Writing output (decode) is limited by memory bandwidth, not compute, because the GPU must re-read weights and each user's stored context for every token it generates. We assume 2,000 tokens per second per GPU. That sits below short-prompt benchmarks to reflect agent-length contexts. We then apply a 1.5x haircut to both figures to bridge benchmark conditions and a live fleet. On these assumptions, our base-case user consumes about 53 GPU-seconds per day: 37.5 seconds writing and 16 seconds reading. Dividing by the 86,400 seconds in a day, sizing for a 2.5x peak-to-average traffic ratio (Muse is US-only, which concentrates usage) and adding 30% spare capacity yields our 0.0020 GPUs per user. Roughly 70% of that requirement comes from writing rather than reading.

Investment implications. At 100M daily users, our framework implies roughly 200,000–390,000 Blackwell-class GPUs, about 2,800–5,500 NVL72 racks, and approximately \$7–19B of one-time Nvidia revenue, including scale-out networking. On a per-user basis, each incremental million agentic daily user is worth roughly \$70–190M to Nvidia if new servers are used.

We spoke with the NVIDIA IR team recently and recap key highlights.

- **Agentic AI applications** — Management sees agentic AI as a potentially orders-of-magnitude increase in compute demand versus traditional chatbots. Chatbots are largely dormant between prompts, while agents can run persistently for hours or continuously—particularly in applications like cybersecurity—driving substantially more token generation across both consumer and enterprise workloads.

- **Open vs Closed Models** — NVIDIA continues to expect large open and proprietary model ecosystems to coexist, with open models particularly important for enterprise and sovereign AI. Enterprises can bring open models in-house and customize/fine-tune them on proprietary data without that data leaving the premise, preserving data sovereignty and control. NVIDIA also emphasized open data sets alongside open model weights, as for its own open models, the company releases both the weights and the underlying training data sets, providing greater visibility into how the model was trained and should behave. Management compared the future AI ecosystem to proprietary software coexisting alongside Linux and other open-source infrastructure.
- **Agent Security** — NVIDIA's agent-security architecture adds another potential infrastructure role for BlueField. As detailed in the [tech blog](#), OpenShell provides the open-source policy/guardrail layer, while NVIDIA Sentry runs enforcement and telemetry in silicon on the BlueField DPU, operating out-of-band so the agent cannot manipulate the monitoring layer. This gives enterprises the ability to monitor, control and, if necessary, shut down agent activity.
- **Scale-In / Scale-Context** — Scale-context builds on the previously discussed STX/CMX platforms, with STX providing the rack architecture and CMX using it for large-context-memory workloads. Scale-in is the more incremental opportunity, extending NVIDIA beyond its historical east-west networking focus into north-south traffic such as storage access, security, provisioning and other data-center services. Management argued agentic AI materially increases this traffic because agents—not humans—are increasingly accessing infrastructure, creating a new acceleration opportunity using BlueField 4 and Spectrum-X Ethernet (see technical blog [here](#)).
- **Fast Inference / LPX** — LPX is expected to begin shipping late in the current quarter and ramp through Q4 and beyond. NVIDIA still views extreme-interactivity/fast inference as a relatively niche portion of AI infrastructure—roughly ~10% nearer term and potentially ~15–20% longer term—with the majority of throughput adequately served by NVL-class GPU racks. However, against NVIDIA's expectation for \$3 - 4T of annual AI capex by decade-end, even a modest percentage represents a very large absolute opportunity.
- **Power Availability** — NVIDIA acknowledged that power remains tight and should stay tight but does not currently view it as a constraint on its overall growth outlook. Management argued that power contracting is inherently multi-year, forcing customers and suppliers to plan well ahead, and believes the issue is ultimately “surmountable.” Some US regions may not support incremental data-center builds, but globally there is sufficient power and workloads can migrate toward regions where power is available. Management highlighted several factors that might be underappreciated in the power supply: off-grid generation, generation-to-generation energy-efficiency gains and scale-across, which can link geographically separate data centers into a larger logical AI factory. NVIDIA also argued its global footprint and broad customer/project pipeline allow infrastructure to be redirected if an individual project is delayed, making the company relatively resilient in a constrained environment.

Raising TP on AMD to \$800

Following the release of Meta Muse and our subsequent CPU TAM raise, we are raising estimates on AMD given our belief that AMD will be the primary beneficiary of the CPU renaissance and our belief that Meta is one of the largest customers of AMD's server business. We raise our TP to \$800 from \$575 and maintain AMD as our favorite growth compute semis pick in 2026.

Valuation - We lift our TP for AMD to \$800 from \$575. We value AMD using SOTP analysis with data center GPU/CPU biz at \$370/\$325 (35/35x 2028 PE), client \$32 (15x), gaming \$2 (6x), embedded \$30 (20x), and net cash per share ~\$41. Our target PE multiples are in-line with respective peer group averages. Our prior TP on AMD of \$575 used SOTP analysis with data center GPU/CPU biz at \$267/\$207 (27/25x 2028 PE), client \$31 (15x), gaming \$2 (6x), embedded \$29 (20x), and net cash per share ~\$40.

Figure 3. AMD SOTP Valuation

SOTP	2026E	2027E	2028E	P/E
Data Center GPU	\$51	\$184	\$370	35
Data Center CPU	\$128	\$246	\$325	35
Client	\$20	\$25	\$32	15
Gaming	\$1	\$1	\$2	6
Embedded (Xilinx)	\$18	\$25	\$30	20
Net Cash Per Share	\$7	\$17	\$41	
Total			\$800

Advanced Micro Devices

Company description

AMD is a fabless semiconductor company that specializes in PC and server microprocessors, graphics processing units (GPUs), semi-custom processors, and embedded processors. AMD is the #2 supplier of microprocessors for desktop PCs, notebook PCs, and servers with approximately 30% total market share. Based in Sunnyvale, CA, AMD has roughly 31,000 employees worldwide. AMD derives approximately 85% of revenue from the Data Center and Client segments and 15% of revenue from the Embedded and Gaming segments. AMD's largest customers include gaming console vendors, PC OEMs, hyperscalers, and LLM companies. AMD competes with Intel in the microprocessor segment and NVIDIA in the AI GPU segment. As a fabless semiconductor company, AMD outsources its wafer fabrication to third party foundries. The company has internal back-end assembly and test operations in Malaysia and China.

Investment strategy

We are Buy rated on AMD given increasing conviction on AMD's AI business and server CPU tailwinds. Namely, we believe Meta will be a significantly larger customer of AMD's AI products than the street is expecting.

Valuation

Our TP on AMD is \$800. We value AMD using SOTP analysis with data center GPU/CPU biz at \$370/\$325 (35/35x 2028 PE), client \$32 (15x), gaming \$2 (6x), embedded \$30 (20x), and net cash per share ~\$41. Our target PE multiples are in-line with respective peer group averages.

Risks

Competition: AMD competes directly with Intel in the microprocessor market. Consequently, any fluctuations in market share between AMD and Intel could result in risk to our estimates. AMD competes directly with NVIDIA in the graphics and AI GPU market. Consequently, any fluctuations in market share between AMD and NVIDIA could result in risk to our estimates.

PC End Market: AMD derives roughly 30% of sales from the PC industry, which is highly dependent on IT spending. Therefore, any major uptick/downtick in IT spending could result in upside/downside to our estimates and rating for AMD.

Valuation: While AMD is currently trading slightly above its historical range, revisions to consensus revenue estimates could result in high volatility to AMD stock.

Tender Offer: Any public or private tender offer for all or part of AMD's business could drive the stock higher and cause us to re-assess our rating.

If the impact on the company from any of these factors proves to be greater than we anticipate, the stock will likely have difficulty achieving our target

price. However, should they be less than anticipated, the stock could trade above our target price.

NVIDIA Corp

Company description

Nvidia is a leader in graphics processing units or GPUs. It is engaged in creating graphics and networking chips, which are used in gaming, data centers, and automotive end markets. Nvidia was founded by Jen-Hsun Huang (current CEO) and partners in January 1993 and is headquartered in Santa Clara, CA.

Investment strategy

We like Buy-rated NVDA on secular AI growth opportunities.

Valuation

Our price target for NVDA of \$315 is based on ~21x P/E on C27E earnings power. Our 21x P/E multiple is in-line with 1 year average.

Risks

Downside risks to the attainment of our target price include: 1) competition on gaming could drive the stock lower if Nvidia loses market share; 2) slower-than-expected adoption of new platforms can drive lower data center and gaming sales; 3) lumpiness in auto and data center markets can add volatility to the stock/multiple; and 4) cryptomining impact on gaming sales.

If you are visually impaired and would like to speak to a Citi representative regarding the details of the graphics in this document, please call USA 1-888-500-5008 (TTY: 711), from outside the US +1-210-677-3788

Appendix A-1

ANALYST CERTIFICATION

The research analysts primarily responsible for the preparation and content of this research report are either (i) designated by “AC” in the author block or (ii) listed in bold alongside content which is attributable to that analyst. If multiple AC analysts are designated in the author block, each analyst is certifying with respect to the entire research report other than (a) content attributable to another AC certifying analyst listed in bold alongside the content and (b) views expressed solely with respect to a specific issuer which are attributable to another AC certifying analyst identified in the price charts or rating history tables for that issuer shown below. Each of these analysts certify, with respect to the sections of the report for which they are responsible: (1) that the views expressed therein accurately reflect their personal views about each issuer and security referenced and were prepared in an independent manner, including with respect to Citigroup Global Markets Inc. and its affiliates; and (2) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in this report.

Citigroup Global Markets Inc. or its affiliates currently has, or had within the past 12 months, the following as clients, and the services provided were non-investment-banking, securities-related: Advanced Micro Devices, Intel Corp, Meta Platforms Inc, Micron Technology Inc, Microsoft Corp., NVIDIA Corp, TSMC, Wiwynn.

Citigroup Global Markets Inc. or its affiliates currently has, or had within the past 12 months, the following as clients, and the services provided were non-investment-banking, non-securities-related: Advanced Micro Devices, Cerebras Systems Inc, Intel Corp, Meta Platforms Inc, Micron Technology Inc, Microsoft Corp., NVIDIA Corp, TSMC, Wiwynn.

Citigroup Global Markets Inc. and/or its affiliates has a significant financial interest in relation to Advanced Micro Devices, Cerebras Systems Inc, Intel Corp, Meta Platforms Inc, Micron Technology Inc, Microsoft Corp., NVIDIA Corp, TSMC, Wiwynn. (For an explanation of the determination of significant financial interest, please refer to the policy for managing conflicts of interest which can be found at www.citiVelocity.com.)

Analysts' compensation is determined by Citi Research management and Citigroup's senior management and is based upon activities and services intended to benefit the investor clients of Citigroup Global Markets Inc. and its affiliates (the "Firm"). Compensation is not linked to specific transactions or recommendations. Like all Firm employees, analysts receive compensation that is impacted by overall Firm profitability which includes investment banking, sales and trading, and principal trading revenues. One factor in equity research analyst compensation is arranging corporate access events between institutional clients and the management teams of covered companies. Typically, company management is more likely to participate when the analyst has a positive view of the company.

For financial instruments recommended in the Product in which the Firm is not a market maker, the Firm is a liquidity provider in such financial instruments (and any underlying instruments) and may act as principal in connection with transactions in such instruments. The Firm is a regular issuer of traded financial instruments linked to securities that may have been recommended in the Product. The Firm regularly trades in the securities of the issuer(s) discussed in the Product. The Firm may engage in securities transactions in a manner inconsistent with the Product and, with respect to securities covered by the Product, will buy or sell from customers on a principal basis.

Unless stated otherwise neither the Research Analyst nor any member of their team has viewed the material operations of the Companies for which an investment view has been provided within the past 12 months.

For important disclosures (including copies of historical disclosures) regarding the companies that are the subject of this Citi Research product ("the Product"), please contact Citi Research, 388 Greenwich Street, 6th Floor, New York, NY, 10013, Attention: Legal/Compliance [E6WYB6412478]. In addition, the same important disclosures, with the exception of the Valuation and Risk assessments and historical disclosures, are contained on the Firm's disclosure website at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures. Valuation and Risk assessments can be found in the text of the most recent research note/report regarding the subject company. Pursuant to the Market Abuse Regulation a history of all Citi Research recommendations published during the preceding 12-month period can be accessed via Citi Velocity (<https://www.citivelocity.com/cv2>) or your standard distribution portal. Historical disclosures (for up to the past three years) will be provided upon request.

Citi Research Equity Ratings Distribution

Data current as of 01 Oct 2026	12 Month Rating			Catalyst Watch		
	Buy	Hold	Sell	Buy	Hold	Sell
Citi Research Global Fundamental Coverage (Neutral=Hold)	61%	32%	7%	36%	48%	16%
% of companies in each rating category that are investment banking clients	39%	43%	30%	42%	38%	36%

Guide to Citi Research Fundamental Research Investment Ratings:

Citi Research stock recommendations include an investment rating and an optional risk rating to highlight high risk stocks.

Risk rating takes into account both price volatility and fundamental criteria. Stocks will either have no risk rating or a High risk rating assigned.

Investment Ratings: Citi Research investment ratings are Buy, Neutral and Sell. Our ratings are a function of analyst expectations of expected total return ("ETR") and risk. ETR is the sum of the forecast price appreciation (or depreciation) plus the dividend yield for a stock within the next 12 months. The target price is based on a 12 month time horizon. The Investment rating definitions are: Buy (1) ETR of 15% or more or 25% or more for High risk stocks; and Sell (3) for negative ETR. Any covered stock not assigned a Buy or a Sell is a Neutral (2). For stocks rated Neutral (2), if an analyst believes that there are insufficient valuation drivers and/or investment catalysts to derive a positive or negative investment view, they may elect with the approval of Citi Research management not to assign a target price and, thus, not derive an ETR. Citi Research may suspend its rating and target price and assign "Rating Suspended" status for regulatory and/or internal policy reasons. Citi Research may also suspend its rating and target price and assign "Under Review" status for other exceptional circumstances (e.g. lack of information critical to the analyst's thesis, trading suspension) affecting the company and/or trading in the company's securities. In both such situations, the rating and target price will show as "—" and "—" respectively in the rating history price chart. Prior to 11 April 2022 Citi Research assigned "Under Review" status to both situations and prior to 11 Nov 2020 only in exceptional circumstances. As soon as practically possible, the analyst will publish a note re-establishing a rating and investment thesis. Investment ratings are determined by the ranges described above at the time of initiation of coverage, a change in investment and/or risk rating, or a change in target price (subject to limited management discretion). At times, the expected total returns may fall outside of these ranges because of market price movements and/or other short-term volatility or trading patterns. Such interim deviations will be permitted but will become subject to review by Research Management. Your decision to buy or sell a security should be based upon your personal investment objectives and should be made only after evaluating the stock's expected performance and risk.

Catalyst Watch/Short Term Views ("STV") Ratings Disclosure:

Catalyst Watch and STV Upside/Downside calls: Citi Research may also include a Catalyst Watch or STV Upside or Downside call to indicate the analyst expects the share price to rise (fall) in absolute terms over a specified period of 30 or 90 days in reaction to one or more specific near-term catalysts or events impacting the company or the market. A Catalyst Watch will be published when Analyst confidence is high that an impact to share price will occur; it will be a STV when confidence level is moderate. A Catalyst Watch or STV Upside/Downside call will automatically expire at the end of the specified 30/90 day period. The Catalyst Watch will also be automatically removed if share price performance (calculated at market close) exceeds 15% against the direction of the call (unless over-ridden by the analyst). The analyst may also remove a Catalyst Watch or STV call prior to the end of the specified period in a published research note. A Catalyst Watch/STV Upside or Downside call may be

different from and does not affect a stock's fundamental equity rating, which reflects a longer-term total absolute return expectation. For purposes of FINRA ratings-distribution-disclosure rules, a Catalyst Watch/STV Upside call corresponds to a buy recommendation and a Catalyst Watch/STV Downside call corresponds to a sell recommendation. Any stock not assigned to a Catalyst Watch Upside, Catalyst Watch Downside, STV Upside, or STV Downside call is considered Catalyst Watch/STV No View. For purposes of FINRA ratings distribution-disclosure rules, we correspond Catalyst Watch/STV No View to Hold in our ratings distribution table for our Catalyst Watch/STV Upside/Downside rating system. However, we reiterate that we do not consider No View to be a recommendation. For all Catalyst Watch/STV Upside/Downside calls, risk exists that the catalyst(s) and associated share-price movement will not materialize as expected.

Privately held companies:

The legal entities through which Citi conducts its business do not permit investment research recommendations, ratings, target prices, or estimates on any privately held companies ("private companies") referenced herein. Citi Research does not utilize a rating system for private companies. Any information on private companies in this report is based on generally available information and, although obtained from sources believed by Citi to be reliable, its accuracy and completeness are not guaranteed. Private companies are generally not subject to reporting obligations, which may result in less publicly available information. The information contained in this report may differ from information a private company may subsequently make public or otherwise share with investors. Continuation of publishing private company reports or private company sections within reports is at Citi's discretion, in accordance with internal policies.

RESEARCH ANALYST AFFILIATIONS / NON-US RESEARCH ANALYST DISCLOSURES

The legal entities employing the authors of this report are listed below (and their regulators are listed further herein). Non-US research analysts who have prepared this report (i.e., all research analysts listed below other than those identified as employed by Citigroup Global Markets Inc.) are not registered/qualified as research analysts with FINRA. Such research analysts may not be associated persons of the member organization (but are employed by an affiliate of the member organization) and therefore may not be subject to the FINRA Rule 2241 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Citigroup Global Markets Inc.

Papa Sylla; Atif Malik; Kelsey Chia, CFA

OTHER DISCLOSURES

Any price(s) of instruments mentioned in recommendations are as of the prior day's market close on the primary market for the instrument, unless otherwise stated.

The completion and first dissemination of any recommendations made within this research report are as of the Eastern date-time displayed at the top of the Product. If the Product references views of other analysts then please refer to the price chart or rating history table for the date/time of completion and first dissemination with respect to that view.

Regulations in various jurisdictions require that where a recommendation differs from any of the author's previous recommendations concerning the same financial instrument or issuer that has been published during the preceding 12-month period that the change(s) and the date of that previous recommendation are indicated. For fundamental coverage please refer to the price chart or rating change history within this disclosure appendix or the issuer disclosure summary at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures.

Citi Research has implemented policies for identifying, considering and managing potential conflicts of interest arising as a result of publication or distribution of investment research. A description of these policies can be found at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures.

The proportion of all Citi Research research recommendations that were the equivalent to "Buy", "Hold", "Sell" at the end of each quarter over the prior 12 months (with the % of these that had received investment firm services from Citi in the prior 12 months shown in brackets) is as follows; Q2 2026 Buy 33%(63%), Hold 44% (51%), Sell 23% (49%), RV 0.5% (87%); Q1 2026 Buy 33% (63%), Hold 44% (52%), Sell 23% (46%), RV 0.5% (89%); Q4 2025 Buy 33% (63%), Hold 44% (50%), Sell 23% (46%), RV 0.4% (91%); Q3 2025 Buy 33%(61%), Hold 44% (52%), Sell 23% (50%), RV 0.4% (80%). For the purposes of disclosing recommendations other than for equity (whose definitions can be found in the corresponding disclosure sections), "Buy" means a positive directional trade idea; "Sell" means a negative directional trade idea; and "Relative Value" means any trade idea which does not have a clear direction to the investment strategy.

European regulations require a 5 year price history when past performance of a security is referenced. CitiVelocity's Charting Tool (https://www.citivelocity.com/cv2/#go/CHARTING_3_Equities) provides the facility to create customisable price charts including a five year option. This tool can be found in the Data & Analytics section under any of the asset class menus in CitiVelocity (<https://www.citivelocity.com/>). For further information contact CitiVelocity support (https://www.citivelocity.com/cv2/go/CLIENT_SUPPORT). The source for all referenced prices, unless otherwise stated, is DataCentral, which sources price information from LSEG Data & Analytics. Past performance is not a guarantee or reliable indicator of future results. Forecasts are not a guarantee or reliable indicator of future performance.

Investors should always consider the investment objectives, risks, and charges and expenses of an ETF carefully before investing. The applicable prospectus and key investor information document (as applicable) for an ETF should contain this and other information about such ETF. It is important to read carefully any such prospectus before investing. Clients may obtain prospectuses and key investor information documents for ETFs from the applicable distributor or authorized participant, the exchange upon which an ETF is listed and/or from the applicable website of the applicable ETF issuer. The value of the investments and any accruing income may fall or rise. Any past performance, prediction or forecast is not indicative of future or likely performance. Any information on ETFs contained herein is provided strictly for illustrative purposes and should not be

deemed an offer to sell or a solicitation of an offer to purchase units of any ETF either explicitly or implicitly. The opinions expressed are those of the authors and do not necessarily reflect the views of ETF issuers, any of their agents or their affiliates. Citigroup Global Markets India Private Limited and/or its affiliates may have, from time to time, actual or beneficial ownership of 1% or more in the debt securities of the subject issuer.

Please be advised that pursuant to Executive Order 13959 as amended (the "Order"), U.S. persons are prohibited from investing in securities of any company determined by the United States Government to be the subject of the Order. This research is not intended to be used or relied upon in any way that could result in a violation of the Order. Investors are encouraged to rely upon their own legal counsel for advice on compliance with the Order and other economic sanctions programs administered and enforced by the Office of Foreign Assets Control of the U.S. Treasury Department.

This communication is directed at persons who are "Eligible Clients" as such term is defined in the Israeli Regulation of Investment Advice, Investment Marketing and Investment Portfolio Management law, 1995 (the "Advisory Law"). Within Israel, this communication is not intended for retail clients and Citi will not make such products or transactions available to retail clients or to non-Eligible Clients. The presenter is not licensed as investment advisor or investment marketer by the Israeli Securities Authority ("ISA") and this communication does not constitute investment or marketing advice. The information contained herein may relate to matters that are not regulated by the ISA. Any securities which are the subject of this communication may not be offered or sold to any Israeli person except pursuant to a security offering exemption according to the Israeli Securities Law, 1968 and the public offering rules provided thereunder.

Citi Research broadly and simultaneously disseminates its research content to the Firm's institutional and retail clients via the Firm's proprietary electronic distribution platforms (e.g., Citi Velocity and various Global Wealth platforms). As a convenience, certain, but not all, research content may be distributed through third party aggregators. Clients may receive published research reports by email, on a discretionary basis, and only after such research content has been broadly disseminated. Certain research is made available only to institutional investors to satisfy regulatory requirements. The level and types of services provided by Citi Research analysts to clients may vary depending on various factors such as the client's individual preferences as to the frequency and manner of receiving communications from analysts, the client's risk profile and investment focus and perspective (e.g. market-wide, sector specific, long term, short-term etc.), the size and scope of the overall client relationship with the Firm and legal and regulatory constraints.

Pursuant to Comissão de Valores Mobiliários Resolução 20 and ASIC Regulatory Guide 264, Citi is required to disclose whether a Citi related company or business has a commercial relationship with the subject company. Considering that Citi operates multiple businesses in more than 100 countries around the world, it is likely that Citi has a commercial relationship with the subject company.

Securities recommended, offered, or sold by the Firm: (i) are not insured by the Federal Deposit Insurance Corporation; (ii) are not deposits or other obligations of any insured depository institution (including Citibank); and (iii) are subject to investment risks, including the possible loss of the principal amount invested. The Product is for informational purposes only and is not intended as an offer or solicitation for the purchase or sale of a security. Any decision to purchase securities mentioned in the Product must take into account existing public information on such security or any registered prospectus. Although information has been obtained from and is based upon sources that the Firm believes to be reliable, we do not guarantee its accuracy and it may be incomplete and condensed. Note, however, that the Firm has taken all reasonable steps to determine the accuracy and completeness of the disclosures made in the Important Disclosures section of the Product. The Firm's research department has received assistance from the subject company(ies) referred to in this Product including, but not limited to, discussions with management of the subject company(ies). Firm policy prohibits research analysts from sending draft research to subject companies. However, it should be presumed that the author of the Product has had discussions with the subject company to ensure factual accuracy prior to publication. Statements and views concerning ESG (environmental, social, governance) factors are typically based upon public statements made by the affected company or other public news, which the author may not have independently verified. ESG factors are one consideration that investors may choose to examine when making investment decisions. All opinions, projections and estimates constitute the judgment of the author as of the date of the Product and these, plus any other information contained in the Product, are subject to change without notice. Prices and availability of financial instruments also are subject to change without notice. Notwithstanding other departments within the Firm advising the companies discussed in this Product, information obtained in such role is not used in the preparation of the Product. Although Citi Research does not set a predetermined frequency for publication, if the Product is a fundamental equity or credit research report, it is the intention of Citi Research to provide research coverage of the covered issuers, including in response to news affecting the issuer. For non-fundamental research reports, Citi Research may not provide regular updates to the views, recommendations and facts included in the reports. Notwithstanding that Citi Research maintains coverage on, makes recommendations concerning or discusses issuers, Citi Research may be periodically restricted from referencing certain issuers due to legal or policy reasons. Where a component of a published trade idea is subject to a restriction, the trade idea will be removed from any list of open trade ideas included in the Product. Upon the lifting of the restriction, the trade idea will either be re-instated in the open trade ideas list if the analyst continues to support it or it will be officially closed. Citi Research may provide different research products and services to different classes of customers (for example, based upon long-term or short-term investment horizons) that may lead to differing conclusions or recommendations that could impact the price of a security contrary to the recommendations in the alternative research product, provided that each is consistent with the rating system for each respective product.

Investing in non-U.S. securities, including ADRs, may entail certain risks. The securities of non-U.S. issuers may not be registered with, nor be subject to the reporting requirements of the U.S. Securities and Exchange Commission. There may be

limited information available on foreign securities. Foreign companies are generally not subject to uniform audit and reporting standards, practices and requirements comparable to those in the U.S. Securities of some foreign companies may be less liquid and their prices more volatile than securities of comparable U.S. companies. In addition, exchange rate movements may have an adverse effect on the value of an investment in a foreign stock and its corresponding dividend payment for U.S. investors. Net dividends to ADR investors are estimated, using withholding tax rates conventions, deemed accurate, but investors are urged to consult their tax advisor for exact dividend computations. Investors who have received the Product from the Firm may be prohibited in certain states or other jurisdictions from purchasing securities mentioned in the Product from the Firm. Please ask your Financial Consultant for additional details. Citigroup Global Markets Inc. takes responsibility for the Product in the United States. Any orders by US investors resulting from the information contained in the Product may be placed only through Citigroup Global Markets Inc.

The Citigroup legal entity that takes responsibility for the production of the Product is the legal entity which the first named author is employed by.

Tekfen Tower, Eski Büyükdere Caddesi # 209 Kat 2B, 23294 Levent, Istanbul, Turkey. Under Capital Markets Law of Turkey (Law No: 6362), the investment information, comments and recommendations stated here, are not within the scope of investment advisory activity. Comments and recommendations stated here rely on the individual opinions of the ones providing these comments and recommendations. These opinions may not fit to your financial status, risk and return preferences. For this reason, to make an investment decision by relying solely to this information stated here may not bring about outcomes that fit your expectations. Furthermore, Citi Research is a division of Citigroup Global Markets Inc. (the "Firm"), which does and seeks to do business with companies and/or trades on securities covered in this research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report, however investors should also note that the Firm has in place organisational and administrative arrangements to manage potential conflicts of interest of this nature.

In the **U.A.E**, these materials (the "Materials") are communicated by Citigroup Global Markets Limited, DIFC branch ("CGML"), an entity registered in the Dubai International Financial Center ("DIFC") and licensed and regulated by the Dubai Financial Services Authority ("DFSA", license #CLO221) to Professional Clients and Market Counterparties, as defined in DFSA regulations, only and should not be relied upon or distributed to Retail Clients. Financial products and/or services to which the Materials relate will only be made available to Professional Clients and Market Counterparties. Citigroup Global Markets Limited DIFC Branch registered address is Level 3, Gate District Building 02, Dubai International Financial Centre and can be contacted on +971 4 509 97 90.

The Product is made available in **United Kingdom** by Citigroup Global Markets Limited, which is authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority ("FCA") and the PRA. This material may relate to investments or services of a person outside of the UK or to other matters which are not authorised by the PRA nor regulated by the FCA and the PRA and further details as to where this may be the case are available upon request in respect of this material. Citigroup Centre, Canada Square, Canary Wharf, London, E14 5LB.

The Product is made available in **United States** and **Canada** by Citigroup Global Markets Inc., which is a member of FINRA and registered with the US Securities and Exchange Commission. 388 Greenwich Street, New York, NY 10013.

Unless specified to the contrary, within EU Member States, the Product is made available by Citigroup Global Markets Europe AG ("CGME"), which is regulated by the European Central Bank and the German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht - BaFin).

The Product is not to be construed as providing investment services in any jurisdiction where the provision of such services would not be permitted.

Subject to the nature and contents of the Product, the investments described therein are subject to fluctuations in price and/or value and investors may get back less than originally invested. Certain high-volatility investments can be subject to sudden and large falls in value that could equal or exceed the amount invested. The yield and average life of CMOs (collateralized mortgage obligations) referenced in this Product will fluctuate depending on the actual rate at which mortgage holders prepay the mortgages underlying the CMO and changes in current interest rates. Any government agency backing of the CMO applies only to the face value of the CMO and not to any premium paid. Certain investments contained in the Product may have tax implications for private customers whereby levels and basis of taxation may be subject to change. If in doubt, investors should seek advice from a tax adviser. The Product does not purport to identify the nature of the specific market or other risks associated with a particular transaction. Advice in the Product is general and should not be construed as personal advice given it has been prepared without taking account of the objectives, financial situation or needs of any particular investor. Accordingly, investors should, before acting on the advice, consider the appropriateness of the advice, having regard to their objectives, financial situation and needs. Prior to acquiring any financial product, it is the client's responsibility to obtain the relevant offer document for the product and consider it before making a decision as to whether to purchase the product.

Card Insights. Where this report references Card Insights data, Card Insights consists of selected data from a subset of Citi's proprietary credit card transactions. Such data has undergone rigorous security protocols to keep all customer information confidential and secure; the data is highly aggregated and anonymized so that all unique customer identifiable information is removed from the data prior to receipt by the report's author or distribution to external parties. This data should be considered in the context of other economic indicators and publicly available information. Further, the selected data represents only a subset of Citi's proprietary credit card transactions due to the selection methodology or other limitations and should not be considered as indicative or predictive of the past or future financial performance of Citi or its credit card business.

Citi Research product may source data from dataCentral. dataCentral is a Citi Research proprietary database, which includes the Firm's estimates, data from company reports and feeds from LSEG Data & Analytics. The source for all referenced prices, unless otherwise stated, is DataCentral. Past performance is not a guarantee or reliable indicator of future results. Forecasts are not a guarantee or reliable indicator of future performance. The printed and printable version of the research report may not include all the information <(e.g. certain financial summary information and comparable company data) that is linked to the online version available on the Firm's proprietary electronic distribution platforms.
