3Q26 beat led by stronger-than-expected pricing for DRAM, NAND, and HBM

SK Hynix (Hynix) reported 3Q26 revenue of W104.6tn (+32% qoq, +328% yoy) and operating profit of W83.3tn (+38% qoq, +632% yoy), where both figures were higher compared to both GSe and Bloomberg consensus estimates, despite the unfavorable F/X rate during the quarter. We believe the beat was led by stronger-than-expected pricing for every major product (conventional DRAM, NAND, and HBM), where we especially think HBM pricing was much stronger-than-expected given the higher HBM4 mix.

We raise our 2027E-2028E EPS estimates by 19-22% to reflect the upside in both pricing and volume (mainly for DRAM), as well as the expectations for a meaningful share buyback and cancellations. With the confirmation of continued strength in the industry fundamentals, shareholder return implying ~15% yield, and attractive valuation even on a P/B basis trading at close to 2028E book value vs. 57% ROE, we believe the risk/reward for the name is attractive and reiterate our Buy rating with an unchanged 12m TP of W3.5mn.

Key takeaways

- **Strong upward revision in 4Q26 OP supported by strength in both pricing and volume**: Hynix guided 4Q26 DRAM bit growth of +mid-20% qoq, which was higher than our prior forecast of +9% qoq. While the company's DRAM inventory level remains at the minimum level, we believe this strong guidance comes from active migration toward 1c nm DRAM, and we pencil in ~30% of the company's DRAM bits to be on this node by the end of this year. We believe another factor driving this strong bit growth is the robust increase in the company's HBM4 supply from the

Source: Company data, Goldman Sachs Research estimates.

M15X fab, and supported by this we expect the company's total HBM bits to grow by around 20% qoq in 4Q26. With this strength in volume also helped by the continued solid pricing we expect, we estimate Hynix' 4Q26 OP to reach over W100tn, a meaningful upward revision compared to our prior estimate of W90tn.

- **Overall memory demand to outpace supply through 2030:** Hynix guided 2027 bit demand for DRAM to grow mid-20% yoy and for NAND to grow high-teens% yoy. The company expects continued strength in AI infra demand to more than offset the weakness in PC/smartphone related demand and drive sustained growth in the overall memory market, and along with the supply constraints coming from rising complexity in leading-edge processes and longer fab construction lead times, believes overall memory demand will continue to outpace supply through 2030.
- **Two major concerns on its HBM business alleviated**: During the call, Hynix addressed two major concerns on its HBM business - 1) potential HBM4 production issues and 2) industry-wide HBM despeccing. On 1), the company highlighted that it started HBM4 mass production without any major issue, now seeing stable yields where it believes it leads the industry in both front-end and back-end production yields. With HBM4 already exceeding its target yield rate, the company mentioned that it revised up its target. Hynix also guided its HBM4 shipment and revenue to both surpass that of HBM3E in 4Q26, implying a smooth ramp-up. On 2), Hynix believes HBM despeccing shows how supply is not able to catch up to demand. The company has not seen any changes to the mid-to-long-term HBM demand outlook, and mentioned that the HBM volume requirements from customers are more than double of what the company can supply today.
- **DRAM and HBM sold out until 2029**: Hynix disclosed additional details on the progress in long-term agreements (LTAs) with customers. The company added 4 additional customers including major global CSPs to reach 14 key customers, and volumes committed under the LTAs now account over 50% of its total capacity for 2027 and 2028. A typical LTA would be based on a 5-year term, while some customers are already asking to extend the duration of the agreement. Hynix also mentioned that taking secured LTA volumes together with demand currently under discussion, both DRAM and HBM are effectively sold out until 2029.
- **W100tn shareholder return plan for this year implying ~65% of our FCF estimate for the company**: Hynix announced a shareholder return plan of W100tn for 2026, where it plans cash dividends of W30tn+ and buyback/cancellation of W60tn+. Given we expect FCF of W152tn for this year, based on our estimates this plan implies the company returning ~65% of its FCF. We assume total cash dividends of ~W34tn and buyback/cancellation of ~W65tn for this year, and given the company also announced a special dividend of W14tn and buyback/cancellation of W10tn for 3Q26, believe the company will announce another ~W20tn in cash dividends and ~W15tn in buyback/cancellation for 4Q26.
- **Expect mid-teens% shareholder yield in 2027E/2028E**: Based on our FCF estimates and assumption that the company will use ~55% of its FCF for shareholder return, we model TSR of W152tn/W165tn for 2027E/2028E. Given the company mentioned it will continue to buyback and cancel shares each quarter, we assume

W20tn/quarter so W80tn/year for buybacks/cancellations, and the remaining W72tn/W85tn for cash dividends during these years. At the current market cap, the implied shareholder yield for 2026E/2027E/2028E are 9%/14%/15%.

Raise earnings estimates and maintain W3.5mn TP; reiterate Buy

Mainly reflecting 3Q26 results that include a significant investment asset related loss (W23tn), we lower our 2026E EPS estimate by 5%. However, as we reflect the higher ASP estimates for conventional DRAM and NAND, higher DRAM bit shipment estimates, and the lower share count from the buyback/cancellation assumptions, our 2027E-2028E EPS estimates rises by 19-22%. Our 12m TP of W3.5mn is unchanged, which is based on a target P/E of ~7X (down from 9X on lower comp multiples) to the 2026E-2027E average EPS.

We expect upside to consensus EPS estimates coming from the tailwinds on both pricing and volume (mainly for DRAM), as well as the expectations for a meaningful share buyback and cancellations. With the confirmation of continued strength in the industry fundamentals, shareholder return implying ~15% yield, and attractive valuation even on a P/B basis trading at close to 2028E book value vs. 57% ROE, we believe the risk/reward for the name is attractive and reiterate our Buy rating.

Key risks include 1) major deterioration in memory supply/demand and delay in technology migration, 2) weaker demand for smartphones/PCs/servers which would impact overall conventional memory demand, 3) Samsung's positive HBM business progress which would impact HBM revenue and profit, 4) lower AI-related capex which would impact overall HBM demand, and thus HBM revenue/profit for the company.

Price Target Risks and Methodology - SK Hynix Inc.

Valuation methodology: Our 2026E/27E avg. P/E-based 12m TP is W3,500,000, applying a target P/E multiple of 7.0X.

Key risks: Key risks include 1) major deterioration in memory supply/demand and delay in technology migration, 2) weaker demand for smartphones/PCs/servers which would impact overall conventional memory demand, 3) Samsung's positive HBM business progress which would impact HBM revenue and profit, 4) lower AI-related capex which would impact overall HBM demand, and thus HBM revenue/profit for the company.

Investment Thesis - SK Hynix Inc.

SK Hynix (Hynix) is the leader in the HBM market, the second-largest DRAM supplier, and one of the leading NAND suppliers globally. We expect one of the strongest memory upcycles to pan out throughout 2026, as the incrementally higher AI spending mainly from the hyperscalers and their intentions to continue to do so is driving our view that memory demand from servers (server DRAM, SOCAMM, HBM, and eSSD) will significantly outpace supply, hence we are Buy rated on the name.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this

company.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (https://www.sipc.org).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, make a market or act as liquidity provider in, and buy or sell, any securities, derivatives, or other financial instruments referred to in this research (including any financial instruments issued by the companies referred to herein), unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at https://www.theocc.com/about/publications/character-risks.jsp and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to https://research.gs.com.
