Key takeaways and implications

We view this as a strong report, with both 3Q26 results and 4Q26/2026 guidance well above both GS and the Street on revenue, adjusted EBIT, and adjusted EPS. Importantly, Vertiv spoke to strong demand (with the pipeline expanding and organic orders up >100% yoy) and momentum heading into 2027, and it continues to take steps to improve supply. Finally, organic growth is broad-based regionally.

Specifically, Vertiv reported 3Q26 revenue/adjusted EBIT/adjusted EPS of $4,313 mn/$1,087 mn/$2.21 compared to the Street at $3,749 mn/$922 mn/$1.82. 4Q revenue/EBIT/EPS guidance of $4.4 bn/$1,138 mn/$2.25 came in above the Street at $4.3 bn/$1,119 mn/$2.21.

We maintain our Buy rating on the stock. We continue to believe that Vertiv is well positioned for growth. We attribute this to both company specific drivers (such as Vertiv's broad portfolio that supports both power and cooling as well as both products and services) as well as end-market investments in datacenter infrastructure. Vertiv noted broad based organic growth in the quarter, including EMEA returning to growth, and the company continues to add capacity as it addresses the supply chain issues seen last quarter. The company also reported strong orders in the quarter (up over 100% organically yoy), with momentum heading into 2027. Finally, we believe capital allocation/M&A could remain an incremental driver, with Vertiv recently closing two deals and highlighting strong balance sheet capacity.

Results

Vertiv reported 3Q26 revenue of $4,313 mn (up 32% qoq as reported and up 55% yoy organically), compared to GS at $3,765 mn and the Street at $3,749 mn, and above the guidance range of

Updated estimates, price target, and key risks

We raise our 2026/27/28 EPS estimates to $7.17/$9.85/$12.50 from $6.75/$9.25/$11.55 prior, reflecting higher revenue and margins.

We remain Buy-rated on VRT shares. We raise our 12-month price target to $313 from $301, which is based on a 20X EV/EBITDA multiple (from 22X prior, reflecting lower peer multiples) applied to our updated Q5-Q8 EBITDA estimate.

Key downside risks to our view include: 1) Revenue growth – Vertiv has a portion of its datacenter revenue still tied to traditional on-premise datacenters, which is a part of the market that could be impacted by either enterprise spending weakness or by the shift to the cloud. In addition, Vertiv's ability to continue to improve its cloud/hyperscale revenue and grow in the channel will be important factors in how fast its revenue will increase. Also, market share will be a factor in revenue trends. 2) Margins – There are risks to our expectation for margin expansion. This could come from increased competitive pressure, mix, or execution, tariffs.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total

return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.
