European Capital Goods

Views and expectations into Q3 results - Outlook commentary more important than Q3 beats

The demand environment for power gen and electrical equipment remained very strong during Q3, PMI's continued to push higher, swift price/cost actions were taken early in Q2 and again in Q3 (in places), and further tariff refunds are probable. While the net of this should see more beats than misses in Q3, what matters more given the volatile macro and geopolitical situation is the commentary regarding Q4 and 2027. With a September year end for Siemens, Rockwell and Emerson (plus the 'Initial Assumptions' slide in Eaton's Q3 deck), outlooks will be in focus - expect a degree of conservatism and consensus straddling, for now. Longer term, the implications of Europe's increased emphasis on security, resiliency and strategic autonomy should be a longer-lasting, policy-supported capex cycle spanning defence, energy, grid, industrial capacity, digital infrastructure, and selected critical supply chains. Relative to the US, the EU is starting from a deeper underinvestment in all of the aforementioned verticals, at a time when relative valuations have never been sustainably cheaper. We summarise our views below and will be hosting the Global Cap Goods Pregame call on Thursday, October 15 @ 9:00am ET/14:00 UK/9:00pm HK with our colleagues from the US and Asia.

- **Key calls into Q3 - large caps:** Investors are expecting a very strong OSG quarter for **Schneider Electric (downgraded to N from OW last week)** following the **PTC (upgraded to N from UW last week)** deal announcement, with an expectation that the shares will move higher to support the c€6bn equity component of the deal, with the hope/expectation that the shares can begin to re-rate thereafter into year end/2027. We would remind investors that this is a low fidelity Q3 sales-only release and that a strong Q3 is well expected. While BBG consensus models 'only' 13.1% (JPM : 12%) with EM +16% and IA +7.6%, the buyside bar strikes us as 16%+, in our view (n.b. Q2: 16.5%). **Siemens (OW, AFL)** is the go-to funding short for Schneider at present on a relative basis given the September year end/expected conservative guide for FY27. We like the name fundamentally and versus Schneider on a relative basis, given the imminent SHL spin-out, accelerated share repos + the software portfolio that has been built over time and derisked from an integration standpoint, which are challenges that still lie ahead for Schneider, whose portfolio is looking a lot more like Siemens post PTC. We would, however, prefer to be long **Legrand** (OW) given the still-crowded nature of Schneider and the easier pair (both CAC40 listed with similar domestic exposure), and if Schneider are set to beat on OSG by several points, so too is Legrand (cons: 10.5%, sequentially stable versus Q2 actuals). As for **Siemens Energy (OW, AFL)** we still need to preview the mini-CMD fully, but expect a further update of medium term guidance above the Street + a follow-on share repo, given the current 3 yr / €6bn programme looks as though it's going to be achieved in year one. On the mechanicals, we continue to like **Atlas Copco (OW)** over **Assa Abloy (OW)** given end market exposures and valuation levels, and we see growing upside risk for **Kone** and **Schindler (both OW)**, related to TKE newsflow, noting the Hitachi + Fujitec headlines re the European ops last week.
- **Other key calls into Q3:** We are positive on **Alstom (OW, AFL)** going into the H1 print and see a low risk of a profit warning, as seen by bears. We expect another good quarter for orders from **Andritz (OW)**, which should support the shares. We are cautious on **Kion (OW)** as we see risks of a profit warning. That

Catalyst Watch is our short-term conviction indicator for our coverage universe. It is an optional indicator our research analysts can apply to a stock in their coverage into a specific event in order to articulate short-term positivity or caution based on near-term fundamentals. As such, it can differ from the analysts' published ratings, which are sector relative and longer term in nature.

See page 29 for analyst certification and important disclosures, including non-US analyst disclosures.

said, the valuation argument is compelling and a reset will present a buying opportunity. We expect a solid organic growth from **Nexans (OW)** and see the potential announcement of a new MI order in the coming weeks as an important catalyst. For **Prysmian (NR)** we see room for another guidance upgrade driven by strength in Electrification segment. We like **Rexel (OW)** into Q3 sales, where we see scope for a guidance upgrade on organic growth. We are comfortable owning **Vestas (OW)** into the Q3 print and the US mid-term elections on Nov 3 is a bigger catalyst for the stock than the results. Amongst the Mining OEMs, we are positive on **Weir (OW; +ve CW)** where we expect order growth, especially OE growth, to be stronger than feared. This should help alleviate some of the market share concerns which continue to be a key debate for the investment case. We are also positive on **Epiroc (OW)** where announced orders underpins good order growth in the quarter but with further upside achievable. In contrast, we are cautious on **Metso (OW)** where expectations are elevated. **FLSmidth (OW)** has announced two large orders last week (c.15% of Q3 group intake) which is an indication of the very positive underlying markets. The debate on **Sandvik (N)** continues to be centered on Machining and we might see some pressure on the stock if Tungsten prices continue their recent decline. We are cautious on the **SKF (UW)** Bearing Solutions margin where the sequential tailwinds are lower (aside from FX). **Trelleborg (OW)** already flagged c.5% organic development at its pre-close call, shy of 5.7% expectations, but with the stock having moved on the news, we are neutral into the event. We expect a straightforward quarter for **Fluidra (OW)** where new build continues to be soft but in the numbers.

- **Sector valuation:** Our coverage trades on ~18.8x 1-year forward adj. P/E, at a 37% premium to MSCI Europe, compared to a historical average of ~29%. The coverage has de-rated vs MSCI Europe Capital Goods and is trading at a 5% discount vs a typical ~2% premium. Our preview heatmap provides a quantitative assessment of the best- and worst-positioned stocks heading into the quarter based on: our expected beat/miss on the quarter, our full-year forecasts vs consensus, one-month share price performance and year-to-date change in PE. We use our heatmap to inform but not dictate, our preferred longs and shorts into the quarter.

phil.buller@jpmorgan.com

Summary expectations into Q3 results

Electrical Engineers

- **Alstom (OW, AFL):** H1 results are an important catalyst for our investment case where, since our early update last month (link), a few data points have boosted our confidence in in-line execution. Alstom has reported several large orders leading to an all-time high quarterly order intake in Q2 after a weak Q1, no outstanding commercial papers at the end of the period (which could bode well for potential upside on H1 FCF guidance), and the company publishing an updated equity story on October 7th which confirms the potential for a self-help turnaround in rolling stock. We forecast H1 revs of €9,505mn, Adj EBIT of €575mn (6.1% margin), net income of €158mn and operating FCF of -€1369mn. We expect management to reiterate FY guidance and see potential for refining the FCF guidance, where Alstom is currently calling for a positive FCF for the year.
- **Electrolux (N):** For Q3, we forecast revenue of Skr33.6bn (+1.8% organic) and Adj EBIT of Skr821mn (+2.4% margin vs. +2.8% a year ago). While fundamentals are weak, the company is working on cost-outs and therefore it is difficult to take a view on the results, given the depressed level of ongoing earnings. Since Q2, exchange rates have turned more favourable, but higher interest rates are a headwind that we expect will push out the recovery in new construction. In the Latin America region, performance could also be impacted by the ongoing bankruptcy process of Casas Bahia, the largest appliance retailer in Brazil with an estimated 20% market share (according to Elux).
- **Legrand (OW):** Overall, we expect a continuation of the trends seen in H1, i.e. very strong growth in US Data Center (DC) at c 30%+ with no visible slowdown into 2027/28, good growth in EU DC, with a mixed if overall flattish picture across non-DC/construction end markets. We model M&A growth of 11.4% in Q3 (BBG cons: +9.7%), FX of +1% (BBG: +1.1%), and OSG of +10.2% (BBG: +10.5%), of which price is 3.6%, with the volume growth largely driven by DC (which now represents c32% of annualised group revenue). For margin, we model 21.1% (BBG: 20.6%).
- **Nexans (OW):** We are comfortable owning the stock into the Q3 print. For Q3, we expect an improvement in the organic growth rate for both Electrification and the overall Group. We forecast Q3 revenues of €1,630mn, which implies an organic growth rate of 5.7% vs. +1.5% in H1. For the Electrification part of the business, we forecast an organic growth rate of 5.1% vs. 4.5% in H1. The current guidance corridor is ~€70mn wide, which is higher than recent years and we expect Nexans to narrow the guidance towards the upper end, reflecting underlying momentum in Electrification markets. Apart from Q3 results, we see the potential signing of a firm MI order in the 'coming weeks' as an important catalyst for the stock.
- **NKT (N):** We expect a solid quarter, driven by all three segments, and expect management to reiterate FY guidance. The company hosted a CMD on September 29, which offered little incremental information, but confirmed the medium-term growth story as underpinned by consensus expectations. We forecast Q3 sales of €706m (standard metal price) and operating EBITDA of €110m.
- **Prysmian (NR):** For Q3, we expect continued momentum in all four segments and forecast revenue of €6.0bn (with organic revenue growth of 8.5%) and Adj EBITDA of €781m. There is no good consensus for the Q3, but our FY Adj EBITDA forecast of €2,917mn is 2% above the Bloomberg consensus, and we expect management to

upgrade the FY guidance (which was first increased with the H1 results), with our FY Adj EBITDA now 1% above the top end of the guidance. Prysmian announced on October 7th that it expects to close the Atkore deal on October 19.

- **Rexel (OW):** Rexel will only report sales figures for Q3. For Q3, we forecast organic same-day growth of 6.0%, which includes 3.9% growth from higher copper prices, +1.6% non-metal pricing and +0.5% volume. We're also looking to hear more about the recently announced GCG acquisition, which should help boost North American growth and margins. We are comfortable holding the stock into the Q3 print as we expect some upside to the FY organic growth guidance.
- **Schneider (N):** For Q3, our sales forecast of €10,940m assumes 12% organic growth (of which 2.2% price) and a 0.5% FX headwind, standing 1% below post-Q2 company consensus of €11,100m (with 13.2% OSG). This is due to Energy Management, where our sales forecast of €9,113m is 2% below consensus (with lower OSG in all regions except Europe), while Industrial Automation sales are in line.
- **Siemens (OW, AFL):** We continue to see 1) ongoing strength in SI thanks to Data Centers and Utility; 2) further evidence of a recovery in discrete and confirmation that the Q4 DI margin guidance offered at Q3 regarding mix was pragmatic, if conservative; 3) another strong orders quarter for Mobility; and 4) immaterial incremental cost inflation, which appears to have been offset by swift pricing actions ytd. The net of these items makes for a still positive outlook into Q4/FY27 on an underlying basis, noting that the all-important SHL spin is now just c6 months away and actionable given the spin-out report is scheduled for December. We model Q4 Industrial orders (ex Healthineers) of €19.8bn (BBG cons: €17.8bn; n.b. while we are 11% above consensus, this is mostly due to being c35% above consensus in Mobility), Industrial revenue (ex Healthineers) of €16.2bn (€BBG: 15.9bn) and Industrial Profit (ex Healthineers) of €2.8bn (c5% ahead of BBG cons), as we are c 4%, 6% and 3% above consensus for DI, SI and Mobility, respectively.
- **Signify (N):** For Q3, we forecast revenues of €1,396mn (2% above consensus), driven by exchange rate assumptions, as our organic growth forecast of -2.9% is largely in line with consensus (-3.1%). Our Adj EBITA estimate of €108mn is 4% below consensus, driven by the Professional segment, where we expect weaker margins than consensus. After weak H1 results, Q3 results are important for the company to deliver on its FY guidance. Nevertheless, we expect management to lower the FY margin guidance towards the bottom half of the range, reflecting lower market volumes, which will offset the tailwind from cost savings.
- **Vestas (OW):** We expect a slightly more backend loaded year and have updated our estimate for a blade incident at the He Dreiht project in the pre-Q3 model update. We forecast Q3 order intake of 3,454MW (-25% y/y), revenue of €6,053mn (+13% y/y) and Adj EBIT of €514mn (+24% y/y, 8.5% margin vs. 7.8% a year ago). Our revenue forecast is 2% above post-Q2 consensus while Adj EBIT is 5% below. We expect consensus Q3 to come down to reflect the offshore repair costs and normalised execution in onshore (which was exceptionally strong in Q2), and believe buyside expectations are already low. Prior to the Q3 results, the mid-term elections in the US are an important catalyst for Vestas, as the outcome may impact growth in renewable energy resources.
- **Wärtsilä (N):** We forecast Q3 order intake of €2,132m, which is 10% above the post-Q2 consensus, reflecting large order announced on October 5th, and we expect consensus to move higher on the back of this order. Our estimates for sales (€1,520m) and comparable operating profit (€217m) are 2% above. Our forecast

reflects updated FX assumptions, which could explain 1% of the delta between consensus. We expect a solid Q3 performance, but investors' focus to be on the November 3 CMD. We look forward to new refined medium-term targets and an update on capacity expansion plans at the CMD.

Mechanical Engineers

- **Alfa Laval (N):** We forecast Q3 orders of Skr19.78bn, 2% below consensus, and implying an organic y/y growth of 14.6%, driven by the Energy segment. We expect the organic revenue growth rate to remain stable sequentially, at 5.9% in Q3, translating into group revenues of Skr19.1bn, an increase of 10.7% y/y. We forecast Adj EBITA margin of 17.6%, up 60bps sequentially but down 80bps y/y. The y/y decline is mainly driven by ramp-up costs in Energy, investments in Food & Pharma and mix in the Ocean segment. We expect a largely stable (y/y) net income of Skr2,261m in the quarter. We don't have a strong view into the results.
- **Andritz (OW):** Andritz has announced two orders in the Hydropower segment totaling mid-triple digits together, which should support a good book to bill in the quarter. We forecast order intake of €2,277m (+4% y/y), revenue of €2,010m (+7% y/y) and Adj EBITA of €176.7m (8.8% margin, up 40bps y/y). The solid book to bill in the quarter is driven by Hydropower, while ex-hydropower we forecast a stable book to bill of ~1x. We expect management to reiterate guidance, with FX tailwinds providing some incremental support to achieve revenue guidance for the year.
- **Assa Abloy (OW):** End-market wise, trends are essentially unchanged versus Q2 and so, too, are our underlying Q3 estimates. Our FY26/27/28 EPS forecasts increase by 0%/2%/2%, primarily due to FX. For Q3, our revenue estimate of Skr 41bn is essentially in line with consensus, with OSG of +3.4% (c80bps below cons) and FX +1.5% (c100bps above cons). Our Q3 adj. EBIT of Skr 7bn and adj. EBIT margin of 17.1% are largely in line with consensus too. While end markets are currently less strong than our broader capital goods coverage, we are 6%/8% above consensus for FY27E/FY28E and the sequentially improving outlook in the years ahead, which is unrelated to Data Center, has its own merits given market volatility.
- **Atlas Copco (OW):** We forecast Q3 sales of Skr 48.8bn assuming 10.5% OSG (of which c1% is price) and a c4% FX tailwind, which compares to the standing BBG consensus of Skr 47.7bn and 9.7% OSG. For Q3, our margin of 21.8% compares with BBG consensus of 21.6%. At a group level we are c3% above BBG for adj. EBIT. In terms of divisions, for CT we model Skr 21.4bn in orders, Skr 21.5bn in sales, and a 25.2% margin, resulting in us being c5% above post Q2 consensus or 4% above standing BBG. For VT, we model Skr 12.5bn in orders, Skr 12.1bn in sales, and a 21.2% margin, resulting in us being c2% above post Q2 consensus or 1% below standing BBG. For IT, we model Skr 6.7bn in orders, Skr 7bn in sales, and a 20.7% margin, resulting in us being c7% above post Q2 consensus or 5% above standing BBG. For PT, we model Skr 8bn in orders, Skr 8.4bn in sales, and a 17.7% margin, resulting in us being c5% above post Q2 consensus or 3% above standing BBG.
- **Epiroc (OW):** For Q3, we are 2%/3%/2% ahead of standing consensus (Infront) on orders/sales/Adj. EBIT. We hosted the company at our Back to School Series, and messaging on Mining remains strong. Epiroc has announced one order, but this is much more sizeable (Skr610m) than Sandvik's large order announcement (Skr275m), leaving it as better positioned into the print. While Service growth was disappointing in Q2 (6%), we expect growth of 8% in Q3 on easier comps. We model orders of Skr17.9bn, +12% organically. Sequentially, we model orders up 3%, driven in part by the large order announced (Skr610m). This compares to the near-term demand guide: "In the near term, we expect mining demand to remain high, while demand from construction customers is expected to increase somewhat." Excluding large orders, we model equipment orders up 14% and service

up 8% in E&S. We model a group margin of 20.1%.

- **FLSmidth (OW):** We were 5% below standing consensus on orders excluding announced large orders in Products (4% below when including the recently announced Dkk360m equipment order in Chile), expecting a flagged moderation in Service orders following a few quarters of very strong intake. Q2 saw some pre-buy and very strong intake in upgrade and retrofits, which we do not expect to repeat in Q3 (partly due to seasonality) despite strong underlying development. On sales, we are in line with consensus and we see these deliveries as well supported by the backlog. On Adj. EBITA, we are 1%/6%/5% above company-compiled consensus for 2026E/2027E/2028E. We model group sales at Dkk3.7bn and a margin of 16.3%, up 100bps y/y. On cash, we expect CFFO to be Dkk44m, better than Q2'26, but with NWC still a headwind (we estimate Dkk291m outflow), due to a continued build-up of inventories and WIP.
- **Fluidra (OW)**: We expect underlying trends to be unchanged from the Q2 but, due to tougher comps, expect only 0.9% organic growth (compared to 3.7% in Q2). We are -1%/+1%/+1% vs Bloomberg consensus (as of Oct 10) on 2026E/2027E/2028E Adj. EBITDA. Texas and Florida pool permit data look sequentially positive but with mixed development y/y. Other resi indicators suggest sluggish development in the US market. We expect another €5m-10m gross benefit from tariff refunds in Q3, but this is mostly offset by higher tariff headwinds, leading to only a slight net positive benefit.
- **GEA (N):** The pre-close call indicated solid demand continuing in Q3. We forecast an order intake of €1,510m (+10.8% organic, driven by the PFP and NPE segments). We forecast a good execution of the backlog, translating into Q3 revenues of €1,473m, an increase of 8.5% y/y on an organic basis. We forecast EBITDA before restructuring margins to rise by 90bps y/y to 17.9% (vs. 17.0% a year ago). The positive commentary on demand appears somewhat at a time of higher interest rates and inflation. However, according to our previous conversations with the company, this is driven by pent-up demand as customers may not want to wait any longer and, therefore, we would be careful in extrapolating current trends.
- **Kone (OW):** We are broadly inline with consensus for Q3. We model Q3 orders growth of +5.6% (BBG cons: 4.8%) and orders of €2,372m in absolute terms (4% above BBG cons). For sales, we forecast OSG of 4.8% (BBG cons: 4.6%) and €3,007m in absolute terms (2% above BBG cons). In adj EBIT terms, we forecast €375m or a 12.5% margin, with EPS of €0.55, which compares to BBG of €377m / 12.6% and €0.54, respectively. Our positive view on Kone is based on the longer term outlook and the material upside that stems from the TKE acquisition, for which we see continued positive headlines in the lead up to the Schindler CMD, including the newsflow regarding Hitachi and Fujitec being among possible bidders to acquire the European operations of TKE.
- **Kion (OW):** We forecast Q3 order intake of €2.64bn, revenues of €2.87bn and Adj EBIT of €210m (7.3% Adj EBIT margin). Compared to the post Q2 Vara consensus our 2026/27/28 Adj EBIT estimates are 6%/12%/14% below and we expect consensus to also come down in the coming days reflecting the message in the pre-close call. Overall, there is no indication that there has been any change in trading over the summer but we note that September is a seasonally very important month, particularly for ITS demand which will be a key for Kion to achieve its FY guidance. The leading indicators so far are pointing in the right direction but Kion is seeing a mixed picture.
- **Knorr-Bremse (N):** We forecast Q3 order intake of €2,112m, revenue of €2,075m

and operating EBIT of €302m (14.5% margin). Our order intake and revenue forecast is in line with Bloomberg consensus but operating EBIT forecast is 6% above. We believe the Bloomberg consensus on operating EBIT could be stale as it looks for CVS segment margin of 11.2% vs. 12.2% JPMe and company guidance of sequential improvement compared to 11.8% in Q2 (our RVS forecast is in line with BBG consensus). We believe our operating EBIT estimate is closer to buyside expectations and expect an in-line quarter with the company reiterating FY guidance.

- **Metso (OW):** Our Q3 orders are 2% below consensus (Vara), across both Minerals and Aggregates. Order announcements in Minerals have been strong (~€140m vs ~ €55m in Q2), so there remains some upside risk. However, order momentum can be lumpy between quarters and we are cautious to linearly increase order expectations. We now expect some of the Mineral orders in 2025 to be delivered in 2027 and expect a smaller sequential increase in sales in Q3. We continue to expect a step-up in Q4. As such, we are 6% below on sales and Adj. EBITA. Overall, Metso continues to be a copper beneficiary but, as flagged previously, we see some quarterly volatility in both orders and sales (especially against a strong Q2).
- **Sandvik (N):** On Q3, we are 1% below standing consensus (Infront) on orders/sales/Adj. EBITA, driven largely by Machining. Machining continues to be the key debate on the stock and, here, we see a negative risk/reward as we do not expect a Machining-led beat to be rewarded as much as a similar sized downgrade to estimates. In Mining, we expect a solid quarter despite only one major order announced (Skr275m). At our Back to School series, Management highlighted the better comps in Q3 versus the Q2 for Equipment growth. However, a pick-up in Rock Processing growth will likely come with a c.18-month lag, suggesting a pick-up in Q1'27 at the earliest. Overall, we sit only slightly below consensus and at this stage we see better plays on the Mining theme elsewhere.
- **Schindler (OW):** For Q3, our orders and sales are 1% ahead of the standing consensus, while our adj. EBIT is 2% below. We do not expect a material change in trends or messaging, with the New Installation (NI) market still mixed, including a weak China NI market, offset by a slightly better Europe, while Service/Modernization momentum should remain intact. The Q3 will likely see a small increase to costs from fuel, logistics and raw materials, which together with a less favourable mix should limit y/y margin expansion in H2 versus H1, although this has been well flagged, in our view. Beyond the print, into 2027, the adoption of IFRS 18 will represent a 30-40bp annualised headwind to adj. EBIT (c50/50 split between corporate/segments) that is not yet in consensus (or our) numbers. The more exciting catalyst will likely be the 19 November CMD, where a refresh of the mid-term targets and capital allocation policy should be a genuine opportunity for Schindler to re-frame the equity story.
- **SKF (UW):** We forecast Q3 sales of Skr23.8bn and adj. EBIT of Skr3,040m (including Auto). On a like-for-like basis (including Auto, which has been moved to discontinued operations), our Q3 sales are 3% ahead of the standing consensus (Infront, 3 August) driven by better FX. However, we are 30bps below on group margin (12.8%) due to our below consensus expectation for Bearing Solutions. On Bearing Solutions margin, there are a few moving parts sequentially including: a usual seasonal c.140bps decline between Q3 vs Q2 (implying c.17.8% margin), lower y/y net benefit from rightsizing savings/dis-synergies in Q3 (we estimate Skr40m vs Skr95m in Q2), lower benefit from overproduction (we estimate Skr20m in Q3 vs Skr80m in Q2), but better FX contribution. This leaves our margin at

17.8% (86bps below consensus).

- **Trelleborg (OW):** Comments on the pre-close call tilted negatively with the company expecting c.5% organic growth versus consensus at 5.7%. We model sales of Skr9.2bn, up 5% organically y/y. Overall trends are mixed with continued growth in Aerospace, growth in automation and renewables but with construction and auto markets still challenged, unsurprisingly. Seasonally, Q3 margins are typically lower than Q2 but Sealing Solutions should not see this seasonality due to volume growth and synergies. For Q3, we model a 19% margin versus consensus at 19.1% and Q2'26 margin of 19.2%.

Table 6: Summary of Q3 Previews

Company	Analyst	Event	Date	Time (UK)	Call / Webcast (UK)	View into results	Full-year outlook*
Alfa Laval	Akash Gupta	Q3'26	27-Oct-26	06:30 AM	08:00 AM	Neutral	For Q3'26, management expects demand to be somewhat lower than in Q2 due to a tough comp.
Alstom	Akash Gupta	H1'27	17-Nov-26	TBA	TBA	Positive	Book to bill >1x for Group, organic sales growth ~5%, adj. EBIT margin of ~6.5% and positive FCF.
Andritz	Akash Gupta	Q3'26	29-Oct-26	TBA	TBA	Positive	Revenues in the range of €8.0-8.3bn; adj. EBITA margin in the range of 8.7-9.1%
Assa Abloy	Phil Buller	Q3'26	27-Oct-26	07:00 AM	08:00 AM	Neutral	NA
Atlas Copco	Phil Buller	Q3'26	22-Oct-26	11:00 AM	01:00 PM	Neutral	Q3'26: Customer activity likely to remain at current levels
Electrolux	Akash Gupta	Q3'26	28-Oct-26	06:00 AM	08:00 AM	Neutral	Volume/price/mix = positive - primarily due to growth in focus categories; Investments in consumer experience = Negative - increased investments; Cost efficiency = positive ~Skr3.5-4.0bn; External factors = Significantly negative
Epiroc	Chit Sinha	Q3'26	28-Oct-26	10:30 AM	12:00 PM	Positive	Outlook at Q2'26: "In the near term, we expect mining demand to remain high and demand from infrastructure customers to increase somewhat."
FLSmidth	Chit Sinha	Q3'26	11-Nov-26	TBA	TBA	Neutral	Organic revenue growth: 0 to +4%; Group adj. EBITA margin: 16-16.5% By division, Service organic growth: +3-5%, Products: -15% to -5%, and PC&V: +5-8%
Fluidra	Chit Sinha	Q3'26	29-Oct-26	Before market	09:00 AM	Neutral	Constant currency sales growth: 3-7%; Adj. EBITDA margin: 23.3-24.3; Adj. EPS growth: 4-13%
GEA	Akash Gupta	Q3'26	09-Nov-26	TBA	TBA	Neutral	Organic sales growth: 6-8%; EBITDA margin before restructuring: 17.0-17.4%
Kion	Akash Gupta	Q3'26	29-Oct-26	TBA	TBA	Cautious	Revenue: €11.525-12.025bn; Adj. EBIT: €880-980m; FCF: €420-540m
Knorr-Bremse	Akash Gupta	Q3'26	29-Oct-26	TBA	TBA	Neutral	Sales: €8.1-8.3bn; Operating EBIT margin: ~14-14.5%; FCF: €750-850mn
Kone	Phil Buller	Q3'26	28-Oct-26	TBA	TBA	Positive	Comparable Sales to grow in the range of 3-6% y/y and adj. EBIT margin in the range of 12.3-13%
Legrand	Phil Buller	Q3'26	05-Nov-26	TBA	TBA	Positive	Constant currency sales growth (organic plus acquisitions): +16-19%; Adj. operating margin (after acquisitions): 20.5-21.0%.
Metso	Chit Sinha	Q3'26	22-Oct-26	07:00 AM	11:00 AM	Cautious	Sequential 6-month guidance at Q1: Market activity to remain at the current level in both Minerals and Aggregates
Nexans	Akash Gupta	Q3'26	22-Oct-26	06:00 AM	08:00 AM	Positive	Adj. EBITDA: €770-840mn; FCF: €235-325mn.
NKT	Akash Gupta	Q3'26	19-Nov-26	TBA	TBA	Neutral	Sales: €2.65bn-2.75bn. Adj. EBITDA: €400-430mn.
Prysmian	Akash Gupta	Q3'26	29-Oct-26	Before market	TBA	NA	Adj. EBITDA: €2,800mn-2,900mn. FCF: €1.65bn-1.75bn.
Rexel*	Akash Gupta	Q3'26	22-Oct-26	After close	After close	Positive	Organic same-day sales growth: c5%. Adj. EBITA margin of at least 6.2%. FCF: >65% conversion.
Sandvik	Chit Sinha	Q3'26	22-Oct-26	07:00 AM	09:00 AM	Neutral	NA
Schindler	Phil Buller	Q3'26	22-Oct-26	05:30 AM	09:00 AM	Neutral	Constant currency sales growth of +LSD-MSD% and reported EBIT margin of ~13%
Schneider Electric*	Phil Buller	Q3'26	16-Oct-26	06:30 AM	07:30 AM	Neutral	Organic sales growth: +10-13%. Organic Adj. EBITA growth: +14-19%. Organic Adj. EBITA margin expansion: +70-100bp y/y.
Siemens	Phil Buller	Q4'26	12-Nov-26	TBA	TBA	Positive	Book-to-bill >1x; Organic sales growth of +6-8%; EPS pre PPA of €11.20-11.50 Organic sales growth: DI = +7-10%, SI = +10-11%, Mobility = +5-7% Profit margin: DI = 17-19%, SI = 18.5-19.5%, Mobility = 8-10%
Siemens Energy	Phil Buller	Q4'26	11-Nov-26	TBA	TBA	Positive	Group comparable revenue growth: 14-16%; Profit margin towards the upper end of the 10-12% range; Net Income: €4bn; FCF pre tax: €8bn Comparable revenue growth: GS = 16-18%, GT = 25-27%, TI = 5-7%, SGRE = 3-5% Profit margin before SI: GS = 14-16%, GT = 18-20%, TI = 11-13%, SGRE = break-even
Signify	Akash Gupta	Q3'26	23-Oct-26	06:00 AM	08:00 AM	Neutral	Adj. EBITA margin: 7.5-8.5%; FCF: 6.5-7.5% of sales; with improved performance in H2'26
SKF	Chit Sinha	Q3'26	21-Oct-26	06:30 AM	07:30 AM	Cautious	Q3'26: Magement expects demand to strengthen somewhat y/y given signs of improved market demand in certain industries in Q2
Trelleborg	Chit Sinha	Q3'26	23-Oct-26	06:45 AM	08:00 AM	Neutral	Q3'26: "Demand is expected to remain solid, although somewhat lower than in the second quarter of 2026, reflecting higher comparative figures and seasonal variations."
Vestas	Akash Gupta	Q3'26	11-Nov-26	TBA	TBA	Positive	Sales: €20-22bn; Adj. EBIT margin: 7-9% (upgraded with H1 results); Investments = ~€1.2bn.
Wärtsilä	Akash Gupta	Q3'26	27-Oct-26	TBA	TBA	Neutral	Demand outlook for the next 12 months (Q3'26-Q2'27): Better than prior period for Marine but similar to previous 12 months for Energy

Q3 Heatmap – Positioning into the Q3 results season

We use a quantitative framework to assess which stocks in our coverage are best and worst positioned going into the upcoming reporting season. The overall score is composed of four factors: our expectation of a beat or miss on the quarter, where our full-year forecasts sit vs consensus, share price performance over the past month, and the change in the P/E multiple year-to-date. For those stocks where we do not have an updated (post prior quarter) consensus, we allocate a ranking in the middle to neither penalize nor benefit the company. We do not claim this analysis as a perfect measure of which companies we see as doing well or not into the quarter, but it is a quantitative way to disaggregate the factors that are working favourably or not for the stock and as an indication of the set-up. We summarise our rationale for each of the metrics below:

- **Quarterly expected beat/miss:** Our current quarter earnings numbers vs the latest consensus, reflecting our view on where short-term expectations on numbers are too high or low.
- **Full-year expected beat/miss:** JPMe vs consensus on full-year earnings as a proxy for where we see upside/downside to outlook commentary and/or guidance changes.
- **1 month % share price performance:** All else being equal, we believe strong share price performance over the past month negatively impacts the likelihood of further performance on the quarter. We therefore attribute a higher rank for companies that have been weaker over the last month.
- **Change in P/E YTD:** Captures a re-rating or de-rating and inversely correlates to a further re-rating or de-rating, i.e., a company that has already re-rated YTD is less likely to do so further on.

Valuation and earnings momentum

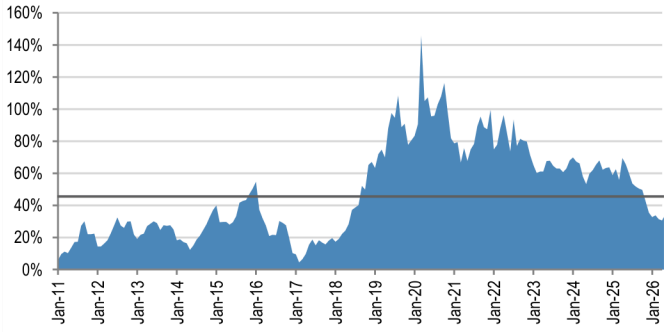

Our coverage trades on ~18.8x 1-year forward adj. P/E, at a 37% premium to MSCI Europe, compared to a historical average of ~29%. The coverage has also de-rated versus MSCI Europe Capital Goods and is trading at a 5% discount vs a typical ~2% premium, primarily due to the relative premium of A&D versus history.

Recent industrial macro data

This is an excerpt from J.P. Morgan Economist Joseph Lupton's Note on October 01. Click here to see the full note.

J. P. Morgan Global Manufacturing PMI – Consolidating around solid growth in June

The J.P. Morgan global manufacturing output PMI for September reached its highest level in five years, jumping 0.7 points, after a 0.3-point increase in August. At 53.8, the index is up a significant 2.9 points since the end of last year, and now stands at a level consistent with a 3.3%ar rise in manufacturing output. Our economists note that this strength reflects the ongoing tech boom alongside a strong pickup in non-tech production, further supported by an inventory rebuild, and suggests that growth drivers are firming as we enter the current quarter.

Figure 19: Global manufacturing output PMI and actual output

Source: S&P Global, J.P. Morgan.

Figure 20: Manufacturing output PMI

Source: S&P Global, J.P. Morgan.

Our economists' view that lean inventories in 1H would translate into an added inventory-driven lift is now showing up in the PMI data. The finished goods inventories index rose 0.5 points last month, building on August's sizable 1.2-point jump. At 50.7, it points to a meaningful pace of stockbuilding, and the cumulative 1.7-point increase highlights inventories' growing contribution to manufacturing output.

The forward-looking indicators in the September PMIs are mixed but broadly constructive. Most importantly, the new orders PMI also firmed last month, adding to its August gain. While the intermediate goods component of new orders in our global sector PMIs (below) are a part of the lift (and thus a signal of inventory building), gains in new orders for consumer and investment goods send a stronger signal for final demand. On balance, the ratio of the new orders to inventory PMI ticked up last month and, at 1.06, is consistent with a solid pace of growth.

Amid signals of solid-to-strong growth, the forward-looking future output index is still surprisingly lackluster and has not strengthened alongside the output PMI. Our economists note there has been a disconnect between the strength in activity data and the less upbeat confidence measures. The flatlining of the future output PMI at the relatively modest level of around 60 for a year suggests there is still some caution among business managers.

Regardless of perceptions of risk, activity is perking up. With supply constraints and rising input costs, pricing pressures are building and increasingly showing up in the manufacturing PMIs. Stronger factory output is coinciding with firmer price dynamics. After easing from the Middle East energy shock, input and output manufacturing price

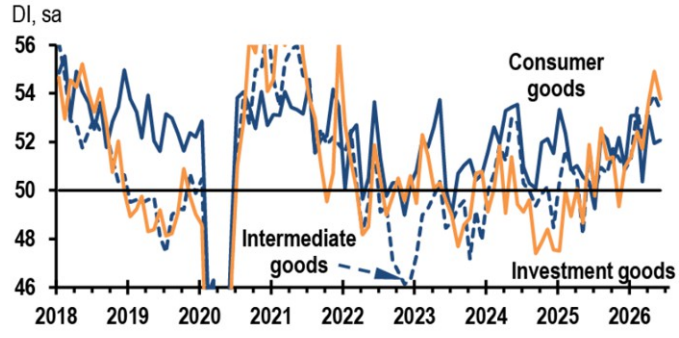

Phil Buller AC
(44-20) 3493-9403
phil.buller@jpmorgan.com

PMIs moved up in September, and both are still at very elevated levels.

By sector – the 0.7-point rise in the September global output PMI was driven by a broad-based move up across sectors. The investment (or capital) goods PMI rose 0.5 points, unwinding some of the recent deceleration and leaving the index at an elevated 53.9. The index is up 3 points YTD, and remains well above its recent and historic averages. The acceleration since the start of the year correctly signaled the 9%ar boom in 1H26 capex spending. The pullback from the May peak looks like moderation from very strong levels, consistent with expectations that capex eases but stays solid in 3Q. Persistent strength is encouraging as it suggests business investment is broadening beyond tech, reinforcing a wider-based expansion.

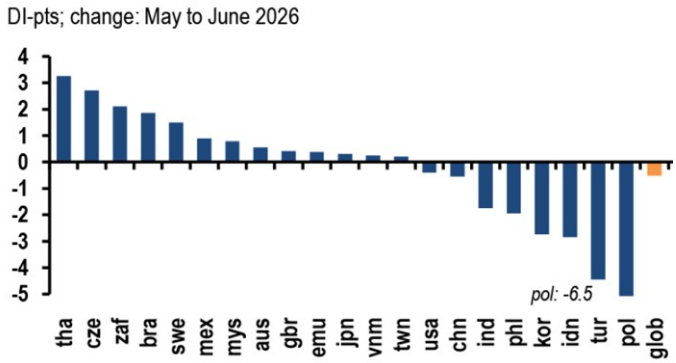

By region – The rise in the September global output PMI was driven by gains in both the DM (+1.1 points) and EM (+0.7 points). In level terms, the DM continues to outperform at 54.7, above the EM's 53.1. DM's gain was driven by a 3.1 point surge in the US, which fully offset the last two months of weakness to bring the index up to a robust 56.2. The Euro area also continued its recent climb, rising another 0.3 points to its highest level in over four years (53.6). These increases offset broad-based declines elsewhere: both Japan (-1.2 points) and the UK (-0.6 points) have now posted two consecutive contractions, coming off a July peak. In EM, China extended its recovery (+0.6 points), while EM Asia ex China and India rebounded to a seven-month high after falling in August, as Korea and Taiwan gains offset weakness in Vietnam, Malaysia, and the Philippines. Overall EM Asia PMI rose 0.8pt to 54.0 (highest since February).

Figure 21: Global manufacturing output PMI, by sector

Source: S&P Global, J.P. Morgan

Figure 22: Manufacturing output PMI, change

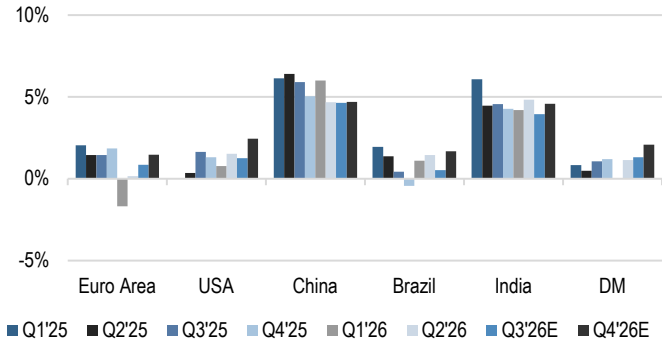

Source: S&P Global, J.P. Morgan

China's Manufacturing PMI compiled by the NBS rose 0.3pt to 50.3 in June (J.P. Morgan: 50.2; consensus: 50.1), with gains across major production and demand components. Both new orders and new export orders PMIs rebounded, up 1.3pts and 1.5pts to 51.2 and 50.1, respectively. NBS Output PMI rose 0.2pts to 51.4, suggesting that the April-May soft patch did not intensify, while the RatingDog Output PMI fell by 0.6pt, but still remained well above 50 at 52.8. These forces reinforce China's manufacturing rebalancing, but they do not by themselves generate a broad recovery in household-facing demand. Demand conditions were mixed, with exports being the bright spot. Export momentum is likely to strengthen further in the near term, reinforcing the ongoing K-shaped pattern of resilient external demand offsetting soft domestic demand.

Phil Buller [AC]

phil.buller@jpmorgan.com

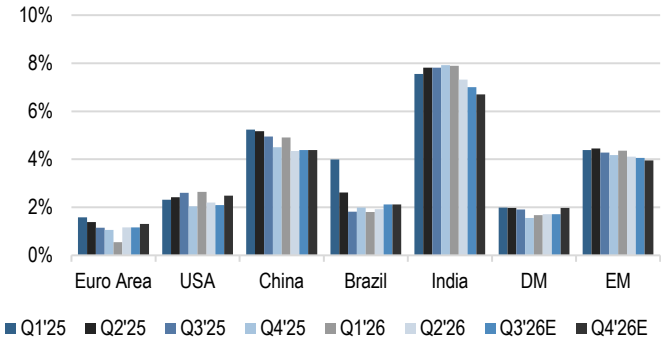

Looking at year-on-year IP growth trends, which are relevant given the focus in company results on growth vs. the prior-year period, the charts below suggest positive growth across all regions in Q2'26, with the Euro Area lagging but recovering from Q1'26 negative trends, and the strongest growth in India, followed by China.

Important Disclosures

Company-Specific Disclosures: J.P. Morgan does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. Important disclosures, including price charts and credit opinion history tables (if applicable), are available for compendium reports and all J.P. Morgan–covered companies, and certain non-covered companies, by visiting https://www.jpmm.com/research/disclosures, calling 1-800-477-0406, or e-mailing research.disclosure.inquiries@jpmorgan.com with your request.

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:
J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, https://www.jpmorganmarkets.com.

J.P. Morgan Equity Research Ratings Distribution, as of October 03, 2026

	Overweight (buy)	Neutral (hold)	Underweight (sell)
J.P. Morgan Global Equity Research Coverage*	53%	35%	12%
IB clients**	83%	81%	72%
JPMS Equity Research Coverage*	51%	37%	12%
IB clients**	95%	93%	88%

***Please note that the percentages may not add to 100% because of rounding.**
****Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.**
For purposes of FINRA ratings distribution rules only, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at http://www.jpmorganmarkets.com, contact the primary analyst or your J.P. Morgan representative, or email research.disclosure.inquiries@jpmorgan.com. For material information about the proprietary models used, please see the Summary of Financials in company-specific research reports and the Company Tearsheets, which are available to download on the company pages of our client website, http://www.jpmorganmarkets.com. This report also sets out within it the material underlying assumptions used.

History of Investment Recommendations:
A history of J.P. Morgan investment recommendations disseminated during the preceding 12 months can be accessed on the Research & Commentary page of http://www.jpmorganmarkets.com where you can also search by analyst name, sector or financial instrument.

Analysts' Compensation: The research analysts responsible for the preparation of this report receive compensation based upon various factors, including the quality and accuracy of research, client feedback, competitive factors, and overall firm revenues.

Registration of non-US Analysts: Unless otherwise noted, the non-US analysts listed on the front of this report are employees of non-US affiliates of J.P. Morgan Securities LLC, may not be registered as research analysts under FINRA rules, may not be associated persons of J.P. Morgan Securities LLC, and may not be subject to FINRA Rule 2241 or 2242 restrictions on communications with covered companies, public appearances, and trading securities held by a research analyst account.

Other Disclosures

J.P. Morgan is a marketing name for investment banking businesses of JPMorgan Chase & Co. and its subsidiaries and affiliates worldwide.

UK MIFID FICC research unbundling exemption: UK clients should refer to UK MIFID Research Unbundling exemption for details of J.P. Morgan's implementation of the FICC research exemption and guidance on relevant FICC research categorisation.

All research material made available to clients are simultaneously available on our client website, J.P. Morgan Markets, unless specifically permitted by relevant laws. Not all research content is redistributed, e-mailed or made available to third-party aggregators. For all research material available on a particular stock, please contact your sales representative.

Any long form nomenclature for references to China; Hong Kong; Taiwan; and Macau within this research material are Mainland China; Hong Kong SAR (China); Taiwan (China); and Macau SAR (China).

J.P. Morgan Research may, from time to time, write on issuers or securities targeted by economic or financial sanctions imposed or administered by the governmental authorities of the U.S., EU, UK or other relevant jurisdictions (Sanctioned Securities). Nothing in this report is intended to be read or construed as encouraging, facilitating, promoting or otherwise approving investment or dealing in such Sanctioned Securities. Clients should be aware of their own legal and compliance obligations when making investment decisions.

Digital assets, which may also be referred to as virtual or crypto assets or crypto currencies (e.g. bitcoin), discussed in this research report are subject to a rapidly changing regulatory landscape. The application of relevant laws in respect of such assets may be unsettled, and the legality of any digital asset investment may be unclear. Prior to making any investment decision regarding any digital asset, investors should seek their own legal advice and be aware of any legal considerations regarding the purchase, holding or selling of such an investment. For relevant regulatory advisories on digital assets, including bitcoin and ethereum, please see https://www.jpmorgan.com/disclosures/cryptoasset-disclosure.

The author(s) of this research report may not be licensed to carry on regulated activities in your jurisdiction and, if not licensed, do not hold themselves out as being able to do so.

Exchange-Traded Funds (ETFs): J.P. Morgan Securities LLC ("JPMS") acts as authorized participant for substantially all U.S.-listed ETFs. To the extent that any ETFs are mentioned in this report, JPMS may earn commissions and transaction-based compensation in connection with the distribution of those ETF shares and may earn fees for performing other trade-related services, such as securities lending to short sellers of the ETF shares. JPMS may also perform services for the ETFs themselves, including acting as a broker or dealer to the ETFs. In addition, affiliates of JPMS may perform services for the ETFs, including trust, custodial, administration, lending, index calculation and/or maintenance and other services.

Options and Futures related research: If the information contained herein regards options- or futures-related research, such information is available only to persons who have received the proper options or futures risk disclosure documents. Please contact your J.P. Morgan Representative or visit https://www.theocc.com/components/docs/riskstoc.pdf for a copy of the Option Clearing Corporation's Characteristics

and Risks of Standardized Options or https://www.finra.org/sites/default/files/2020-08/Security_Futures_Risk_Disclosure_Statement_2020.pdf for a copy of the Security Futures Risk Disclosure Statement.

Changes to Interbank Offered Rates (IBORs) and other benchmark rates: Certain interest rate benchmarks are, or may in the future become, subject to ongoing international, national and other regulatory guidance, reform and proposals for reform. For more information, please consult: https://www.jpmorgan.com/global/disclosures/interbank_offered_rates

Private Bank Clients: Where you are receiving research as a client of the private banking businesses offered by JPMorgan Chase & Co. and its subsidiaries ("J.P. Morgan Private Bank"), research is provided to you by J.P. Morgan Private Bank and not by any other division of J.P. Morgan, including, but not limited to, the J.P. Morgan Corporate and Investment Bank and its Global Research division.

Legal entity responsible for the production and distribution of research: The legal entity identified below the name of the Reg AC Research Analyst who authored this material is the legal entity responsible for the production of this research. Where multiple Reg AC Research Analysts authored this material with different legal entities identified below their names, these legal entities are jointly responsible for the production of this research. Where more than one legal entity is listed under an analyst's name, the first legal entity is responsible for the production unless stated otherwise. Research Analysts from various J.P. Morgan affiliates may have contributed to the production of this material but may not be licensed to carry out regulated activities in your jurisdiction (and do not hold themselves out as being able to do so). Unless otherwise stated below in the legal entity disclosures, this material has been distributed by the legal entity responsible for production, or where more than one legal entity is listed under the analyst's name, the first legal entity will be responsible for distribution. If you have any queries, please contact the relevant Research Analyst in your jurisdiction or the entity in your jurisdiction that has distributed this research material.

Morgan Markets Limited ("JPMML Ltd") which is authorised and regulated by the Financial Conduct Authority. Unless specified to the contrary, this material is distributed in the UK by JPMS plc and is directed in the UK only to: (a) persons having professional experience in matters relating to investments falling within article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) (Order) 2005 ("the FPO"); (b) persons outlined in article 49 of the FPO (high net worth companies, unincorporated associations or partnerships, the trustees of high value trusts, etc.); or (c) any persons to whom this communication may otherwise lawfully be made; all such persons being referred to as "UK relevant persons". This material must not be acted on or relied on by persons who are not UK relevant persons. Any investment or investment activity to which this material relates is only available to UK relevant persons and will be engaged in only with UK relevant persons. A description of J.P. Morgan EMEA's policy for prevention and avoidance of conflicts of interest related to the production of Research can be found at the following link: J.P. Morgan EMEA - Research Independence Policy.

U.S.: J.P. Morgan Securities LLC ("JPMS") is a member of the NYSE, FINRA, SIPC, and the NFA. JPMorgan Chase Bank, N.A. is a member of the FDIC. Material published by non-U.S. affiliates is distributed in the U.S. by JPMS who accepts responsibility for its content.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst's involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.

Confidentiality and Security Notice: This transmission may contain information that is privileged, confidential, legally privileged, and/or exempt from disclosure under applicable law.
