Key takeaways

- **Liquid cooling updates with future revenue transition potential:** United Alloy-Tech. Company Ltd., or UATC (3162.TT, 36% owned by Minth) has obtained supplier qualification and vendor code in late August and formal orders from Cooler Master, leading to higher visibility for incoming liquid cooling product orders in the next 2-3 years. Currently, profit for Minth is mainly recognized through equity method with a minority share, but in the future, management sees increasing consolidated revenue and profit recognition when Minth's overseas production capacity expands in Thailand and the US, and the customer base expands from Taiwanese clients to a broader US market.
- **Exclusive humanoid component wins in the US with cross-selling potential:** Minth has achieved exclusive supplier status for masks from a key US customer, with volume production scheduled between late this year and next year. Management also sees product cross-selling potential from ongoing collaboration. Acknowledging the regulatory and geopolitical complexities of exporting full-body robotics from China to the US, Minth is strategically leveraging its overseas manufacturing footprint to mitigate trade barriers. Consequently, the company expects future revenue to be mainly driven by overseas market.
- **Cost-effective independent robotics and commercialization strategy:** Minth's long-term robotics strategy centers on launching an independent, cost-effective brand with an ODM business model, specifically tailored for overseas markets and secondary development. By utilizing Minth's assembly plants in Taiwan, Serbia, and the US, management aims to price its robots significantly lower than domestic peers and similar to passenger vehicle price (targeting Rmb150k-200k

- **Robust automotive business growth driven by content value expansion:** The automotive segment is projected to deliver a 20% LT earnings CAGR, supported by 1) the strategic upgrade from single components to larger assemblies, and 2) increasing NEV penetration in Europe. This growth is highly capital-efficient, per management, requiring limited incremental capex. For example, Mint acquired a 4,000-acre US site with existing rail infrastructure and pre-built facilities, reducing deployment time and costs. In Europe, the company is rapidly consolidating market share as local competitors lag, utilizing its highly productive Serbia plant as a central manufacturing hub to supply future facilities.

Investment Thesis

Established in 1992 in Ningbo, Mint has grown to become a leading auto parts supplier in China with a portfolio of well-selected niche components for interior & exterior (including battery housing, trim, aluminum, decorative parts, roof racks, structural body parts, and seat frames). We are Neutral-rated on Mint. Despite strong growth from the battery housing segment, we see Mint's other businesses under pressure as global auto demand looks to be peaking in key markets in 2025-2026E. Mint is currently trading at 10x 12-month forward P/E, in line with historical mid-cycle levels. We believe next stage valuation re-rating hinges on global auto demand outlook, which we expect to peak in key markets (China/US/EU/Japan), with growth slowing down from 6% in 2023/24 to 1% in 2025/26E, and then -1% in 2027E/28E. As a result, we expect Mint's net profit growth to slow from 24% in 2023/24 to 13% in 2025/26E, and then 12% in 2027E. Key risks: (+/-) better/worse-than-expected Europe and US auto production, (+/-) more/less-than-expected pricing pressure from OEM customers, (+/-) faster/slower-than-expected development of new products.

Price Target Risks & Methodology

We are Neutral rated with a 12-month target price of HK\$33.5, based on a 12.0x 2026E P/E. Key risks: (+/-) better/worse-than-expected Europe and US auto production, (+/-) more/less-than-expected pricing pressure from OEM customers, (+/-)

faster/slower-than-expected development of new products.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.
