

Hitachi (6501.T): Hitachi Energy capex tracker: \$300 mn investment announced in China to capture growing UHV market

On August 17 JST, Hitachi Energy announced an investment of US\$300 mn to expand production capacity for transformers and related components in Anhui Province, China ([LINK](#)). The company has not disclosed the scale of the capacity increase and the start date of operations, but the expansion is expected to be mainly for the domestic Chinese market. The capacity expansion is likely to cover 1,100kV UHV transformers and bushings for ultra-high voltage applications. This investment is included in the previously [announced](#) US\$6.25 bn.

Demand for ultra-high-voltage (UHV) power grids in China is strong, and according to [a report](#) by our China Industrial Tech team, the number of UHV power grids to be constructed under the 15th Five-Year Plan (2026–30) is expected to be double that of the 14th Five-Year Plan. Hitachi Energy already has a strong presence in the UHV sector in China, having won an order in [June 2025](#) for the Gansu-Zhejiang ± 800 kV ultra-high-voltage direct current (UHVDC) transmission project from the State Grid Corporation of China, and we see this investment as a move to capture further demand.

About UHV power transmission and transformation in Japan

Although Japan has successfully standardized UHV power transmission and transformation technology and has examples of UHV infrastructure construction, the infrastructure is actually operated at 500kV due to factors such as sluggish electricity demand following advances in energy conservation and slowing economic growth, and a land area not large enough to require UHV. In the future, the need for UHV transmission in Japan could increase if power consumption surges due to the proliferation of generative AI data centers or if the restart of nuclear power plants progresses.

Price Target Risks and Methodology - Hitachi

We are Buy rated. Our 12-month target price of ¥6,600 for Hitachi is based on an EV/EBITDA multiple of 13X (base year is FY3/28E; the multiple is based on the EV/EBITDA and EBITDA margin correlation across its domestic and global competitors).

Risks: **Digital systems & services:** delays and losses on large projects, weaker IT capex sentiment at customers accompanying a macroeconomic downturn, reemergence of supply disruptions for servers and other products, slower standalone growth at GlobalLogic, slower-than-expected realization of synergies between Hitachi and GlobalLogic; **Energy (Power grid):** delays on power transmission/distribution projects, a sharp rise in input costs; **Connective industries:** weaker new construction demand in China, losing out on new repair/maintenance orders to competitors in Japan, semiconductor production equipment (SPE) prices not improving over the long term a risk for the measurement and analysis systems business (Hitachi High-Tech);

Companywide: Forex swings (¥1 appreciation vs. USD has an estimated negative impact of ¥7 bn on sales and ¥0.8 bn on adjusted EBITA) and an increase in purchase price allocation (PPA) amortization due to forex swings.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global

Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
