Why SMid?

We have kept an OW stance on SMid vs Large YTD and we are sticking to that view, because SMid-Caps in the US benefit from the following:

- Improving fundamentals (interest rate and wage inflation headwinds are no more)
- Depressed Sentiment (4-yrs of outflows have left them underowned)
- Trough Technicals (SMid is still down vs Large in an unprecedented way since its relative high of 2021... the only other time we saw this (the tech bubble) resulted in a 14-yr outperformance of SMid vs Large in the US for example)
- A record valuation discount
- And a much stronger medium to long term outlook vs that of large-caps (in a world where large-caps are facing de-globalization disruptions, fiscal/regulatory pressure, passive flows, and challenging technicals).

Why SMid?

- Improving fundamentals
(interest rate and wage inflation headwinds are no more)

Why SMid?

- **And investor sentiment that has become irrationally bearish about SMid** (SMid-Caps are not all low quality; SMid-Caps are >90% of all IPOs; They are >90% of all M&A deals which adds 1.0% / yr of alpha; much more thinly covered and thus mispriced; etc, etc).

Why US SMid?

Why are we OW US SMids?: 1) **Economic growth** remains solid and better than what we can find in most other regions (real GDP grw of 2.1% and not decelerating YoY); 2) **SMid EPS Grw** stronger than other regions and stronger than hist avg; and 3) **valuations** that are not pricing in the stronger grw story (cheaper PEG); 4) Because **“The Case for SMid” I just made is nowhere more true than in the US** (SMid-Caps in EMs have outperformed Large and are in fact expensive; while in Japan they hurt from the ongoing devaluation of the Yen).

Why US SMid?

- **A much safer medium to long term play** (governments are in need of cash, that means friction and volatility... specially for Large-Caps. US SMid might benefit from a flight to safety after all — think de-globalization disruptions, fiscal/regulatory pressure, passive flows, and challenging technicals).

What to do within US SMid-Caps at this juncture?

We believe short-term one has to be a bit cautious... a view we have held since the start of June because of:

- Fundamental challenges: ½ of cos that reported 1Q saw revenue **grw decelerate YoY** and margins contract. Hard to imagine a turnaround when oil remains @ **\$100/barrel**, most commodities are moving higher, the **consumer is getting squeezed** (borrowing has increased). Our econ team continues to call for real GDP grw to decelerate YoY in most regions, with **interest rates moving higher**. And then there is **el Super El Niño** (expect downward pressure to growth and upward pressure to inflation through much of 2007).
- Lack of leadership: Most indices were near highs going into the summer months. What could take this market significantly higher from there? A) **Tech**, despite broad concerns is sitting near highs; B) **Financials** have worked very well aided by sticky inflation and a rising rates outlook, but it is cyclical and valuations are now fuller; C) **Consumer spending** should hurt in our view from higher energy prices, higher food prices, and wage inflation that is not keeping up with headline inflation (US consumer confidence dropped in July, Aug, and Sep for example); D) **Yield** sectors should not be winners in an outlook of higher rates, specially given their poor yields; and E) **other sectors are too small** to move the broader mkt (Energy or Materials). This leaves us with **Industrials...** but they are not cheap anymore.
- Seasonality: **Sep** is one of the seasonally weakest months of the yr (the Russell 2000 has delivered **negative returns 70% of the yrs in last decade**).

What to do within US SMid-Caps at this juncture? No Free Lunch!

- **But we see opportunity at the stock level**
(40% are down >50% already while 20% have more than doubled from the Nov 2021 highs of the Russell 2000!), and all with 15% of all US SMid-Caps trading < 1.0 P/B.
- **We recommend focusing on stocks that A)** have achievable consensus expectations, **b)** have rerating upside (i.e. we prefer value to growth), and **C)** visibility.

Executive Summary

■ SMid Cap Industrials: Bullish View

- Recommend capital disciplined companies exposed to secular megatrends with a focus on Safety unlocking value

■ Sub-Sector Preference: Automation > Power Infrastructure > Aerospace, Defense, & Nuclear > Specialty > Engineering & Construction > Building Products

- We favor our Automation companies, supported by a prolonged trough in industrial activity, improving sentiment and signs of stronger order activity exiting 2Q26.
- Favoring Power Infrastructure as AI-driven data center buildouts, grid modernization, and electrification continue to drive strong demand across the group.
- The Aerospace, Defense, & Nuclear space is well-positioned at the intersection of rising global defense budgets, the nuclear energy renaissance, and the growing demand for resilient, secure systems.
- We see Specialty companies anchored by recurring revenue but impacted by macro volatility.
- We believe the Engineering & Construction sub-sector is positioned to benefit from strong infrastructure and energy transition spending. Project execution remains paramount.
- We are cautious on Building Products companies with a mixed outlook going forward.

■ Key Investment Mantra

- 1) Value Engines 2) Capital Discipline 3) Margin of Safety 4) Sustainability

- **Top picks for 2026** are Helios Technologies (HLIO), Valmont (VMI), AtkinsRealis (ATRL CN), API Group (APG), Exponent (EXPO), and CSW Industrials (CSW)

Safety as a Strategy: Unlocking Value Beyond Compliance

■ Safety First, Performance Always: The 2026 Differentiator:

- Safety is a strategic imperative that drives economic value, margin resilience, and stakeholder trust.
- In 2026, safety-focused initiatives are key catalysts for compounding returns and long-term competitive advantages.
- Safety is not just a compliance requirement but a strategic lever that supports scalable growth and employee retention.

■ Measuring Safety Leadership Through TRIR Trends:

- Explaining TRIR: A key indicator for workspace safety, TRIR is a standardized metric to measure the number of OSHA-recordable incidents per 200,000 work hours.
- Companies with lower TRIRs and significant safety improvements over the past 5 years show higher top-line and margin growth, with a correlation of -0.68.
- Declining TRIR signals better labor retention, fewer disruptions, and greater process discipline.

Total Recordable Incident Rate (TRIR): Coverage vs Industry Average

AI Supercycle & Grid Renaissance in Focus: Infrastructure Investment Accelerates

■ AI/Data Center Supercycle:

- Global capex of \$5-\$7T; U.S. installed base to reach 242GW by 2028 (from 97GW in 2024).
- U.S. data center electricity consumption to grow at ~15% CAGR, reaching ~425 TWh by 2030.
- Hyperscaler capex growth >50% YoY in 2025.

■ Grid Renaissance:

- Utility capex growth projected at 10%/7% for 2026/27.
- Transmission build remains below DOE targets, highlighting the need for sustained investment

■ Beneficiaries: VMI, POWL, RRX, GTES, MIR and EXPO are well-positioned for secular growth.

Total Projected Functional Capex of U.S. Electric Utilities

Investor-Owned Electrical Utilities Capex Rising

Source: EEI Financial Analysis Department, EEI member company reports (updated Sept. 2025)

Physical AI, Reshoring, Automation & Transformation: Competitive Moat

■ Reshoring & Automation:

- Labor shortages and tariff volatility are accelerating automation and service-led models.
- Companies are investing in automation, strategic sourcing, and recurring service offerings to offset wage and tariff pressures.
- Humanoid, industrial, and surgical robotics are accelerating, providing differentiated avenues for sustainable growth.

■ Transformation in Motion:

- CEO transitions (e.g., RRX, TKR, AWI, TIC) and disciplined M&A are driving strategic realignment.
- Performance-based incentives and KPIs tied to growth, margins, and cash flow are increasingly critical for management evaluation.

- **Winners:** Companies with local-for-local sourcing, robust M&A integration, and strong management alignment are best positioned for 2026.

% of Jobs Remaining Unfilled NAM Survey Results

Snapshot of Coverage Robotics Exposure

Company	Humanoid Robotics	Industrial Robotics	Surgical Robotics
RRX	Positioned as a multi-axis motion supplier across humanoid joint architectures through frameless motors and integrated drive systems. Early design-in activity reflects strength in actuation + control.	Broad exposure across the automation stack, supplying servo motors, drives, and linear motion systems used in robot arms and expanded workcells.	Participates in surgical arm actuation through precision servo systems enabling vibration-free instrument positioning.
TKR	Core supplier of precision transmission components including harmonic and cycloidal reducers used in humanoid limb joints.	High direct robot content via reducers, actuators, and bearings embedded within articulated joints. Also exposed to linear motion adjacencies through RTUs expanding reach.	Exposure in micro-mechanical transmission, including miniature gearboxes and bearings enabling micron-level surgical precision.
ALNT	Frameless torque motors align with humanoid joint architectures. Limited commentary from management.	Participates in high-performance motion niches including robot actuation, cobot joints, and mobile robotics drive systems.	Supplies torque motors and frameless actuation systems embedded within surgical robotic arms and instrument articulation modules.
CGNX	Limited direct exposure	Core positioning in vision-guided robotics, supplying vision systems enabling bin picking, guidance, and inspection.	Limited direct exposure
GTE5	Limited direct exposure	Indirect but scalable exposure through synchronous conveyor systems supporting automation infrastructure.	Limited direct exposure
HLIO	Limited direct exposure	Benefits from automation infrastructure and robotics-adjacent machinery rather than articulated robot arms themselves; core exposure in electro-hydraulic motion.	Limited direct exposure

North America SMid Cap Industrials

2Q Recap: From Heat to Homework: Demand Is Hot, Execution Is the Work

2Q26 Recap: Key Themes & Questions

- **Quarter Overview: Volatility Continues, Trend Constructive**
 - Dispersion defined the quarter (avg. move +0.5%, ~14.5% std dev; >50% of 40 reporters moved >5%), yet coverage is +17.7% YTD. Screens into 2H26: order visibility, backlog resilience, margin conversion.
- **Building Products: Beats Broaden as Price/Cost Is Tested**
 - Broad-based beats (ALLE \$2.40 vs. \$2.21; AOS \$1.03 vs. \$0.95; CSW \$3.84 vs. \$3.48) on data-center spec tailwinds; freight/input inflation the key 2H watch item.
- **Automation: Order Momentum Broadens**
 - Orders accelerating broadly, RRX AMC +17.1% YoY, ALNT +49% YoY/+27% seq, HLIO +DD 4th straight quarter. Conservative 2H guidance leaves room to grow.
- **Power Infrastructure: Record Orders on Data-Center Demand**
 - Record order books, POWL \$934M (+158% YoY, 3.0x b-t-b), CECO \$799M (2.8x). Conversion timing the risk (POWL backlog convertibility slipped to ~54%).
- **Aerospace, Defense & Nuclear: Record Backlogs, Broad Beats**
 - Standout quarter led by nuclear, ATRL Nuclear +18.3% organic, BWXT Commercial Ops +72% YoY, ESE backlog record \$1.54bn (+36%).
- **E&C: Divergence: Margin Resets and Take-Privates**
 - Revenue growth offset by margin resets; downgraded LMB (GM -650bps) and BWMN (take-private at \$43) to UW, upgraded TIC to Neutral on record \$1.18bn backlog.

Short-Cycle: Mother Machines Signal Revival

- **Machine Tool Order Strength:** Machine tool orders, often called “mother machines” showed a robust 45.1% YoY increase, marking five consecutive months of 20%+ growth. Seasonally adjusted figures show 9.5% MoM rise.
- **Potential Risks:** While activity is strong, escalating supply chain pressure (prices paid highest since July 22), soaring delivery times, and surging Global Supply Chain Pressure Index, raise risk of front-loaded demand.
- **Order Volume & Commentary Support Strength:** Order activity and commentary from our coverage has been encouraging with orders: RRX (AMC +17% YoY), ALNT (+49% YoY), HLIO (12Ms of +DD orders), TKR (up QoQ/YoY), GTES (book-to-bill >1)

Robotics: The New Engine of the U.S. Manufacturing Resurgence

■ Humanoids:

- Humanoid robots are transitioning from research labs to pilot deployments in warehouses and factories, performing repetitive and physically demanding tasks.
- RRX, TKR, and ALNT are most levered to humanoid robotics, supplying products such as high-torque motors, drives, precision gear reducers, and frameless torque motors. RRX sees a ~\$100M opportunity funnel with >\$30M in order in 2025.

■ Industrial Robotics:

- Industrial robots are expanding beyond automotive into logistics, electronics, and high-mix manufacturing, addressing bottlenecks in throughput, quality, and safety.
- Our coverage exposure includes RRX in actuation and motion systems, TKR in precision reducers and bearings, ALNT in configurable motors and drives, and CGNX as a vision backbone for guidance and inspection.

■ Surgical Robotics:

- Surgical robots are transforming healthcare by enabling highly precise, minimally invasive procedures across specialties.
- RRX and ALNT are exposed through actuation, supplying servo and torque motor solutions for robotic arm articulation and instrument positioning, and TKR provides miniature precision gearing and bearings for micron-level accuracy.

Humanoid Robots: Key Parts / Functions

Reshaping the Factory: Industrial Robotics Growth

- **Broadening of Robotics:** Industrial robotics adoption is broadening beyond legacy automotive cycles into electronics, logistics, food & beverage, and general manufacturing, driven by labor shortages, reshoring, and throughput/uptime priorities
- **Cobots (collaborative robots)** are accelerating as manufacturers deploy flexible automation to address throughput, quality, and safety bottlenecks
- **Vision-guided automation** is becoming the norm, enabling robots to operate in semi-structured environments with integrated vision + AI guidance vs fixed programming, expanding the opportunity set for perception + control suppliers

Humanoids: Large TAM; Coverage Positioned Across the Value Chain

- **Acceleration in Patent Publications:** Patent activity signals a real innovation acceleration with U.S. publications referencing “humanoid” up >300% and global publications up >400% since 2015
- **Humanoids are actuator-dense systems:** a typical robot may require ~20 to 40+ actuator assemblies depending on degrees of freedom, making actuation/motion a primary BOM cost pool
- **Actuator & motion TAM scales to ~\$4bn by 2030E**, with actuator/motion content stepping down from ~53% of BOM to ~39% as production matures

Our Coverage Companies: Components & Offerings

- **RRX Kollmorgen & Portescap:** Portescap supplies high-torque, lightweight DC/BLDC miniature motors enabling human-like dexterity (hands/fingers/wrists). Kollmorgen TBM2G frameless servos deliver high torque-density, precise multi-jointing actuation (limbs/torso)
- **TKR Cone Drive and SPINEA:** Cone Drive provides strain wave solutions for powerful, highly accurate movement in small space. SPINEA produces cycloidal drives and its TwinSpin bearing + reducer for smooth, ultra-precise positioning in factory automation
- **Allient** provides high torque-density direct-drive motors/actuators for ultra-precise joint motion supporting a full, plug-and-play motion stack

Data Centers: Accelerating Optionality with New Product Launches

- **Liquid Cooling Optionality:** We believe Helios and Gates are poised to capture incremental revenue from the liquid cooling market. GTES targets \$150M in revenue by 2028 (~4.5% incremental growth), while HLIO recently launched its thermal management product offering targeting a \$1bn servable market.
- **Allient Data Center Offering:** Allient has exposure through power quality under its TCI and SNC Manufacturing brands offering transformers, harmonic filters, and line reactors.
- **RRX Data Center Offering:** Through E-Pods and core Thomson Power brand, we believe RRX's AMC can grow ~39% YoY in FY27.

Prepared Q&A: Top Picks for 2026

The Next Wave of Leaders – Helios Technologies (HLIO), Valmont (VMI), AtkinsRealis (ATRL CN), API Group (APG), Exponent (EXPO), and CSW Industrials (CSW)

Helios Technologies (HLIO) – Transformation with Cycle Momentum

■ Culture, Strategy, Execution: Core 2030 Strategy:

- We believe the culture is revitalized under CEO Sean Bagan with our recent on-site visit confirming the operational focus and cultural transformation.
- The go-to-market strategy has shown strong execution driving market share gains even in a weak demand environment.
- Management is instilling guidance discipline, establishing a consistent beat-and-raise cadence since Sean was appointed CEO.
- While historical M&A execution has been mixed, the new management team has delivered guidance since appointment and driven cultural transformation.

■ Data Center Opportunity:

- With contracts won in Electronics (\$70 Cascadia) and the recent launch of Faster's products within thermal management systems (UQD, UQDB, LQC, FFC), we believe there is a runway to structure growth with even a 5% capture

From ~100bps of Contraction Post-Carlson to Expansion Under Bagan

Valmont (VMI) – Infrastructure Champion for Data Era

■ Utility Demand Fueling Growth

- Historically, Utility has grown at roughly a nine-month lag to Total utility capex.
- Utility Group Capex has grown 1.4%, 12.2%, and 19.1% in 1Q,2Q, and 3Q.
- Plants running near 100% capacity with backlog growth accelerating.
- Targets \$350-400M (\$3-5 in EPS) for Utility growth in next 3-4 years.
- Investing ~\$100M in growth capex in 2025 and plans \$100M more in 2026.

■ Conservative Agriculture, Optimistic Infrastructure:

- Factoring in ~\$50M bad debt expense and legal expense in Ag for 2025.
- Above-consensus estimates driven by Utility capex momentum and ongoing cost improvements.
- \$620 PT (15.0x 2027E EV/EBITDA, ~20% premium to 5-year avg)

Source: Company data, J.P. Morgan

Note: Total Utility Capex includes EEI U.S. Investor-Owned Electric Utilities (excluding private companies)
Source: Company data, J.P. Morgan estimates, Bloomberg Finance L.P.

AtkinsRealis (ATRL CN) – Cultural Transformation and Nuclear Growth Potential

■ Nuclear Super-Cycle Leader with a Transformed Culture:

- Leading engineering and nuclear services provider, uniquely positioned to benefit from the global nuclear super-cycle and North American infrastructure investment.
- Exclusive CANDU reactor technology with end-to-end capabilities across refurbishment, new-build design, and decommissioning.
- Robust nuclear backlog underpinned by ongoing SMR and digital innovation investments.
- Cultural transformation under new leadership (2023 rebrand, Odyssey program) has built a collaborative, high-performing workforce, a magnet for talent and a differentiator for both organic growth and M&A integration.

■ M&A-Driven Growth, Margin Expansion, and a Valuation Disconnect:

- Targeted US Engineering Services M&A (Northeast and Northwest) building toward coast-to-coast coverage.
- Group revenue expected to grow at a HSD% CAGR through 2027, with segment margins expanding on integration synergies and operational efficiencies.
- A fundamentally de-risked, services-focused model with significant nuclear optionality.

Improving EBITDA Margins

High Adj. FCF Generation

Source: J.P. Morgan estimates, Company Data

API Group (APG) – Safety in Execution

■ Streamlined, Scalable Platform in a Large Fragmented Market:

- Transitioned from a post-Chubb integration story into a streamlined operator with two focused platforms: Safety Services and Specialty Services.
- Firsthand diligence revealed consistent messaging and operational discipline across the field.
- Large, fragmented \$160B TAM supports multiple expansion, with EBITDA margin upside driven by rising share and a growing service revenue mix (targeting 60%).

■ Disciplined Capital Allocation + Visible Margin Expansion:

- Post-Chubb deleveraging largely complete, unlocking flexibility for selective, margin-accretive M&A.
- Internal productivity levers: procurement centralization and technology integration, driving frontline efficiency and service transparency.
- 50-100bps of margin expansion through FY26, from both structural levers and organic scale.

Exponent (EXPO) – Science-Powered Safety

■ Science-Led Consulting Leader with Multi-Year Growth Tailwinds:

- Leading science and engineering consulting firm serving over 2,000 clients across 17 core practice areas.
- Deep technical moat with ~75% of 900 consultants hold doctoral degrees, spanning 90+ specialties in a multidisciplinary model.
- Robust litigation business provides revenue stability, while direct exposure to major megatrends (AI, electrification, and the energy transition) offers multi-year growth tailwinds.
- Incremental growth from strengthening end markets (energy, transportation, life sciences, consumer electronics) and an expanding portfolio of proactive services.

■ Margin Expansion, Strong Cash Flow, and Re-Rating Potential:

- Margin expansion ahead, driven by healthy revenue growth, ongoing cost management, and normalization of one-time expenses.
- Robust free cash flow and flexible capital allocation support resilience through cycles.
- Diversified model, technical expertise, and industry-leading margins underpin an attractive risk/reward balance.

CSW Industrial (CSW) – Capital Discipline at an Attractive Multiple

■ Strategic Upgrade to OW

- Upgraded CSW to OW on strong strategic direction and growth prospects.
- Focus on resilient end markets and operational excellence.
- Shares up ~3% YTD, with attractive entry point as macro environment improves in FY27.

■ Disciplined Capital Allocation That Delivers:

- Completed 21 acquisitions, deploying ~\$1.7bn since 2015.
- Deployed ~\$1bn in 2025 with acquisitions of Aspen Manufacturing and MARS Parts.
- MARS expected to deliver \$10M in annualized synergies and ~30% EBITDA margins within twelve months.

Organic Revenue Growth Sequentially Improving

Appendix

North America SMid Cap Industrials Investment Mantra

■ Screen Criteria:

- <\$30B Market Cap
- Dominant Market Share
- Long History of Success
- Strong Safety Culture (TRIR)

■ Value Engine: Delivering Reliable Shareholder Returns

- Robust Market Share Positioned in Secular End Markets
- Pricing Power with Strong Competitive Advantages
- Improving Product Mix with Cyclical Adjusted Profitability

■ Capital Discipline: Rigorous Financial Stewardship

- High ROIC, ROA, ROE with Future Investments
- Attractive Leverage Profile with History of M&A
- Robust FCF Generation with High Conversion

■ Margin of Safety: Risk Mitigation Framework for Valuation

- Use of Relative Multiples for Peer/Historical Comparison
- Cross-Check Price Target with Absolute Methods
- Attractive Risk/Reward Return Profile

■ Sustainability: Key Differentiator for Sustainable Returns

- Positioned at Forefront of Megatrends
- Superior Safety/Culture (Low TRIR)
- Review of Governance, Management, and Ownership Structure

2Q26 Recap: Key Takeaways

Building Products	Share Price (1D)	Key Topics
CSW	15.0%	- Record quarter; Adj. EPS \$3.84, revenue +33%; EBITDA margin +290bps to 29.0%; Organic 5.3% (SRS +16.6%). - ~\$1.0bn across five deals since May 2025; MARS synergies raised to \$13M; July price increase 3-5% lands 2Q27.
CSL	10.6%	- Revenue and earnings beat; Both segments ~8% organic; CCM pricing LSD to MSD/HSD in 3Q/4Q; Price-cost neutral 3Q. - Lowered FY26 EBITDA margin outlook (flat vs. +50bps) on pricing-cost delay; Premium TPO capturing DC specs as PVC tightens.
ALLE	10.5%	- Revenue and EPS beat; Americas +11.8% (organic 8.9%), electronics low-teens; International organic -1.2% on Germany. - Raised FY26 EPS to \$8.85-9.00, organic to 3.5-4.5%; European restructuring ~\$10M benefit; Data centers ~5% of non-resi.
AWI	8.1%	- Net sales +11.2%, EPS +12.8%; MF +7.9% (6.0% AUV), AS +16.6% on ~9% organic; EBITDA margin -110bps on freight/raws. - Raised FY26 guide across metrics; 4th straight qtr of DD AS orders; \$800M buyback authorization.
ADIG	2.5%	- Record revenue +1% YoY; Commercial security back to MSD; EBITDA -6% (~160bps from tariff refunds). - Guided FY26 rev \$4.95-5.0B; 2H ADS growth 5-7% on easier ERP comps; Watch deleveraging toward 2.0x (~3.0x now).
ALH	(0.6%)	- Beat across the board; Adj. EBITDA margin +135bps to 28.1%; NA revenue +9%, margin +226bps; Net leverage 2.4x. - Raised FY26 EBITDA growth to +8-10%; Targets 2.0x leverage by year-end; International the watch item on Middle East.
AOS	(3.6%)	- Beat across all accounts (EPS \$1.03); NA +5% on boilers +21%; RoW -19% on China; Margin -114bps on pre-buy. - Narrowed FY26 EPS to \$3.70-3.85; NA resi water heater now -LSD; Pricing 4-7% weighted to 4Q; Soft guide amid pre-buying.
REZI	(20.4%)	- Record revenue +2%; P&S +4% (record 43.6% GM, 13th straight qtr); Adj. EBITDA +19%, EPS +26%; ADI spin completed Aug 3. - Initiated standalone FY26 guide (\$2.90-2.95B rev); \$40-50M 2H OEM pressure; Memory up 4x, metals +35% a GM headwind.
Automation	Share Price (1D)	Key Takeaways
ALNT	19.3%	- Record orders +49% YoY; book-to-bill 1.31x; Data center revenue +60% YoY. - Record GM 34.9% (+170bps) on STAN; Backlog conversion implies ~6-15% 3Q upside.
GTES	8.5%	- Core sales +4.9% YoY; ERP headwinds fading; Personal mobility and on-highway +25%. - Raised FY26 guidance; 3Q implies ~5.5% core growth; Reiterated 23.5% 2H EBITDA margin.
HLIO	(0.6%)	- Best July ever for revenue and orders; Orders +DD YoY (4th straight qtr); Rec marine depressed. - Raised FY26 guide embeds 2H conservatism; Data center thermal largest TAM; No revenue embedded yet.
CGNX	(4.7%)	- Record revenue +17% YoY; EBITDA margin +1,150bps (8th straight qtr); China +46.9%, Europe -11.6%. - 3Q guide \$300-320M; Data center +30% YoY on OneVision; 2H noise from \$13M partnership headwind.
TKR	(6.9%)	- Broad-based beat; Industrial Motion +14.6% (margin +500bps) on Bijur Delimon; Incrementals >40%. - Raised FY26 EPS to \$6.05-\$6.35 (~16% YoY); Belts divestiture 3Q26 (+200bps IM margin); 80/20 ~60%.
RRX	(16.7%)	- AMC +16.2% on data center/automation/A&D; Daily orders +8.8% (BtB 1.02); Resi HVAC and pool soft. - Guidance cut ex-IEEPA refunds; New CEO Paul focused on cross-sell; Switchgear ~\$180M to ~\$240M FY27.
E&C	Share Price (1D)	Key Takeaways
BWMN	55.8%	- All-cash take-private by Bernhard Capital at \$43.00/sh (~\$1.0bn EV); 58% premium; 35-day go-shop to Sept. 13. - 2Q rev \$146M, adj. EBITDA \$24M (18.7% margin), backlog \$659M; FY26 guidance reaffirmed; Close 4Q26/1Q27.
TIC	6.1%	- Revenue +86% reported (+3.3% pro forma); C&E +17%, Geospatial +8%, I&M -5.5%; Backlog +20% to \$1.18bn. - FY26 guidance reaffirmed signaling 2H acceleration; Acuren-NV5 cross-sell early evidence; Awaiting proof missteps rectified.
EXPO	3.5%	- Net revenue +12%, EPS +15% to \$0.60; Utilization 74% (from 72%); Billable hours +8%; AI-enabled work amplifying demand. - \$272M returned LTM plus \$50M buyback increase; Expects >\$100M FCF in 2H; Widening moat in user research.
ORN	(24.1%)	- Revenue +8.1% YoY but shy of consensus; Adj. EBITDA -28% (3.5% margin) on utilization drag; Concrete +30% (data centers ~50%). - Marine shortfall client-driven timing, all projects mobilized; ~90% of 2H Marine contracted; Backlog +8% QoQ (1.25x BtB).
LMB	(35.5%)	- Revenue +22% to \$173M; Adj. EBITDA -22% (8.0% margin); Organic ~flat; GM -650bps on Pioneer Power and data center cost pressure. - Raised revenue guide (\$760-790M) while cutting EBITDA (\$78-84M); Bookings healthy but margins pressured.

Disclosures

Analyst Certification: The Research Analyst(s) denoted by an “AC” on the cover of this report certifies (or, where multiple Research Analysts are primarily responsible for this report, the Research Analyst denoted by an “AC” on the cover or within the document individually certifies, with respect to each security or issuer that the Research Analyst covers in this research) that: (1) all of the views expressed in this report accurately reflect the Research Analyst’s personal views about any and all of the subject securities or issuers; and (2) no part of any of the Research Analyst’s compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the Research Analyst(s) in this report. For all Korea-based Research Analysts listed on the front cover, if applicable, they also certify, as per KOFIA requirements, that the Research Analyst’s analysis was made in good faith and that the views reflect the Research Analyst’s own opinion, without undue influence or intervention.

All authors named within this report are Research Analysts who produce independent research unless otherwise specified. In Europe, Sector Specialists (Sales and Trading) may be shown on this report as contacts but are not authors of the report or part of the Research Department.

Important Disclosures

Company-Specific Disclosures: J.P. Morgan does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. Important disclosures, including price charts and credit opinion history tables (if applicable), are available for compendium reports and all J.P. Morgan–covered companies, and certain non-covered companies, by visiting <https://www.jpmm.com/research/disclosures>, calling 1-800-477-0406, or e-mailing research.disclosure.inquiries@jpmorgan.com with your request.

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock’s expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts’ coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst’s coverage universe can be found on J.P. Morgan’s Research website, <https://www.jpmorganmarkets.com>.

Disclosures

J.P. Morgan Equity Research Ratings Distribution, as of July 04, 2026

	Overweight (buy)	Neutral (hold)	Underweight (sell)
J.P. Morgan Global Equity Research Coverage*	53%	36%	12%
IB clients**	83%	80%	73%
JPMS Equity Research Coverage*	51%	37%	12%
IB clients**	95%	92%	87%

*Please note that the percentages may not add to 100% because of rounding.

**Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.

For purposes of FINRA ratings distribution rules only, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at <http://www.jpmorganmarkets.com>, contact the primary analyst or your J.P. Morgan representative, or email research.disclosure.inquiries@jpmorgan.com. For material information about the proprietary models used, please see the Summary of Financials in company-specific research reports and the Company Tearsheets, which are available to download on the company pages of our client website, <http://www.jpmorganmarkets.com>. This report also sets out within it the material underlying assumptions used.

History of Investment Recommendations:

A history of J.P. Morgan investment recommendations disseminated during the preceding 12 months can be accessed on the Research & Commentary page of <http://www.jpmorganmarkets.com> where you can also search by analyst name, sector or financial instrument.

Analysts' Compensation: The research analysts responsible for the preparation of this report receive compensation based upon various factors, including the quality and accuracy of research, client feedback, competitive factors, and overall firm revenues.

Other Disclosures

J.P. Morgan is a marketing name for investment banking businesses of JPMorgan Chase & Co. and its subsidiaries and affiliates worldwide.

UK MIFID FICC research unbundling exemption: UK clients should refer to [UK MIFID Research Unbundling exemption](#) for details of J.P. Morgan's implementation of the FICC research exemption and guidance on relevant FICC research categorisation.

All research material made available to clients are simultaneously available on our client website, J.P. Morgan Markets, unless specifically permitted by relevant laws. Not all research content is redistributed, e-mailed or made available to third-party aggregators. For all research material available on a particular stock, please contact your sales representative.

Any long form nomenclature for references to China; Hong Kong; Taiwan; and Macau within this research material are Mainland China; Hong Kong SAR (China); Taiwan (China); and Macau SAR (China).

Disclosures

J.P. Morgan Research may, from time to time, write on issuers or securities targeted by economic or financial sanctions imposed or administered by the governmental authorities of the U.S., EU, UK or other relevant jurisdictions (Sanctioned Securities). Nothing in this report is intended to be read or construed as encouraging, facilitating, promoting or otherwise approving investment or dealing in such Sanctioned Securities. Clients should be aware of their own legal and compliance obligations when making investment decisions.

Digital assets, which may also be referred to as virtual or crypto assets or crypto currencies (e.g. bitcoin), discussed in this research report are subject to a rapidly changing regulatory landscape. The application of relevant laws in respect of such assets may be unsettled, and the legality of any digital asset investment may be unclear. Prior to making any investment decision regarding any digital asset, investors should seek their own legal advice and be aware of any legal considerations regarding the purchase, holding or selling of such an investment. For relevant regulatory advisories on digital assets, including bitcoin and ethereum, please see <https://www.jpmorgan.com/disclosures/cryptoasset-disclosure>.

The author(s) of this research report may not be licensed to carry on regulated activities in your jurisdiction and, if not licensed, do not hold themselves out as being able to do so.

Exchange-Traded Funds (ETFs): J.P. Morgan Securities LLC (“JPMS”) acts as authorized participant for substantially all U.S.-listed ETFs. To the extent that any ETFs are mentioned in this report, JPMS may earn commissions and transaction-based compensation in connection with the distribution of those ETF shares and may earn fees for performing other trade-related services, such as securities lending to short sellers of the ETF shares. JPMS may also perform services for the ETFs themselves, including acting as a broker or dealer to the ETFs. In addition, affiliates of JPMS may perform services for the ETFs, including trust, custodial, administration, lending, index calculation and/or maintenance and other services.

Options and Futures related research: If the information contained herein regards options- or futures-related research, such information is available only to persons who have received the proper options or futures risk disclosure documents. Please contact your J.P. Morgan Representative or visit <https://www.theocc.com/components/docs/riskstoc.pdf> for a copy of the Option Clearing Corporation's Characteristics and Risks of Standardized Options or https://www.finra.org/sites/default/files/2020-08/Security_Futures_Risk_Disclosure_Statement_2020.pdf for a copy of the Security Futures Risk Disclosure Statement.

Changes to Interbank Offered Rates (IBORs) and other benchmark rates: Certain interest rate benchmarks are, or may in the future become, subject to ongoing international, national and other regulatory guidance, reform and proposals for reform. For more information, please consult: https://www.jpmorgan.com/global/disclosures/interbank_offered_rates

Private Bank Clients: Where you are receiving research as a client of the private banking businesses offered by JPMorgan Chase & Co. and its subsidiaries (“J.P. Morgan Private Bank”), research is provided to you by J.P. Morgan Private Bank and not by any other division of J.P. Morgan, including, but not limited to, the J.P. Morgan Corporate and Investment Bank and its Global Research division.

Legal entity responsible for the production and distribution of research: The legal entity identified below the name of the Reg AC Research Analyst who authored this material is the legal entity responsible for the production of this research. Where multiple Reg AC Research Analysts authored this material with different legal entities identified below their names, these legal entities are jointly responsible for the production of this research. Where more than one legal entity is listed under an analyst’s name, the first legal entity is responsible for the production unless stated otherwise. Research Analysts from various J.P. Morgan affiliates may have contributed to the production of this material but may not be licensed to carry out regulated activities in your jurisdiction (and do not hold themselves out as being able to do so). Unless otherwise stated below in the legal entity disclosures, this material has been distributed by the legal entity responsible for production, or where more than one legal entity is listed under the analyst’s name, the first legal entity will be responsible for distribution. If you have any queries, please contact the relevant Research Analyst in your jurisdiction or the entity in your jurisdiction that has distributed this research material.

U.S.: J.P. Morgan Securities LLC (“JPMS”) is a member of the NYSE, FINRA, SIPC, and the NFA. JPMorgan Chase Bank, N.A. is a member of the FDIC. Material published by non-U.S. affiliates is distributed in the U.S. by JPMS who accepts responsibility for its content.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst's involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P.
