

Battery Storage - Q2 State of Charge

Benchmark battery revenue improved in Q2, with the last recorded full week in June hitting a record high since Q1 2025. GC0166 parameters were also implemented during the quarter. In this context, we note that while battery-specific skip rates have broadly declined since 2024, batteries' skipped volume as a share of total in-merit volume has increased.

Q2 state of charge: [Modo Energy's](#) revenue benchmark indicates that GB battery revenue weakened quarter-on-quarter in Q2, achieving c.£46,000/MW/year for 1-hour batteries and c.£70,700/MW/year for 2-hour batteries, improving from c.£39,900/MW/year and c.£65,500/MW/year, respectively, in Q1. However, this is lower than in Q2 2025, when 1-hour and 2-hour batteries achieved c.£57,400/MW/year and c.£72,000/MW/year, respectively.

Exhibit 1 - Modo GB BESS annualised weekly revenue by duration (£/MW/year)

Source: Modo Energy/Jefferies

Ancillary services: In Q2, volume for dynamic services to absorb excess power (i.e. high dynamic response) has exceeded the volume for dynamic services to release power (i.e. low dynamic response). This reflected seasonally weaker energy demand and excess supply from renewables.

While prices have generally improved across different dynamic response services, prices for high dynamic regulation have declined, as operators are still willing to pay for the service in lieu of buying energy in the wholesale market.

Exhibit 2 - Monthly weighted average prices in each dynamic response market (£/MW/hr)*

	Dynamic containment		Dynamic moderation		Dynamic regulation	
	High (DCH)	Low (DCL)	High (DMH)	Low (DML)	High (DRH)	Low (DRL)
Dec 2025	1.5	1.9	0.5	4.5	-4.6	12.7
Jan 2026	1.1	2.3	-0.4	5.5	-7.4	16.1
Feb 2026	0.7	1.7	-0.8	4.8	-7.4	14.5
Mar 2026	1.2	2.9	-0.2	6.6	-7.4	17.6
Apr 2026	1.9	2.8	0.4	6.4	-5.9	16.1
May 2026	1.2	1.9	-1.5	6.0	-11.4	17.2
Jun 2026	2.7	3.4	-0.2	7.1	-8.6	18.2

Source: NESO/Jefferies *The Q1 data was restated due to an error calculating the average

Exhibit 3 - Monthly volume in each dynamic response market (MW)*

Source: NESO/Jefferies *Q1 data restated

Trading: Day-ahead and intraday spreads averaged £72/MW per month in Q2, having increased from £60/MW in Q1. Interestingly, even though the average electricity price was lowest in June, the month had the highest intraday spread in Q2, likely reflecting increased solar participation in June, which resulted in lower power prices during the peak sun hours.

Elsewhere, the new parameters related to GC0166 that allow storage assets to reflect their

Please see analyst certifications, important disclosure information, and information regarding the status of non-US analysts on pages 4 - 9 of this report.

deliverable volumes were implemented on June 25th. While it is too early to observe the impact of the implementation, we note that battery-specific skip rates have declined since National Grid started recording the data in December 2024. However, batteries' skipped volume as a share of total in-merit volume has been increasing, suggesting there are still many technology-specific issues that prevent batteries from fully participating in the balancing mechanism.

Long duration electricity storage (LDES): Ofgem opened the minded-to-decision consultation on LDES last month, releasing a list of 16 assets in consideration, out of the 73 previously shortlisted. Final awards are expected to be published in Autumn 2026, alongside any associated delivery requirements. Benefit-cost ratio to the grid still represents 40% of the selection criteria, but the regulator emphasised non-monetised factors, such as system operability and security of supply under a wide range of future scenarios. Even though NESO originally excluded batteries from LDES, 11 out of the 16 selected are lithium-ion batteries, including GRID's Ocker Hill project, a 145MW asset with a connection date in 2029. To qualify as LDES, this pipeline asset would be built to an eight-hour duration, as outlined in the recent capital markets event. While the cap-and-floor regime for LDES is new, it will likely be broadly modelled after the regime currently used for interconnectors, and we expect it to similarly benefit from the 'soft cap', where operators would still be able to receive a portion of revenue above the cap level, and a 'hard floor', likely indexed to inflation.

For an explanation of the technical details on battery storage please see our primers [here](#) and [here](#). We have also included a glossary of jargon in the full note.

Battery glossary

Term	Definition
Ancillary services	Services that help to maintain operational grid requirements based on energy frequencies. Service providers are generally paid based on availability to discharge or absorb energy from the grid within a defined time period
Balancing mechanism (GB)	NESO's tool to maintain the balance between electricity supply and demand in real-time (or near delivery). From the battery perspective, this would be similar to trading in the spot market
Battery management system	Software sytem and related hardware that oversee the battery packs' condition, status and actions
CAISO	California Independent System Operator, electric system operator in California
Capacity market	A mechanism to secure future electricity supply. Capacity market contracts are generally paid based on the availability of the capacity during high demand periods and are generally secured a year or more in advance
Day-ahead market	A market for trading electricity to be delivered the next day
Duration	The amount of time the battery can charge or discharge at full capacity, generally stated in hours and can be calculated by installed capacity in MWh divided by Installed capacity in MW
Dynamic responses (GB)	Includes dynamic containment (DC), dynamic moderation (DM), dynamic response (DR). Modern ancillary services that react to small frequency deviations of the grid
ERCOT	Electric Reliability Council of Texas, electric system operator in Texas
GC0166	Grid code change that aims to introduce new parameters for batteries in the balancing mechanism
Installed capacity (MW)	The maximum electrical output the battery can provide to the system at any given moment, generally stated in MW
Installed capacity (MWh)	The total amount of electricity that can be stored in the battery, generally stated in MWh
Intraday market	A market for trading electricity to be delievered the same day
NESO	National Energy System Operator, energy system operator in Great Britain
Optimiser	Generally also known as route-to-market provider. It is the software service provider that allows battery to participate in power markets
Quick Reserve	An electricity reserve dispatchable in a short time in response to energy imbalances and correct the grid's frequency deviation, works similarly to dynamic resposes
Skip rates	In the context of balancing mechanism, it measures how often NESO bypass (or 'skip') a less expensive power asset in favour of another asset when calling for assets to provide or absorb electricity real time. High skip rates generally mean NESO is choosing more expensive assets over batteries, which limit batteries' revenue opportunities
Slow Reserve	An electricity reserve that aims to restore energy imbalances post-fault, generally kicks in when deviation is wide
State of Charge (SoC)	The amount of electrical charge available in a battery at a given time, generally expressed as a percentage of total amount storable
State of Health (SoH)	A measure of its overall condition and capacity compared to its original new condition

Company Description

Gresham House Energy Storage

GRID invests in a diversified portfolio of utility-scale energy storage systems.

Gore Street Energy Storage Fund

GSF is a closed-ended fund that invests in energy storage assets globally.

Company Valuation/Risks

Gresham House Energy Storage

Our estimated NAV includes accrued income and cost. Risks include falling ancillary services prices and narrowing intraday electricity price spread, as well as construction delays.

Gore Street Energy Storage Fund

Our estimated NAV includes accrued income and cost. Risks include falling ancillary services prices and narrowing intraday electricity price spread, as well as construction delays.

Analyst Certification:

I, Fiona Huang, certify that all of the views expressed in this research report accurately reflect my personal views about the subject security(ies) and subject company(ies). I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this research report.

I, Matthew Hose, certify that all of the views expressed in this research report accurately reflect my personal views about the subject security(ies) and subject company(ies). I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this research report.

Registration of non-US analysts: Fiona Huang is employed by Jefferies International Limited, a non-US affiliate of Jefferies LLC and is not registered/qualified as a research analyst with FINRA. This analyst(s) may not be an associated person of Jefferies LLC, a FINRA member firm, and therefore may not be subject to the FINRA Rule 2241 and restrictions on communications with a subject company, public appearances and trading securities held by a research analyst.

Registration of non-US analysts: Matthew Hose is employed by Jefferies International Limited, a non-US affiliate of Jefferies LLC and is not registered/qualified as a research analyst with FINRA. This analyst(s) may not be an associated person of Jefferies LLC, a FINRA member firm, and therefore may not be subject to the FINRA Rule 2241 and restrictions on communications with a subject company, public appearances and trading securities held by a research analyst.

As is the case with all Jefferies employees, the analyst(s) responsible for the coverage of the financial instruments discussed in this report receives compensation based in part on the overall performance of the firm, including investment banking income. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Aside from certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgement.

Investment Recommendation Record

(Article 3(1)e and Article 7 of MAR)

Recommendation Published July 1, 2026 15:48 P.M.

Recommendation Distributed July 1, 2026 19:01 P.M.

Company Specific Disclosures

Jefferies Financial Group Inc., its affiliates or subsidiaries make a market in the securities or ADRs of Gresham House Energy Storage Fund PLC.

Jefferies Financial Group Inc., its affiliates or subsidiaries expect to receive or intend to seek compensation for investment banking services from Gresham House Energy Storage Fund PLC within the next three months.

Jefferies International Ltd, its affiliates or subsidiaries has, or had, within the past 12 months an agreement to provide investment services to Gresham House Energy Storage Fund PLC.

Within the past 12 months, Jefferies Financial Group Inc., its affiliates or subsidiaries has received compensation from investment banking services from Gresham House Energy Storage Fund PLC.

Within the past twelve months, Gresham House Energy Storage Fund PLC has been a client of Jefferies Financial Group Inc., its affiliates or subsidiaries and investment banking services are being or have been provided.

Jefferies International Limited acts as a corporate broker for Gresham House Energy Storage Fund PLC.

Jefferies Financial Group Inc., its affiliates or subsidiaries beneficially owned 1% or more of the common equity of Gore Street Energy Storage Fund plc as of last month's end (or the prior month's end if this report is dated later than 10 days after the most recent month end).

All National Grid data in the report are supported by National Grid ESO Open Data. This report also contains BMRS data - Elexon Limited copyright and database right (2023).

Explanation of Jefferies Ratings

Buy - Describes securities that we expect to provide a total return (price appreciation plus yield) of 15% or more within a 12-month period.

Hold - Describes securities that we expect to provide a total return (price appreciation plus yield) of plus 15% or minus 10% within a 12-month period.

Underperform - Describes securities that we expect to provide a total return (price appreciation plus yield) of minus 10% or less within a 12-month period.

The expected total return (price appreciation plus yield) for Buy rated securities with an average security price consistently below \$10 is 20% or more within a 12-month period as these companies are typically more volatile than the overall stock market. For Hold rated securities with an average security price consistently below \$10, the expected total return (price appreciation plus yield) is plus or minus 20% within a 12-month period. For Underperform rated securities with an average security price consistently below \$10, the expected total return (price appreciation plus yield) is minus 20% or less within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Jefferies policies.

CS - Coverage Suspended. Jefferies has suspended coverage of this company.

NC - Not covered. Jefferies does not cover this company.

Restricted - Describes issuers where, in conjunction with Jefferies engagement in certain transactions, company policy or applicable securities regulations prohibit certain types of communications, including investment recommendations.

Monitor - Describes securities whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Valuation Methodology

Jefferies' methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Jefferies Franchise Picks

Jefferies Franchise Picks include stock selections from among the best stock ideas from our equity analysts over a 12 month period. Stock selection is based on fundamental analysis and may take into account other factors such as analyst conviction, differentiated analysis, a favorable risk/reward ratio and investment themes that Jefferies analysts are recommending. Jefferies Franchise Picks will include only Buy rated stocks and the number can vary depending on analyst recommendations for inclusion. Stocks will be added as new opportunities arise and removed when the reason for inclusion changes, the stock has met its desired return, if it is no longer rated Buy and/or if it triggers a stop loss. Stocks having 120 day volatility in the bottom quartile of S&P stocks will continue to have a 15% stop loss, and the remainder will have a 20% stop. Franchise Picks are not intended to represent a recommended portfolio of stocks and is not sector based, but we may note where we believe a Pick falls within an investment style such as growth or value.

Risks which may impede the achievement of our Price Target

This report was prepared for general circulation and does not provide investment recommendations specific to individual investors. As such, the financial instruments discussed in this report may not be suitable for all investors and investors must make their own investment decisions based upon their specific investment objectives and financial situation utilizing their own financial advisors as they deem necessary. Past performance of the financial instruments recommended in this report should not be taken as an indication or guarantee of future results. The price, value of, and income from, any of the financial instruments mentioned in this report can rise as well as fall and may be affected by changes in economic, financial and political factors. If a financial instrument is denominated in a currency other than the investor's home currency, a change in exchange rates may adversely affect the price of, value of, or income derived from the financial instrument described in this report. To the extent prices are shown in non-US currency, please note that our local currency price targets are based on a currency conversion using an exchange rate as of the prior trading day (unless otherwise noted). Should there be fluctuations in the exchange rate after this date, that will affect the non-US target prices and should no longer be relied upon. In addition, investors in securities such as ADRs, whose values are affected by the currency of the underlying security, effectively assume currency risk.

This report has been prepared independently of any issuer of securities mentioned herein and not as agent of any issuer of securities. No Equity Research personnel have authority whatsoever to make any representations or warranty on behalf of the issuer(s). Any comments or statements made herein are those of the Jefferies entity producing this report and may differ from the views of other Jefferies entities.

This report may contain information obtained from third parties, including ratings from credit ratings agencies such as Standard & Poor's, and information derived from third-party or proprietary generative artificial intelligence (Gen AI) models. Jefferies does not guarantee the accuracy, completeness, timeliness or availability of this information, and is not responsible for any errors or omissions (negligent or otherwise), regardless of the cause, or for the results obtained from the use of such content. Neither Jefferies nor any third-party content providers, including providers of Gen AI models, give any express or implied warranties, including, but not limited to, any warranties of merchantability or fitness for a particular purpose or use. Neither Jefferies nor any third-party content provider shall be liable for any direct, indirect, incidental, exemplary, compensatory, punitive, special or consequential damages, costs, expenses, legal fees, or losses (including lost income or profits and opportunity costs) in connection with any use of their content, including ratings. Credit

ratings are statements of opinions and are not statements of fact or recommendations to purchase, hold or sell securities. They do not address the suitability of securities or the suitability of securities for investment purposes, and should not be relied on as investment advice. Reproduction and distribution of third party content in any form is prohibited except with the prior written permission of the related third party.

Jefferies research reports are disseminated and available electronically, and, in some cases, also in printed form. Electronic research is simultaneously made available to all clients. This report or any portion hereof may not be copied, reprinted, sold, or redistributed or disclosed by the recipient or any third party, by content scraping or extraction, automated processing, or any other form or means, without the prior written consent of Jefferies. Any unauthorized use is prohibited. Neither Jefferies nor any of its respective directors, officers or employees, is responsible for guaranteeing the financial success of any investment, or accepts any liability whatsoever for any direct, indirect or consequential damages or losses arising from any use of this report or its contents. Nothing herein shall be construed to waive any liability Jefferies has under applicable U.S. federal or state securities laws.
