Focus List Changes – China/HK

We add Minimax (0100.HK) to our China/HK Focus List, and remove Duality Biotherapeutics (9606.HK).

Adding Minimax (0100.HK):

Morgan Stanley Internet and Telecoms analyst, Gary Yu, and Software & IT Services analyst, Lydia Lin, are OW on Minimax:

- M3’s smaller scale, higher pricing and weaker coding performance drove negative developer feedback, but they view the model primarily as an architecture test for MiniMax Sparse Attention rather than the full expression of its LLM capability.
- The upcoming M3 update should address coding, while the 2-3T M3 Pro in Sep-Oct will represent a more important test of MiniMax’s frontier performance and pricing power.
- Importantly, MiniMax is more than an LLM story. Its strength in multimodality remains underappreciated, with an H3 ranking among leading global video models and potentially providing a second ARR growth engine.
- Meanwhile, c.US\$2bn of planned equity/CB financing should support continued investment in model training and inference compute.
- They maintain 2026 ARR at US\$1bn, but expect growth to be more back-end loaded around H3 and M3 Pro, with successful M3 Pro scaling the key upside catalyst.

For more details, please see: [China AI Foundation Models: Intelligence War Over Price War \(9 Aug 2026\)](#), [MiniMax: Next-gen Multimodal Model: H3 \(3 Aug 2026\)](#)

We remove Duality Biotherapeutics (9606.HK) from our China/HK Focus List.
