

Samsung SDI

Assuming full ownership at GM battery JV: from a stranded asset to a scalable US ESS site; stay OW

Samsung SDI (SDI) has agreed to buy GM's 49.9% stake in their Indiana EV battery JV, terminating the originally planned JV amid slower EV demand; SDI will fully own/operate the site. Construction was halted at the building phase, and SDI has invested W275bn so far, previously raising stranded asset risk given the slow EV recovery and GM's existing ~80Gwh capacity with LGES. Full ownership and planned conversion to ESS plant removes that stranded asset risk and, importantly, turns the site into a scalable US ESS capacity: with SDI's US ESS orderbook of 60-90Gwh (JPM) and our 2030 US ESS demand at 303GWh, adding 27-36Gwh could lift SDI's US ESS capacity to 56-65Gwh, which implies ~20% share at full ramp. We raise 2028 OP est. by 5% and reiterate Overweight, nudging Dec-27 PT to W640,000, with bigger upside from 2029 as US-local output lifts core earnings and AMPC (advanced manufacturing production credit).

- **Assuming full ownership at GM battery JV.** According to a Bloomberg news ([link](#)), SDI has agreed to purchase GM's 49.9% stake in their Indiana EV battery JV. Citing slower EV demand, the transaction effectively terminates the planned joint factory. SDI will assume full ownership of the Indiana site and operate it independently, while maintaining a separate technology partnership with GM to co-develop next-generation prismatic batteries.
- **From a stranded asset...** Construction was halted at the building phase, before the equipment-installation stage. SDI has invested W275bn to date (for its 50.1% stake), recorded as construction in progress and previously subject to potential write-offs given the slower EV recovery and GM's existing ~80Gwh battery capacity with LGES. With SDI taking full ownership of the Indiana site and planning to scale it to 27-36Gwh ESS plant, we see the risk of the project becoming a stranded asset as removed.
- **...to a scalable US ESS battery site.** We view the former JV plant as a key bottlenecking lever for US capacity, addressing SDI's constraint in meeting rising made-in-US ESS demand once the Stellantis JV reaches full ramp (29Gwh). In the 2Q26 earnings call, management indicated an ESS orderbook covering 3-4 years of current US ESS capacity, which we translate to 60-90Gwh, underscoring the need for incremental capacity. Against our 2030 US ESS demand forecast of 303GWh ([link](#)), adding 27-36Gwh of capacity would lift SDI's US ESS capacity to 56-65Gwh, implying roughly ~20% market share assuming full ramp up, which we view as achievable rather than aggressive.
- **PT modestly up to W640,000; stay OW.** We model only a modest uplift in 2028 OP, as the Indiana plant will still be in the early stages of ramp up. Accordingly, we lift our Dec-27 PT slightly to W640,000 (from W630,000). The more meaningful uplift should come from 2029 onwards, as higher US-local production increases both core-earnings and AMPC. After the OP turnaround in 2Q26, we expect continued earnings momentum led by: 1) fast-growing BBU (battery back up unit)/UPS (uninterruptible power supply); 2) structural US ESS demand growth alongside supplier substitution from Chinese to Korean players; and 3) incremental policy support in Korea. We also see a partial sale of the Samsung Display stake (potentially around year-end, per company guidance) as an additional sentiment tailwind.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period. J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, <https://www.jpmorganmarkets.com>.

Coverage Universe: Lee, Sonny : Doosan Enerbility (034020.KS), Ecopro BM (247540.KQ), HL Mando (204320.KS), Hyundai Autoever (307950.KS), Hyundai E&C (000720.KS), Hyundai Mobis (012330.KS), Hyundai Motor Company (005380.KS), KEPCO (015760.KS), KEPCO E&C (052690.KS), Kia Corp (000270.KS), L&F (066970.KQ), POSCO (005490.KS), POSCO Future M (003670.KS), Samsung SDI (006400.KS)

J.P. Morgan Equity Research Ratings Distribution, as of July 04, 2026

	Overweight (buy)	Neutral (hold)	Underweight (sell)
J.P. Morgan Global Equity Research Coverage*	53%	36%	12%
IB clients**	83%	80%	73%
JPMS Equity Research Coverage*	51%	37%	12%
IB clients**	95%	92%	87%

*Please note that the percentages may not add to 100% because of rounding.

**Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.

For purposes of FINRA ratings distribution rules only, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.
