Orbbec - A

HK NDR reinforces platform moat; model update; keep OW

We update our model for Orbbec to reflect the latest 1H26 operating trends and key takeaways from our post-results physical NDR with management in Hong Kong. While the 2Q26 results missed estimates on profit, due to capacity constraints, overseas expansion delays, and a strategic pullback from the low-margin legacy business, management's tone was highly constructive. Orders remain robust, content value per robot is rising, and Orbbec continues to see essentially no meaningful competition in its core 3D vision segment. The company is winning new business in 3D scanning and physical AI data collection, with new partnerships and product launches broadening the customer base. Management cut FY26 guidance to Rmb1.4B-1.5B from >Rmb1.6B, reflecting supply-side bottlenecks rather than demand weakness, but lifted the long-term outlook and remains confident in the platform's scalability. We trim our Dec-2027 PT to Rmb140 (45% upside), maintain OW, and continue to see Orbbec and Leader Drive as our top picks in the humanoid robot supply chain.

- **The near-term revenue reset is driven by supply constraints and new product rollout delays, not a deterioration in demand or order momentum.** We now take a more conservative view on FY26E revenue, mainly due to delays in overseas capacity expansion and slower-than-expected shipment readiness for new products, such as 3D scanning and physical AI data collection equipment. Overseas capacity ramp up, initially expected in July, is now pushed to September/October, and some new products are delayed by 1–2 months. Management expects a visible sales and profit inflection in 4Q26 as new lines come online. Despite the reset, order flow remains strong, and management expects to bridge the gap in 2H26, with the revised guidance implying ~Rmb1B in sales in the second half.
- **Physical AI data collection and robotics are increasingly synergistic, driving content value and platform stickiness.** Orbbec's July launch of its physical AI/robotics training data-collection platform is gaining traction, targeting the robot training market, with customers including humanoid robot OEMs, foundation model developers and giant tech companies. Management believes Orbbec's dominant share in robot-embodiment vision gives it a natural advantage in this market, and the ability to connect front-end data collection with back-end robot perception solutions could help define industry standards. Humanoid robot orders are ramping up, with over 1,200 robotics customers in 1H26 and urgent delivery requests from domestic embodied AI model companies. The two businesses reinforce each other: as more robots are deployed, demand for high-quality data collection grows, creating a powerful flywheel for content value per robot.
- **Business mix shift, technology innovation, and ecosystem integration are supporting margin expansion and long-term scalability.** Orbbec's ongoing shift from low-margin biometrics to higher-margin AIoT segments is driving visible gross margin improvement, with GPM up nearly 8ppts Y/Y to 48.5% in 2Q26. The company's ecosystem integration with major platforms, such as

Summary Investment Thesis and Valuation

Investment Thesis

We are Overweight on Orbbec, a leading 3D vision solution provider based in Shenzhen, China. Orbbec is strategically positioned as a platform leader in 3D machine vision, a critical enabler for the emerging embodied AI era. The company has an estimated 95% market share (according to management) in China's humanoid robot vision hardware segment, supported by its full-stack technology platform. Orbbec's solutions are embedded in major robotics ecosystems, with partnerships spanning NVIDIA, Microsoft, and leading domestic players.

Valuation

Our December 2027 price target is Rmb40 based on an FY27E P/S multiple of 23x. We keep the multiple unchanged, benchmarking to the 90% percentile of China humanoid robot comps. In particular, we view Leader Drive as the closest peer, given their strong positioning in the China's humanoid robot hardware supply chain, with a strong margin profile and market share stance.

Performance Drivers

DivYld	-0.20	-0.21

NVIDIA Isaac/Jetson, Apple macOS, Microsoft, and Intel, continues to strengthen, and Orbbec's solutions are becoming the default choice for next-generation robotics. New product launches and partnerships are expanding Orbbec's reach and technical integration, while the "dual factory" model (Guangdong and Vietnam) supports both domestic and international demand. Management reiterated that long-term revenue and profit targets for 2027/28 remain on track, with profitability expected to exceed Rmb200MM in 2026 with a outlined growth trajectory towards Rmb800MM by 2030.

Physical NDR takeaways and model update

FY26E cut on supply constraints, but longer-term thesis remains intact; maintain OW, keeping Orbbec as a top pick within the robotics space

Our recent physical NDR with Orbbec's board secretary in Hong Kong left us more bullish on the company's long-term outlook. Management highlighted robust order momentum, rising content value per robot, and essentially no meaningful competition in the core 3D vision segment. The company is seeing strong demand for new products, including 3D scanning and physical AI data collection platforms (EGO, UMI, WristCamera), with customer adoption accelerating across both domestic and overseas markets. Orbbec's technology is now standard in a wide range of service, industrial, and humanoid robots, and the company's ecosystem integration with new partners, such as Robbyant, Linkerbot, and Honor is deepening. Overseas revenue nearly doubled Y/Y, and the customer base continues to broaden, supporting the long-term thesis of scalable, defensible growth. Management remains focused on scaling, product innovation, and global expansion, which we see as the real drivers of long-term value.

Following the NDR, we are lowering our FY26 revenue and profit estimates to reflect near-term supply bottlenecks and the company's strategic exit from legacy segments, but our FY27/28E forecasts remain well above consensus as we expect Orbbec to fully capture the next leg of growth once capacity ramps. Management lifted their long-term outlook, but cut FY26 delivery guidance due to supply constraints, not demand. Our December 2027 price target is slightly reduced to Rmb140 (down 7%), still offering c.45% upside from current levels. We maintain our Overweight rating and continue to see Orbbec as one of the top picks in the humanoid robot supply chain, with Leader Drive as our next preferred component play.

- **Humanoid robot order momentum and data collection business are both accelerating, and the two are increasingly synergistic.**
Management highlighted that humanoid robot orders are ramping up rapidly, even facing delivery bottlenecks due to strong demand to fulfill some model companies' needs. Orbbec's 3D vision modules are now standard in many leading humanoid and service robots, and the number of modules per robot is rising as customers require more advanced sensing and manipulation. At the same time, the data collection business—centered on platforms such as EGO, UMI, and WristCamera—is seeing strong adoption by both model companies and robot OEMs. These two businesses are closely linked: high-quality data collection is essential for training and deploying next-generation humanoid robots, and Orbbec's ability to provide both the hardware and the data pipeline creates a powerful flywheel, in our view. As more robots are deployed, the demand for data collection and model training grows, further reinforcing Orbbec's platform position and content value per robot.
- **Business mix shift and ecosystem integration are laying the foundation for margin expansion and platform stickiness.**
Orbbec's ongoing shift from low-margin biometrics to higher-margin AIoT segments is driving visible gross margin improvement and supporting a more resilient business model. The company's ecosystem integration with major platforms, such as NVIDIA Isaac/Jetson, Apple macOS, Microsoft, and Intel, continues to strengthen, and Orbbec's solutions are becoming the default choice for next-generation robotics. The company's "dual factory" model—with new capacity

in Guangdong and Vietnam—supports both domestic and international demand, and management expects this to further enhance supply chain resilience and delivery efficiency.

- **Technology evolution and product innovation are driving content value and customer stickiness.**
Orbbec's R&D pipeline is focused on expanding the range and performance of its 3D vision modules, with new launches in 3D scanning, data collection, and physical AI platforms. The company is also investing in next-generation sensor fusion, with products that combine 2D, 2.5D, and LiDAR for more complex robotic applications. Management highlighted that content value per robot is rising as customers adopt more advanced modules, with ASPs for binocular modules at Rmb1,500–2,500 and wrist modules at Rmb1,800 each. The number of vision modules per robot is increasing, especially in humanoid and high-end service robots, supporting both revenue growth and margin expansion.
- **Pricing power and margin trends remain robust, supported by product mix and ecosystem integration.**
The company's gross margin improved to 48.5% in 2Q26, up nearly 8ppts Y/Y, as the business mix continues to shift toward higher-margin AIoT segment. Management expects GPM to remain strong, even as the company invests in new capacity and R&D. The decision to pull back from low-margin biometrics (Touch and Pay) is expected to further support margin resilience. Orbbec's pricing power is underpinned by its technology breadth, ecosystem partnerships, and the high switching costs for customers who have standardized on its platform. Management is confident that as scale builds, operating leverage will improve and margin volatility will subside.
- **The competitive landscape remains favorable, with Orbbec's platform breadth and integration setting it apart from both domestic and international peers.**
Orbbec continues to see little meaningful competition in its core 3D vision segment, especially in the context of humanoid and service robots. While LiDAR players, such as Hesai and Robosense, are present in the market, their focus is more on automotive and long-range navigation, and their content value per robot is much lower (typically a few hundred renmibi per unit) mainly for obstacle avoidance purpose. Orbbec's solutions cover all mainstream 3D vision modalities, including structured light, stereo, ToF, and multi-sensor fusion, and the company's ability to deliver high GPM and rapid customization is a key differentiator. Management noted that RealSense is less competitive on cost and integration, and that Orbbec's ecosystem stickiness is increasing as more customers standardize on its platform.
- **Production plans and capacity expansion are on track to support the next phase of growth, despite near-term delays in overseas ramp-up.**
The company's new manufacturing base in Guangdong is ramping up, and the Vietnam factory is expected to be operational by 4Q26–1Q27. Management acknowledged that capacity constraints and training have slowed shipments in 1H26, but expects a clear inflection in 4Q26 as new lines come online and product launches accelerate. The company is also investing in automation and process optimization to improve efficiency and support higher volumes. Management reiterated that the long-term revenue and profit targets for 2027/28 remain on track, with profitability expected to exceed Rmb200MM in 2026 and revenue growth to accelerate as new capacity is absorbed.

Investment Thesis, Valuation and Risks

Orbbec - A *(Overweight; Price Target: Rmb140.00)*

Investment Thesis

We are Overweight on Orbbec, a leading 3D vision solution provider based in Shenzhen, China. Orbbec is strategically positioned as a platform leader in 3D machine vision, a critical enabler for the emerging embodied AI era. The company has an estimated 95% market share (according to management) in China's humanoid robot vision hardware segment, supported by its full-stack technology platform. Orbbec's solutions are embedded in major robotics ecosystems, with partnerships spanning NVIDIA, Microsoft, and leading domestic players.

Valuation

Our December 2027 price target is Rmb140 based on an FY27E P/S multiple of 23x, benchmarking to the 90% percentile of China humanoid robot comps. In particular, we view Leader Drive as the closest peer, given their strong positioning in China's humanoid robot hardware supply chain, with a strong margin profile and market share stance.

Risks to Rating and Price Target

Key downside risks include: (1) Slower-than-expected market growth pace, notably the key drivers including humanoid robot/embodied AI applications and 3D printing applications; (2) rising competition diluting profitability; (3) any shift in vision hardware standards towards lower-ASP categories.

Analyst Certification: The Research Analyst(s) denoted by an “AC” on the cover of this report certifies (or, where multiple Research Analysts are primarily responsible for this report, the Research Analyst denoted by an “AC” on the cover or within the document individually certifies, with respect to each security or issuer that the Research Analyst covers in this research) that: (1) all of the views expressed in this report accurately reflect the Research Analyst’s personal views about any and all of the subject securities or issuers; and (2) no part of any of the Research Analyst’s compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the Research Analyst(s) in this report. For all Korea-based Research Analysts listed on the front cover, if applicable, they also certify, as per KOFIA requirements, that the Research Analyst’s analysis was made in good faith and that the views reflect the Research Analyst’s own opinion, without undue influence or intervention.

All authors named within this report are Research Analysts who produce independent research unless otherwise specified. In Europe, Sector Specialists (Sales and Trading) may be shown on this report as contacts but are not authors of the report or part of the Research Department.

Important Disclosures

- **Market Maker/ Liquidity Provider:** J.P. Morgan is a market maker and/or liquidity provider in the financial instruments of/related to Orbbec - A or related entities.
- **Client:** J.P. Morgan currently has, or had within the past 12 months, the following entity(ies) as clients: Orbbec - A or related entities.
- **Potential Investment Banking Compensation:** J.P. Morgan expects to receive, or intends to seek, compensation for investment banking services in the next three months from Orbbec - A or related entities.
- **Debt Position:** J.P. Morgan may hold a position in the debt securities of Orbbec - A or related entities, if any.

Company-Specific Disclosures: J.P. Morgan does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. Important disclosures, including price charts and credit opinion history tables (if applicable), are available for compendium reports and all J.P. Morgan-covered companies, and certain non-covered companies, by visiting <https://www.jpmm.com/research/disclosures>, calling 1-800-477-0406, or e-mailing research.disclosure.inquiries@jpmorgan.com with your request.

Orbbec - A (688322.SS, 688322 CH) Price Chart

Date	Rating	Price (Rmb)	Price Target (Rmb)
06-Aug-26	OW	109.02	150

Source: Bloomberg Finance L.P. and J.P. Morgan; price data adjusted for stock splits and dividends.
Initiated coverage Aug 05, 2026. All share prices are as of market close on the previous business day.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period. J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the

price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, <https://www.jpmorganmarkets.com>.

J.P. Morgan Equity Research Ratings Distribution, as of July 04, 2026

	Overweight (buy)	Neutral (hold)	Underweight (sell)
J.P. Morgan Global Equity Research Coverage*	53%	36%	12%
IB clients**	83%	80%	73%
JPMS Equity Research Coverage*	51%	37%	12%
IB clients**	95%	92%	87%

*Please note that the percentages may not add to 100% because of rounding.

**Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.

For purposes of FINRA ratings distribution rules only, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at <http://www.jpmorganmarkets.com>, contact the primary analyst or your J.P. Morgan representative, or email research.disclosure.inquiries@jpmorgan.com. For material information about the proprietary models used, please see the Summary of Financials in company-specific research reports and the Company Tearsheets, which are available to download on the company pages of our client website, <http://www.jpmorganmarkets.com>. This report also sets out within it the material underlying assumptions used.

History of Investment Recommendations:

A history of J.P. Morgan investment recommendations disseminated during the preceding 12 months can be accessed on the Research & Commentary page of <http://www.jpmorganmarkets.com> where you can also search by analyst name, sector or financial instrument.

Analysts' Compensation: The research analysts responsible for the preparation of this report receive compensation based upon various factors, including the quality and accuracy of research, client feedback, competitive factors, and overall firm revenues.

Registration of non-US Analysts: Unless otherwise noted, the non-US analysts listed on the front of this report are employees of non-US affiliates of J.P. Morgan Securities LLC, may not be registered as research analysts under FINRA rules, may not be associated persons of J.P. Morgan Securities LLC, and may not be subject to FINRA Rule 2241 or 2242 restrictions on communications with covered companies, public appearances, and trading securities held by a research analyst account.

Other Disclosures

J.P. Morgan is a marketing name for investment banking businesses of JPMorgan Chase & Co. and its subsidiaries and affiliates worldwide.

UK MIFID FICC research unbundling exemption: UK clients should refer to [UK MIFID Research Unbundling exemption](#) for details of J.P. Morgan's implementation of the FICC research exemption and guidance on relevant FICC research categorisation.

All research material made available to clients are simultaneously available on our client website, J.P. Morgan Markets, unless specifically permitted by relevant laws. Not all research content is redistributed, e-mailed or made available to third-party aggregators. For all research

material available on a particular stock, please contact your sales representative.

Material relating to equity securities is issued and distributed in Taiwan by J.P. Morgan Securities (Taiwan) Limited, subject to the license scope and the applicable laws and the regulations in Taiwan. **To the extent that J.P. Morgan Securities (Taiwan) Limited produces research materials on securities not listed on the Taiwan Stock Exchange or Taipei Exchange ("Non-Taiwan Listed Securities"), these materials shall not constitute securities recommendations for the purpose of applicable Taiwan regulations, and, for the avoidance of doubt, J.P. Morgan Securities (Taiwan) Limited does not act as broker for Non-Taiwan Listed Securities.** According to Paragraph 2, Article 7-1 of Operational Regulations Governing Securities Firms Recommending Trades in Securities to Customers (as amended or supplemented) and/or other applicable laws or regulations, please note that the recipient of this material is not permitted to engage in any activities in connection with the material that may give rise to conflicts of interests, unless otherwise disclosed in the "Important Disclosures" in this material.

Thailand: This material is issued and distributed in Thailand by JPMorgan Securities (Thailand) Ltd., which is a member of the Stock Exchange of Thailand and is regulated by the Ministry of Finance and the Securities and Exchange Commission. The registered address is 548 One City Center Building, 50th Floor, Ploenchit Road, Lumpini, Pathum Wan, Bangkok 10330.

UK: Research is produced in the UK by J.P. Morgan Securities plc ("JPMS plc") which is a member of the London Stock Exchange and is authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority or J.P. Morgan Markets Limited ("JPMML Ltd") which is authorised and regulated by the Financial Conduct Authority. Unless specified to the contrary, this material is distributed in the UK by JPMS plc and is directed in the UK only to: (a) persons having professional experience in matters relating to investments falling within article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) (Order) 2005 ("the FPO"); (b) persons outlined in article 49 of the FPO (high net worth companies, unincorporated associations or partnerships, the trustees of high value trusts, etc.); or (c) any persons to whom this communication may otherwise lawfully be made; all such persons being referred to as "UK relevant persons". This material must not be acted on or relied on by persons who are not UK relevant persons. Any investment or investment activity to which this material relates is only available to UK relevant persons and will be engaged in only with UK relevant persons. A description of J.P. Morgan EMEA's policy for prevention and avoidance of conflicts of interest related to the production of Research can be found at the following link: [J.P. Morgan EMEA - Research Independence Policy](#).

U.S.: J.P. Morgan Securities LLC ("JPMS") is a member of the NYSE, FINRA, SIPC, and the NFA. JPMorgan Chase Bank, N.A. is a member of the FDIC. Material published by non-U.S. affiliates is distributed in the U.S. by JPMS who accepts responsibility for its content.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst's involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject

to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.

Confidentiality and Security Notice: This transmission may contain information that is privileged, confidential, legally privileged, and/or exempt from disclosure under applicable law. If you are not the intended recipient, you are hereby notified that any disclosure, copying, distribution, or use of the information contained herein (including any reliance thereon) is STRICTLY PROHIBITED. Although this transmission and any attachments are believed to be free of any virus or other defect that might affect any computer system into which it is received and opened, it is the responsibility of the recipient to ensure that it is virus free and no responsibility is accepted by JPMorgan Chase & Co., its subsidiaries and affiliates, as applicable, for any loss or damage arising in any way from its use. If you received this transmission in error, please immediately contact the sender and destroy the material in its entirety, whether in electronic or hard copy format.
