

JPM | APAC Technology - SEC / TSMC / Commodity tech

Duncan Wagner
+852 2800 8874
duncan.wagner@jpmorgan.com

SEC: investors modeled SEC 2Q OP W80-85trn, thou the name was driven by local expectations which were W95-100trn. Investors continue to question Jay when we believe retail clears their positions out of the leveraged ETFs. We also continue to receive investor questions when we expect de-grossing to come to a halt, which VAR (Value At Risk) calculation is a function of volatility * delta, as SEC 30-day vol has edged up to nearly 107, and Kioxia to 127 (10-day vol has spiked back to 147) - constraining managers' ability to re-gross unless vols drop. Investors also concur w/ Jay/Mio NAND thesis of increased CSP KV Cache offloading inference demand, yet remain circumspect of Japan retail leverage involved in Kioxia, by far the most actively traded stock. Investors agree memory producers need to spend capex to fulfill customers' demand; Mio has highlighted TEL/SCREEN as gaining SEC/MU DRAM etcher and cleaning equip share, respectively. Thou SPE names do tend to trade weaker according to a second derivative basis if the market believes memory prices are peaking or set to decline.

TSMC: initial feedback to our buy-side bars' request indicate Gokul's GM estimates are above, thou investors model higher FY26/27 capex estimates, as the market anticipates positive forward capex commentary to fulfill customers' backlogged demand [link](#). Mio/Gokul believe Lasertec key catalyst remains TSMC A14 mass production qualification, as investors anticipate timing towards FY26-end/early-FY27. Investors expect Ebara F1Q orders to beat, as believe prior guidance was overly conservative, based on CMP tool share gains at TSMC. Mio also highlights TEL/SCREEN; Advantest/Disco are long-term investor consensus picks as the latter's multiple is challenging.

Commodity tech: Kanemoto picks Murata to potentially beat earnings, while Taiyo Yuden may lag as investors await execution, setting up an interesting pair into the print. Nakada does not see an increase in raw wafer prices due to depressed spot market; Jimmy's checks at Sumco sub co Formosa Sumco did not confirm any price 12" hike at TSMC into 3Q26, contrary to recent press reports - as investors seek to rotate into this sub-sector

Corporate / Analyst access: Please join Gokul's TSMC 2Q26 preview webinar (rescheduled) today Wed July 9 8:30am ET / 8:30pm HKT register [link](#)

Key Highlights Today

- **Samsung Electronics (OW PT W480,000): Focus on durability of earnings cycle** – Jay Kwon [link](#)
- **AP Memory (OW PT -> NT\$1,350): Second foundry qualification complete** – William Yang [link](#)
- **Kioxia / TEL / Advantest / Nittobo** – Mio Shikanai [link](#)
- **Murata / Taiyo Yuden / TDK F1Q earnings estimates** – Akinori Kanemoto [link](#)
- **Sumco / Tokyo Ohka Kogyo** – Yasuhiro Nakada [link](#)
- **Taiwan Substrate: Exiting BT an emerging trend** – Jerry Tsai [link](#)

[Earnings Calendar](#)

Detailed Highlights

Samsung Electronics (OW PT W480,000): Focus on durability of earnings cycle – Jay Kwon [link](#)

- **SEC recognized W15trn+ worth of labor cost provisions covering the 2 quarters of 1H26.** We continue to see memory pricing in favor of suppliers and expect another leg of upward EPS revisions. We re-iterate our bullish ‘longer for higher up-cycle’ view on the memory industry and SEC. Co to disclose full earnings details July 30 Asia morning time. We believe NAND pricing could surprise on the upside relative to investor expectations (20% q-q increase) given CSPs appetite for sourcing eSSD for KV cache offloading.

AP Memory (OW PT -> NT\$1,350): Second foundry qualification complete – William Yang [link](#)

- **We again increase our estimates. AP Memory has recently qualified another foundry partner UMC for its interposers.** We believe PSMC will focus on IPD products while UMC could focus on interposers from 2H27. We believe this is an incremental positive catalyst

Kioxia / TEL / Advantest / Nittobo – Mio Shikanai [link](#)

- **We forecast FY26-28 WFE growth +28%/+29%/+16%, but we believe there is still upside.** Key points for Kioxia include recent price trends, direction of LTAs and progress for Super High IOPS. For TEL, we expect attention to focus on price revisions update and additional initiatives, as we expect GMs to reach 50% sooner than 2 years. Advantest we expect further earnings upside from CPUs and CPOs. We believe Nittobo may not announce specific plans to raise production capacity, but we anticipate TAM growth driven by the adoption of NER-glass for M9 and T-glass in the future for MLCs.

Murata / Taiyo Yuden / TDK F1Q earnings estimates – Akinori Kanemoto [link](#)

- **We forecast an MLCC shortage from FY27,** and we think prices will start to rise when customers become aware of the shortage during Oct-Dec negotiations’ timing. We currently cautiously forecast Murata F1Q OP Y86.5bn, but we think Y90bn or higher could be possible due to JPY and strong market conditions. We forecast Taiyo Yuden F1Q OP Y5bn, but are concerned profit could undershoot depending on when their strikes at their Korea MLCC production facilities ends. We forecast TDK F1Q OP Y67.4bn; we believe would be a positive surprise if exceeds Y70bn. We also see tight s/d for discrete semis at Rohm

Sumco / Tokyo Ohka Kogyo – Yasuhiro Nakada [link](#)

- **We maintain UW, which we expect to post another OP loss in Apr-June, and OW on TOK,** which we think could raise its FY guide given its strong earnings. We believe TOK could raise dividends based on stronger than expected earnings

Taiwan Substrate: Exiting BT an emerging trend – Jerry Tsai [link](#)

- **BT capacity conversion to ABF underway.** Our industry supply chain checks indicate that multiple Asian suppliers are planning/reducing their BT exposures by transferring some production tools for BT to ABF. We believe the results of the conversion will be net-net positive for both rev and margin for substrate makers as ABF is meaningful higher. Unimicron plans to cease half of BT Substrate production and may cease production by FY28.

Sector Key Newsflow

- **SK Hynix US Listing Said to Be Multiple Times Oversubscribed** ([Bloomberg](#))
- **Samsung Electronics Surpasses NVIDIA, Apple With Record Profit** ([The Chosun](#))
- **Samsung to hike foldable phone price amid AI chip shortage** ([News18](#))
- **Samsung, SK Hynix reportedly seek China-free chip tool buffer against US controls** ([Digitimes](#))
- **Luxshare Prices \$3.1 Billion HK Listing at Top** ([Bloomberg](#))

- **DeepSeek** developing its own AI chip, sources say ([Reuters](#))
- **Zhipu** Weighs Designing Own AI Chip, Information Reports ([Bloomberg](#))
- **Asahi Kasei** Invests 2 Billion Yen in Taiwan DFR Facility to Boost Capacity ([MT Newswires](#))
- **Taiwan Memory**: First-half revenue for Taiwan memory suppliers tops full-year 2025 ([Taiwan News](#))
- **Macronix Intl**: Macronix Announces Consolidated Net Sales of NT\$6.956 Billion for June 2026 ([Macronix](#))
