

Aluminum electrolytic capacitors industry

1Q results of Nippon Chemi-Con and Nichicon

- Slightly positive impression of Nippon Chemi-Con's (6997) 1Q results:** Key points are (1) 1Q sales came in at ¥37.99 billion and operating profit was ¥1.67 billion, slightly above our estimate of ¥1.48 billion and the Bloomberg consensus estimate of ¥1.49 billion. Management maintained full-year guidance, but progress toward the 1H operating profit target of ¥3.0 billion exceeded 50%, representing a solid start. In 1Q, the increase in material costs exceeded expectations, but strong sales, cost reductions and yen depreciation offset the impact. (2) In aluminum electrolytic capacitors, sales totaled ¥33.6 billion (+23% YoY, +5% QoQ), with significant growth in sales for AI servers, automotive, industrial equipment and new energy applications, while sales for home appliances, ICT (excluding AI servers) and other uses declined sharply. Sales for AI servers and industrial equipment in 1Q appeared to be firmly in line with guidance. Looking only at sales, this quarter typically sees an increase in snap-in products for air conditioners, but sales for home appliances declined sharply QoQ, suggesting that the company prioritized supply for extended-length capacitors used in AI applications. (3) The BB ratio for aluminum electrolytic capacitors increased to 1.4 in 1Q from 1.3 in 4Q.
- Nichicon (6996) and Nippon Chemi-Con:** For aluminum electrolytic capacitors sales, Nippon Chemi-Con posted a 5% QoQ increase and Nichicon a 4% QoQ increase, a similar trend as we noted above. By major application, Nippon Chemi-Con saw sales for AI servers rise 8% QoQ, automotive grow 20%, industrial equipment increase 22% and renewable energy expand 44%, while home appliances fell 35% and ICT (excluding AI servers) declined 5% QoQ. At Nichicon, sales for IT applications increased 38% QoQ and home appliances rose 17%, while automotive declined 9%, electric and industrial equipment fell 12% and power supplies dropped 15% QoQ. The two companies showed a significant divergence in QoQ momentum for automotive and industrial equipment applications.

Important Disclosures

Company-Specific Disclosures: J.P. Morgan does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. Important disclosures, including price charts and credit opinion history tables (if applicable), are available for compendium reports and all J.P. Morgan-covered companies, and certain non-covered companies, by visiting <https://www.jpmm.com/research/disclosures>, calling 1-800-477-0406, or e-mailing research.disclosure.inquiries@jpmorgan.com with your request.

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock’s expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts’ coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst’s coverage universe can be found on J.P. Morgan’s Research website, <https://www.jpmorganmarkets.com>.
