US Electric Utilities

Top Takeaways from Texas Power Expert Meetings on Batch Zero Delay

CITI'S TAKE

We met up with Eric Goff, CEO of Goff Policy, and Texas utilities in our coverage around the implications of the Texas Batch Zero delay for datacenters in response to the Governor's letter. We believe that delay will last until at least after the November election (result dependent), will allow time for some new legislative action to address the public concerns around datacenters by May 31, and set the state up for implementation summer/fall 2027 (delay from April 2027 timeline). On stocks, the insights are negative short outlooks for all Texas utilities, but positive longer-term fundamentals for Texas transmission (SRE, AEP, CNP) and power development (NRG, CEG). The delay is slightly deflationary for equipment costs for equipment & labor.

Why Now? — In our view, the political polls have turned unfavorable to Republicans in the US Senate race in Texas, and for Governor Abbott. Polls show that Texas voters are against datacenters, care about affordability, and worry about AI. As a result, in our view, the current executive branch is responding and pausing datacenter allocation via Batch Zero until after the election. This also allows time for the Texas legislature to weigh in on solutions to the public's concerns.

2027 Texas Legislature Session to Focus on Datacenters — In part, dependent on November election results, the Jan 12, 2027 through May 31, 2027 legislative session is likely to pursue bills on 1) water rights – closed looping, easy political win, 2) extending time period for electric transmission to receive approvals by 180 days (to 360 days), and 3) local siting rules set at state level – most government officials will try to avoid weighing on this political hot potato and prefer to keep a local issue. We think the air permit issues are national issues not likely to be addressed in TX (or DC).

Bring Your Own Power Debate to Heat Up in Texas — There are more unknowns than knowns about how BYOP could work in Texas at this point within policymaking circles. Within Batch Zero, some datacenters are bringing power, while others were not planning on it. This could change, but it is unclear how this would work as ERCOT's process is for transmission connection only and the resources planning was designed to be separate. Our base case for the size of Batch Zero is ~40GW.

Outlook for New Power Generation — The datacenters in Texas have continued to grow more sophisticated. At this point, many datacenter developers are buying land, turbines, and critical equipment. IPPs are looking to simply build power plants (along with EPCs) and to own the assets on their balance sheets in exchange for reasonable costs of capital. The datacenters (and the scarce gas and T&D equipment providers) have leverage in this power market much more so than the merchant power providers. Meanwhile, solar and battery continue to be added to the market. This outlook paints a more muted picture for power in Texas for the foreseeable future (until DC load underwhelms at some point in future which would be bearish).

Stock Implications: In our view, the ~4+ month delay estimate to Batch Zero is negative for Texas power/utility/datacenters/energy infrastructure in the next few months. Over the next year, we view this as positive for power generation developers in Texas (NRG, CEG, etc.) and transmission (AEP, SRE, CNP), and the need for power/gas infra.

Unpacking Texas Batch Zero Delay

Politics have been Changing

A key US Senate race in Texas is scheduled for November. Over the last few months, the Democratic candidate James Talarico’s poll numbers have increased materially. Per a recent poll conducted by [Fox News](#) on July 23–27, James Talarico (D) is ahead among all Texas registered voters.

In our view, the US Senate seat, while not an Austin-based seat, is a leading indicator of statewide political trends. US Senators have historically had a lot of influence on state politics.

Figure 1. Texas Senate Vote Preference

© 2026 Citigroup Inc. No redistribution without Citigroup's written permission.
Source: Citi Research, Fox News

In our view, Governor Abbott likely cares more about the Governor election polling, which has also trended less favorably in recent weeks. The same Fox News poll shows that Governor Abbott is only leading by ~1%. While any poll should be taken with a grain of salt, the trend is concerning for re-election politics.

Figure 2. Texas Governor Vote Preference

© 2026 Citigroup Inc. No redistribution without Citigroup's written permission.
Source: Citi Research, Fox News

As the Governors' office is gearing up for the November election, they are likely looking at the top issue in the state being inflation (~37%), while 10% of Texans indicated that job security is their top issue. Datacenters fit into both.

Figure 3. Texans View Inflation as Most Important Issue to Senate Vote

© 2026 Citigroup Inc. No redistribution without Citigroup's written permission.
Source: Citi Research, Fox News

Nationally, 70% of Americans oppose datacenters (60% of Republicans and 76% of Democrats).

Figure 4. Nationwide Survey of Voters on Data Centers

© 2026 Citigroup Inc. No redistribution without Citigroup's written permission.

Source: Citi Research, Fox News

When asked why they oppose datacenters, most cite environmental issues, with quality of life, economics impacts, and negative views of AI listed as the top 4 reasons.

Figure 5. Main Reasons Voters Nationwide Favor or Oppose Data Centers

Governor Action

This week, Governor Abbott published a [letter](#) to help respond to above, in our view.

The letter indicated that:

“The Public Utility Commission of Texas (PUC) and ERCOT must conduct a comprehensive verification and audit of all data centers advancing through ERCOT’s interconnection process before any additional data centers are approved to move forward. Any project that fails to comply with the requirements set forth by the PUC and ERCOT, and by state law, must be denied connection to the Texas grid.”

“The failure of some data centers to comply with the PUC’s survey measuring water and power usage under the General Appropriations Act makes this necessary. Failure to fully comply with that law hinders your ability to make fully informed decisions.”

The Governor also mandated that the PUC and ERCOT must obtain information from the datacenters on

- 1) **Financial Assistance:** Information detailing the extent to which data centers are paying their own way or depending on the state for financial assistance. That would include all state and local tax incentives, grants, abatements, or other public financial assistance received or expected to be received;
- 2) **Bring Your Own Power:** “The extent to which data centers are providing their own power or depending on the ERCOT grid for that power.”
- 3) **Water:** “The extent to which data centers are bringing their own water and reusing their own water as opposed to using water needed by local communities.”
- 4) **Community:** “The extent to which data centers are using measures to reduce impacts on neighboring property owners and communities, including noise mitigation, light controls, setbacks, traffic improvements, emergency response coordination, and other community protection measures, understanding that each community is unique;”
- 5) **Ownership Info:** “Information detailing the ownership and controlling interests in the project.”

Given the above, the PUCT and ERCOT are delaying Batch Zero until further notice ([see link](#)).

Expected Timeline from Here – Shift Everything to the Right

In our view, everything is delayed for at least 4 months. After the election, we expect the Batch Zero decisions to be made. This could happen in November at the earliest, but December or January appear more likely. This revised timeline would allow Texas to make some of the decisions conditional on the legislative session results in early 2027. Then, the legislature could move the transmission decision dates (previously scheduled for April 2027) back well after the legislative session is finalized and new laws are starting to be put into practice. Recall that it took several months post SB6 for it to be implemented.

Figure 6. Catalyst Calendar – Citi View

Event	Dates
Batch Zero Results Announced	December 2026 / Jan 2027
Legislative Session	Jan 12, 2027 to May 31, 2027
Transmission Decision	August / September 2027

Open Issues into 2027 Legislative Session

In Texas, the legislative session is 140 days every two years. The next session is Jan 12, 2027 to May 31, 2027. With the delayed schedule for the Batch Zero process, and datacenters to be front and center in the general public's minds, we expect datacenter-related issues to be on the agenda.

Bring Your Own Generation/Power

In our view, there are not a lot of details behind the Governor's letter around BYOG. The various branches of Texas government will need to work through these issues in the coming months. The ERCOT Batch Zero process is explicitly designed only around transmission connections with current grid availability and does not take into consideration generation and resource adequacy planning.

Datacenters are divided on this issue as some have already procured new generation and others have not. A potential mandate for data centers to BYOG will likely be a political issue in the next legislative session. It is not going to be easy to achieve the objectives of all interested parties at this stage of the process.

In theory, this new policy emphasis may tilt the scale to support projects that come with gas turbines and the ability to get the generation built in a timely fashion.

Water Rights – Easy Political Win

The water usage issue is viewed as an easy political win in Austin as the datacenters are already moving to closed-loop systems, and agreeing to something already being done helps gain public support.

Industry testimony has pointed to closed-loop systems requiring only an initial water charge, rather than the millions of gallons per day associated with older evaporative designs. A formal Texas requirement for closed-loop or water-efficient cooling could therefore be more of a political comfort mechanism than a major operational change for leading developers.

The more material issue may be the water needed for incremental power generation supporting the load, particularly if Texas increasingly relies on gas generation to serve data centers. However, given Texas's history and familiarity with gas generation, we don't think there is any political will to tighten up regulation of water usage associated with incremental gas consumption.

Alternatively, Chair Gleeson commented on the potential need for data centers to build additional reservoirs around the community. Data center developers may ultimately need to participate in broader water infrastructure solutions, not just optimize cooling systems on-site.

Air Permits – Nothing Is Expected to Change

For air permits in Texas, recent conversations in policymaking and datacenter circles indicate that rules may become less stringent in the state, despite the governor letter.

In talking to stakeholders, our view is that any changes to air permit rules would likely be addressed by the EPA at the federal level rather than at the Texas/state level. In theory, the US Supreme Court can take up this issue, but we don't think it will, given there is some precedent around "New Issue" rule. As a result, any changes to air permit rules would likely require federal legislation to be more friendly to gas, which is not likely in the next year given the potential blue wave in the midterm election. Therefore, we do not expect relaxation of air permit rules in the near term.

To put this into context, some Texas data centers are avoiding going through standard air permitting by assembling a fleet of smaller generators below permitting thresholds. For example, the 709 MW Voltagrid facility in Abilene is permitted to operate 24/7 through a fleet of 210 natural gas-fired reciprocating engines while remaining below major-source permitting thresholds. This practice is gaining local opposition, whereas the local community is more familiar with large-scale CCGTs with standard permitting and more efficient power generation.

We think air permits for smaller gas generation running 24/7 are less likely to be well-received in rural communities while large power plants with 40% utilization rates may have an easier time in the media.

Figure 7. Implied Power Generation per Bcf/Day: CCGT vs. Backup Generators

© 2026 Citigroup Inc. No redistribution without Citigroup's written permission.

Source: Citi Research, TCEQ

State Rules on Setbacks/Buffer Zones – Hot Button

Some communities/cities/towns in the state are advocating for setbacks or buffer zone rules that set a minimum distance between a data center and property lines or residential areas, due to concerns over noise, impact on property value, etc.

Currently, this is a local issue and has not historically been addressed by the Governor or state level politics. This is also a hot button issue that few stakeholders are likely willing to touch. Hypothetically, if a bill that mandates setbacks or buffer zones for all data centers is introduced in the next state legislative session, many politicians are likely to feel compelled to publicly add

provisions, which could create a slippery slope, making Texas appear to be more anti datacenter than other states, and may deter future data center investment in the state.

Transmission – Extension of PUCT Approval Timeline Through New Bill Gaining Traction

The current PUCT transmission line approval timeline has bias to move from 180 to 360 days in the next legislative session. Currently, the PUCT has a statutory limit of 180 days to approve each CCN application for transmission lines after they are submitted, which was mandated by the legislature through HB5066 passed in 2023. Before HB5066, the approval timeline was 360 days. During our meeting with PUCT leadership this June, and echoed by our recent expert meeting, we got the impression that the 180-day timeline is less practical and has a bias for delay, and that the legislature may remove the 180-day requirement and restore the 360-day timeline in the next session. As such, we think the 765-kV lines are less likely to hit key approval, construction, and COD milestones outlined in figure below.

Figure 8. 765-kV STEP Project Timeline

Status	Timing	Event
Actual	September 2024	Permian Reliability Plan endorsed by ERCOT
Actual	December 2025	765-kV STEP Eastern & Western Portion endorsed by ERCOT
Actual	December 2025 - March 2026	Utilities submitted Permian transmission lines for PUCT approval
Expected	June 2026 - September 2026	PUCT approval expected for Permian transmission lines
Expected	March 2027 - June 2027	Utilities to submit Eastern & Western transmission lines for PUCT approval
Expected	September 2027 - December 2027	PUCT approval expected for Eastern & Western transmission lines
Expected	December 2028 - December 2030	In-service date for Permian transmission lines
Expected	Summer 2030	In-service date for Western transmission lines
Expected	2030-2032	In-service date for Eastern transmission lines

Which Datacenters are in Batch Zero?

In reality, datacenters don't know if they will be allocated transmission and power from the Batch Zero process at this point. Many of the datacenters have received private letters indicating that they have conditional rights to power if it is available under the Batch Zero process, but it is subject to a number of future decisions.

In our view, datacenters will learn more in a few months and, as a result, we think their development timelines have a bias for delay.

From a regulated utility perspective, companies such as AEP, CenterPoint, and Semptra know how much load they requested and have indicates of where they sit in the process, but they similarly haven't received a formal decision to give them very high confidence in future capital allocation decisions. Yes, they have some collateral received, but a lot of it is refundable.

American Electric Power Co Inc

(AEP.O; US\$126.47; 2; 05 Aug 26; 16:00)

Valuation

Citi values shares of AEP using a DCF-driven SOTP approach. We assign value to the regulated business, which we think deserves a terminal multiple of 19.0x due to its attractive T&D growth. We also assign ~(\$29)/share value to corporate and other assets and effect of tax asset. The rounded sum-of-the-parts gets us to our \$142 target price.

Risks

AEP is subject to a number of risks, including regulatory risk in jurisdictions where it operates regulated utilities, market risk with respect to its unregulated assets, and construction risk with respect to its transmission and other projects under construction.

All these risks may prevent shares of AEP from reaching our target price. Likewise, if any of these factors proves to have less of an effect than we anticipate, the stock could outperform our target.

CenterPoint Energy Inc

(CNP.N; US\$40.65; 2; 05 Aug 26; 16:00)

Valuation

We take an average of multiple valuation methodologies to derive our \$47 price target. We value regulated assets at a multiple of rate base (1.8x for gas based on the recent LDC transaction price, 2x for Houston Electric, and 1.7x for other electric utilities). We use the latest public trading prices for the publicly listed securities. Our DDM values the company at \$49. Our P/E and EV/EBITDA multiples are based on our proprietary analyses, which utilize current equity risk premiums, current betas, and projected risk-free yields. For our P/E analysis, we use multiples of 21.0x earnings for the company's utility. For our EV/EBITDA analysis, we use multiples of 12.0x EBITDA for the company's electric utility assets. Our P/E and EV/EBITDA analyses yield values of \$48 and \$47, respectively.

Risks

The key risks to our investment thesis are: (1) Hurricanes in Texas create new liabilities, impair ROEs, and reduce company earnings. (2) TX and MN Regulatory Environments: The PUCT or MPUC could reduce delivery rates below what we consider to be a reasonable rate of return. (3) Capital Investment Recovery: CNP, relying on future rates, spends capital to maintain and expand utility systems. A politicized commission could delay or put at risk this recovery. (4) Customer Growth: An unexpected increase or decrease in population could affect earnings substantially, either favorably or unfavorably. (5) Capital markets: CenterPoint's outlook is tied to its ability to raise capital at attractive prices to fund its growth in an accretive manner. (6) Changes in Interest Rates: Any future upwards or downwards interest rate

movement could affect valuation substantially, either favorably or unfavorably. And (7) Commodity Prices: commodity prices could impair customer bills and thus the regulatory support for future investment.

If the impact on the company from any of the following factors proves to be greater or less than we anticipate, the company could fail to achieve/exceed our target price.

Constellation Energy Corp

(CEG.N; US\$264.46; 2H; 05 Aug 26; 16:00)

Valuation

Our \$297 target price is a sum of \$36/share value creation from 5GW potential new gas generation buildout, and a weighted average of EV/EBITDA, SOTP, and P/E approaches for the business consisted of legacy Constellation and Calpine. For the existing consolidated business, we use the following approach: 1) EV/EBITDA: We applied a 10.5x EV/EBITDA multiple on our 2028E consolidated EBITDA estimate with 9.5% corporate discount rate to get implied value of \$256/share. 2) SOTP: We applied a 10.5x EV/EBITDA multiple on our 2028E EBITDA estimate for the existing consolidated business with 9.5% discount rate, and a 5% probability of realization on the NPV of all potential data center contracts for CEG's nuclear fleet and 5% probability for consolidated CEG's gas fleet at market premium. We used 5.5% discount rate for both NPV analyses to account for lower counterparty risk once the projects are in flight. This approach yields \$269/share. 3) P/E: We applied a 15x P/E multiple on our 2028E consolidated EPS estimate to get \$259/share.

Risks

We apply a High Risk rating to CEG as the stock is High Risk per our quantitative model. We expect the stock to remain higher risk as market expectations are expected to evolve related to merchant power sales to hyperscalers, the company works to execute on power plant restarts, and power price outlooks remain volatile.

Risks to the CEG stock deviating from our target price include:

- Commodity Price Volatility & Hedging Risk: Constellation has material exposure to power, gas, uranium, and oil prices which are inherently volatile and difficult to predict. Although partially offset by hedging, changes to commodity prices could drive material changes to earnings and free cash flow. Constellation's hedging strategy could introduce new risks.
- Policy Risk: Constellation is subsidized by various state and federal credits for nuclear generation, and could be subject to higher exposure to volatile returns if these subsidies roll off earlier than expected. Negative political, regulatory, or public sentiment toward behind-the-meter deals with datacenters could reduce Constellation's possibility of contracting deals which could diminish future growth profile. Sentiment towards nuclear and oil/gas generation could impact Constellation's generation profile and operating/capital allocation decisions.

- Execution Risk: The Crane (TMI) restart is exposed to permitting/licensing risk, financing risk, and operational risk. A delayed or cancelled restart with cost overruns could impact future earnings and cash flow growth profile.
- Capital Markets & Financing Risk: Constellation's execution of its share repurchase program, growth capex, and other capital allocation decisions are subject to capital market conditions and investor valuation of its business. If there is a material change to Constellation's business outlook as a result of the risks above, its access to capital markets could change as well.
- Counterparty Risk: If Constellation's power offtakers (utilities, retail customers, and potentially datacenter developers) fail to honor contract obligations, Constellation could be subject to financial losses.

Surprises to the upside/downside on these fronts could cause the stock to exceed/not reach our TP.

NRG

(NRG.N; US\$120.73; 1; 05 Aug 26; 16:00)

Valuation

We arrive at our target price of \$180 through a blended average of a sum-of-the-parts valuation, an EV/EBITDA multiple, and a P/E multiple, incorporating recent acquisitions. We derive a value from our SOTP analysis: we value Generation and Retail through a DCF, and we value Vivint through its transaction price, and we subtract to account for Holdco debt. We derive a value through the EV/EBITDA multiple approach, applying a 8.0x multiple on 2027 EBITDA to reflect value accretive new build power plants, constructive view of Texas sparks, and the scarcity value of public IPPs. We also applied a 16.0x P/E multiple on 2027 adjusted EPS estimate. On top of these, we add \$20 to all valuation approaches to account for NPV of potential datacenter deals and potential interconnection sales.

Risks

Wholesale Power Market Risk – NRG is exposed to power market fluctuations as it operates its merchant business. Generated power without long-term contracts (i.e., hedges) will be sold at wholesale market prices and could get lower or higher merchant power prices depending on the market conditions. As datacenter growth is forecasted to drive incremental power demand and rising power prices, there are risks to the stock story if datacenter load growth doesn't materialize.

Commodity Risk – The changes in natural gas, coal, oil, and other commodity prices, which are beyond the company's control, can significantly impact profitability of NRG. The company relies on its coal, oil, gas and other fuel suppliers to generate power; hence, these counterparties are essential for continuing operation of the company.

Operational Risk – NRG sells forward a significant amount of its generating capacity and can incur substantial penalties if it is not be able to deliver on these obligations.

Execution Risk – Execution of Vivint integration/synergies through cross-

selling, organic growth through margin enhancement, and cost cutting is a key risk.

Capital allocation decisions and market dynamics for IPPs are also critical.

If the impact of the above risks turns out to be greater/less than we expect, the shares could fail to achieve/exceed our target price.

Sempra

(SRE.N; US\$84.66; 2; 05 Aug 26; 16:00)

Valuation

We average four multiple valuation methodologies to derive our \$99 target price. Our SOTP yields a value of \$97. We apply an appropriate valuation metric for each asset in the SOTP approach that varies between P/E, EBITDA multiple, and trading value, based on the business we are valuing. These values are partially offset by the company's net debt and preferred shares. Our DDM values the company at \$89. Our P/E and EV/EBITDA multiples are based on analyses of current equity risk premiums, current betas, and projected risk-free yields. For our P/E analysis, we apply multiples to 2027 earnings at the utility and infrastructure segments. Our P/E analysis yields a value of \$99. For our EV/EBITDA analysis, we apply multiples to 2027 California and Texas utility EBITDA. Our EV/EBITDA analysis yields a value of \$111.

Risks

The key risks to our investment thesis are as follows: (1) The utilities are subject to regulation from federal, state, and local authorities, which may impose rulings adverse to Sempra's interests. (2) Uncertainty in the contracting of capacity on expansions at the company's LNG facilities may negatively impact earnings in the coming years, along with changes in the regulatory outlook toward exporting gas. (3) Sempra is exposed to currency issues in Mexico, and earnings could be impacted by significant volatility in the value of the Mexican peso. (4) The ability to access debt or equity markets at a reasonable cost in the future could materially impact growth in the future. (5) Cameron construction delays could further reduce earnings outlook over the next few years. In addition, we view the following risks: (6) Mexico administration changes the course of energy reform to IEnova's detriment; (7) the City of San Diego and CPUC move forward with community choice aggregation and SDG&E is unable to recover stranded costs; and (8) a fire hits SDG&E and/or there is an unfavorable resolution to the wildfire cases (legislature, courts, CPUC, executive branch).

If the impact on the company from any of these factors proves to be greater/less than we anticipate, it may prevent the stock from achieving/exceeding our target price.

Citigroup Global Markets Inc. and/or its affiliates has a significant financial interest in relation to American Electric Power Co Inc, Constellation Energy Corp, NRG. (For an explanation of the determination of significant financial interest, please refer to the policy for managing conflicts of interest which can be found at www.citiVelocity.com.)

Analysts' compensation is determined by Citi Research management and Citigroup's senior management and is based upon activities and services intended to benefit the investor clients of Citigroup Global Markets Inc. and its affiliates (the "Firm").

Compensation is not linked to specific transactions or recommendations. Like all Firm employees, analysts receive compensation that is impacted by overall Firm profitability which includes investment banking, sales and trading, and principal trading revenues. One factor in equity research analyst compensation is arranging corporate access events between institutional clients and the management teams of covered companies. Typically, company management is more likely to participate when the analyst has a positive view of the company.

For financial instruments recommended in the Product in which the Firm is not a market maker, the Firm is a liquidity provider in such financial instruments (and any underlying instruments) and may act as principal in connection with transactions in such instruments. The Firm is a regular issuer of traded financial instruments linked to securities that may have been recommended in the Product. The Firm regularly trades in the securities of the issuer(s) discussed in the Product. The Firm may engage in securities transactions in a manner inconsistent with the Product and, with respect to securities covered by the Product, will buy or sell from customers on a principal basis.

Unless stated otherwise neither the Research Analyst nor any member of their team has viewed the material operations of the Companies for which an investment view has been provided within the past 12 months.

Within the previous 12 months, Ryan Levine, Analyst, and/or members of their team have viewed the material operations of Semptra and were not reimbursed by the company for expenses associated with the visit.

Within the previous 12 months, Xinru Yin, Senior Associate, and/or members of their team have viewed the material operations of Semptra and were not reimbursed by the company for expenses associated with the visit.

For important disclosures (including copies of historical disclosures) regarding the companies that are the subject of this Citi Research product ("the Product"), please contact Citi Research, 388 Greenwich Street, 6th Floor, New York, NY, 10013, Attention: Legal/Compliance [E6WYB6412478]. In addition, the same important disclosures, with the exception of the Valuation and Risk assessments and historical disclosures, are contained on the Firm's disclosure website at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures. Valuation and Risk assessments can be found in the text of the most recent research note/report regarding the subject company. Pursuant to the Market Abuse Regulation a history of all Citi Research recommendations published during the preceding 12-month period can be accessed via Citi Velocity (<https://www.citivelocity.com/cv2>) or your standard distribution portal. Historical disclosures (for up to the past three years) will be provided upon request.

Citi Research Equity Ratings Distribution

Data current as of 01 Jul 2026	12 Month Rating			Catalyst Watch		
	Buy	Hold	Sell	Buy	Hold	Sell
Citi Research Global Fundamental Coverage (Neutral=Hold)	61%	32%	7%	36%	48%	16%
% of companies in each rating category that are investment banking clients	38%	42%	27%	42%	37%	36%

Guide to Citi Research Fundamental Research Investment Ratings:

Citi Research stock recommendations include an investment rating and an optional risk rating to highlight high risk stocks.

Risk rating takes into account both price volatility and fundamental criteria. Stocks will either have no risk rating or a High risk rating assigned.

Investment Ratings: Citi Research investment ratings are Buy, Neutral and Sell. Our ratings are a function of analyst expectations of expected total return ("ETR") and risk. ETR is the sum of the forecast price appreciation (or depreciation) plus the dividend yield for a stock within the next 12 months. The target price is based on a 12 month time horizon. The Investment rating definitions are: Buy (1) ETR of 15% or more or 25% or more for High risk stocks; and Sell (3) for negative ETR. Any covered stock not assigned a Buy or a Sell is a Neutral (2). For stocks rated Neutral (2), if an analyst believes that there are insufficient valuation drivers and/or investment catalysts to derive a positive or negative investment view, they may elect with the approval of Citi Research management not to assign a target price and, thus, not derive an ETR. Citi Research may suspend its rating and target price and assign "Rating Suspended" status for regulatory and/or internal policy reasons. Citi Research may also suspend its rating and target price and assign "Under Review" status for other exceptional circumstances (e.g. lack of information critical to the analyst's thesis, trading suspension) affecting the company and/or trading in the company's securities. In both such situations, the rating and target price will show as "—" and "—" respectively in the rating history price chart. Prior to 11 April 2022 Citi Research assigned "Under Review" status to both situations and prior to 11 Nov 2020 only in exceptional circumstances. As soon as practically possible, the analyst will publish a note re-establishing a rating and investment thesis. Investment ratings are determined by the ranges described above at the time of initiation of coverage, a change in investment and/or risk rating, or a change in target price (subject to limited management discretion). At times, the expected total returns may fall outside of these ranges because of market price movements and/or other short-term volatility or trading patterns. Such interim deviations will be permitted but will become subject to review by Research Management. Your decision to buy or sell a security should be based upon your personal investment objectives and should be made only after evaluating the stock's expected performance and risk.

Catalyst Watch/Short Term Views ("STV") Ratings Disclosure:

Catalyst Watch and STV Upside/Downside calls: Citi Research may also include a Catalyst Watch or STV Upside or Downside call to indicate the analyst expects the share price to rise (fall) in absolute terms over a specified period of 30 or 90 days in reaction to one or more specific near-term catalysts or events impacting the company or the market. A Catalyst Watch will be published when Analyst confidence is high that an impact to share price will occur; it will be a STV when confidence level is moderate. A Catalyst Watch or STV Upside/Downside call will automatically expire at the end of the specified 30/90 day period. The Catalyst Watch will also be automatically removed if share price performance (calculated at market close) exceeds

15% against the direction of the call (unless over-ridden by the analyst). The analyst may also remove a Catalyst Watch or STV call prior to the end of the specified period in a published research note. A Catalyst Watch/STV Upside or Downside call may be different from and does not affect a stock's fundamental equity rating, which reflects a longer-term total absolute return expectation. For purposes of FINRA ratings-distribution-disclosure rules, a Catalyst Watch/STV Upside call corresponds to a buy recommendation and a Catalyst Watch/STV Downside call corresponds to a sell recommendation. Any stock not assigned to a Catalyst Watch Upside, Catalyst Watch Downside, STV Upside, or STV Downside call is considered Catalyst Watch/STV No View. For purposes of FINRA ratings distribution-disclosure rules, we correspond Catalyst Watch/STV No View to Hold in our ratings distribution table for our Catalyst Watch/STV Upside/Downside rating system. However, we reiterate that we do not consider No View to be a recommendation. For all Catalyst Watch/STV Upside/Downside calls, risk exists that the catalyst(s) and associated share-price movement will not materialize as expected.

RESEARCH ANALYST AFFILIATIONS / NON-US RESEARCH ANALYST DISCLOSURES

The legal entities employing the authors of this report are listed below (and their regulators are listed further herein). Non-US research analysts who have prepared this report (i.e., all research analysts listed below other than those identified as employed by Citigroup Global Markets Inc.) are not registered/qualified as research analysts with FINRA. Such research analysts may not be associated persons of the member organization (but are employed by an affiliate of the member organization) and therefore may not be subject to the FINRA Rule 2241 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Citigroup Global Markets Inc.

Xinru Yin; Ryan Levine; Amber Zhao

OTHER DISCLOSURES

Any price(s) of instruments mentioned in recommendations are as of the prior day's market close on the primary market for the instrument, unless otherwise stated.

The completion and first dissemination of any recommendations made within this research report are as of the Eastern date-time displayed at the top of the Product. If the Product references views of other analysts then please refer to the price chart or rating history table for the date/time of completion and first dissemination with respect to that view.

Regulations in various jurisdictions require that where a recommendation differs from any of the author's previous recommendations concerning the same financial instrument or issuer that has been published during the preceding 12-month period that the change(s) and the date of that previous recommendation are indicated. For fundamental coverage please refer to the price chart or rating change history within this disclosure appendix or the issuer disclosure summary at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures.

Citi Research has implemented policies for identifying, considering and managing potential conflicts of interest arising as a result of publication or distribution of investment research. A description of these policies can be found at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures.

The proportion of all Citi Research research recommendations that were the equivalent to "Buy", "Hold", "Sell" at the end of each quarter over the prior 12 months (with the % of these that had received investment firm services from Citi in the prior 12 months shown in brackets) is as follows; Q1 2026 Buy 33%(63%), Hold 44% (52%), Sell 23% (46%), RV 0.5% (89%); Q4 2025 Buy 33% (63%), Hold 44% (50%), Sell 23% (46%), RV 0.4% (91%); Q3 2025 Buy 33% (61%), Hold 44% (52%), Sell 23% (50%), RV 0.4% (80%); Q2 2025 Buy 33%(63%), Hold 44% (51%), Sell 23% (49%), RV 0.4% (86%). For the purposes of disclosing recommendations other than for equity (whose definitions can be found in the corresponding disclosure sections), "Buy" means a positive directional trade idea; "Sell" means a negative directional trade idea; and "Relative Value" means any trade idea which does not have a clear direction to the investment strategy.

European regulations require a 5 year price history when past performance of a security is referenced. CitiVelocity's Charting Tool (https://www.citivelocity.com/cv2/#go/CHARTING_3_Equities) provides the facility to create customisable price charts including a five year option. This tool can be found in the Data & Analytics section under any of the asset class menus in CitiVelocity (<https://www.citivelocity.com/>). For further information contact CitiVelocity support (https://www.citivelocity.com/cv2/go/CLIENT_SUPPORT). The source for all referenced prices, unless otherwise stated, is DataCentral, which sources price information from LSEG Data & Analytics. Past performance is not a guarantee or reliable indicator of future results. Forecasts are not a guarantee or reliable indicator of future performance.

Investors should always consider the investment objectives, risks, and charges and expenses of an ETF carefully before investing. The applicable prospectus and key investor information document (as applicable) for an ETF should contain this and other information about such ETF. It is important to read carefully any such prospectus before investing. Clients may obtain prospectuses and key investor information documents for ETFs from the applicable distributor or authorized participant, the exchange upon which an ETF is listed and/or from the applicable website of the applicable ETF issuer. The value of the investments and any accruing income may fall or rise. Any past performance, prediction or forecast is not indicative of future or likely performance. Any information on ETFs contained herein is provided strictly for illustrative purposes and should not be deemed an offer to sell or a solicitation of an offer to purchase units of any ETF either explicitly or implicitly. The opinions expressed are those of the authors and do not necessarily reflect the views of ETF issuers, any of their agents or their affiliates.

Citigroup Global Markets India Private Limited and/or its affiliates may have, from time to time, actual or beneficial ownership of 1% or more in the debt securities of the subject issuer.

Please be advised that pursuant to Executive Order 13959 as amended (the "Order"), U.S. persons are prohibited from investing in securities of any company determined by the United States Government to be the subject of the Order. This research is not intended to be used or relied upon in any way that could result in a violation of the Order. Investors are

encouraged to rely upon their own legal counsel for advice on compliance with the Order and other economic sanctions programs administered and enforced by the Office of Foreign Assets Control of the U.S. Treasury Department.

This communication is directed at persons who are "Eligible Clients" as such term is defined in the Israeli Regulation of Investment Advice, Investment Marketing and Investment Portfolio Management law, 1995 (the "Advisory Law"). Within Israel, this communication is not intended for retail clients and Citi will not make such products or transactions available to retail clients or to non-Eligible Clients. The presenter is not licensed as investment advisor or investment marketer by the Israeli Securities Authority ("ISA") and this communication does not constitute investment or marketing advice. The information contained herein may relate to matters that are not regulated by the ISA. Any securities which are the subject of this communication may not be offered or sold to any Israeli person except pursuant to a security offering exemption according to the Israeli Securities Law, 1968 and the public offering rules provided thereunder.

Citi Research broadly and simultaneously disseminates its research content to the Firm's institutional and retail clients via the Firm's proprietary electronic distribution platforms (e.g., Citi Velocity and various Global Wealth platforms). As a convenience, certain, but not all, research content may be distributed through third party aggregators. Clients may receive published research reports by email, on a discretionary basis, and only after such research content has been broadly disseminated. Certain research is made available only to institutional investors to satisfy regulatory requirements. The level and types of services provided by Citi Research analysts to clients may vary depending on various factors such as the client's individual preferences as to the frequency and manner of receiving communications from analysts, the client's risk profile and investment focus and perspective (e.g. market-wide, sector specific, long term, short-term etc.), the size and scope of the overall client relationship with the Firm and legal and regulatory constraints.

Pursuant to Comissão de Valores Mobiliários Resolução 20 and ASIC Regulatory Guide 264, Citi is required to disclose whether a Citi related company or business has a commercial relationship with the subject company. Considering that Citi operates multiple businesses in more than 100 countries around the world, it is likely that Citi has a commercial relationship with the subject company.

Securities recommended, offered, or sold by the Firm: (i) are not insured by the Federal Deposit Insurance Corporation; (ii) are not deposits or other obligations of any insured depository institution (including Citibank); and (iii) are subject to investment risks, including the possible loss of the principal amount invested. The Product is for informational purposes only and is not intended as an offer or solicitation for the purchase or sale of a security. Any decision to purchase securities mentioned in the Product must take into account existing public information on such security or any registered prospectus. Although information has been obtained from and is based upon sources that the Firm believes to be reliable, we do not guarantee its accuracy and it may be incomplete and condensed. Note, however, that the Firm has taken all reasonable steps to determine the accuracy and completeness of the disclosures made in the Important Disclosures section of the Product. The Firm's research department has received assistance from the subject company(ies) referred to in this Product including, but not limited to, discussions with management of the subject company(ies). Firm policy prohibits research analysts from sending draft research to subject companies. However, it should be presumed that the author of the Product has had discussions with the subject company to ensure factual accuracy prior to publication. Statements and views concerning ESG (environmental, social, governance) factors are typically based upon public statements made by the affected company or other public news, which the author may not have independently verified. ESG factors are one consideration that investors may choose to examine when making investment decisions. All opinions, projections and estimates constitute the judgment of the author as of the date of the Product and these, plus any other information contained in the Product, are subject to change without notice. Prices and availability of financial instruments also are subject to change without notice. Notwithstanding other departments within the Firm advising the companies discussed in this Product, information obtained in such role is not used in the preparation of the Product. Although Citi Research does not set a predetermined frequency for publication, if the Product is a fundamental equity or credit research report, it is the intention of Citi Research to provide research coverage of the covered issuers, including in response to news affecting the issuer. For non-fundamental research reports, Citi Research may not provide regular updates to the views, recommendations and facts included in the reports. Notwithstanding that Citi Research maintains coverage on, makes recommendations concerning or discusses issuers, Citi Research may be periodically restricted from referencing certain issuers due to legal or policy reasons. Where a component of a published trade idea is subject to a restriction, the trade idea will be removed from any list of open trade ideas included in the Product. Upon the lifting of the restriction, the trade idea will either be re-instated in the open trade ideas list if the analyst continues to support it or it will be officially closed. Citi Research may provide different research products and services to different classes of customers (for example, based upon long-term or short-term investment horizons) that may lead to differing conclusions or recommendations that could impact the price of a security contrary to the recommendations in the alternative research product, provided that each is consistent with the rating system for each respective product.

Investing in non-U.S. securities, including ADRs, may entail certain risks. The securities of non-U.S. issuers may not be registered with, nor be subject to the reporting requirements of the U.S. Securities and Exchange Commission. There may be limited information available on foreign securities. Foreign companies are generally not subject to uniform audit and reporting standards, practices and requirements comparable to those in the U.S. Securities of some foreign companies may be less liquid and their prices more volatile than securities of comparable U.S. companies. In addition, exchange rate movements may have an adverse effect on the value of an investment in a foreign stock and its corresponding dividend payment for U.S. investors. Net dividends to ADR investors are estimated, using withholding tax rates conventions, deemed accurate, but investors are urged to consult their tax advisor for exact dividend computations. Investors who have received the Product from the Firm may be prohibited in certain states or other jurisdictions from purchasing securities mentioned in the Product from

the Firm. Please ask your Financial Consultant for additional details. Citigroup Global Markets Inc. takes responsibility for the Product in the United States. Any orders by US investors resulting from the information contained in the Product may be placed only through Citigroup Global Markets Inc.

The Citigroup legal entity that takes responsibility for the production of the Product is the legal entity which the first named author is employed by.

Tekfen Tower, Eski Büyükdere Caddesi # 209 Kat 2B, 23294 Levent, Istanbul, Turkey. Under Capital Markets Law of Turkey (Law No: 6362), the investment information, comments and recommendations stated here, are not within the scope of investment advisory activity. Comments and recommendations stated here rely on the individual opinions of the ones providing these comments and recommendations. These opinions may not fit to your financial

status, risk and return preferences. For this reason, to make an investment decision by relying solely to this information stated here may not bring about outcomes that fit your expectations. Furthermore, Citi Research is a division of Citigroup Global Markets Inc. (the "Firm"), which does and seeks to do business with companies and/or trades on securities covered in this research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report, however investors should also note that the Firm has in place organisational and administrative arrangements to manage potential conflicts of interest of this nature.

In the **U.A.E**, these materials (the "Materials") are communicated by Citigroup Global Markets Limited, DIFC branch ("CGML"), an entity registered in the Dubai International Financial Center ("DIFC") and licensed and regulated by the Dubai Financial Services Authority ("DFSA", license #CLO221) to Professional Clients and Market Counterparties, as defined in DFSA regulations, only and should not be relied upon or distributed to Retail Clients. Financial products and/or services to which the Materials relate will only be made available to Professional Clients and Market Counterparties. Citigroup Global Markets Limited DIFC Branch registered address is Level 3, Gate District Building 02, Dubai International Financial Centre and can be contacted on +971 4 509 97 90.

The Product is made available in **United Kingdom** by Citigroup Global Markets Limited, which is authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority ("FCA") and the PRA. This material may relate to investments or services of a person outside of the UK or to other matters which are not authorised by the PRA nor regulated by the FCA and the PRA and further details as to where this may be the case are available upon request in respect of this material. Citigroup Centre, Canada Square, Canary Wharf, London, E14 5LB.

The Product is made available in **United States** and **Canada** by Citigroup Global Markets Inc., which is a member of FINRA and registered with the US Securities and Exchange Commission. 388 Greenwich Street, New York, NY 10013.

Unless specified to the contrary, within EU Member States, the Product is made available by Citigroup Global Markets Europe AG ("CGME"), which is regulated by the European Central Bank and the German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht-BaFin).

The Product is not to be construed as providing investment services in any jurisdiction where the provision of such services would not be permitted.

Subject to the nature and contents of the Product, the investments described therein are subject to fluctuations in price and/or value and investors may get back less than originally invested. Certain high-volatility investments can be subject to sudden and large falls in value that could equal or exceed the amount invested. The yield and average life of CMOs (collateralized mortgage obligations) referenced in this Product will fluctuate depending on the actual rate at which mortgage holders prepay the mortgages underlying the CMO and changes in current interest rates. Any government agency backing of the CMO applies only to the face value of the CMO and not to any premium paid. Certain investments contained in the Product may have tax implications for private customers whereby levels and basis of taxation may be subject to change. If in doubt, investors should seek advice from a tax adviser. The Product does not purport to identify the nature of the specific market or other risks associated with a particular transaction. Advice in the Product is general and should not be construed as personal advice given it has been prepared without taking account of the objectives, financial situation or needs of any particular investor. Accordingly, investors should, before acting on the advice, consider the appropriateness of the advice, having regard to their objectives, financial situation and needs. Prior to acquiring any financial product, it is the client's responsibility to obtain the relevant offer document for the product and consider it before making a decision as to whether to purchase the product.

Card Insights. Where this report references Card Insights data, Card Insights consists of selected data from a subset of Citi's proprietary credit card transactions. Such data has undergone rigorous security protocols to keep all customer information confidential and secure; the data is highly aggregated and anonymized so that all unique customer identifiable information is removed from the data prior to receipt by the report's author or distribution to external parties. This data should be considered in the context of other economic indicators and publicly available information. Further, the selected data represents only a subset of Citi's proprietary credit card transactions due to the selection methodology or other limitations and should not be considered as indicative or predictive of the past or future financial performance of Citi or its credit card business.

Citi Research product may source data from dataCentral. dataCentral is a Citi Research proprietary database, which includes the Firm's estimates, data from company reports and feeds from LSEG Data & Analytics. The source for all referenced prices, unless otherwise stated, is dataCentral. Past performance is not a guarantee or reliable indicator of future results. Forecasts are not a guarantee or reliable indicator of future performance. The printed and printable version of the research report may not include all the information <(e.g. certain financial summary information and comparable company data) that is linked to the online version available on the Firm's proprietary electronic distribution platforms.

Where included in this report, MSCI sourced information is the exclusive property of Morgan Stanley Capital International Inc. (MSCI). Without prior written permission of MSCI, this information and any other MSCI intellectual property may not be reproduced, disseminated or used to create any financial products, including any indices.
