Sustained earnings upward revision

Top line growth to more than offset profitability pressure; multiple AI/HPC projects to ramp up from 2H26

Maintain Buy with a higher TP of TWD9,000

WinWay reported 2Q26 results on 6 Aug, with GM of 38% which missed already bearish Nomura/Bloomberg forecasts (39/40%, vs. 43% in 1Q26). We warned about a possible narrowed GM in 2Q in our *report*, but the q-q decline in GM was steeper-than-expected, likely due to higher costs associated with its capacity scale up, apart from a higher mix of MEMS probe cards. While profitability has softened and may not quickly recover, the July revenue print announced yesterday was notably strong (TWD1,600mn, reaching 40% of the 3Q26E consensus revenue estimate), underscoring the resilience of underlying demand. We highlight a substantial number of projects is set to ramp up in 2H26E and beyond, pointing to a robust order book and healthy business momentum. As a result, we believe the company's overall operations remain firmly on track. The company also continues to expand capacity to keep pace with customer demand and capture growth opportunity. We estimate WinWay's socket capacity will at least double y-y in 2026F and 2027F.

Growth trajectory remains intact and can more than compensate GM headwinds

In short, we believe WinWay has been one of the key beneficiaries of the AI/HPC boom and rising chip complexity, particularly with Agentic AI driving substantial CPU demand as well (see details in our *Advanced Semi Testing report*). We raise 2026-28F EPS by 6-9%, mainly to account for top line expansion, while also taking into account GM pressure (we model 39.6%/41.3%/42.3% for 2026F/27F/28F vs previously 41%/43.6%/44.7%). With our earnings upward revision, our new TP is TWD9,000, still based on 32x 2027-28F average EPS. The stock now trades at 24x 2027-28F EPS. WinWay's share price has corrected ~40% from the Apr peak (vs. TAIEX up 20%), with improving risk-reward supporting our positive stance. We reiterate Buy on WinWay.

Company profile

Established in 2001 in Kaohsiung, WinWay started its business with test fixtures for optoelectronic products, and subsequently expanded into high-end test sockets for logic ICs, later adding probe cards and thermal control solutions.

Valuation Methodology

Our TP of TWD9,000 is based on 32x average 2027-28F EPS, which is the mid end of its historical range. The benchmark index is TAIEX.

Risks that may impede the achievement of the target price

Major downside risks to WinWay include 1) weaker demand in AI/HPC market or slowdown of AI proliferation, 2) fierce competition in test interface market and share loss, and 3) worse-than-expected profitability

ESG

WinWay's ESG efforts center on operational resource efficiency — in 2023 it cut water usage by 28.9% and sourced 15% of electricity from green energy, alongside ISO 14001/45001 certifications. As a TWSE-listed company it publishes an annual sustainability report, though it has no public RE100 or net-zero commitment, reflecting earlier-stage ESG maturity versus larger peers.
