

Energy, Utilities & Mining Pulse: Investors Asking: Where Are We Seeing Green Shoots of Interest on Emerging Themes?

As we near the end of this earnings cycle, we begin to examine emerging themes where we are seeing incremental interest from investors. We ask our senior analysts to identify these emerging themes within their respective sub-sectors, and discuss how they envision these themes playing out. Our teams also discuss stocks across their coverage that are exposed to each emerging theme and to provide stock recommendations to express their view on the topic.

Themes and stocks discussed include:

Clean Technology: Trade policies in clean energy; **FSLR**

Energy Services: Increasing offshore capex; **XPRO**

E&Ps: Natural gas demand; **EQT**

Majors & Refiners: Incremental refining runs in China; **MPC**

Metals & Mining: Incremental steel capacity impact on prices; **NUE**

Midstream: Produced water beneficial reuse; **WBI**

Utilities: Texas power and ERCOT pricing; **NRG**

Clean Technology:

Within the Clean Tech sector, we are seeing incremental interest from investors regarding trade policy across the sector. Investors had been particularly interested in understanding the potential timing on the ongoing Section 232 investigation on polysilicon, as well as the potential outcomes and implications to the market on both a solar pricing standpoint and potential demand destruction angle. Importantly, there was a decision on Section 232 post-close on Thursday ([link here](#)) where President Trump imposed minimum import prices and ad valorem tariffs that imply a ~\$0.44/w import price for modules (all-in, excl. AD/CVD and other tariffs), based on our estimates. Additionally, there has been interest in the FCC's recent ban on imported inverters, and potential market implications to both market share gains for incumbents as well as any demand impacts. We note that given leading market share for domestic players within the resi market, this ban should be most impactful for the C&I and utility-scale markets. Within our coverage, we see **FSLR** as most exposed to the S232 investigation, and best positioned to benefit from an outcome, not just from opportunities to increase prices, but also because the company has deferred

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. For Reg AC certification and other important disclosures, see the Disclosure Appendix, or go to www.gs.com/research/hedge.html. Analysts employed by non-US affiliates are not registered/qualified as research analysts with FINRA in the U.S.

booking volumes beyond the 2028 timeframe pending this decision. This decision will also help inform a decision on its idled capacity in Southeast Asia. Separately, we see **NXT**, **SEDG**, and **ENPH** as beneficiaries of the FCC ban on imports of new inverter products. We note that NXT recently acquired an inverter company, providing a unique opportunity, while SEDG maintains material market share in the C&I segment, and ENPH recently entered the market.

Energy Services:

As we screen for positive rate of change in activity, we highlight the offshore market which we believe will grow to be a larger theme among OFS into 2027. With incremental production coming from continued development in offshore fields, we anticipate to see increasing spend from NOCs and IOCs for offshore development and production over the next 12 months. As estimated in the Top Projects report, we see the potential for 6%/10% increase in offshore capex in 2027/2028, largely driven by offshore developments in Brazil, offshore Africa, and offshore Middle East. We see this theme playing out over the next several years, and continue to look for catalysts in new rig tenders, offshore contract awards, and capital spend plans. We view **XPRO** and **FTI** as the main beneficiaries of this theme, as XPRO sees ~70% of its revenue generated from offshore operations, and FTI remains the largest player in the subsea space. FTI continues to see the potential for larger FIDs in the offshore space over the next several years, which we view as a positive catalyst for the stock, as we see large FIDs contributing to orders in 2027 and outer years.

E&Ps:

Within the E&P sub-sector, we have seen incremental interest around the possible implications of a material demand inflection for US natural gas driven by the LNG and power themes, including some investors debating the potential for prolonged periods of elevated pricing in 2028+. This investor debate has stirred up incremental interest across our Gas E&P coverage, as the sub-sector has underperformed the broader energy sector year-to-date (Gas E&Ps -8% vs XLE 30% YTD). Across the sub-sector, we see robust ability for producers to grow natural gas supply given the quality and depth of inventory seen across much of the industry. Furthermore, we continue to see increasing GOR rates in oil producing basins, particularly in the Permian Basin, where associated gas volumes from the basin is expected to add material supply to the US natural gas market in FY2026 as incremental Permian takeaway pipeline capacity comes online. We remain constructive on the potential for significant natural gas demand growth in the US, however, we have historically seen natural gas supply surprise to the upside during periods of historic demand inflections and believe there is ample capacity from producers to see a similar dynamic play out. As a result, we continue to highlight **EQT** as a quality operator in the low-cost Appalachian Basin, as the company continues to invest organically to lower the cost structure of the business alongside continued execution to market and commercialize its natural gas supply.

Majors & Refiners:

Within the Integrated Oil & Refining complex, a theme getting increasingly more attention in our investor conversations is the risk surrounding incremental refining runs in China and the government relaxing its refined product export restrictions, potentially weighing on refining margins on the go-forward. In particular, US West Coast product

margins have been an area of focus, with equities like MPC, PBF, PARR, & DINO recurring in investor conversations. While we remain mindful of the risks surrounding a potential shift in export policy, we note our macro team and our APAC counterparts still do not expect a significant change given the country's ongoing focus on (a) energy security and (b) its transition from petroleum to petrochemicals. In addition, VLO reported its traders are seeing no material changes in exports leaving the region during its 2Q26 earnings call. That said, we recommend investors who are bullish on the refining outlook to reflect this theme through larger cap equities, **MPC** and **VLO**, given both companies' balance sheet strength, track record of execution, Gulf Coast exposure, and ongoing commitment to return of capital. Lastly, while we are mindful of YTD outperformance, we still see room for positive consensus estimate revisions which we ultimately expect to support share performance, where we highlight we are ~19%/14% above 2028 FactSet EPS consensus for MPC/VLO, respectively.

Metals & Mining:

Capacity and oversupply has begun to emerge as a theme of interest across the US steel space. As July has passed and USMCA negotiations were a non-event, investors have now shifted focus to fundamentals when looking forward into 2027 pricing. Capacity additions is beginning to emerge as a theme across the space as we get closer to 2027. According to a presentation by US Steel, Big River 2 shipped ~484k net tons in 1Q26 and **NUE** is set to ramp up capacity of WV in 2027, targeting a 50% capacity exit rate which we estimate will produce roughly ~800kt of flat roll in 2027. As a result, we expect markets to remain tight, as we have seen finished flat roll imports decline by ~4mn tons while US flat roll steel demand is expected to increase ~2mn tons per NUE management commentary. Even if flat roll steel imports rebound by 2-3mn tons, we anticipate market tightness lasts through 2027. As a result, we anticipate investors to begin to underwrite higher 2027 pricing across the steel complex.

Midstream:

We see increasing interest in the development of alternative use cases for produced water, particularly for data center and power cooling, alongside other beneficial reuse applications. Among our coverage, **WBI** and **LB** are the most exposed to capitalize on the emerging theme. On the data center front, investor focus is centering on the potential role of treated produced water in supporting the net-zero water and sustainability initiatives of major hyperscalers. Historically, we viewed beneficial reuse as a longer-dated upside due to high desalination and treatment costs relative to traditional recycling or disposal, compounded by a lack of regulatory support. However, rising seismic activity and subsurface pressure constraints have accelerated the push toward desalination. To that point, we are seeing tangible regulatory progress in Texas under the Texas Commission on Environmental Quality (TCEQ) to establish water quality and permit qualifications for treated produced water. Most recently for beneficial reuse cases, we have seen increasing potential for treated water discharge under Texas Pollutant Discharge Elimination System (TPDES) permits, which allow for discharge into local river streams (Texas Pacific Land and NGL Energy Partners have both applied for a TPDES permit this year). We expect further regulatory milestones and ESG mandates of data center developers to accelerate this market. We view WBI and LB as best positioned to benefit from this momentum through their highly integrated business models. WBI provides the critical water volume and treatment capabilities required to address customers potential ESG concerns. Meanwhile, LB provides the essential surface

acreage, pore space capacity, and access to brackish water supply. As Permian water intensity rises and data center cooling demand could improve over time, these beneficial reuse cases provide incremental revenue streams for both companies as higher spec treatment becomes more commercially viable.

Utilities:

Following the Texas Governor's August 3 directive to audit all data center projects looking to connect to the ERCOT power grid, a debate has sparked among investors around the outlook for the power demand and pricing trajectory in ERCOT as well as the potential impacts to utilities and IPPs operating in ERCOT. The main concern from investors is that if the data center audit ultimately causes data center customers to locate their facilities elsewhere and power demand in Texas does not materialize to the level many expect, driving ERCOT to remain well supplied and thus leaving power prices weaker on a relative basis vs. PJM. We ultimately still believe that given the abundant land, resource, and relatively streamlined permitting processes in Texas, it is still an attractive market longer term for data center customers. In terms of stock implications, among the IPPs, **NRG**, **VST**, and **CEG** are exposed to Texas, and for regulated utilities in our coverage, the main exposed stocks are **SRE** via its Oncor utility, as well as **AEP**. For the IPPs, the debate is around whether or not they will (1) be able to lock in data center PPAs and (2) could see downside risk to earnings guidance in the event power prices remain soft in ERCOT. For the regulated utilities, the concern is around potential downside risk to utility capital investment plans in Texas to accommodate large load customers, though we note SRE has indicated data center load is more of an upside driver vs. a driver already captured in their base capital plan, and AEP has highlighted \$10 bn of incremental capex opportunities relative to their base plan outside of Texas that potentially could backfill in the event any Texas spend was pushed out or reallocated. We remain Buy rated on NRG, VST, and SRE, and we also highlight PJM exposed stocks like Buy rated **TLN**, where we see near term potential catalysts to lift the regulatory overhang on the stock.

Editor's Choice Charts

Exhibit 1: Energy, Utilities & Mining sub-sector performance

Past 90 days (5/8/2026-8/6/2026)

Source: FactSet, Goldman Sachs Global Investment Research

Exhibit 2: We believe E&Ps are reflecting a cost of capital just below 11%

4-week rolling avg. of the implied discount rate for E&Ps based on five-year futures

Source: Bloomberg, Goldman Sachs Global Investment Research

Exhibit 3: We Estimate the Spot Brent Fair Value Around \$80/bbl, Suggesting the Market Prices Only a Moderate Risk Premium

Current GS estimate of fair value of Brent 36M is \$76/bbl, and latest Brent 36M market price is \$70/bbl. Latest predicted Brent 1M/36M timespreads are 7% (using latest balance demand) and 14% (using pre-war balance demand).

Our long-dated 36M Brent assumption of \$76 incorporates a \$9 structural security premium we implemented at the start of the war to encourage surpluses in no-disruption periods given structurally high disruption risk.

Source: IEA, Kpler, DOE, Euroilstocks, ARA PJK, PAJ, Haver, ICE, Goldman Sachs Global Investment Research

Exhibit 4: Oil Exports From the Persian Gulf Are at 36% of Pre-War Levels (7-Day Moving Average), Down from 80% in Late June Before Renewed Tanker Attacks

Includes flows through the Strait of Hormuz, Yanbu, Fujairah, Gulf of Oman, and Botas Ceyhan. Yanbu is on the west coast of Saudi Arabia, bordering the Red Sea and connected to Saudi eastern oil fields via the East-West pipeline. Fujairah lies east (outside) of the Strait of Hormuz and is connected to Abu Dhabi's onshore fields via the Abu Dhabi Crude Oil Pipeline (ADCOP). The Gulf of Oman connects the Strait to the Arabian Sea (southeast). The Kirkuk-Ceyhan pipeline allows northern Iraqi crude to be pumped through Türkiye to the Mediterranean sea. "Normal" flows are assumed to be 20mb/d for Strait of Hormuz and 2025 average for Yanbu (1.4mb/d), Fujairah (1.7mb/d), Gulf of Oman (0mb/d), and Botas Ceyhan (0mb/d).

Conversations we are having with investors

E&P - Neil Mehta

OXY. OXY has been a stock in focus this week after disclosing strong 2Q26 earnings versus GS and consensus and unveiling a detailed cash flow improvement plan through 2030. Conversations have largely centered on this newly announced target for \$4.0 bn in annual sustainable cash flow improvement by 2030, as investors have sought more clarity on the cadence of the savings and the drivers of the planned decrease in sustaining capital. OXY noted expectations to reduce the base decline of operations by 5% to 20% relative to a starting point of 25% to create sustainable benefits to sustaining capital levels. Investors have also focused on capital allocation, particularly management's outlook for share repurchases as a lower priority for the business until the preferred equity redemption in August 2029. As a result, those more cautious on OXY seek more clarity on the upside potential to shareholder returns and dividend growth throughout the duration of this cash flow improvement plan as benefits are realized. On the midstream and marketing segment, investors noted the strong 2Q26 adjusted pre-tax income beat driven by depressed Waha differentials relative to Gulf Coast pricing. Given the recent recovery in Waha differentials in 3Q26, investors seek more clarity on the degree in which strong US natural gas price realizations will offset the normalization in natural gas marketing profits.

EOG. EOG has been a stock in focus this week following 2Q26 results where the company disclosed initial UAE well results, establishing oil production. Investors remain focused on the resource potential of the company's exploration efforts in the UAE, while management disclosed initial production for the first two wells drilled with 1-mile laterals that reaped average cumulative oil production of 25,000 barrels through the first 30 days of production. Investors continue to seek more clarity from EOG surrounding the upside to the project in UAE and scale of the role this asset could play in EOG's future portfolio. Investors have also highlighted the strength of shareholder returns, with EOG returning ~\$1.84 bn in the quarter through \$540 mn in base dividends and ~\$1.3 bn in share repurchases. Those more constructive on the stock point to EOG's strong balance sheet, with net debt-to-EBITDA of 0.4x providing resilience and optionality through the cycle. Finally, more cautious investors note the company's valuation is more expensive relative to oily E&P peers, as we see EOG trading at an 8% FCF yield on average 2027/2028 estimates relative to peer average of 12% (peers include COP, OXY, FANG, DVN).

Majors & Refining - Neil Mehta & Alexa Petrick Breno

SMID Cap Refining. This week we note we have received incremental investor inbounds around SMID cap refiners Delek (DK), Par Pacific Holdings (PARR), and HF Sinclair (DINO) following the EPA's update around 2024 small refinery exemptions (SREs). We note the EPA provided updated decisions for select refiners that were awaiting a ruling, resulting in higher cash inflow from RIN monetization. Investors have been particularly constructive on the ruling for DK given the potential readthrough for 2025 SRE rulings. More generally, for bullish investors awaiting decisions around 2025 SREs, these names remain top of mind given each company's SRE optionality and potential to monetize the received RINs at elevated prices. For DK and DINO, in particular, investors highlight commitment to shareholder returns, where investors expect cash inflow from RIN monetization to be returned to investors via share repurchases. For those less constructive on the outlook for SREs, we note investors question the cadence and magnitude of exemptions on the go-forward.

Management Transition. Investor focus shifted toward ConocoPhillips (COP) this week following strong 2Q26 results and a new executive succession plan, with Mr. Andy O'Brien, current CFO and EVP Strategy and Commercial, assuming the role of President and CEO next month. We note key projects and cost reductions remain on track to generate ~\$7 bn of free cash flow growth by 2029, though investors continue to look for color on long-term capital spend. Management leaves all full-year guidance items unchanged, despite Middle East disruptions and asset divestitures, estimating 3Q26 production at ~2.29-2.32 MBOE/d driven by Lower 48 growth and a ramp-up in Qatar. Investors also expect the capital returns payout to pick up in 2H26, as the company targets 45% of full-year cash from operations to shareholders. Separately, investors focus on Suncor Energy (SU), as Mr. Rich Kruger, current President and CEO, plans to transition to Executive Vice Chair in April 2027, with Mr. Peter Zebedee, current EVP Upstream, assuming the role of incoming President and CEO. While management highlights positive operational momentum across assets and higher monthly buyback guidance of C\$500 mn, some investors remain mindful of multi-year outperformance.

Energy Services – Neil Mehta & Alexa Petrick Breno

Behind-the-Meter. Conversations with investors this week focused on Behind-the-Meter on the back of earnings and our conversation with LBRT's management team. With AESI reporting earlier this week and providing more color on their BTM opportunities, investors are focused on the contract awards for each of the players and the timeline for each of the awards. Overhaul capex for recip engines and turbines was more in-focus among investors this week, as with the pull forward of capex for equipment payments, investors are focused on the potential higher capex over the life cycle of the contracts, taking into account high capacity factors and life spans for BTM equipment. With typical machine overhaul every 4-5 years for equipment per industry standards, investors are looking to the potential increase in total capex required to maintain equipment health over the duration of anticipated contracts, and subsequent funding mechanisms for each of the players in the space.

Specialty Contractors. Investors focused on the Specialty Contractors this week after PWR, MTZ, and MYRG reported earnings last week. With a dispersion in stock prices on the back of the earnings prints, investors are focused on the potential forward rate of change for the companies, particularly MTZ, as the companies remain exposed to similar end-markets and the power demand theme. Investors are focused on the transmission and distribution businesses for each of the companies as the build-out and repair of the US grid remains a theme of high-interest with PWR, MTZ, and MYRG viewed as large beneficiaries as the main players in the space. We continue to look to Utility capex plans over the next several months, as companies anticipate the start of many long-haul 765 kV transmission lines in 2027 and 2028, which are expected to drive forward earnings growth for the Specialty Contractors. Specifically for MTZ, the market remains focused on out-year growth expectations for the Communications business, and the opportunity set for the build out of fiber associated with data centers.

Utilities - Carly Davenport

NRG. This week, NRG reported 2Q earnings and faced a negative market reaction (down 15% on the day) largely driven by the Texas governor's recent directive to halt new data center approvals until PUCT and ERCOT conduct an audit of projects advancing through ERCOT's interconnection queue, pausing the Batch Zero process. The stock reaction reflected two key debates from our investor conversations including (1) whether this regulatory uncertainty in Texas presents implications to the company's 1 GW large load target for 2026, or their broader data center strategy, and (2) the read across to NRG's go forward earnings expectations potentially being lower given a softer or at least more delayed load ramp and power prices in Texas. On the first point, most investors expressed concern that the directive to audit and verify data centers in the ERCOT interconnection queue introduced regulatory uncertainty and could delay sector-wide deal announcements. Management commentary on the potential 1.2 GW data center opportunity being able to operate BTM or island mode if the grid faces interconnection delays addressed some investor concerns. The second key debate on earnings headwinds concerned some investors though others expect strength in PJM prices to offset Texas weakness.

Upside to EPS guidance. As companies report 2Q earnings, investors have been contemplating which utilities are likely setting up for raising their EPS guidance on the 3Q or 4Q calls due to increasing capital plans and clearing of regulatory overhangs. DUK is a stock that has been topical where investors have been focused on regulatory execution to get line of sight into earnings growth upside where its current 5%-7% EPS CAGR through 2030 contemplates outstanding regulatory proceedings and its current capital plan. In our conversations, investors have been constructive on the path to clearing of regulatory uncertainty with now proposed settlements for both DEC and DEP and the update on converting the remainder of the large load pipeline by 1H27 was viewed positively. Expectations on DUK's earnings outlook have been lower than peers given historically more execution challenges and the company's size, but sentiment seems to be shifting. AEE is another stock that comes up in our conversations, where investors are looking to the 3Q capital plan update to reflect the updated Missouri IRP filing in September and its awarded competitive transmission projects. There is also a desire to get more clarity on the magnitude of data center upside to its 6%-8% EPS CAGR where it currently has 2.8 GWs under ESAs and the company plans to update its long-term growth guidance next quarter. Lastly, while XEL already updated the 26-30 EPS CAGR to 9%+, investors still see potential for further upside on the 3Q call given the capital plan roll-forward update.

MLPs/Pipelines - John Mackay & Olivia Foster

Texas data center audit - focus on BTM. Data center development timelines were a focus this week following the Texas governor's recent directive to halt new data center approvals until the Public Utility Commission of Texas (PUCT) and the Electric Reliability Council of Texas (ERCOT) conduct an audit of projects advancing through ERCOT's interconnection queue. The PUCT and ERCOT must complete this audit before any data center project moves forward, and any project which fails to meet the PUCT/ERCOT standard will be denied an interconnect to the TX grid. Investor inbounds focused on the impact to data center development timelines, and the potential for behind-the-meter power solutions to incrementally compete with front-of-the meter projects which will require grid connects. On that last point, some investors highlighted that behind-the-meter developments (or the bring your own power model) are consistent with previous gubernatorial directives of grid reliability, affordability, and community protection. WMB and KGS were cited as potential beneficiaries of an incremental shift towards BTM developments given their incumbent positions developing and operating BTM systems. Looking further out, investors continue to debate which geography is optimal for data center development with some investors citing advantages including affordable, abundant gas resource and land in Texas, while others highlight the proximity to fiber, dense populations, and lower ambient temperatures near existing hubs in the Mid-Atlantic and Midwest markets.

Shifting sentiment on MLO2 sequencing and downstream focus. This week, we fielded several inbounds regarding MLO2 following ET and ENB earnings calls, where both management teams provided updates on the MLO2 project. Notably, the original upstream Mainline expansion into DAPL is being pushed to the right (potential late 2026 or beyond vs prior expectations of a mid-year 2026 FID) and could ultimately take an entirely different form due to ongoing regulatory and policy uncertainty for producers in Canada. While many investors acknowledged the strategic rationale to prioritize the downstream market access segments amid regulatory uncertainty, some sought clarification on the near-term viability of the downstream segment, asking if this pivot will pull existing Midwest barrels to the Gulf Coast, eventually requiring a necessary debottlenecking of the upstream system. Furthermore, investors are increasingly focused on what an upstream egress delay means for WCSB differentials in the medium term and raises concerns that pipeline constraints could re-emerge, and potentially widen the WCS-WTI differential in the medium term. Meanwhile, ET remained supportive of the project as originally envisioned, emphasizing that DAPL is steel in the ground and highlighting its advantaged position compared to alternatives. From here, focus remains on the progress of regulatory landscape in Canada, primarily from the tri-lateral MOU, as investors look for Canadian producers to receive enough policy clarity to announce long-term growth projects and commit to incremental egress, alongside potential read-throughs from upcoming USMCA negotiations.

Clean Technology - Brian Lee

RUN. Inbounds on RUN increased this week following the company's earnings results, as investors asked about trends in the resi market, thoughts on the company's near-term operating results, cash generation potential, and potential impacts from policy actions. In particular, investors have wanted to understand the company's near-term growth trajectory as it de-emphasizes its affiliate channel as its direct channel is expected to exit the year at a 10% yoy growth rate, and how this could impact RUN's growth profile in 2027. Additionally, there were questions on the recent reduction in cash generation guidance, and how meaningful cash generation could be next year. Lastly, there have been inquiries into potential impacts from recent policy measures such as the Section 232 investigation, but RUN remains less exposed to this action due to its focus on securing domestic equipment.

SEDG. We received an influx of investor interest on SEDG this week, with key questions focused on the company's near-term operating trajectory. In particular, investors wanted to better understand the 3Q26 topline guidance that implies a sequential decline despite the quarter typically offering seasonal strength, as well as incremental color that 4Q26 like to see sequential declines. Additionally, there remain inquiries into its safe harbor strategy, which remains focused on the physical work test, and how it differs from peer ENPH which has been recognizing more 5% threshold business that is driving near-term revenue generation. Lastly, investors remain focused on the outlook for the resi market in general, especially in Europe where there have been hopes for a stronger growth trajectory that appears to not be materializing.

Metals & Mining - Nick Cash

FCX. Investor inbounds increased this week on FCX as copper climbed to record high levels this week while diesel prices retreated and gold prices are rallying off of the \$4,000/oz level. As tensions in the Middle East seem to have calmed, investors are beginning to price in stronger global growth alongside a reignited AI/power demand trade, both of which have been tailwinds to copper. Conversations around length in the commodity trade have increased. As a result, many investors believe there is more room to run in the copper trade which should provide further tailwinds to the equities.

Key GS Energy Research Reports

GS Energy Research for the Week

See North America Price Improvements, But Focus on International Activity Rate of Change Over the Long-Term; Buy SLB

Occidental Petroleum Corp. (OXY): Raising Target Following Strong Multi-Year Cash Flow Improvement Plan

Dominion Energy Inc. (D): Updating estimates for 2Q results, with focus on CVOW timeline and data center pipeline

Suncor Energy Inc. (SU): Updating Estimates Following Solid 2Q Results and Key Management Changes Including Incoming CEO

Chevron Corp. (CVX): Strong Quarterly Results Support Upstream Efficiency Gains and Stable Shareholder Returns; Buy

ExxonMobil Holdings (XOM): Modestly Raising Target and See Differentiated Asset Base/Execution; Neutral on Relative Valuation

Valero Energy Corp. (VLO): Despite Outperformance, Still Constructive on Shares Given Supply-Side Macro and FCF Algorithm

Williams Cos. (WMB): 2Q26 Recap: Focus is Now on BTM Wins, with Momentum Announced and Funding Secured

Balancing Near-Term Gas Macro Softness with Robust Long-Term Demand Potential; Buy on EQT, Neutral on RRC at \$3.50 MMBtu Mid-Cycle

Commodities - Oil and Natural Gas strip

Valuation and Key Risks

EQT. We are Buy rated on EQT with a 12-month price target of \$62 and a target free cash flow yield of 8.0% on average 2027/2028 estimates applying \$75/\$75 per bbl Brent oil price and \$3.50/\$3.50 per MMBtu Henry Hub gas price. Key risks include costs, well results, commodity price volatility and government pronouncements. Closing Price: \$51.59

MPC. We are Buy rated on MPC, and our 6-month, P/E (14.0x on normalized EPS) and SOTP-based price target is \$376. Key risks relate to refining margins, operational execution, and midstream earnings. Closing Price: \$299.10

VLO. We are Buy-rated on VLO, and our 6-month, P/E (15.0x on our normalized EPS forecast) and SOTP-based price target is \$365. Key risks relate to refining margins, operational execution, and capital returns. Closing Price: \$302.88

CEG. We are Neutral rated on CEG with a blended P/E and FCF yield based valuation, and our 12-month price target of \$305 reflects a target P/E multiple of 21.0x and FCF yield of 5.0%. Key risks for CEG include 1) Regulatory and interconnection risk, 2) higher/lower than anticipated power prices, 3) increase/slowdown in data center demand. \$261.10

NRG. We are Buy rated on NRG with a blended EV/EBITDA and FCF yield based valuation, and our 12-month price target of \$169 is based on an 8.75x EV/EBITDA multiple and an 8.75% FCF. Key downside risks for NRG include: (1) Increased headline risk tied to AI and data center theme; (2) Lower-than-anticipated power prices; and (3) PJM capacity auction price uncertainty. Closing Price: \$118.97

VST. We are Buy rated on VST with a blended EV/EBITDA and FCF yield based valuation, and our 12-month price target of \$209 is based on a 10.5x EV/EBITDA multiple and a 7.0% FCF yield. Key downside risks for VST include: (1) PJM capacity auction uncertainty; (2) Lower than anticipated power prices; and (3) Future of the power demand theme. Closing Price: \$141.41

SRE. We are Buy rated on Sempra with a 12-month SOTP based PT of \$109. Key downside risks for SRE include (1) management execution and communication

challenges, (2) balance sheet strength weakens, and (3) constructive regulatory outcomes. Closing Price: \$84.33

LB. We are Buy rated with a 12-month price target of \$84 based on a 23.00x multiple on our 2027 EBITDA estimate. Key downside risks include: 1) Lower Permian oil drilling activity, 2) regulatory changes for produced water disposal, 3) execution on additional commercial opportunities including data centers 4) discipline around M&A, 5) sponsorship ownership concentration, and 6) clarity around the capital returns profile. Closing Price: \$80.74

WBI. We are Buy rated with a 12-month price target of \$41 based on a 12x multiple on our 2027 EBITDA estimate. Downside risks include: 1) Reduction in demand for oil, 2) regulatory changes in New Mexico and/or Texas, 3) material increases in non-disposal solutions for produced water, 4) project execution, 5) high multiple M&A, 6) sponsor ownership concentration, and 7) governance risk. Closing Price: \$32.75

NXT. Our 12-month price target of \$141 is based on a 25X P/E multiple on our revised Q5-Q8 EPS. Key risks include increasing competition, customer attrition, patent protection, market demand, policy, and supplier product availability/pricing. Closing Price: \$98.43

SEDG. Our 12-month price target of \$30 is based on a 20X P/E multiple on Q5-Q8 EPS. Key risks include increases in energy prices, interest rate decline, increase in inverter pricing, lower costs, and broad market acceptance of SSTs. Closing Price: \$32.67

ENPH. Our 12-month target price of \$55 is based on our target P/E multiple of 20.0X applied to our Q5-Q8 EPS, and then adding back ~\$7 of net cash per share. Key risks include lower-than-expected revenue growth and margins, changes in the competitive and technology landscape, US-China tariffs, and abnormal inventory builds across the channel. Closing Price: \$39.67

FSLR. Our 12-month price target of \$310 is based on an 11.5X ex-cash P/E multiple on our lower Q5-Q8 EPS with ~\$16 per share in net cash added back. Key risks include module oversupply, higher than expected module costs, trade policy and changes to US manufacturing credits. Closing Price: \$244.14

NUE. Our 12-month price target of \$303 is based on a 9.5x EV/EBITDA multiple on average FY2026-FY2028 EBITDA. Key Risks. 1) Higher than expected scrap costs; 2) Reductions in tariffs; 3) Increases in domestic capacity could drive downward pressure on prices; 4) Slower-than-anticipated economic growth could drive a deceleration in US steel demand. Closing Price: \$272.03

FTI. Our 12-month price target is \$80 and is based on an average of the valuations implied by our target through-cycle ('27-'31) EV/EBITDA multiple of 10.0x and target through-cycle ('27-'31) FCF yield of 7.0%. Key Risks: 1) weaker commodity prices, 2) loss of contracts, 3) slower adoption of new technologies, 4) supply chain issues. Closing Price: \$69.62

XPRO. Our 12-month price target is \$20 and is based on the average of two methodologies: a target through-cycle free cash flow yield of 9.0% and a target through-cycle EV/EBITDA multiple of 5.5x. Key Risks: 1) Slowdown in global drilling and completion activity, 2) Slower than expected rate of change in international oilfield markets, 3) Slower than expected technology developments. Closing Price: \$16.99

TLN. We are Buy rated on TLN with a blended EV/EBITDA and FCF yield based valuation, and our 12-month price target of \$499 reflects a target EV/EBITDA multiple of 10.0x and FCF yield of 7.0%. Key downside risks for TLN include 1) Regulatory and interconnection risk, 2) lower than anticipated power prices, 3) slowdown in data center demand. Closing Price: \$338.31

AEP. We are Neutral rated on AEP. Our 12-month SOTP-based price target is \$150. Key upside risks include 1) faster-than-expected interconnection of the 69 GW contracted load, and 2) greater-than-expected realization of the Bloom/Piketon and other incremental capex opportunities beyond what we have already embedded. Key downside risks include 1) higher than expected financing needs, 2) failure to make progress on closing the ROE gap at the VIU utilities, 3) poor cost management, and 4) adverse regulatory decisions in key jurisdictions like Texas or Ohio regarding data center tariffs. Closing Price: \$125.26

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Disclosures

The rating(s) for LandBridge and WaterBridge Infrastructure is/are relative to the other companies in its/their coverage universe: Antero Midstream Corp., Cheniere Energy Inc., Cheniere Energy Partners, DT Midstream Inc., EagleRock Land, Energy Transfer LP, Enterprise Products Partners LP, Excelerate Energy Inc, Golar LNG, Hess Midstream LP, Kinder Morgan Inc., Kinetik Holdings, Kodiak Gas Services Inc., LandBridge, MPLX LP, NextDecade Corp., ONEOK Inc., Plains All American Pipeline LP, Plains GP Holdings, South Bow Corp., TC Energy Corp., Targa Resources Corp., Venture Global, WaterBridge Infrastructure, Williams Cos.

Regulatory disclosures**Disclosures required by United States laws and regulations**

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In

producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Brazil:** Disclosure information in relation to CVM Resolution n. 20 is available at <https://www.gs.com/worldwide/brazil/area/gir/index.html>. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Resolution n. 20, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** This information is being provided to you for information purposes only and is not, and under no circumstances should be construed as, an advertisement, offering or solicitation by Goldman Sachs & Co. LLC for purchasers of securities in Canada to trade in any Canadian security. Goldman Sachs & Co. LLC is not registered as a dealer in any jurisdiction in Canada under applicable Canadian securities laws and generally is not permitted to trade in Canadian securities and may be prohibited from selling certain securities and products in certain jurisdictions in Canada. If you wish to trade in any Canadian securities or other products in Canada please contact Goldman Sachs Canada Inc., an affiliate of The Goldman Sachs Group Inc., or another registered Canadian dealer. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 10th Floor, Ascent-Worli, Sudam Kalu Ahire Marg, Worli, Mumbai-400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. Registration granted by SEBI and certification from NISM in no way guarantee performance of the intermediary or provide any assurance of returns to investors. Goldman Sachs (India) Securities Private Limited compliance officer and investor grievance contact details, a copy of the annual compliance audit report and other relevant information and disclosures can be found at this link: <https://www.goldmansachs.com/worldwide/india/research-analyst>. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom's departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at <https://www.gs.com/disclosures/europeanpolicy.html> which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan Type II Financial Instruments Firms Association, and Investment Management Association of Japan. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied

upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

Global product; distributing entities

Goldman Sachs Global Investment Research produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. This research is disseminated in Australia by Goldman Sachs Australia Pty Ltd (ABN 21 006 797 897); in Brazil by Goldman Sachs do Brasil Corretora de Títulos e Valores Mobiliários S.A.; Public Communication Channel Goldman Sachs Brazil: 0800 727 5764 and / or contatogoldmanbrasil@gs.com. Available Weekdays (except holidays), from 9am to 6pm. Canal de Comunicação com o Público Goldman Sachs Brasil: 0800 727 5764 e/ou contatogoldmanbrasil@gs.com. Horário de funcionamento: segunda-feira à sexta-feira (exceto feriados), das 9h às 18h; in Canada by Goldman Sachs & Co. LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom.

Goldman Sachs International ("GSI"), authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority ("FCA") and the PRA, has approved this research in connection with its distribution in the United Kingdom.

European Economic Area: Goldman Sachs Bank Europe SE ("GSBE") is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research within the European Economic Area.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY

10282.
