Q2'26 review: Solid base business, increasing credibility on future growth drivers; stay OW

- Solid base business:** While we accept that the Q2 results will have benefited a degree from pre-buying ahead of the Infineon transaction, even excluding this there is a clear acceleration in the base business in Auto and Industrial, while Consumer ex-Android looks to remain solid. On constant currency and perimeter business, we estimate growth ~9%. The company is benefitting from a cyclical upturn, while growing content and market share (Eviyos particularly successful), and forward-looking orders/design wins have accelerated. Notably in L&S, the 'Last Man Standing' strategy is paying off (growth and profitability).
- Increasing credibility on future growth drivers:** While less significant than Q1 results (when management announced an industry partner on AI Photonics), Q2 reporting continued the positive direction of travel on the two main growth drivers focused on by the market. On *AI Photonics*, progress on expansion of elements beyond the emitter array aims to create a sub-system/package which can more easily be adopted by potential partners (while also increasing ams-Osram revenue potential), while commentary on Mr. Ashkan Seyedi's (ex-Nvidia, now head of division) role and remit adds to credibility. On *Smart Glasses*, management are understandably unable to share details of revenue ramps (given ties to key customer) but commentary around preparation for mass production the company indicates a medium-term ramp (perhaps beginning early 2027), in our view.
- Early thoughts on FY27 EBITDA development:** Most conversations with investors have placed limited weight on 2026 EBITDA (recognising the year is a 'transition' with perimeter changes); however, we think that anchoring 2027 estimates will be more important (as base level earnings on which growth initiative earnings will layer on top). On our 2026 base forecast of ~€560m (group margin of 17.0%), we see moving parts of: annualisation of perimeter changes (~€60-75m negative), easing currency (perhaps ~€10m positive), and annualisation of 'Simplify' savings (~€50-60m positive), plus drop-through on organic growth (~mid/high 20%), gives our estimates of ~€615m EBITDA in '27 (group margin 17.9%).
- Progress on the Balance Sheet:** We noted previously how we expected a virtuous cycle between deleveraging, free cashflow and earnings. Deleveraging is continuing, with our expectation for leverage on net financial debt of 2.1x at year end (although Osram puts and pension liabilities add another ~1.7x). On balance, the push out on the Osram put liability is a slight positive (pushing cash out into 2027).
- Forecast and PT update:** We raise our group-level revenue forecasts by 1/0/1% in '26/27/28 respectively, primarily driven by L&S. Our group-level Adj. EBITDA forecasts are raised by 1/0/5%, again primarily driven by L&S. See Table 1 for summary of forecasts changes, and Table 2 for a comparison to latest Vara consensus. Our December 2027 price target goes to 24.00 CHF (from 24.40 CHF previously) reflecting our latest estimates as well as latest EV bridge, our 12.5x '28 EBIT multiple is unchanged. The price target implies a valuation of 8.5/7.3x EBITDA in '27/28 and 20.6/13.4x EPS in '27/28.

Summary Investment Thesis and Valuation

Investment Thesis

ams-Osram is a smartphone/consumer and automotive exposed semiconductor/LED and lighting company, but has announced plans to apply its core Micro LED technology to Data Center Interconnect (as an alternative to laser-based optics) and Smart Glasses. Core end-markets in Automotive, Industrial and Consumer are all showing signs of a recovery with volumes improving with ams-Osram benefitting from market share gains and content gains; however, new category growth will begin to support through 2027 and continue to the end of the decade. We are Overweight on the shares, as we see improving growth and financial profile and investor sentiment (as balance sheet issues are addressed).

Valuation

We value ams-Osram on 2028 EBIT estimates, applying a 12.5x multiple (unchanged), which yields a new December 2027 price target of 24.00 CHF (previously 24.40 CHF). Our estimates are pro forma for the announced divestments and our EV bridge is based on the current balance sheet but also factors in the expected proceeds from the Infineon disposal (closed in Q3'26). Our price target implies a EV/EBITDA of 8.5/7.3x in '27/28, and P/E of 20.6/13.4x in '27/28.

Investment Thesis, Valuation and Risks

ams-Osram (*Overweight; Price Target: CHF24.00*)

Investment Thesis

ams-Osram is a smartphone/consumer and automotive exposed semiconductor/LED and lighting company, but has announced plans to apply its core Micro LED technology to Data Center Interconnect (as an alternative to laser-based optics) and Smart Glasses. Core end-markets in Automotive, Industrial and Consumer are all showing signs of a recovery with volumes improving with ams-Osram benefitting from market share gains and content gains; however, new category growth will begin to support through 2027 and continue to the end of the decade. We are Overweight on the shares, as we see improving growth and financial profile and investor sentiment (as balance sheet issues are addressed).

Valuation

We value ams-Osram on 2028 EBIT estimates, applying a 12.5x multiple (unchanged), which yields a new December 2027 price target of 24.00 CHF (previously 24.40 CHF). Our estimates are pro forma for the announced divestments and our EV bridge is based on the current balance sheet but also factors in the expected proceeds from the Infineon disposal (closed in Q3'26). Our price target implies a EV/EBITDA of 8.5/7.3x in '27/28, and P/E of 20.6/13.4x in '27/28.

Risks to Rating and Price Target

Downside risks include:

- Slower or lower adoption of Micro LED data center solution (or lower market share for ams-Osram than assumed)
- Slower or lower adoption of Smart Glasses (or lower market share for ams-Osram than assumed)
- Increased competitive pressure in core Automotive market
- Slowdown in smartphone end-market impacting ams-Osram as a component supplier
- Lack of resolution on the Kulim II sale or failure to refinance at a lower interest rate
- Continued pressure on earnings quality and free cash flow from restructuring and net working capital movements

Initiated coverage Jul 20, 2017. All share prices are as of market close on the previous business day.

The chart(s) show J.P. Morgan’s continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period. J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); Neutral (over

the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, <https://www.jpmorganmarkets.com>.

Coverage Universe: McDowell, Craig A: Aixtron (AIXGn.DE), Comet Holding (COTNE.S), Inficon (IFCN.S), Nexi (NEXII.MI), Nordic Semiconductor (NOD.OL), Soitec (SOIT.PA), Wise (WSE), Wise Plc (WISEa.L), Worldline (WLN.PA), ams-Osram (AMS.S)

J.P. Morgan Equity Research Ratings Distribution, as of July 04, 2026

	Overweight (buy)	Neutral (hold)	Underweight (sell)
