Accelerating growth in expanding AI TAM, ignore quarterly noise, Buy, \$620 PO

Reiterate Rating: BUY | PO: 620.00 USD | Price: 518.58 USD

'27 Helios ramp more important than mid-'26 trends

We reiterate Buy, and raise our estimates on AMD as we believe the company is well set for top-line growth acceleration to +77% YoY in CY27E from +47% YoY. While the magnitude of near-term beat/raise is modest, and likely to pressure the stock near-term, we think it's immaterial as flagship Helios full-scale rack system ramp begins in earnest only from Q4. Meanwhile, gross margins are holding up despite input cost inflation and company continues to be execute flawlessly in GPU, agentic CPU and customer traction. Risks include rising exposure to unprofitable frontier labs, but AMD's deployment at public hyperscalers can help generate sustainable traction. Overall, we raise CY26/27/28E EPS by +2%/+20%/+34% to \$7.62/\$15.88/\$23.88 with CY30E likely in excess of \$30/sh or ~4x current levels. Reiterate \$620 PO, now on 27x CY28E including SBC (vs. 47x CY27E excluding SBC prior), in-line with key AI compute peers now including SBC in their EPS forecasts, and as more of the growth upside is in the out years. Our 27x target multiple is still in-line with AMD's historical 5-yr fwd median of 27-28x.

Likes: \$30+ EPS power on AI TAM outgrowth, share gains

We believe AMD can outgrow mgmt's increased \$2Tn total AI compute TAM (incl. \$1.4Tn+ accelerators, \$220bn CPUs) growing at +40% CAGR, given new customer ramps and share gain momentum in AI GPUs, as well as continued proliferation in server CPUs over the next few years. At just 7-8% AI GPU share and 25-30% CPU share, we believe AMD DC sales could reach ~\$170bn by CY30E from just ~\$32bn in CY26E, growing at >50% CAGR and reaching \$30+ in EPS power. Per mgmt, supply visibility is high with potential for upside as well, given continued investments in HBM/wafer capacity.

Risks: Competition, execution in new rack-scale systems

AMD's key AI customers (OpenAI, Meta, Anthropic) are multi-sourcing from multiple CPU/GPU/networking vendors, with AMD's execution in ramping its first rack-level solution 'Helios' a key determinant of customer adoption. Concentrated exposure to some of these frontier AI vendors with limited FCF/capital also creates risks that customers may not have sufficient funds to buy in the future. However, if successful, we expect a continued ramp of AMD systems beyond the first 1 GW contracted, into multi-generational, multi-GW, and new-customer ramps.

Company Description

Advanced Micro Devices is one of the largest suppliers of PC microprocessors and graphics processors worldwide to computing OEMs. The company's main product lines include desktop, notebook, server, graphics processors and embedded/semi-custom chips.

Investment Rationale

We rate AMD Buy. It serves a multi-hundred billion addressable market opportunity in PC, server, high-end gaming, deep-learning and related markets where AMD has less than 30% value share currently. While AMD's data center accelerator products are still 1yr behind leader's roadmap, we see continued demand for a stable second source alternative in GPUs and potentially share gain opps as AMD narrows the product/systems gap. On the CPU front, we see continued share gains against the incumbent.

BofA GLOBAL RESEARCH

Price objective basis & risk

Advanced Micro Devices, Inc (AMD)

Our \$620 PO is based on 27x our 2028E non-GAAP EPS, including SBC. Our PO basis is in-line with historical fwd median of 27-28x and in the middle of historical 13x-58x range, well supported by AMD's 50%+ annual EPS CAGR potential and its AI CPU/GPU share gain potentials, modestly offset by slower growth in cyclical PC/embedded/console markets.

Downside risks: 1) Execution on first rack-scale product (MI400 Series), 2) Timing/Magnitude of Middle East AI Projects, 3) Lumpy nature of consumer and enterprise spending that could create delays in acceptance and success of new products, 4) High reliance on one outsourced manufacturing partner, 5) Maturity of current game console cycle.

Upside risks are greater share gain potential in the PC and server processor market against competitors.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. VOLATILITY RISK RATINGS, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. INVESTMENT RATINGS reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster ^{R2}
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

^{R2} Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. Coverage Cluster is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.
