

Zenergy (3677.HK): 1H26 positive profit alert: NP 20% beat at mid-point on strong shipments and operating leverage; Buy

Zenergy issued a positive profit alert after market close on August 7, guiding for 1H26 net profit of Rmb320mn–400mn. This implies 45.5%–81.8% yoy growth vs. Rmb219mn in 1H25. At the midpoint of Rmb360mn (+64% yoy), guidance is 20% ahead of our expectations, likely reflecting stronger-than-expected operating leverage. Management attributed the earnings growth mainly to:

- **Strong shipments:** New capacity ramp-up and better utilization drove solid shipment growth in both power and ESS batteries. ESS battery shipments saw particularly strong momentum, providing a meaningful revenue boost.
- **Scale efficiencies and expense control:** Economies of scale and tighter expense discipline lowered the expense ratio, supporting margin improvement and profitability.

Additionally, we highlight Zenergy's notable market share gains in 1H26. Based on CABIA data, its domestic passenger vehicle battery installation ranking rose to #5 in 1H26 from #7 in 2025, with market share expanding by +1.2ppt yoy. We maintain our Buy rating.

Price Target Risks and Methodology - Zenergy

Valuation methodology: We value Zenergy using an SoTP methodology, applying an 11x EV/EBITDA multiple to average 2026E/27E EBITDA for the core business, benchmarked to the historical mid-cycle average of H-share peers CALB and Rept, with a slight premium reflecting Zenergy's fast-growth phase and above-WACC ROIC. We value its long-term equity investment, mainly the Toyota battery pack JV, at book value.

Key risks: 1) Slower-than-expected China EV demand; 2) Milder-than-expected ESS demand; 3) Upstream raw material cost volatility; 4) Intensifying competition in the domestic power battery market; 5) Softer-than-expected execution and capacity ramp-up in the ESS segment.

Investment Thesis - Zenergy

We view Zenergy as an underappreciated high-growth EV battery platform with improving competitive positioning, solid manufacturing discipline, and a more attractive growth-return balance than most Tier-2/3 peers. Although founded only in 2019, Zenergy benefits from auto-component know-how inherited from Fuyao

Analysts employed by non-US affiliates are not registered/qualified as research analysts with FINRA in the U.S.

Glass, where its founding team originated, helping it scale quickly while maintaining solid returns. As one of the few smaller players gaining share in China's consolidating battery market, Zenergy should benefit from continued EV customer diversification, rising utilization, and early expansion into ESS, supporting the fastest EBITDA growth in our coverage universe. Despite this, the stock trades at a significant discount to peers, creating attractive risk-reward.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.
