Strong electronic materials revenue growth of +15% m/m; July revenue surged to a 49-month high

NPC's electronic materials revenue reached a new record-high of NT\$17.4bn in July 2026. While 3Q revenue typically rises q/q due to seasonality, the y/y growth has accelerated significantly from 39% in 1H26 to 85% in July. The m/m growth of 15% outperformed CCL peers Elite Materials/ITEQ (+8%/+13% m/m) and was only slightly below TUC's +21% m/m. The July revenue growth came from both volumes/utilization and ASP, and we believe the company is on track to achieve 30% electronic materials OPM in 2027. Our 2027 EPS forecast is 25% above consensus. Reiterate OW.

- July electronic materials revenue +15% m/m:** NPC reported electronic materials revenue of NT\$17.4bn in July, an increase of NT\$2.3bn from June. 63% of the m/m growth came from volume and 37% came from ASP improvement. Excluding NYPCB, NPC's electronic materials revenue also grew 15% m/m. The company noted that utilization of all major products has improved to >90%, implying a sequential utilization improvement for epoxy resins and copper foil. Shipments and revenue contribution of specialty products continue to ramp up, and customer verification for higher grade products is underway. Consumer-type products are also seeing m/m volume expansion and price hikes, driven by the tight supply of commodity grade materials.
- More details on the 2Q electronic materials beat:** NYPCB reported 2Q26 results yesterday (6 August). 2Q revenue was up 21% q/q and 42% y/y to NT\$13.6bn. 2Q OP was up 114% q/q to NT\$2.9bn, with 2Q OPM of 21% reaching the highest since 1Q23. The company noted robust demand for AI/data center products, which now account for ~60% of ABF substrate sales. Demand for servers, ASIC platform and memory products also continued to grow. ABF substrate utilization was maintained at 80-85%, while BT substrate utilization was close to 100%. Following the strong 2Q, NYPCB guided to continued q/q revenue growth and margin improvement in 2H26, driven by the tight supply of advanced substrates for AI applications. The company is debottlenecking capacity at the three existing facilities. Of these, the Jinxing plant will complete line upgrades and start producing higher grade products in 2H26.
- NYPCB announced record investments for a new advanced substrate plant:** On 6 August, NYPCB's board approved NT\$46.8bn in capex to build a smart production facility for large-sized, high-layer-count advanced substrates. This represents the largest investment project in the company's history. Details on the capacity and timeline were not disclosed. During media briefings, management commented that the investment is not merely the construction of a plant. Rather, it reflects a LT strategy to develop high-end/specialty products for AI, HPC and advanced packaging applications. NYPCB simultaneously announced the leasing of land and factory buildings in Shulin from NPC, likely in relation to the new advanced substrate plant. This implies that most of the NT\$46.8bn capex will be spent on equipment, and long-term specialty-product capacity could surprise to the upside.
- Chemicals revenue also increased m/m:** Chemicals revenue increased by NT\$950mn m/m (volume +NT\$1.1bn, ASP -NT\$150mn), mainly driven by

## Summary Investment Thesis and Valuation

### Investment Thesis

NPC is a major producer of electronic materials (CCL, copper foil, epoxy resin, glass fiber, PCB), polyester, chemicals (mainly MEG/BPA), and PVC plastics. We are OW on NPC on the back of emerging EPS positives from a multi-year PCB material supply tightness and its transition towards specialty grade electronic materials. While we estimate that >90% of NPC's electronic materials sales are commodity-grade with lower margins as of 2025, an improving product mix, utilisation uptick and price hikes on the back of tightening industry S&D in the coming years should drive OPM upside for the segment, in our view.

### Valuation

Our Dec-27 PT of NT\$300 is based on a one-year forward P/B of 5x to reflect a new record-high ROE of close to 36% by 2028 (previously: 4x, 30% ROE). This is due to a structural improvement in electronic material margins caused by NPC's transition towards AI-grade electronic materials. We see NPC's ROE improving to >30% over the next two years. For comparison, NPC's historical 10-year average P/B and ROE are 1.6x and 9%, respectively.

increased US MEG sales volume amid Middle East supply disruptions. BPA sales volume increased m/m due to downstream restocking. Plastics revenue rose +NT\$120mn m/m (volume +NT\$180mn, ASP -NT\$60mn), supported by a modest demand recovery in China auto, footwear materials, furniture and home appliances. Polyester revenue rose +NT\$100mn m/m (volume +NT\$70mn, ASP +NT\$30mn), driven by restocking demand as feedstock prices started recovering. Growth across all four segments drove NPC's revenue to a 49-month high in July.

## Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); and Underweight (over the duration of the price target indicated in

this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, <https://www.jpmorganmarkets.com>.
