Hongfa Technology - A

Fireside chat showcases further improved outlook—strong growth visibility, TAM expansion and margin upside support PT raise; stay OW

Following our latest fireside chat with Hongfa, we are incrementally more bullish on the company's growth trajectory and margin outlook. Management's tone was notably more confident than in prior briefings, especially regarding the pace and breadth of AIDC and 800V adoption, the durability of market share gains and the sustainability of margin expansion. The company is not only executing well in its traditional relay business, but is also rapidly scaling new business lines and system solutions, with customer engagement and order momentum exceeding expectations. With industry consolidation accelerating and Hongfa's scale, product breadth and customer relationships driving further share gains, we see the company entering a new phase of structural growth. At an 18x FY27E P/E and c35% earnings growth, the stock remains attractively valued, in our view, with c40% potential upside to our new Dec-27 PT. We remain OW.

- **AIDC and 800V are ramping faster than expected and are set to become the next major growth engines.** Management's commentary during the fireside chat was notably more bullish on the AIDC 800V opportunity set, with tangible evidence that customer engagement, sampling and validation are progressing ahead of schedule. Multiple power supply, transformer and Internet platform customers are already moving from pilot to validation, and management now sees a realistic path for AIDC-related revenue to sustain >50% Y/Y in 2026, in our view, with the potential to double as more projects move to mass production in 2027-28. The 800V architecture is also driving incremental content per system, and Hongfa is poised to be a key supplier as industry standards converge. This acceleration in new business drivers stands out as a key differentiator versus peers.
- **Industry consolidation is accelerating, and Hongfa is poised to capture incremental share as scale advantages become more pronounced.** The fireside chat reinforced that the current environment is driving a "winner takes more" dynamic, with raw material and delivery pressures disproportionately impacting smaller players. Hongfa's procurement scale, product breadth and global customer coverage are enabling it to capture incremental share across both traditional and new business lines. Management was explicit that, even in mature categories like HVDC, there is still significant headroom for growth, and ongoing industry consolidation is expected to further accelerate Hongfa's market share gains. This structural shift in the competitive landscape is a key reason for our increased confidence in the company's above-industry growth outlook.
- **Margin expansion and pricing discipline are supporting a more resilient earnings profile.** Management's tone on margin recovery and pricing power was more constructive than in previous updates, with GPM improving by 1.1ppts Q/Q in 2Q26, and we believe further recovery toward 35-40% can be expected as higher-value products scale and pricing actions flow through. Summary Investment Thesis and Valuation

Investment Thesis

Hongfa is a leading global supplier of relays, with applications across home appliances, automotive, power grids and renewables. Hongfa's diversified end demand and strong market positioning in niche segments enhance its resilience and growth potential, in addition to its consistent Op-CF and ROE generation achieved over the past decade. AIDC 800V architecture opportunities are emerging as the next catalyst to drive both earnings revisions and a re-rating. OW.

Valuation

Our Dec-27 PT of Rmb46 is based on our discounted cash flow (DCF) valuation. Our valuation assumes a WACC of 8.8% and a terminal growth rate of 0%.

fireside chat clarified that price increases are being implemented in a staggered fashion across different product lines, with no broad-based cuts planned even as raw materials ease. This disciplined approach to pricing, combined with a product mix upgrade and high utilization, is supporting sustainable margin expansion and improving earnings quality. Management's ability to defend profitability in a volatile macro environment stands out as a core strength.

Raising PT on upgraded outlook following fireside chat

We update our model and raise our estimates following today's fireside chat with Hongfa, as management's latest commentary provided an incrementally more positive outlook on growth, margin and new business drivers. Management's tone was more constructive on AIDC compared to previous briefings, particularly under the new 800V architecture, and on system solution opportunities, with greater clarity on customer engagement, TAM expansion and the pace of new product adoption. We now expect both revenue and profit to accelerate further, supported by robust execution, an expanding TAM in AIDC 800V, and continued market share gains. We raise our FY27E-28E earnings by 7% and lift our Dec-27 DCF-based PT by 7%, to Rmb46, offering c40% potential upside. Management's confidence in growth, margin expansion and global competitiveness stands out, especially as Hongfa continues to deliver in a niche market with high technical barriers. At an 18x FY27E P/E against c35% earnings growth, the stock remains attractively valued, in our view. We remain OW.

Topic	Color from our meeting	Trends
AIDC 800V ramp and TAM	Management sees AIDC 800V demand ramping faster than expected, with broader customer engagement and validation. Potential path to Rmb15B in AIDC revenue near-term, in our view, with potential to double by 2027-28.	New business drivers are materializing ahead of schedule, expanding TAM and future growth runway.
Market share gains	Industry consolidation is accelerating; SME exits and Hongfa's scale, product breadth and customer coverage are driving further share gains. No sign of ceiling in HVDC/high-end.	Ongoing share gains support above-industry growth, even in mature categories.
Margin and pricing power	GPM improved 1.1ppts Q/Q in 2Q26; commodity price trend supports our confidence to expect further recovery to 35-40%. Price increases staggered, no broad-based cuts planned, even as raw materials ease.	Margin expansion is sustainable, pricing discipline is robust, and earnings quality is improving.
Order momentum and capacity	Backlog at historical highs, order coverage 3-6 months, some into 2027. Capacity expansion and utilization (85-90%) support future growth.	Strong order book and flexible capacity underpin confidence in delivering above-industry growth.
New business traction	Five new product categories (modules, control boxes, solutions) gaining traction, customer adoption accelerating, especially in AIDC and new energy.	New business lines are set to become increasingly important contributors to growth and margin.

Source: J.P. Morgan.

Order momentum is exceeding expectations and underpinning future growth, supported by paced and diversified capacity expansion

Utilization rates remain high, and management is proactively expanding capacity to support future growth. The company's average utilization is running at 85-90%, with some lines even tighter, and management is accelerating capacity expansion and technical upgrades both in China and overseas. The fireside chat provided more granularity on new capacity coming online, and management expressed confidence that

production can keep pace with rising order momentum.

Order momentum is stronger than expected, with backlog at historical highs and visibility extending into 2027. Management noted that order coverage now spans three to six months for most products, with some orders already booked into 2027. The fireside chat highlighted that new orders from AIDC, energy storage and high-voltage applications are coming in faster than anticipated and that customer feedback on new products and solutions has been very positive. This strong order book underpins management's confidence in delivering above-industry growth and supports our upward revisions to revenue and earnings.

Industry consolidation is accelerating, and Hongfa is poised to capture incremental share as scale advantages become more pronounced

Management's commentary during the fireside chat was more bullish than in previous briefings, with a clear message that the current environment is accelerating industry consolidation and favoring scale leaders. Raw material and delivery pressures are disproportionately impacting smaller players, while Hongfa's procurement scale, product breadth and customer relationships are driving further consolidation in its favor. Management was explicit that the "winner takes more" dynamic is playing out across both traditional and new business lines and that Hongfa is poised to capture incremental share as the industry landscape continues to evolve.

Management sees ample room for further expansion even in mature categories, with no signs of hitting a ceiling in HVDC and other high-end segments. The company's global customer coverage—including all major European, Japanese, Korean and emerging market OEMs—positions it to capture incremental share as new projects ramp up. Management was clear that there is still significant headroom for growth, even in mature categories, and ongoing industry consolidation is expected to further accelerate Hongfa's market share gains.

New business lines and system solutions are gaining traction and are set to become increasingly important growth drivers

The company's new business lines—including modules, control boxes and system solutions—are gaining traction across core growth verticals, and management expects these to become increasingly important contributors. Management noted that five new product categories, including high-voltage control modules and packaged solutions, have already achieved breakthroughs in key scenarios such as new energy, automotive and AIDC. While the current revenue base for these new products is still small, the fireside chat made clear that customer adoption is accelerating, and management expects these categories to provide stronger incremental growth and margin contribution as they scale.

Hongfa's ability to rapidly develop and deliver customized modules is becoming a key differentiator in winning new business. The company's collaborative approach to product innovation and customer co-development is enabling it to secure design wins earlier in the customer cycle, lock in longer-term supply agreements and become a preferred partner for global OEMs. This is translating into a stronger pipeline of high-value projects and a more defensible competitive moat.

AIDC 800V architecture is ramping faster than expected and is set to become the next major growth engine

AIDC 800V architecture is emerging as the most powerful new growth engine, with management providing more tangible evidence of customer engagement and future revenue potential. Management highlighted during the fireside chat that AIDC-related demand is broader and ramping faster than previously expected, with multiple power supply, transformer and Internet platform customers already moving from sampling to validation. We now see a realistic path for AIDC-related revenue to reach Rmb15B in the near term, with the potential to double as more projects move to mass production in 2027-28.

The 800V architecture is also driving incremental content per system, and management expects Hongfa to be a key supplier as industry standards converge. The level of detail and confidence on AIDC 800V was more explicit and positive than in earlier updates, supporting our view that new business drivers are materializing ahead of schedule. The company is now targeting not only traditional relay demand, but also broader system-level opportunities, which could add tens of billions of Rmb in incremental TAM over the next several years.

Margin expansion and pricing discipline are supporting a more resilient earnings profile

Margin expansion is poised to continue, supported by a product mix upgrade, pricing discipline and operating leverage from high utilization. Management reiterated that GPM improved by 1.1ppts Q/Q in 2Q26, and we are now incrementally confident in a further recovery toward 35-40% as higher-value products scale and pricing actions flow through. The fireside chat provided more confidence that margin gains are sustainable, as the company's scale and supply chain flexibility allow it to absorb cost volatility and defend profitability better than peers.

Pricing power remains robust, with management reiterating that price cuts are not planned, even as raw materials ease, due to ongoing supply tightness and strong customer demand. The fireside chat clarified that price increases are being implemented in a staggered fashion across different product lines, with some categories still seeing further hikes in Q3 and Q4. We believe the full-year average price contribution could reach 10-15ppts and do not see a basis for broad-based price reductions, given current supply/demand dynamics. This disciplined approach to pricing is a key factor supporting margin resilience.

Investment Thesis, Valuation and Risks

Hongfa Technology - A (*Overweight; Price Target: Rmb46.00*)

Investment Thesis

Hongfa is a leading global supplier of relays, with applications across home appliances, automotive, power grids and renewables. Hongfa's diversified end demand and strong market positioning in niche segments enhance its resilience and growth potential, in addition to its consistent Op-CF and ROE generation achieved over the past decade. AIDC 800V architecture opportunities are emerging as the next catalyst to drive both earnings revisions and a re-rating. OW.

Valuation

Our Dec-27 PT of Rmb46 is based on our discounted cash flow (DCF) valuation. Our valuation assumes a WACC of 8.8% and a terminal growth rate of 0%.

Risks to Rating and Price Target

Downside risks include: (1) weaker-than-expected end demand in major verticals, such as home appliances and EVs; (2) an unexpected rebound in copper prices, putting pressure on our margin assumptions; and (3) unexpected trade policy changes.

Source: Bloomberg Finance L.P. and J.P. Morgan; price data adjusted for stock splits and dividends. Initiated coverage May 28, 2021. All share prices are as of market close on the previous business day.

The chart(s) show J.P. Morgan’s continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period. J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock

because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, <https://www.jpmorganmarkets.com>.

Coverage Universe: Li, Karen : COSCO SHIPPING Holdings Co Ltd - A (601919.SS), COSCO SHIPPING Holdings Co Ltd - H (1919.HK), CRRC Corp - A (601766.SS), CRRC Corp - H (1766.HK), Cathay Pacific Airways (0293.HK), China Merchants Port Holdings (0144.HK), Estun Automation - A (002747.SZ), Evergreen Marine (2603.TW), Full Truck Alliance (YMM), Hongfa Technology - A (600885.SS), International Container Terminal Services Inc (ICT.PS), J&T Express - H (1519.HK), JD Logistics (2618.HK), Jiangsu Hengli Hydraulic - A (601100.SS), Leader Harmonious Drive System Co. J.P. Morgan Equity Research Ratings Distribution, as of July 04, 2026

	Overweight (buy)	Neutral (hold)	Underweight (sell)
J.P. Morgan Global Equity Research Coverage*	53%	36%	12%
IB clients**	83%	80%	73%
JPMS Equity Research Coverage*	51%	37%	12%
IB clients**	95%	92%	87%

*Please note that the percentages may not add to 100% because of rounding.

**Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.

For purposes of FINRA ratings distribution rules only, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at <http://www.jpmorganmarkets.com>, contact the primary analyst or your J.P. Morgan representative, or email research.disclosure.inquiries@jpmorgan.com. For material information about the proprietary models used, please see the Summary of Financials in company-specific research reports and the Company Tearsheets, which are available to download on the company pages of our client website, <http://www.jpmorganmarkets.com>. This report also sets out within it the material underlying assumptions used.

History of Investment Recommendations:

A history of J.P. Morgan investment recommendations disseminated during the preceding 12 months can be accessed on the Research & Commentary page of <http://www.jpmorganmarkets.com> where you can also search by analyst name, sector or financial instrument.

Analysts' Compensation: The research analysts responsible for the preparation of this report receive compensation based upon various factors, including the quality and accuracy of research, client feedback, competitive factors, and overall firm revenues.

Registration of non-US Analysts: Unless otherwise noted, the non-US analysts listed on the front of this report are employees of non-US affiliates of J.P. Morgan Securities LLC, may not be registered as research analysts under FINRA rules, may not be associated persons of J.P. Morgan Securities LLC, and may not be subject to FINRA Rule 2241 or 2242 restrictions on communications with covered companies, public appearances, and trading securities held by a research analyst account.

Other Disclosures

J.P. Morgan is a marketing name for investment banking businesses of JPMorgan Chase & Co. and its subsidiaries and affiliates worldwide.

UK MIFID FICC research unbundling exemption: UK clients should refer to [UK MIFID Research Unbundling exemption](#) for details of J.P. Morgan's implementation of the FICC research exemption and guidance on relevant FICC research categorisation.

All research material made available to clients are simultaneously available on our client website, J.P. Morgan Markets, unless specifically permitted by relevant laws. Not all research content is redistributed, e-mailed or made available to third-party aggregators. For all research

material available on a particular stock, please contact your sales representative.

Any long form nomenclature for references to China; Hong Kong; Taiwan; and Macau within this research material are Mainland China; Hong Kong SAR (China); Taiwan (China); and Macau SAR (China).

J.P. Morgan Research may, from time to time, write on issuers or securities targeted by economic or financial sanctions imposed or administered by the governmental authorities of the U.S., EU, UK or other relevant jurisdictions (Sanctioned Securities). Nothing in this report is intended to be read or construed as encouraging, facilitating, promoting or otherwise approving investment or dealing in such Sanctioned Securities. Clients should be aware of their own legal and compliance obligations when making investment decisions.

Digital assets, which may also be referred to as virtual or crypto assets or crypto currencies (e.g. bitcoin), discussed in this research report are subject to a rapidly changing regulatory landscape. The application of relevant laws in respect of such assets may be unsettled, and the legality of any digital asset investment may be unclear. Prior to making any investment decision regarding any digital asset, investors should seek their own legal advice and be aware of any legal considerations regarding the purchase, holding or selling of such an investment. For relevant regulatory advisories on digital assets, including bitcoin and ethereum, please see <https://www.jpmorgan.com/disclosures/cryptoasset-disclosure>.

The author(s) of this research report may not be licensed to carry on regulated activities in your jurisdiction and, if not licensed, do not hold themselves out as being able to do so.

Exchange-Traded Funds (ETFs): J.P. Morgan Securities LLC ("JPMS") acts as authorized participant for substantially all U.S.-listed ETFs. To the extent that any ETFs are mentioned in this report, JPMS may earn commissions and transaction-based compensation in connection with the distribution of those ETF shares and may earn fees for performing other trade-related services, such as securities lending to short sellers of the ETF shares. JPMS may also perform services for the ETFs themselves, including acting as a broker or dealer to the ETFs. In addition, affiliates of JPMS may perform services for the ETFs, including trust, custodial, administration, lending, index calculation and/or maintenance and other services.

Options and Futures related research: If the information contained herein regards options- or futures-related research, such information is available only to persons who have received the proper options or futures risk disclosure documents. Please contact your J.P. Morgan Representative or visit <https://www.theocc.com/components/docs/riskstoc.pdf> for a copy of the Option Clearing Corporation's Characteristics and Risks of Standardized Options or https://www.finra.org/sites/default/files/2020-08/Security_Futures_Risk_Disclosure_Statement_2020.pdf for a copy of the Security Futures Risk Disclosure Statement.

Changes to Interbank Offered Rates (IBORs) and other benchmark rates: Certain interest rate benchmarks are, or may in the future become, subject to ongoing international, national and other regulatory guidance, reform and proposals for reform. For more information, please consult: https://www.jpmorgan.com/global/disclosures/interbank_offered_rates

Private Bank Clients: Where you are receiving research as a client of the private banking businesses offered by JPMorgan Chase & Co. and its subsidiaries ("J.P. Morgan Private Bank"), research is provided to you by J.P. Morgan Private Bank and not by any other division of J.P. Morgan, including, but not limited to, the J.P. Morgan Corporate and Investment Bank and its Global Research division.

Legal entity responsible for the production and distribution of research: The legal entity identified below the name of the Reg AC Research Analyst who authored this material is the legal entity responsible for the production of this research. Where multiple Reg AC Research Analysts authored this material with different legal entities identified below their names, these legal entities are jointly responsible for the production of this research. Where more than one legal entity is listed under an analyst's name, the first legal entity is responsible for the production unless stated otherwise. Research Analysts from various J.P. Morgan affiliates may have contributed to the production of this material but may not be licensed to carry out regulated activities in your jurisdiction (and do not hold themselves out as being able to do so). Unless otherwise stated below in the legal entity disclosures, this material has been distributed by the legal entity responsible for production, or where more than one legal entity is listed under the analyst's name, the first legal entity will be responsible for distribution. If you have any queries, please contact the relevant Research Analyst in your jurisdiction or the entity in your jurisdiction that has distributed this research material.

Morgan Securities plc (“JPMS plc”) which is a member of the London Stock Exchange and is authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority or J.P. Morgan Markets Limited (“JPMML Ltd”) which is authorised and regulated by the Financial Conduct Authority. Unless specified to the contrary, this material is distributed in the UK by JPMS plc and is directed in the UK only to: (a) persons having professional experience in matters relating to investments falling within article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) (Order) 2005 (“the FPO”); (b) persons outlined in article 49 of the FPO (high net worth companies, unincorporated associations or partnerships, the trustees of high value trusts, etc.); or (c) any persons to whom this communication may otherwise lawfully be made; all such persons being referred to as “UK relevant persons”. This material must not be acted on or relied on by persons who are not UK relevant persons. Any investment or investment activity to which this material relates is only available to UK relevant persons and will be engaged in only with UK relevant persons. A description of J.P. Morgan EMEA’s policy for prevention and avoidance of conflicts of interest related to the production of Research can be found at the following link: [J.P. Morgan EMEA - Research Independence Policy](#).

U.S.: J.P. Morgan Securities LLC (“JPMS”) is a member of the NYSE, FINRA, SIPC, and the NFA. JPMorgan Chase Bank, N.A. is a member of the FDIC. Material published by non-U.S. affiliates is distributed in the U.S. by JPMS who accepts responsibility for its content.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst’s involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan’s current opinions or judgment as of the date of the material only and are therefore subject to change without

notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.
