

Siemens Energy (ENR1n.DE): New buyback points to a returns of value acceleration

Siemens Energy announced they will commence the third tranche of its share buyback program on 24 September 2026, with a volume of up to €2bn. The tranche will run until 31 March 2027 at the latest. The tranche forms part of Siemens Energy's share buyback program of up to €6 billion, which is scheduled to run until the end of fiscal year 2028.

View: Including today's buyback, Siemens Energy will have returned €5bn of the €6bn of buyback earmarked out to FY 2028. This forms part of €10bn of returns of value over the period when dividends are included. If the company were to maintain the existing run rate for buybacks it would imply €12bn over the period to FY 2028 for buybacks and €16bn returns of value. Overall, we would see this announcement as a positive and it sets up for an update on capital allocation on the Capital Markets Day on the 11th November. Our EBITA estimates are 6% ahead of consensus by FY 2030, and we forecast a further material acceleration in cash flow. This leaves the company trading at c.6x 2030E EV/EBITDA, with visibility and growth expanding. This growth is driven by: (1) higher profitability within Gas Services; (2) solid, long-duration top-line growth and higher profit margins in Grid Technologies; and (3) increased profit margins at Siemens Gamesa. Looking at capital returns, we see scope for more than €25bn to be returned to shareholders out to the end of the decade. When compared to GE Vernova, Siemens Energy's performance continues to progress meaningfully, supporting the case for the relative valuation gap to narrow on 2028E EV/EBITDA (Siemens Energy at a c.50% discount). We remain Buy rated.

Investment thesis

We see Siemens Energy's delivery this year as providing reassurance on fundamental demand tailwinds for the business (data center demand, grid capex, energy security), and expect further top-line growth and margin improvement. Beyond FY 2028, our estimates imply more than 60% earnings growth through to FY2030, and a further material acceleration in cash flow. This would leave Siemens Energy trading at a c.6x 2030E EV/EBITDA, with visibility and growth expanding. The growth we expect is driven by: (1) higher OEM volumes and stronger service profitability within Gas Service; (2) strong and long-duration top-line growth in Grid Technologies; and (3) increased focus on offshore wind at Siemens Gamesa. Looking at capital returns, we see scope for more than €25bn to be returned to shareholders out to the end of the decade. We continue to see execution narrowing the valuation gap with GE Vernova (covered by Joe Richie), which trades at broadly twice the multiple of Siemens Energy at c.21x 2028E EV/EBITDA. We are Buy rated, with a 12m price

target of €212.

Valuation & risks

We are Buy rated (on CL) on Siemens Energy, with a 12-month price target of €212. Our SOTP-based valuation methodology is based on a peer group CY27E EV/EBITA multiple for Gas & Power of 21.5x. We value Siemens Gamesa using a DCF, in which we use a 7.4% post-tax WACC.

Key downside risks to our investment thesis and price target include: Inability to manage the quality issues emerging in specific onshore wind turbine models, increasing competition and price pressure, failure to deliver cost savings, a weaker economy, and FX and material headwinds.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or

policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.
