Goldman Sachs International

We hosted Veronika Bienert (CFO), Tobias Atzler (Head of IR) & Martin Bacherle (IR Manager) at the 15th German Corporate Conference in Munich. Here are our key takeaways:

- **Short-term demand continues to slightly improve.** DI's overall environment continues to improve, driven by semis and aerospace & defence, especially in the US. Machine builders are seeing improving order patterns too, and discrete automation is benefiting from trickle-down effects. Traditional industries remain soft, particularly energy-intensive industries as well as German automotive and chemicals. SI is the clear outperformer on data centre exposure, with a positive multi-year outlook. German infrastructure stimulus is showing a 'slow but steady' impact, but it is not yet material.
- **DI Software's SaaS transition is nearly done, and AI is both a moat and an internal cost lever going forward.** DI's medium-term margin guide remains c17–23%, with this year's software performance an early indicator that Siemens can continue to improve within that band. For DI Automation, margin and volume growth recovery remain the most important drivers, while for software, the healthy pipeline, continually fading SaaS impacts, lower M&A integration costs, and cost and revenue synergies from M&A should continue to contribute positively. A leaner DI organisational structure goes live on October 1 to take costs out and lift margin quality. On AI disruption, their moat is real-time industrial data; customers want defensible, real-time context. Monetisation is a live topic: customers are asking for user-based licensing, with token-based pricing having been requested so far only in niches, but over the medium term they see that as a potential layer on top of licenses as well. Internally, 45k developers are focused on finding opportunities to deploy AI in three dimensions: own productivity, AI-enhanced existing products, and new offerings/back-office cost savings, with code and data shared live across the group except where customer contracts restrict it. Overall, Siemens is on track or slightly ahead of its objective of doubling its digital business by 2030 and notes

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. For Reg AC certification and other important disclosures, see the Disclosure Appendix, or go to www.gs.com/research/hedge.html. Analysts employed by non-US affiliates are not registered/qualified as research analysts with FINRA in the U.S.

ARR is very healthy.

- **On capital allocation, Siemens remains focused on a progressive dividend, accelerated buybacks and prudent M&A.** The progressive dividend will be maintained post the Healthineers spin-off. In the context of the €6bn/5-year buyback, Siemens has already completed its first €1bn at a very fast pace; the five-year framing is about flexibility, and management would rather execute it at an accelerated pace like the last one. A short pause of a few months is needed around the SHL spin period, but then it will resume. On M&A, Siemens is committed to staying prudent with daily target monitoring. Hardware assets are interesting where they create complementary data, and software targets could be interesting in operational and asset management areas, but Siemens always needs to assess the merits of build-vs-buy. Regarding the interlinks of Mobility with the remaining divisions, Siemens thinks it fits the real-and-digital thesis (digital twin, signaling data in the cloud, predictive fleet management), with technology leadership in areas like Vectron (which leverages SFS expertise, generates strong margins and ~€1bn of FCF p.a. since 2015, while enjoying improving backlog margin quality). However, long project cycles mean slow P&L read-through, and execution needs to improve.
- **Siemens sees its positioning vs Chinese competition as defensible given its focus on local innovation; the local China market remains healthy on demand.** China DI Automation delivered ~17% order intake growth and ~9% revenue growth in 3Q, with 26+ locally developed products launched and local-for-local “smart” products growing DD. More launches are planned next year, and these products are now cost-competitive enough to serve broader markets beyond China if Siemens needs to compete with Chinese companies abroad. In large PLCs, barriers to entry remain high and Siemens is strong on both technology and cost, but constant local innovation is required to maintain its cost position. Regarding the domestic China environment, management sees healthy demand, with a strong July and very healthy August. They see no signs of distributor inventory build or unusual channel behaviour.
- **Data centres have a ~€6bn backlog and Siemens does not see risks of overcapacity.** Siemens noted an optimistic outlook with 9 of the top 10 hyperscalers relying on them, and has adjusted capacity with new plants in Germany and the US, in order to execute the backlog. Crucially, all capacity expansion is matched to order backlog or long-term frame agreements and built modularly to stay flexible. Frankfurt was chosen over emerging markets specifically for its qualified, highly skilled labour pool; management does not want to risk execution. Demand is well covered for 2–3 years but is harder to call beyond that. The medium- vs low-voltage mix will hinge on the pace of the 800VDC transition, which they see as a 4–5 year journey across greenfield and brownfield projects, with pilots in 2027 and two partners deliberately chosen first to help Siemens form its own view of which products matter most.
- **ONE Tech Company will materially help improve productivity, but with a back-end loaded profile.** From 1 October, total cost of ownership will be measured per function across cybersecurity, sales and engineering tools, underpinned by shared platforms, a shared CRM/sales approach, a solid data fabric and shared code,

tools and AI, with the aim of creating headroom for the company.

Valuation and key risks

Siemens: We are Buy rated with a 12 month price target of €319. Overall, we value Siemens 50% on our SOTP and 50% on our sector-relative EV/IC to ROIC/WACC methodology using 6m27/6m28 estimates.

Key downside risks include: (1) prolonged automation weakness, especially in China; (2) pricing pressure due to EM competition; (3) contract execution issues; and (4) value-dilutive capital deployments.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or

other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, make a market or act as liquidity provider in, and buy or sell, any securities, derivatives, or other financial instruments referred to in this research (including any financial instruments issued by the companies referred to herein), unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
