Bottom Line: Highlights from our discussion included: **1)** Vertiv commented on strong demand and a robust pipeline, supported by its product offerings and full solutions, and discussed future architectures including 800V DC; **2)** Vertiv commented that it continues to work through supply chain challenges; **3)** Management reiterated its 27%+ adjusted operating margin target in 2030; and **4)** On capital allocation, Vertiv commented that it will continue to invest in organic and inorganic opportunities, and highlighted the recently proposed UIG acquisition.

Key Takeaways

1) Vertiv highlighted strong demand and a robust pipeline, supported by its product offerings and full solutions, and discussed future architectures including 800V DC:

Vertiv spoke to strong demand and an attractive long-term growth opportunity driven by the datacenter market, in particular for AI, and its ability to offer full solutions (e.g. SmartRun and OneCore). Recall that the company's target organic revenue CAGR is 20–22% from 2025–2030, which is 4% above the market at the midpoint.

The company had commented that its pipeline increased on the 2Q call, and the company spoke to how demand has broadened geographically.

Importantly, management commented that despite recent headline volatility, including potential policy headwinds on datacenter construction, demand has remained strong. Moreover, the company discussed how its products help to address some policy related concerns, such as closed loop cooling.

On its tech roadmap, Vertiv discussed the transition to 800V DC power architectures to support higher density racks, including needing flexibility in the datacenter for different architectures as Vertiv believes datacenter architecture will vary based on

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. customer types and needs. On the timeline of 800V, the company reiterated that customer validation is ongoing and that it would expect to see an acceleration of 800V sidecar products start to ship in 2H27 and that fully native 800V is expected to start in 2H27 with larger volume shipments in 2028.

Vertiv also discussed the advancement of its liquid cooling solutions, including strong initial demand for its new CoolLoop Trim Cooler.

On hyperscalers building their own power and cooling products, the company commented that this is not a new phenomenon in the industry, and that those customers still need suppliers who can help them with technology know how and product depth.

2) Vertiv commented that it continues to work through its supply chain challenges:

On the timing issues related to supply chain congestion and project phasing from 2Q, the company commented that it was specific to its converged infrastructure products (SmartRun and OneCore). Specifically, when industrializing these products the company ran into some coordination issues across factories. Management commented that its guidance allows for some hiccups but it is working to mature these products and processes. The company commented on the 2Q call that it was taking steps to alleviate these challenges, including adding capacity and allowing more time for procurement/production and it expected the issue to be resolved in 2H26.

3) Management continues to expect to reach its 27%+ adjusted operating margin target in 2030:

Management highlighted that it is on track to achieve its longer term 27%+ margin target in CY30 driven by operational leverage and efficient operation output, such as manufacturing facility productivity with labor and overhead and well as scale in purchasing.

On pricing, similar to previous commentary, the company also expects to remain price-cost positive in 2026, inclusive of tariff impacts and countermeasures.

4) On capital allocation, Vertiv commented that it will continue to invest in organic and inorganic opportunities and highlighted the recently proposed UIG acquisition:

Vertiv noted that it will continue to invest both organically and inorganically. The company commented at its investor day that it has an opportunity to do ~\$28 bn in capital deployment from 2026-2030, including ~\$4 bn in share repurchases and dividends, with flexibility to use another ~\$24 bn (which could include larger acquisitions).

The company also highlighted the recent proposed acquisition of UtilityInnovation Group (UIG) to improve its power solutions portfolio, which it expects to be accretive to adjusted EPS in the first year post-close. Management commented that UIG is helping it with influencing how the powertrain will be constructed in future deployments.

Valuation/Risks

We are Buy rated on the stock. Our 12-month price target is \$301, which is based on a 22X EV/EBITDA multiple applied to our updated Q5-Q8 EBITDA estimate.

Key downside risks to our view include: 1) Revenue growth – Vertiv has a portion of its datacenter revenue still tied to traditional on-premise datacenters, which is a part of the market that could be impacted by either enterprise spending weakness or by the shift to the cloud. In addition, Vertiv’s ability to continue to improve its cloud/hyperscale revenue and grow in the channel will be important factors in how fast its revenue will increase. Also, market share will be a factor in revenue trends. 2) Margins – There are risks to our expectation for margin expansion. This could come from increased competitive pressure, mix, or execution, tariffs.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global

Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
