Factoring US updated earnings; hog profit cycles, feeding cost & EL Nino in focus

0288.HK 12m Price Target: **HK\$10.10** Price: **HK\$7.10** Upside: **42.3%**

SFD (covered by US Packaged Food analyst Leah Jordan) provided a business update and lowered 3Q adj OP guidance, implying a 53% yoy decline at the mid-point. Following our [initial take](#) earlier today, we updated our WH earnings and now expect 24% yoy OP decline in 3Q26 and flat yoy in 4Q26 respectively, versus -10%/+4% before.

The impact of the US hog price & feeding cost cycle, along with El Nino, on the 4Q26 outlook remains the most asked question in our conversations with investors. While we do not forecast commodity trends, we have outlined key historical insights for reference. We highlight below key takeaways: **1) US hog profits cycle:** Our US team now projects \$15/head profits for hog production in 3Q26 and \$11/head losses in 4Q26, and \$4/head in 2027 – which is broadly in line with the industry’s simple average profits in 2024 if referring to [Iowa State University forecasts](#) – while we understand mgmt has highlighted their hog profit expectations will outperform the industry benchmark (from CME futures and Iowa State model) through its cost and operating advantages (refer to [2Q26 readacross](#)). In an extreme case back to 2023, hog profit losses can reach up to \$24/head where total feeding cost was a major swing, at \$89/head (by applying 10 bu corn + 150 lb soybean meal per head) vs 2024’s \$67 and 2025’s \$66 per head. In 2025, we see strong hog prices and dropping feeding costs ([Exhibit 2](#)), leading to a higher hog profitable year at \$27/head ([Exhibit 1](#)); **2) Feeding costs on El Nino effect:** according to [our global commodities team](#), the El Nino effect could disrupt multiple Crop Regions Through Severe Droughts and Floods (e.g. US/Brazil corn, accounting for c.40%/20% of global exports and US/Brazil soybean, accounting for c.20%/60% of global exports), though SFD mgmt shared mitigating measures (see our [2Q26 earnings review](#)) by leveraging its established hedging framework, including the long-dated liquidity of corn futures to lock in costs further ahead. Beyond financial hedging, the company is optimizing corn procurement, grain-storage capacity and feed formulations to reduce feed-cost risk; **3) China hog price**

assumptions: Our China agricultural team's 2H26E hog price forecast is Rmb12.0/kg, and Rmb14.0/kg for 2027–2028E, echoing the thesis of a hog price rebound in 2H26E (see our [China Agricultural Team's analysis](#)) driven by MOA's lower target for industry sow herd combined with accelerating exits of distressed producers.

Earnings Revisions: After factoring in the latest US forecasts (see [US team's earnings revisions](#)), we lower our WH group 26–28E OP by 3–5% to reflect 5–7% lower US profits due to the weaker outlook for hog production & fresh pork. Following earnings changes, our TP moved to HK\$10.1 (vs prior HK\$10.9), with an unchanged SOTP.

Price target, risks and methodology - WH Group

Our 12m TP of HK\$10.10/sh is based on a SOTP, with 1) the US business SFD using the US team's valuation based on a risk-reward framework with target downside/base/upside EV/EBITDA of 7.0x/8.0x/8.5x; 2) China business P/E valuation at 17x; 3) European business at 2026E P/E at 7x, and applying a NAV discount of 10%. Key downside risks: **1) US business** (per our US team): **Topline:** A slowdown in economic activity which could lead to a reduction of consumer spending, resulting in lower demand; shifts in consumption trends away from protein/pork or value-added options; lower-than-expected demand for US pork in the global market; **Margin:** Margin pressure from increased promotional spending; higher raw material costs; changes in regulation which could result in higher costs; labor shortages or wage cost pressure; retaliatory tariffs; and loss of sales or higher costs related to an outbreak of food-borne illnesses or diseases among livestock; **2) China business: Volatility in live hog prices, higher-than-expected corn prices in US/China to put pressure on Shuanghui pork and packaged meat margins:** Potential inflation risks in commodities incl. soybean, corn, and pork in China with US/China imposing tariffs on imports; **3) Food safety issues:** Any repeat of food safety issues could largely impact the trust of consumers in the brand and WH Group's financials negatively.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, make a market or act as liquidity provider in, and buy or sell, any securities, derivatives, or other financial instruments referred to in this research (including any financial instruments issued by the companies referred to herein), unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators.
