

JAPAN BANKS

Adjusting GSe/TPs for our coverage banks to reflect higher policy rate forecasts

Expectations for a BOJ policy rate hike are accelerating. At the time of writing, the OIS market has almost fully priced in a September hike, with a total of two hikes by January 2027. Our economists also revised their outlook for BOJ rate hikes on August 25, and now expect a September rate hike. Should this September hike occur, it will likely create profit upside for banks against their FY3/27 guidance (many of which still assume a policy rate of 0.75%) and medium-term plans (many of which assume 0.75% to 1.25% for FY3/29). Barring any deterioration in the Middle East situation, this could lead to upward revisions to full-year guidance at 2Q earnings (see Japan Banks: Rising near-term BOJ rate hike expectations: Implications for banks, published on August 26).

In response to these environmental changes, we raise our earnings forecasts for banks to incorporate a 25 bp policy rate hike in September followed by another 25 bp hike in January 2027. While we factored in an acceleration in loan growth in our earnings forecast adjustments at 1Q earnings, we revise this up again somewhat while tempering our growth assumptions for cash and securities. We continue to assume stable credit costs and expect an acceleration in gains on sales of cross-shareholdings from 2Q onward.

From a stock-picking perspective, given the near-term focus on the policy rate, our investment strategy entails going long on banks with high interest rate sensitivity while underweighting those with high funding costs. The pricing in of rate hikes in bank stocks has lagged behind the interest rate markets, leaving significant room before the terminal rate is fully priced in. In addition, alongside rising rates, banks with room for spread expansion, banks with superior deposit-gathering capabilities, and banks with low loan-to-deposit ratios will likely be favored against the backdrop of 'competition for capital,' characterized by rising funding demand and debate on inheritance tax breaks for retail JGBs. Based on the above factors, we believe megabanks are in the sweet spot, with Mizuho our top pick due to its competitive edge in large corporate lending and capital markets business. In the short term, however, given the tendency for regional banks with high domestic exposure to also gain favor during rate-hike cycles, we also raise our target prices for these names.

Review of FY3/27 1Q earnings: Solid start

The three megabanks' 1Q FY3/27 results were strong, renewing record high profits.

Analysts employed by non-US affiliates are not registered/qualified as research analysts with FINRA in the U.S.

Net income at each company increased by 33% to 43% yoy. Achievement rates against initial guidance got off to a solid start at 30% to 32% in 1Q, and despite stock market volatility from 2Q onward and uncertainty surrounding the situation in the Middle East, we get a positive impression from each bank's stance regarding the certainty of achieving their guidance.

Regarding full-year guidance, Mizuho implemented an upward revision to reflect the June rate hike, marking the second consecutive year of an upward revision at its 1Q results. Although SMFG forewent an upward revision, its materials showed the estimated impact of the June rate hike and wording about pursuing upside. While MUFG had already factored a policy rate hike to 1.0% into its initial guidance, a common point among the companies is that recent corporate loan growth and the levels of the USD/JPY and Nikkei average appear to be higher than guidance assumptions, and the potential for the BOJ to raise the policy rate to 1.25% within the fiscal year is not included in their guidance.

The background to the strong results is that the core business remains solid, in addition to rising interest rates. Consolidated net interest income (excluding gains on cancellation of investment trusts) in 1Q grew by 16% to 21% yoy at each company, expanding smoothly driven by an increase in the domestic loan balance and higher investment yields due to yen bond rebalancing.

In particular, the robust funding demand shows potential for a trend change at this juncture. The combined domestic loan balance of the three megabanks (excluding loans to the government) has grown significantly, primarily among large and mid-sized corporates, coming in at +9.8% yoy at end-March 2026 and +10% yoy at end-June. From the perspective of investors, although this was on the radar to some extent before earnings due to the BOJ's lending and deposit statistics (April-June lending +6.1% yoy, of which city banks +8.4% yoy), it was a surprise to see it even higher when actually confirmed in the results. Furthermore, alongside volume factors, the domestic loan-deposit margin is also expanding, and although it may not expand in a straight line every quarter given the timing of deposit rate hikes, it appears to be progressing smoothly.

Non-interest income was also solid, with growth in securities/solutions-related and sales & trading revenues amid buoyant capital markets both domestically and overseas, as well as favorable asset management-related revenues, despite some mark-to-market factors. At MUFG, M&A-related and project finance revenues, as well as equity-method profits from Morgan Stanley, were strong; at SMFG, securities and payments contributed to higher fee income; and at Mizuho, we get the impression that M&A-related, large-scale transactions, and sales & trading were steady. In addition, banking revenues (ALM and equity gains) were also strong, capturing the upside in the stock market, and it appears that agile responses in a fluctuating environment have been successful.

Although expenses increased due to inflation and forex factors, the increase was contained relative to top-line growth, resulting in a lower expense ratio. Credit costs did not show any material impact related to the situation in the Middle East; even with an accumulation of forward-looking provisions, Mizuho's consumption rate against its full-year guidance remained low at 5%, while MUFG and SMFG were also contained at 20-22%, albeit with some contribution from their Asian franchises.

Overall, net income is progressing smoothly, and ROE (TSE standard) is also coming in line with or slightly exceeding the 12% target in each bank's current medium-term plan.

Funding demand is still strong

Major banks' 1Q results showed domestic lending (excluding loans to the government) at megabanks reaching a historically high growth rate of +10% yoy. The acceleration in funding demand, initially seen as temporary in the Jan-Mar quarter, continued through Apr-Jun, maintaining momentum into July and August, and along with rising interest rates, this has served as a driver of net interest income (NII).

With attention focused on the outlook for funding demand, the BOJ released its August lending and deposit data on the morning of September 8. The outstanding loan balance at city banks grew at a high rate of +7.9% yoy, continuing the strong momentum seen in June and July. We believe this suggests that megabanks and major regional banks continued to grow lending significantly through the middle of 2Q.

According to comments from banks at their 1Q results briefings, loan growth was driven by a wide range of industries and funding needs (capital investment and working capital), which was also confirmed by the BOJ's data on Loans and Bills Discounted by Sector (April-June). While we cannot rule out demand such as securing cash on hand in preparation for the risk of supply chain disruptions due to uncertainty over the situation in the Middle East, the proportion of manufacturing in the loan growth is not high, and the amount of commitment lines outstanding does not appear to be as sustainable as seen during the Covid-19 period. Amid accelerating corporate actions in Japan, funding demand for capital investment, growth investment, and M&A appears to be increasing. For banks, as they capture funding demand, issues such as rising loan-to-deposit ratios and B/S control will also come into view, making management that balances clients' demand for capital and banks' own funding the key.

August loan balance up +5.8% yoy, city banks up +7.9% yoy

The BOJ August outstanding loan balance grew by +5.8% yoy (with city banks +7.9% yoy, average balance basis), and while this represents a slightly cooling from June, growth continued the trend from July in exceeding momentum seen up to April. Historical growth rates were +3.8% in Jul-Sep 2025 (city banks +3.7%), +4.6% in Oct-Dec 2025 (+5.1%), +5.0% in Jan-Mar 2026 (+5.9%), and +6.1% in Apr-Jun 2026 (+8.4%). Data published by the Japanese Bankers Association on September 7 (August growth of +4.6% yoy overall, with +5.6% yoy for city banks; ending balance basis, including loans to government) similarly showed ongoing robust growth led by city banks, suggesting megabanks and major regional banks have continued to significantly increase lending in 2Q.

Lending appears to be growing across a wide range of industries and for a range of uses. The BOJ's Loans and Discounts by Sector (quarterly survey) released on August 10 revealed lending by industry at the end of June, showing high growth rates across many sectors, with Manufacturing at +6.9% yoy, Construction +14.8%, Information and Communications +11.7%, Transport +7.6%, Wholesale Trade +10.2%, Real Estate +8.2%, and Finance +8.4%, while overseas yen loans also grew +15.8% yoy, albeit from a small base. Demand is dispersed across other industries, and there does not appear to be a skew toward any single industry such as data centers.

In terms of the use of funds, June statistics suggest that both capital investment funds and non-capital investment funds (e.g., working capital, M&A) are growing. Demand for non-capital investment funds remains larger (78% of total lending for manufacturing, 64% for non-manufacturing), and the growth rate for non-capital investment funds is also accelerating (manufacturing +7.4% yoy, non-manufacturing +9.0% yoy), but growth in capital investment funds is also solid, with notable growth in recent months, particularly in non-manufacturing (+6.3% yoy).

Exhibit 1: Domestic Banks: Loans, Deposits, and Loan-to-Deposit ratio

Bank classifications conform to BOJ standards.

Opportunities and risks

For banks, the recent expansion in funding demand, along with rising interest rates, should be a tailwind for NII. Against the backdrop of rising funding demand, we also see scope for a recovery in loan spreads. On the other hand, while lending is growing significantly, growth in deposits remained at +1.9% yoy (August, average balance basis), and we think loan-to-deposit ratios are prone to rise, while the issue of balance sheet control (e.g., with liquidity ratios in mind) is coming into view for the medium term. Some major regional banks have set out dynamic balance sheet management policies, such as not reinvesting redemption money from held-to-maturity JGBs and instead diverting it to capturing funding demand. Going forward, we think management that balances clients' demand for capital and banks' own funding will be key.

We raise our earnings estimates and target price to factor in our Japan economists' expectations for policy rate hikes (to 1.25% in September and then to 1.5% in January 2027), as well as recent loan growth and our strategist's upward TOPIX target revision. We raise our FY3/27-FY3/29 net income estimates by 3%/1%/4%. Note that we also make some adjustments as necessary for higher deposit betas or unrealized losses on AFS (Available-For-Sale Securities).

Our new 12-month target price is ¥4,300 (previously ¥4,000). We base this on a target P/B of 1.91X (previously 1.74X; derived from our FY3/29 normalized ROE estimate of 14.30% (previously 13.94%) and an 8.0% cost of equity) and our end-FY3/28E BVPS estimate of ¥2,277 (previously ¥2,270). We maintain our Buy rating.

Source: Company data, Goldman Sachs Global Investment Research

We raise our earnings estimates and target price to factor in our Japan economists' expectations for policy rate hikes (to 1.25% in September and then to 1.5% in January 2027), as well as recent loan growth and our strategist's upward TOPIX target revision. We raise our FY3/27-FY3/29 net income estimates by 12%/26%/27%. Note that we also make some adjustments as necessary for higher deposit betas or unrealized losses on AFS (Available-For-Sale Securities).

Our new 12-month target price is ¥2,150 (previously ¥1,700). We base this on a target P/B of 1.47X (previously 1.18X; derived from our FY3/29 normalized ROE estimate of 11.72% (previously 9.44%) and an 8.0% cost of equity) and our end-FY3/28E BVPS estimate of ¥1,469 (previously ¥1,422). We maintain our Buy rating.

Source: Company data, Goldman Sachs Global Investment Research

We raise our earnings estimates and target price to factor in our Japan economists' expectations for policy rate hikes (to 1.25% in September and then to 1.5% in January 2027), as well as recent loan growth and our strategist's upward TOPIX target revision. We raise our FY3/27-FY3/29 net income estimates by 8%/27%/25%. Note that we also make some adjustments as necessary for higher deposit betas or unrealized losses on AFS (Available-For-Sale Securities). The scheduled integration with Chiba Kogyo Bank is not included in our estimates as the integration is not yet effective.

Our new 12-month target price is ¥3,040 (previously ¥2,500). We base this on a target P/B of 1.49X (previously 1.24X; derived from our FY3/29 normalized ROE estimate of 11.92% (previously 9.93%) and an 8.0% cost of equity) and our end-FY3/28E BVPS estimate of ¥2,038 (previously ¥1,983). We maintain our Neutral rating.

We update our earnings estimates and target price to factor in our Japan economists' expectations for policy rate hikes (to 1.25% in September and then to 1.5% in January 2027), as well as recent loan growth and our strategist's upward TOPIX target revision. We revise our FY3/27-FY3/29 net income estimates by +0%/-2%/+1%. Note that we also make some adjustments as necessary for higher deposit betas or unrealized losses on AFS (Available-For-Sale Securities).

Our new 12-month target price is ¥1,870 (previously ¥1,980). We base this on a target P/B of 1.30X (previously 1.37X; derived from our FY3/29 normalized ROE estimate of 9.73% (previously 9.6%) and an 8.0% cost of equity) and our end-FY3/28E BVPS estimate of ¥1,438 (previously ¥1,440). We maintain our Neutral rating.

Investment Thesis - MUFG

MUFG is Japan's largest megabank and provides a wide range of financial services in Japan and overseas. We see potential tailwinds in steady growth in domestic/overseas corporate lending at present, and recovery in capital and bond markets going forward. The company has accelerated group-wide initiatives aimed at improving capital efficiency. MUFG is also targeting ROE of mid-10% over the longer term. We are Buy rated.

Price Target Risks and Methodology - MUFG

Target price methodology: We are Buy rated on MUFG. Our 12-month target price of ¥4,300 is based on a target P/B of 1.91X and our end-FY3/28E BVPS estimate of ¥2,277. We derive our target P/B multiple from our FY3/29E normalized ROE estimate of 14.3% and a cost of equity of 8.0%.

Key downside risks: (1) Deterioration in the global economic outlook; (2) credit cycle worsening; and (3) capital markets remaining weak.

Investment Thesis - SMFG

One of Japan's megabanks with traditional banking and securities operations, SMFG also operates a variety of financial services including credit card (Sumitomo Mitsui Card), consumer finance (SMBCCF), and aircraft leasing, and yields and ROA in these businesses have been high historically relative to other megabanks. Our investment focus is on: (1) the possibility of further profit increases due to additional interest rate hikes by the BOJ, (2) movements related to corporate governance such as accelerating the sale of cross-shareholdings, and (3) strong profit momentum driven by the expansion of domestic and overseas capital market revenues and inorganic growth in Asia. Sensitivity to BOJ monetary policy changes is also high, in line with other megabanks. We are Buy rated.

Price Target Risks and Methodology - SMFG

Target price methodology: Our 12-month target price of ¥8,200 is based on a target P/B of 1.74X and our end-FY3/28E BVPS estimate of ¥4,697. We derive our target P/B multiple from our normalized FY3/29E ROE estimate of 13.03% and a cost of equity of 8.0%.

Key downside risks: (1) Long-term interest rates declining due to outlook for a global economic slowdown, (2) Higher input/procurement costs owing to inflationary pressure, (3) A prolonged slump in capital markets.

Investment Thesis - Mizuho FG

Mizuho has been working to improve value by transforming the corporate culture and promoting digital transformation (DX) in conjunction with the shift to stable system operations since February 2022. We are Buy rated, as the bank is improving its earnings on the back of steady growth in lending to domestic and overseas corporations. Our investment focus is on: (1) signs of profit growth on the allocation of management resources to priority areas, led by the domestic corporate business, and steady growth in the core business; (2) the improvement of capital efficiency and ROE through the shifting of resources from low-margin assets to high-margin assets; and (3) the possible strengthening of growth investments and shareholder returns while maintaining a CET1

ratio in the 9.5–10.5% range.

Price Target Risks and Methodology – Mizuho FG

Target price methodology: Our 12-month target price of ¥10,300 is based on a target P/B of 1.91x and our end-FY3/28E BVPS estimate of ¥5,404. We derive our target P/B multiple from our normalized FY3/29E ROE estimate of 14.31% and a cost of equity of 8.0%.

Key downside risks: (1) Long-term interest rates declining amid global economic slowdown outlook; (2) credit cycle worsening due to prolonged geopolitical risk; and (3) larger-than-expected cost increases under the stable management of systems and business operations.

Investment Thesis – Resona Holdings

Resona Holdings is a major regional bank in Japan composed of Resona Bank, Saitama Resona Bank, and Kansai Mirai Financial Group. Its strength lies in community-based retail banking, mainly in the Greater Tokyo area and the Kansai region. We are Neutral rated on Resona relative to our sector coverage. Key investment considerations include (1) potential for higher long/short-term interest rates, (2) the potential for higher ROE from rebounding interest spreads, and (3) gradual growth in profits.

Price Target Risks and Methodology – Resona Holdings

Target price methodology: Our 12-month target price is ¥2,800, based on our FY3/28E BVPS estimate of ¥1,541 and a target P/B of 1.79X. Our P/B is derived from our normalized ROE estimate of 14.35% (FY3/29E ROE estimate adjusted by normalized credit costs of -3 bp) and a cost of equity of 8.0%.

Upside risks: (1) faster-than-expected improvement in yields on SME loans, (2) faster-than-expected JGB reinvestment, and (3) acceleration in profit growth driven by digital platform or organic/inorganic growth.

Downside risks: (1) higher-than-expected increase in funding costs (deposit rates), (2) higher-than-expected increase in unrealized losses on JGBs, and (3) higher SME-related credit costs.

Investment Thesis – Yokohama Financial Group

The Group's Kanagawa Prefecture and Tokyo home markets feature a significant number of listed companies, and it has relatively large corporate client and high-net-worth customer bases. Key points to our investment thesis: (1) Impact of interest rate normalization: A rising interest rate environment would create revenue opportunities for regional banks. In our view, especially when short-term prime rates rise, large regional banks such as Yokohama FG could benefit more than megabanks. (2) Corporate governance: Unwinding of cross-shareholdings could provide further tailwinds. (3) Profit momentum and corporate solutions: The capture of high-margin structured finance contracts could not only improve its lending yield but also expand fee income. (4) Capital policy outlook: We think investors may focus more on the potential for share buybacks if Yokohama FG does not utilize surplus funds for investment in inorganic growth. Key downside risks include (1) higher unrealized losses on bonds, (2) an increase in domestic SME credit costs, and (3) increased competition for high-margin contracts

such as LBO loans. We are Buy rated.

Price Target Risks and Methodology - Yokohama Financial Group

Price target methodology: Our 12-month target price is ¥2,150, based on a fair P/B of 1.47X (calculated using our normalized FY3/29E ROE forecast of 11.72% and cost of equity of 8.0%) and our FY3/28E BVPS forecast of ¥1,469.

Key downside risks: (1) Higher unrealized losses on bonds, (2) an increase in domestic SME credit costs, and (3) increased competition for high-margin contracts such as LBO loans.

Investment Thesis - Chiba Bank

Chiba Bank is a major regional bank with an operating base in Chiba Prefecture, which is a large prefecture in terms of both population and economy. In addition to lending to SMEs, the bank has high exposure to real estate related lending, including loans for logistics facilities and the property leasing industry, reflecting regional characteristics. Key points to our investment thesis: (1) Boosting ROE through self-help efforts: We see potential for further ROE improvement through growth in existing businesses (such as corporate solutions) and strategic investments in systems and human capital (related to cashless payments, new businesses, etc.). (2) Manifestation of synergies with Chiba Kogyo Bank as set forth in the Chiba FG Midterm Plan. (3) Outlook for capital policy: Although the bank continues to exceed its CET1 ratio target range (10.5-11.5%), leading to expectations for shareholder returns, our impression is that this is still under consideration, including the balance with inorganic growth. Upside risks include (1) larger-than-expected gains from shareholding sales, (2) stronger-than-expected growth in net interest income due to normalization of BOJ monetary policy, and (3) accelerated monetization from inorganic growth, including digital business. Downside risks include (1) higher-than-expected credit costs, (2) stronger-than-expected rise in deposit rates, and (3) increase in bond valuation losses. We are Neutral rated.

Price Target Risks and Methodology - Chiba Bank

Price target methodology: We are Neutral rated. Our 12-month target price of ¥3,040 is based on a target P/B of 1.49X and our end-FY3/28E BVPS estimate of ¥2,038. We derive our target P/B multiple from our normalized FY3/29E ROE estimate of 11.92% and a cost of equity of 8.0%.

Key upside risks: (1) larger-than-expected gains from shareholding sales, (2) stronger-than-expected growth in net interest income due to normalization of BOJ monetary policy, and (3) accelerated monetization from inorganic growth, including digital business.

Key downside risks: (1) higher-than-expected credit costs, (2) stronger-than-expected rise in deposit rates, and (3) increase in bond valuation losses.

Investment Thesis - Fukuoka Financial Group

In Kyushu, the group's major business base, capex is strong, particularly in semiconductor-related fields, and the group estimates the economic impact over the 10 years from 2021 at ¥20.1 tn. With funding needs already emerging in leasing and logistics, we see prospects for more funding demand going forward. Key points to our

investment thesis are as follows: (1) Visibility of profit targets in the next medium-term plan and the impact of the BOJ's monetary policy normalization: Consensus already factors in the upside guidance factors disclosed by the company, but we see room for further upside if the BOJ makes additional rate hikes. (2) Alliances to turn Minna Bank profitable: If Minna Bank turns profitable, it could increase the visibility of the FY3/28 ROE target of 10%. (3) Capturing Kyushu's economic growth: If the increase in semiconductor-related lending has a positive impact on the local economy, it could be a positive catalyst for the bank. (4) Outlook for capital policy: The direction of the group's capital policy is less clear than that of its peers, and market expectations for short-term shareholder returns are also relatively low. Upside risks include (1) better-than-expected accumulation of businesses/assets in structured finance and diversified investments, (2) improved productivity/sales capabilities via reform of existing business models, and (3) more aggressive shareholder returns due to better-than-expected profit growth. Downside risks include (1) increase in bond unrealized losses, (2) worsening credit risk due to deterioration in the financial condition of borrowers, and (3) uncertainty over Minna Bank earnings. We are Neutral-rated.

Price Target Risks and Methodology - Fukuoka Financial Group

Price target methodology: Our 12-month target price of ¥7,500 is based on a fair P/B of 1.14X (calculated using our normalized FY3/29 ROE forecast of 9.14% and cost of capital of 8.0%) and our FY3/28E BVPS forecast of ¥6,518.

Key upside risks: (1) better-than-expected accumulation of businesses/assets in structured finance and diversified investments, (2) improved productivity/sales capabilities via reform of existing business models, and (3) more aggressive shareholder returns due to better-than-expected profit growth.

Key downside risks: (1) increase in bond unrealized losses, (2) worsening credit risk due to deterioration in the financial condition of borrowers, and (3) uncertainty over Minna Bank earnings.

Investment Thesis - Japan Post Bank

Japan Post Bank (JPB) is one of the largest deposit holders in Japan. In recent years, it has positioned alternative investments such as private equity and real estate funds as strategic investment areas, and is growing earnings through asset management. We are Buy rated on the stock. Our focus is on initiatives aimed at achieving 10% ROE over the medium to long term and the possibility of excess cash being shifted to JGBs. Valuations are slightly behind other Japanese banks in terms of P/B but warrant close monitoring when interest rates are rising.

Price Target Risks and Methodology - Japan Post Bank

Target price methodology: Our 12-month target price of ¥3,740 is based on a target P/B of 1.35X and our end-FY3/28E BVPS estimate of ¥2,771. We derive our target P/B multiple from our FY3/29E ROE forecast of 8.77% and a cost of capital of 6.5%.

Downside risks: 1) higher-than-expected deposit beta. 2) Fed Funds rate cut not materializing and keeping US funding costs elevated, and 3) timing mismatch between FX hedge causing optically weaker earning quarters as happened in 1Q FY3/26.

Investment Thesis – Aozora Bank

Aozora Bank is a major mid-tier lender whose strength lies in its business relationships with real estate/business revitalization financing companies and regional financial institutions. Under its current “Aozora 2027” medium-term business plan (FY3/26–FY3/28), the bank aims to promote a unique “Aozora-type” investment banking business, and positions synergistic effects due to a capital alliance with Daiwa Securities Group (Coverage Suspended) and GMO Aozora Net Bank as main growth drivers. We are Sell rated mainly due to the short/medium-term outlook for the bank’s profits. Investment themes include (1) yen and dollar interest rate sensitivity, (2) the ROE outlook, and (3) profit outlook and capital policy (non-financial income is a growth driver in the medium-term plan).

Price Target Risks and Methodology – Aozora Bank

Target price methodology: Our 12-month target price of ¥2,930 is based on a target P/B of 0.77X and our end-FY3/28E BVPS estimate of ¥3,796. We derive our target P/B multiple from our normalized FY3/29E ROE estimate of 6.17% and a cost of equity of 8.0%.

Upside risks: (1) A decline in foreign currency funding cost due to early Fed rate cuts, (2) faster than expected advancements in credit ETF disposals, and (3) realization of higher-than-expected sales gains on investments/investment projects.

Investment Thesis – SBI Shinsei Bank

SBI Shinsei Bank is the core banking institution within SBI Holdings’ digital finance ecosystem and is differentiated by its specialty finance capabilities, including project finance. Key investment focus points: (1) We expect the bank’s above-peer deposit and loan growth rates to continue, supported by cross-selling within the SBI ecosystem. (2) The key challenge is balancing deposit growth with deposit interest rates. However, if its somewhat higher-than-peer deposit rates stabilize, the likelihood of capturing earnings sensitivity to a Bank of Japan (BOJ) rate hike increases—something we believe the market would appreciate. (3) That said, if Hyper Deposits grow faster than we forecast, income from fund operations could rise and the deposit beta could decline. **Key catalysts:** (1) Evidence of increasing wallet share within the SBI ecosystem, such as growth in Hyper Deposits; (2) Continued expansion of the broader SBI ecosystem; and (3) Initiatives to enhance ROE, such as growth investments and shareholder returns.

Price Target Risks and Methodology – SBI Shinsei Bank

We are Neutral-rated. Our 12-month target price of ¥1,870 is based on a fair P/B of 1.30X and our end-FY3/28E BVPS estimate of ¥1,438. We derive our fair P/B multiple from our normalized FY3/29E ROE estimate of 9.73% and a cost of capital of 8.0%.

Key upside risks include: (1) higher-than-expected growth in the deposit balance and (2) a decline in deposit interest rates. Key downside risks include: (1) intensified competition for deposits, (2) an unexpected decline in synergies with the SBI Group, (3) an unforeseen slowdown in the markets for mortgage loans, corporate lending, and project finance, where SBI Shinsei Bank has been expanding, and (4) risks related to credit costs, funding, interest rates, regulations, and data security.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Regulatory disclosures**Disclosures required by United States laws and regulations**

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; registered market maker. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in

part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Brazil:** Disclosure information in relation to CVM Resolution n. 20 is available at <https://www.gs.com/worldwide/brazil/area/gir/index.html>. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Resolution n. 20, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** This information is being provided to you for information purposes only and is not, and under no circumstances should be construed as, an advertisement, offering or solicitation by Goldman Sachs & Co. LLC for purchasers of securities in Canada to trade in any Canadian security. Goldman Sachs & Co. LLC is not registered as a dealer in any jurisdiction in Canada under applicable Canadian securities laws and generally is not permitted to trade in Canadian securities and may be prohibited from selling certain securities and products in certain jurisdictions in Canada. If you wish to trade in any Canadian securities or other products in Canada please contact Goldman Sachs Canada Inc., an affiliate of The Goldman Sachs Group Inc., or another registered Canadian dealer. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 10th Floor, Ascent-Worli, Sudam Kalu Ahire Marg, Worli, Mumbai-400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. Registration granted by SEBI and certification from NISM in no way guarantee performance of the intermediary or provide any assurance of returns to investors. Goldman Sachs (India) Securities Private Limited compliance officer and investor grievance contact details, a copy of the annual compliance audit report and other relevant information and disclosures can be found at this link: <https://www.goldmansachs.com/worldwide/india/research-analyst>. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom's departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at <https://www.gs.com/disclosures/europeanpolicy.html> which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan Type II Financial Instruments Firms Association, and Investment Management Association of Japan. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

Global product; distributing entities

Goldman Sachs Global Investment Research produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom.

Goldman Sachs International ("GSI"), authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority ("FCA") and the PRA, has approved this research in connection with its distribution in the United Kingdom.

European Economic Area: Goldman Sachs Bank Europe SE ("GSBE") is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research within the European Economic Area.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, make a market or act as liquidity provider in, and buy or sell, any securities, derivatives, or other financial instruments referred to in this research (including any financial instruments issued by the companies referred to herein), unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
