

Nantong Jianghai Capacitor Co. (002484.SZ): 2Q26 results below GSe, limited shipment or customer certification progress despite aggressive

Jianghai released 2Q26 results after the Aug 20 market close, with revenue/gross profit/operating profit/net profit of Rmb1,767mn/435mn/251mn/221mn, +15%/+12%/+11%/+7% yoy, **-6%/-8%/-8%/-14% vs. GSe, below our expectations**. Market is most interested in its AIDC product shipment status and new customer certification progress. **Among aluminum electrolytic capacitor** revenue breakdown, industrial control and UPS revenue was around Rmb579mn in 2Q26 versus Rmb497mn in 2Q25, with limited incremental contribution so far, although company commented on shipping 2mn units in August for AIDC applications (implying revenue of c. Rmb108mn). **For EDLC**, company has already started shipping into AI applications, with cumulative shipments of around 1mn units, while 1H26 AI-related supercapacitor revenue was only around Rmb17mn. We remain cautious despite the improving near-term pricing environment. **For aluminum electrolytic capacitors**, management's 2027 capacity plan implies a very large revenue opportunity, but we do not yet see enough verified customer demand to support full utilization. **EDLC** shipment remains small, capturing likely 13% market share, while **LIC** and **MLPC** remain at relatively early stages of qualification and customer conversion. We reiterate Sell as we believe current stock price has reflected overly optimistic opportunities across aluminum electrolytic capacitors, supercapacitors and MLPC.

Exhibit 2: Current Jianghai share price implies separately 48%/64%/77% market share for aluminum electrolytic capacitors or 41%/55%/66% market share for LIC in AIDC business by applying 40x/30x/25x P/E in 2028E, both above our base case forecast

Source: Company data, Goldman Sachs Global Investment Research

1H26 revenue breakdown:

Aluminum electrolytic capacitors revenue recorded Rmb2,498mn, +12% yoy, with GPM at 27.0%, +0.3pp yoy.

Film capacitors revenue recorded Rmb311mn, +34% yoy, with GPM at 15.2%, +0.8pp yoy.

Supercapacitors revenue recorded Rmb249mn, +54% yoy, with GPM at 19.5%, +2.7pp yoy.

Gross margin trends: 2Q26 GPM declined by 0.8pp yoy and 1.3pp qoq, mainly due to the annual price decline of 3-5% across the company's products and higher raw-material costs. Some price hikes (from 4.5% to 20%) will only be fully implemented during 3Q26, with company possessing strong pricing power under supply shortage conditions. AI-related high-margin products have yet to make a meaningful contribution, and management expects margins to improve sequentially from August onward, where we also forecast a slight recovery into 2H26E, though noting electricity prices could be a modest headwind: Xinjiang electricity prices remain broadly stable at around Rmb0.31/kWh, while the gradual withdrawal of preferential power tariffs for some strategic emerging industries in Inner Mongolia could increase electricity costs by around Rmb0.01-0.02/kWh. Some formation-foil plants in Urumqi and Kuitun were affected by electricity-price and environmental factors in 1H26; Jianghai is exploring measures such as direct green-power procurement, energy-efficiency improvements and tighter supply-chain control to mitigate the impact, while management expects regional electricity tariffs and environmental requirements to gradually converge over

the medium term.

Aluminum electrolytic capacitors: Jianghai's traditional products have an average ASP of Rmb10-12/unit and capacity of around 30mn units per month, or 360mn units per year, implying annual production value of roughly Rmb4.3bn, broadly in line with 2025 revenue, requiring further capacity expansion to drive growth for traditional/non-AI products. **AIDC aluminum electrolytic capacitors:** Around 20% of products are priced at Rmb20-30/unit, 60% at Rmb40-60/unit, with the remainder priced higher. Current capacity is around 2mn units per month, expected to expand to 4mn units per month by end-2026E and 10-12mn units per month by end-2027E. Among aluminum electrolytic capacitor revenue breakdown, industrial control and UPS revenue was around Rmb579mn in 2Q26 versus Rmb497mn in 2Q25, with limited incremental contribution so far. Management indicated around 2mn units of shipments in August (implying revenue of c. Rmb108mn), mainly to Megmeet, and expects further orders from Delta Electronics in September, which we still await to verify. Assuming 80% utilization through year-end, supported by the tight supply dynamics described by management, we factor in c.Rmb480mn of AI-related revenue in 2026E. For 2027E, we assume a 20% market share for Jianghai, broadly in line with management guidance. However, we do not yet see sufficient specific demand drivers to support full utilization of its potential c.Rmb4.5bn capacity.

EDLC: The company has already started shipping into AI applications, with cumulative shipments of around 1mn units, while 1H26 AI-related supercapacitor revenue was around Rmb17mn. Current monthly capacity is around 1mn units, among a total industry demand of c.8.3mn units per month in 2026E (implying c.13% market share), with plans to expand to more than 3mn units per month in 2027.

LIC: Current capacity is around 50k units per month, with a target of more than 100k units per month by end-2026E and 300k units per month by end-2027E. Expansion remains relatively cautious, as most customers are still in testing and qualification and demand has yet to fully convert into firm orders. Company is positive on retrofit demand as a meaningful growth driver, as the old servers that did not include supercapacitors may increasingly add them, which could add a new TAM on top of AI-server shipments, however, we still view the more critical watch point as the company's certification with clients to benefit from the demand tailwinds.

MLPC: MLPC has not yet entered formal mass production for AI servers. The company is conducting technical performance, reliability, and environmental validation, while jointly developing the product with strategic domestic customers. Current total MLPC capacity is around 20mn units per month, of which roughly 5mn units per month could be converted for AI applications through modifications to existing lines. The company plans to continue upgrading existing lines and may build additional capacity depending on validation progress and customer adoption.

Raw materials supply chain may be a constraint, while Jianghai is actively looking for solutions: key upstream materials for aluminum electrolytic capacitors are etched foil and formed foil, where supply appears relatively manageable for Jianghai because more than 90% of high-capacitance foil are internally supplied and the company is expanding upstream material capacity in parallel with capacitor capacity. The raw material for EDLC could be a significant bottleneck, which is high-end activated carbon material, which mgmt described as very tight and Kuraray (3405.T) has reported prices

hike by 30%. LIC is also exposed to carbon-material supply, but uses less carbon material than EDLC. On pricing, company overall expects to be able to pass through any upstream material price hike to customers.

TP/EPS change: We revise down 2026-30E EPS by 0-1%, while our 12-m TP is now at Rmb54.4, still based on 2028E P/E of 30x, discounted to 2027E with a COE of 10.5%.

Investment thesis, valuation methodology and risks

Investment thesis

Jianghai is a top aluminum electrolytic capacitor supplier expanding into film capacitor, supercapacitor, and MLPC products. From a positive standpoint, we note the company's 1) vertical integration of key aluminum electrolytic capacitor manufacturing processes with a c.75% self-sufficiency rate for formed foil (vs. c.30% for Japanese peers), which provides c.18% GPM advantage and closer control of product performance; (2) strong industrial client base in aluminum electrolytic capacitor, which has high entry barriers – with brand recognition the company can leverage into other segments. We expect AIDC-led demand across aluminum electrolytic capacitors, LIC, and MLPC to remain the key earnings driver from 2026E, supported by customer wins, higher per-rack usage, pricing upside, and next-generation power architectures, while EDLC is likely to be a more transitional solution as adoption shifts toward LIC over time. However, after the stock's recent rerating, we believe the current valuation has run ahead of Jianghai's medium-term AIDC potential and already prices in overly aggressive market-share gains across LIC, MLPC, and aluminum electrolytic capacitors, despite still-limited LIC and MLPC customer certification progress and remaining product-quality gaps versus leading peers. We are Sell-rated.

Valuation methodology: Our 12-m TP is Rmb54.4, based on a 30x 2028E P/E discounted back to 2027E with 10.5% CoE.

Upside risks: (1) Faster-than-expected LIC and MLPC customer qualification progress; (2) Higher-than-expected market share gains in LIC, MLPC, and aluminum electrolytic capacitors; (3) Stronger AIDC demand, capacitor content growth, and pricing than our expectations.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

Goldman Sachs International ("GSI"), authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority ("FCA") and the PRA, has approved this research in connection with its distribution in the United Kingdom.

European Economic Area: Goldman Sachs Bank Europe SE ("GSBE") is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research within the European Economic Area.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, make a market or act as liquidity provider in, and buy or sell, any securities, derivatives, or other financial instruments referred to in this research (including any financial instruments issued by the companies referred to herein), unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
