

Everpure Inc

Quantifying the large TAM; Significant profitable growth opportunities ahead

Reiterate Rating: BUY | PO: 150.00 USD | Price: 93.78 USD

Expecting a bullish financial update at investor day

Everpure will host its 2026 Financial Analyst Meeting in Santa Clara, CA on Wed, Sep 23rd. Unlike prior years which have featured technology and product updates, this time we expect a financial update as well with mgmt. addressing both near-term trends, as well as long-term (possibly, 3-year) rev and operating margin outlook. We expect presentations from CEO Giancarlo, CFO Robbiati and from Rob Lee, Chief Technology and Growth officer. The announced win with the 2nd hyperscale customer validates the company's DirectFlash architecture and we see opportunity for further growth. Reiterate Buy rating.

Multiple avenues for rev growth and margin expansion

Our analysis (Fig 1) suggests that the TAM for Everpure is very significant at 259EB split across 195EB for Hyperscalers, 8EB for Neoclouds and 56EB for Enterprise. We see the potential for Everpure to meaningfully exceed street estimates (Fig 6) over the next several years. Our TAM model is available to institutional investors upon request. We also view the potential for significant margin expansion given the positive mix from Hyperscale revenues which we expect will accelerate as the TCO benefits become more apparent when deployed at scale alongside other SSD solutions. We see high incremental margins at hyperscalers where the costs do not scale with the revenue opportunity.

Share gains: SSD during inflation, HDD during deflation

Given the technological differentiation, we view Everpure's solution as attractive relative to SSDs in any environment but especially during inflationary times when there is significant cost pressure. During times of deflation (as NAND pricing starts to come down), we expect some share gains from HDDs as well as the TCO benefit to increase in magnitude on a relative basis.

Opportunity to address investor concerns

Investors have been concerned about the impact to revs & margins from NAND pricing, which should eventually decline after a period of unprecedented growth. The concern is whether volumes will return (possibly given some pent up and deferred demand) and whether lower pricing would then again allow for share gains against SSD/HDD. As commodity costs decline, Everpure could see a period of margin capture as its prices need not come down in tandem. Technology differentiation also affords pricing power.

Company Sector

IT Hardware

Company Description

Pure Storage is a leading vendor in the All-Flash Array market that addresses the larger \$12bn Tier-1 Storage Area Network market as well as the \$6bn NAS market. All-Flash Arrays are disrupting Hard Disk Drives given better performance, better durability, higher reliability, lower power consumption, and a smaller footprint. The company disrupts traditional selling models by allowing customers to use the same hardware for up to ten years, offering free upgrades every 3 years for a service fee.

Investment Rationale

Our Buy rating on Everpure is based on our expectation that the available revenue opportunities for the company are expanding with increased penetration at Hyperscale, and the company has the ability to take share in both inflationary as well as deflationary environments. We see strong growth in subscription ARR, and higher prices and richer mix.

BofA GLOBAL RESEARCH

Price objective basis & risk

Everpure Inc (P)

Our PO of \$150 is based on 37x EV/C28 FCF. In our view this multiple is appropriate for a company growing earnings at over 30% CAGR. In our view, this multiple factors in long-term upside from increased use of NAND flash in datacenters, and balances that against increased risk to margins from higher component costs, from potentially different hyperscale contract structures, and from investments in OpEx needed to support growth in the Enterprise segment.

Upside risks to our PO are higher than expected revenue from hyperscale customers, lower than expected margin drag from component cost increases, mix shift to more revenues from Pure's storage-as-a-service offering Evergreen//One, unexpected share gains from components, and unanticipated large M&A which can drive revenue growth faster than expected.

Downside risks to our PO are an extended economic slowdown, rising costs, competition from well-established vendors that control vast distribution networks and have the ability to deeply discount products for certain customers, competition from private companies, enterprise movement to the public cloud, execution-related issues due to the high-growth nature of the company, and erosion of its competitive advantage in operating software over time.

Equity Investment Rating Distribution: Global Group (as of 30 Jun 2026)

Coverage Universe	Count	Percent	Inv. Banking Relationships ^{R1}	Count	Percent
Buy	1987	56.11%	Buy	1190	59.89%
Hold	797	22.51%	Hold	496	62.23%
Sell	757	21.38%	Sell	391	51.65%

^{R1} Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. **VOLATILITY RISK RATINGS**, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. **INVESTMENT RATINGS** reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster ^{R2}
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

^{R2} Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. **Coverage Cluster** is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

All opinions, projections and estimates constitute the judgment of the author as of the date of publication and are subject to change without notice. Prices also are subject to change without notice. BofA Securities is under no obligation to update this information and BofA Securities ability to publish information on the subject issuer(s) in the future is subject to applicable quiet periods. You should therefore assume that BofA Securities will not update any fact, circumstance or opinion contained herein.

Subject to the quiet period applicable under laws of the various jurisdictions in which we distribute research reports and other legal and BofA Securities policy-related restrictions on the publication of research reports, fundamental equity reports are produced on a regular basis as necessary to keep the investment recommendation current.

Certain outstanding reports or investment opinions relating to securities, financial instruments and/or issuers may no longer be current. Always refer to the most recent research report relating to an issuer prior to making an investment decision.

In some cases, an issuer may be classified as Restricted or may be Under Review or Extended Review. In each case, investors should consider any investment opinion relating to such issuer (or its security and/or financial instruments) to be suspended or withdrawn and should not rely on the analyses and investment opinion(s) pertaining to such issuer (or its securities and/or financial instruments) nor should the analyses or opinion(s) be considered a solicitation of any kind. Sales persons and financial advisors affiliated with BofAS or any of its affiliates may not solicit purchases of securities or financial instruments that are Restricted or Under Review and may only solicit securities under Extended Review in accordance with firm policies.

Neither BofA Securities nor any officer or employee of BofA Securities accepts any liability whatsoever for any direct, indirect or consequential damages or losses arising from any use of this information.
