

GLOBAL STRATEGY VIEWS

Competition for Capital

1. There are two themes dominating our investor conversations: the impact of AI and the rise in interest rates. The two issues are linked as demand for capital from both the private and public sectors increase. In the private sector a surge in capex spending to fund AI infrastructure has eaten into free cash flow and forced companies to raise more in debt and equity markets. Meanwhile, government borrowing needs have increased as priorities shift towards upgrading critical infrastructure, energy security and defense at a time when cyclical inflationary pressures driven by higher energy prices are also resulting in higher policy rates. The combination has pushed up the cost of capital. As recently as 2022, for example, 30-year bond yields in Germany and Japan were close to zero ([Exhibit 1](#)). A rise in yields, together with more uncertainty (over geopolitics and the future impact of AI) have, in combination, pushed up the cost of capital.

Exhibit 1: Rising yields and uncertainty have increased the cost of capital
30-year government bond benchmark yields (%)

Source: Datastream, Goldman Sachs Global Investment Research

2. This rise in yields comes after a near-record period of equity outperformance relative to bonds over 10-year holding periods ([Exhibit 2](#)).

Investors should consider this report as only a single factor in making their investment decision. For Reg AC certification and other important disclosures, see the Disclosure Appendix, or go to www.gs.com/research/hedge.html.

Exhibit 2: Equities have enjoyed a near record period of outperformance relative to bonds

10-year rolling annualised equity vs. bond performance (ex post equity risk premia)

Source: Robert Shiller, Datastream, Haver Analytics, Goldman Sachs Global Investment Research

As equities have continued to outperform bonds, equity risk premia have fallen back to levels last seen in the late 1990s, leaving equity markets more vulnerable to further increases in bond yields. That said, in the US and Japan, the ERP has bounced off recent lows ([Exhibit 3](#)).

Exhibit 3: Equities have re-rated versus bonds amid higher inflation

Global market implied ERP (%)

Source: Goldman Sachs Global Investment Research

3. The impact of rising bond yields, however, depends not only on the level of yields, but also on the reasons as well as the speed of the adjustment ([Exhibit 4](#)). It is the speed issue that has caused the biggest impact in the recent past. As our US strategists note, stocks have usually generated positive returns alongside rising interest rates unless the pace of rising rates exceeded 2+ standard deviations and this is a pattern that is broadly

reflected in other regions too. Today, a 2-standard deviation move in 10-year Treasury yields would equate to about 50bps over a month or 30bps over two weeks, similar to the adjustments in recent days which explains the pullback in equity prices.

Exhibit 4: A continued sharp increase in bond yields could put pressure on equities

Data since 1962

Source: Datastream, Goldman Sachs Global Investment Research

4. But despite the rise in yields, nominal GDP and profit growth remain strong and, until recently, the impact of rising bond yields has been offset by the strength in corporate profits. Earnings growth has been the main driver of equity returns over the past 18 months in all regions ([Exhibit 5](#)). This strength has meant that PE multiples have either been flat (Japan and Europe) or have fallen (the US, Asia and EM).

Exhibit 5: Earnings have driven most of the returns since 2025

Total return contribution since Jan-2025 (local CCY)

Source: Datastream, STOXX, Goldman Sachs Global Investment Research

In the US, in particular, the forward PE multiple for the S&P has come down from 22x at

the start of the year to 19x, in line with its long-run average, despite the market being close to its all-time high.

5. While US equities have driven the bulk of equity outperformance for much of the fifteen years post the financial crisis, the improvement in earnings across regions, and the sharper de-rating in the US, has resulted in equity performance being broader-based by geography. Since 2025, the US equity market has been the weakest of the major regions ([Exhibit 6](#)), a turnaround from the dominant trend since the financial crisis and increasing investor returns from a more geographically diversified portfolio.

Exhibit 6: US equities have underperformed other major regions since 2025

Indexed price performance (USD)

Source: Datastream, STOXX, Goldman Sachs Global Investment Research

6. Supportive profit growth has been accompanied by positive earnings revisions, with 2026 and 2027 estimates moving higher across major regions. There are four broad areas which have been driving much of this profit growth. First, technology earnings continue to be very robust. Second, rising energy prices have pushed up profits in the commodity sector. Third, banks have generally enjoyed strong earnings backed by positive nominal GDP growth, steep yield curves and strong private sector balance sheets. Finally, sectors such as Industrials have benefited from the surge in AI capex spending which has spilled over into improved revenues for the 'pick and shovels' of AI infrastructure. The breadth of the earnings' growth has also increased the opportunity for investors to diversify across sectors as well as countries.

Exhibit 7: Earnings revisions have unusually been positive

Consensus estimates in USD. MSCI AC World EPS

Source: Datastream, Goldman Sachs Global Investment Research

7. While technology profit growth has remained strong, the surge in capex spending among the hyperscalers has increasingly eaten through their free cash flow (Exhibit 8) prompting companies to look for alternative sources of funding, in the credit and equity markets. The capex spending growth for AA-rated issuers has been substantial: the 65% year-over-year growth in Q2 marks the 10th consecutive quarter that aggregate AA capex growth exceeds 35%. They have also turned to the convertible bond market where volume has also increased year to date reaching \$135 billion in the US, with AI-related borrowers driving 44% of total issuance, on our estimates.

Our Credit team raised their full-year US IG gross issuance forecast by \$200bn to \$2.3 trillion and AI-related issuers account for a quarter of USD IG gross supply this year, pushing overall supply to a year-to-date record.

Exhibit 8: CAPEX is concentrated in few companies

Hyperscaler capex as % of cash flow from operations, dashed line representing 2026 consensus

Source: Compustat, FactSet, Goldman Sachs Global Investment Research

The combination of higher cost of capital and greater capital intensity in the tech sector has reduced the value of their future cash flows and triggered a de-rating in the biggest companies. The dominant capex hyperscalers in the US now have a forward PE close to the average of the rest of the market.

Exhibit 9: Large-cap valuations are less demanding than perceived

S&P 500 12m forward P/E multiple

Source: Datastream, Goldman Sachs Global Investment Research

8. Software companies have also de-rated on the back of fears of disruption from AI while memory and chips stocks have also experienced lower multiples as their earnings

surge. Globally technology has seen its PE ratio moderate, falling below its 20-year median ([Exhibit 10](#)). Meanwhile, the spending of these companies has spilled over into better earnings and more visible cash flows in many other parts of the economy. Healthcare, Consumer Discretionary and Industrials are all more expensive in absolute terms than IT, and Industrials has re-rated and now has a PE close to the 90th percentile of its 20-year range.

Exhibit 10: Industrials now trade at higher valuations than Technology

MSCI World sector/style valuations, 12-month forward P/E's relative to the last 20 years

Source: FactSet, Datastream, Goldman Sachs Global Investment Research

9. For these reasons, we have argued that Technology equities have not experienced a classic bubble because valuation levels are much lower than in previous financial bubbles. Nevertheless, the risk for investors is less about valuation and more whether there is an unsustainable earnings bubble. Bubbles in earnings, rather than valuations, have occurred in previous periods. The Bank sector, for example, briefly became the biggest sector in the S&P 500 in the run up to the financial crisis of 2008/09 ([Exhibit 11](#)). Unlike the technology bubble of the late 1990s, or the Japanese bubble of the late 1980s, Bank stocks did not experience a major valuation bubble at the time, but the surge in earnings that drove the sector's outperformance proved to be unsustainable.

Exhibit 11: Banks peaked again on earnings momentum

MSCI World Banks

Source: Datastream, Goldman Sachs Global Investment Research

There are, however, important differences to the Tech sector today. The earnings of the banks were boosted by sharply rising leverage and the asset that they were financing – US real estate – did experience a valuation bubble. When the housing market collapsed, pushing economies into recession, it triggered a sharp fall in underlying earnings for the banking sector. There are important differences today. First, technology profits remain very robust, and balance sheets are strong overall. Second, interest coverage ratios for the aggregate S&P 500 and its median stock, for example, rank in the 99th and 68th percentiles relative to the past 20 years. Third, demand for compute is accelerating and outstripping supply; Microsoft recently declared their intent to triple data centre capacity in 6 years. The bottlenecks are increasingly power, land and data centre capacity rather than a lack of compute demand. At our annual [Communacopia Technology Conference](#), Nvidia reiterated its 2030 AI TAM outlook to \$3tn-\$4tn and supply constraints continue to be broad based. Nonetheless, any slowdown in profit growth, in an environment of a much higher cost of capital, could put downward pressure on equity prices, reducing confidence in future cash flows across the ecosystem from the hyperscalers to the ‘pick and shovels’ that have been benefiting from the capex boom.

10. Given the near-term risks in bond markets, we remain neutral on equities, alongside other asset classes on a 3-month horizon, but continue to be overweight equities over 12 months. While profit growth is likely to slow from the recent strong pace, ongoing growth in nominal GDP should underpin equity markets and the earnings cycle propelling equity returns even without any valuation expansion from current levels and our economists continue to see a low risk of recession. As our asset allocation team has shown, earnings growth and ROE are likely to continue to be the key drivers of equity performance relative to bonds, and we expect these fundamentals to remain supportive for equity returns. Nevertheless, we continue to recommend well diversified equity exposure as opportunities continue to broaden across geographies, sectors and factors.

Stock correlations are at multi-year lows across the major equity markets ([Exhibit 12](#)).

Exhibit 12: Pairwise correlation is low across regions

6-month average pairwise correlation

Source: Bloomberg, Goldman Sachs Global Investment Research

Even within sectors like technology, correlations have fallen sharply ([Exhibit 13](#)). The ‘magnificent seven’ that was long seen as a homogeneous group of technology winners has also seen significant dispersion of returns. Differentiation, diversification and alpha generation are likely to remain the key drivers of equity returns. With higher bond yields, valuations are not likely to rise making earnings the critical driver of returns for investors.

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; registered market maker. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Brazil:** Disclosure information in relation to CVM Resolution n. 20 is available at <https://www.gs.com/worldwide/brazil/area/gir/index.html>. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Resolution n. 20, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** This information is being provided to you for information purposes only and is not, and under no circumstances should be construed as, an advertisement, offering or solicitation by Goldman Sachs & Co. LLC for purchasers of securities in Canada to trade in any Canadian security. Goldman Sachs & Co. LLC is not registered as a dealer in any jurisdiction in Canada under applicable Canadian securities laws and generally is not permitted to trade in Canadian securities and may be prohibited from selling certain securities and products in certain jurisdictions in Canada. If you wish to trade in any Canadian securities or other products in Canada please contact Goldman Sachs Canada Inc., an affiliate of The Goldman Sachs Group Inc., or another registered Canadian dealer. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 10th Floor, Ascent-Worli, Sudam Kalu Ahire Marg, Worli, Mumbai-400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. Registration granted by SEBI and certification from NISM in no way guarantee performance of the intermediary or provide any assurance of returns to investors. Goldman Sachs (India) Securities Private Limited compliance officer and investor grievance contact details, a copy of the annual compliance audit report and other relevant information and disclosures can be found at this link: <https://www.goldmansachs.com/worldwide/india/research-analyst>. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of

New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for “wholesale clients” (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom's departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at <https://www.gs.com/disclosures/europeanpolicy.html> which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan Type II Financial Instruments Firms Association, and Investment Management Association of Japan. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Global product; distributing entities

Goldman Sachs Global Investment Research produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. This research is disseminated in Australia by Goldman Sachs Australia Pty Ltd (ABN 21 006 797 897); in Brazil by Goldman Sachs do Brasil Corretora de Títulos e Valores Mobiliários S.A.; Public Communication Channel Goldman Sachs Brazil: 0800 727 5764 and / or contatogoldmanbrasil@gs.com. Available Weekdays (except holidays), from 9am to 6pm. Canal de Comunicação com o Público Goldman Sachs Brasil: 0800 727 5764 e/ou contatogoldmanbrasil@gs.com. Horário de funcionamento: segunda-feira à sexta-feira (exceto feriados), das 9h às 18h; in Canada by Goldman Sachs & Co. LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom.

Goldman Sachs International (“GSI”), authorised by the Prudential Regulation Authority (“PRA”) and regulated by the Financial Conduct Authority (“FCA”) and the PRA, has approved this research in connection with its distribution in the United Kingdom.

European Economic Area: Goldman Sachs Bank Europe SE (“GSBE”) is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research within the European Economic Area.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, make a market or act as liquidity provider in, and buy or sell, any securities, derivatives, or other financial instruments referred to in this research (including any financial instruments issued by the companies referred to herein), unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is focused on investment themes across markets, industries and sectors. It does not attempt to distinguish between the prospects or performance of, or provide analysis of, individual companies within any industry or sector we describe.

Any trading recommendation in this research relating to an equity or credit security or securities within an industry or sector is reflective of the investment theme being discussed and is not a recommendation of any such security in isolation.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal.

It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
